Mr. FLOOD. Mr. Chairman, the usually correct gentleman from Wisconsin [Mr. STAFFORD] is a little bit mistaken as to the history of this commission. It has been in existence a good while. It was brought into existence by reason of a treaty between this country and the Republic of Mexico. The first commissioner we had—and we had him for a long, long time—was an Army officer, Gen. Anson Mills, a most efficient man. He drew no salary from this appropriation. He was a retired Army officer and got the salary of a retired Army officer and rendered this service without getting any additional salary from the Government. Our distinguished ex-colleague, Mr. Gaines, was the secretary of this commission. There were two commissions then. He was the water commissioner and the secretary to the boundary commission under the treaty. Mr. Gaines did not resign because there was no work to do. An unfortunate circumstance occurred in reference to an estimate sent to Congress in reference to Mr. Gaines's salary, which irritated him, and for that reason he resigned, because he did not think the State Department had remedied that mistake quickly enough. Mr. Gaines had proposed to do extensive work, which did not meet with the approval of the Committee on Foreign Affairs. Recently Judge Hill has been appointed commissioner, and his corps of assistants has been filled, and he has been engaged in this work for the last year. During the time that Mr. Gaines was the secretary and the acting commissioner Mexico had no commission. Conditions have improved in Mexico since that time and she now has a commissioner, and that commissioner and our commissioner are at work trying to settle the boundary questions between this country and Mexico, so as to avoid in the future any international complications between these two countries. Judge Hill recommended the survey of the Rio Grande and the Colorado Rivers, with a view of finding a basis for a change in the treaty between these two countries. The boundary line is constantly shifting.

Mr. SLAYDEN. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. SLAYDEN. Which Colorado was that? The Colorado of the West?

Mr. FLOOD. Yes.

Mr. SLAYDEN. Not the Colorado in Texas?

Mr. FLOOD. No.

Mr. SLAYDEN. The Colorado of the West runs into the Gulf of Mexico and is an international stream.

Mr. FLOOD. A part of the boundary line.

Mr. SLAYDEN. Yes; and the other is not.

Mr. FLOOD. No. I understood from what I gathered in the hearings that Judge Hill wanted to make a proposition by which a fixed boundary could be established instead of a varying boundary which varies with the shifting of the Rio Grande River, and for that reason he asked for $91,000. The committee cut that down to $47,500, as the committee thought that amount would enable them to do the work on the Rio Grande and postpone the work on the Colorado for the present, settle the question of these bancos in the present existing stream, and enable Judge Hill to make a report that the State Department could use as a basis for a new treaty. Twenty-two thousand five hundred dollars, which the gentleman has suggested, would keep this commission alive and pay the salaries, but it would not enable the commission to do the work essential to settle controverted matters between this country and Mexico and avoid international disputes in the future and lay a basis for a most sensible settlement of the question. I hope, therefore, that the gentleman will withdraw his amendment, or, failing that, that the amendment will be voted down and that we will give this commission a chance to make the investigations in the Rio Grande River and make a report to Congress at the next session, and at any rate enable the commission to keep down any irritating questions between this country and Mexico. We are not in position to encourage irritation with any of our neighbors or any other foreign nation.

Mr. SLAYDEN. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. SLAYDEN. Mr. Chairman, I would like to ask the chairman of the committee if Mexico now has a commissioner on the ground?

Mr. FLOOD. It has; fully equipped.

Mr. SLAYDEN. Ready to cooperate with our commission in the work that is laid upon them?

Mr. FLOOD. Yes; it has a fully equipped commissioner and assistants.

Mr. KEARNS. Mr. Chairman, I move to strike out the last word. The gentleman from Indiana [Mr. Cox] made a very astounding statement just a few moments ago. He was discussing the delay in the delivery of our mails in France, and he

assigned as one of the chief causes the fact that we did not have a sufficient number of mail clerks in France to do this work. He said that up until some three weeks ago we had only about 40 clerks assigned to this duty, that the Government had made provision in the last three weeks to send over 26 more men, provided it could get the transportation facilities to send those 26 abroad. He said that the Government was experiencing difficulty in getting these men at this particular port in France which our mails all pass through. It seems to me that if the Government of the United States is experiencing a great difficulty in transporting 26 men to France, it is going to find it is more than a man's job to get a million men in the fighting line over there. If this statement of the gentleman from Indiana is true, or is based upon fact, I believe that the Senator from Oregon the other day ought to have gone a step further and said that not only had the War Department fallen down, but the Shipping Board and also the Navy had fallen down. I can not understand why it should be found to be a difficult matter to get 26 men to France, when the War Department is boasting of the fact that it is going to have a million and a half men in France by midsummer. If the gentleman's statement is true, I believe the people of the United States are justified in the belief that somebody connected with the War Department is indulging in a species of camouflage. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

BOUNDARY LINE, ALASKA AND CANADA, AND THE UNITED STATES AND CANADA.

To enable the Secretary of State to mark the boundary and make the surveys incidental thereto between the Territory of Alaska and the Dominion of Canada, in conformity with the award of the Alaskan Boundary Tribunal and existing treaties, including employment at the seat of government of such surveyors, computers, draftsmen, and clerks as are necessary; and for the more effective demarcation and mapping, pursuant to the treaty of April 11, 1908, between the United States and Great Britain, of the land and water boundary line between the United States and the Dominion of Canada, as established under existing treaties, to be expended under the direction of the Secretary of State, including the salaries of the commissioner and the necessary engineers, surveyors, draftsmen, computers, and clerks in the field and at the seat of government, rental of offices at Washington, D. C., expense of printing and necessary traveling, for payment for timber necessarily cut in determining the boundary line not to exceed $500, and commutation to members of the field force while on field duty or actual expenses not exceeding $3.50 per day each, to be expended in accordance with regulations from time to time prescribed by the Secretary of State, $60,000, together with the unexpended balances of previous appropriations for these objects: *Provided*, That hereafter advances of money under the appropriation "Boundary line, Alaska and Canada, and the United States and Canada," may be made to the commissioner on the part of the United States and by his authority to chiefs of parties, who shall give bond under such rules and regulations and in such sum as the Secretary of State may direct, and accounts arising under advances shall be rendered through and by the commissioner on the part of the United States to the Treasury Department as under advances heretofore made to chiefs of parties: *Provided*, That when the commissioner is absent from Washington on official business he shall be allowed actual and necessary expenses of subsistence, not in excess of $8 per day.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph. I notice two changes in existing law—one limiting the amount of daily expenses for subsistence of the commissioner to $8 a day, and increasing the per diem allowance to the field force from $2.50 to $3.50 per day. What is the purpose of the proviso as to the amount that may be expended by the commissioner when outside of the District on official business to $8 a day, which is in the nature of a limitation? Has the evidence disclosed that there has been a larger amount expended in the past, or at present is the amount lower than that of $8?

Mr. FLOOD. The amount is lower. The amount is $4 a day.

Mr. STAFFORD. What is the reason for allowing him $8 a day when in other branches of the service we only allow for subsistence, while traveling in the United States, $4 per day. We are met by the Secretary of Commerce in making claims on behalf of commercial attachés, commercial agents, to increase the per diem allowance for subsistence while absent from the country, and the committee has not so far acted favorably; in fact, the Secretary of Commerce has recently requested that the per diem allowance of our commercial attaché at Buenos Aires, the most expensive capital in the world, be increased to $7 per day, and here we are asked that this commissioner be allowed $8 per day.

Mr. FLOOD. Well, the reason for that is this: He is a commissioner of the United States, and goes up to these meetings where he meets the commissioner of Canada. He has to stop at a decent hotel, which the gentleman well knows he could not stop at on $4 a day, and he made the statement to the committee that during last year his expenses were $8 a day; that he could not hold them below $8, and he got reimbursed $4, and the committee thought it was fair to pay his expenses. The committee was impressed with the business ability and desire for economy on the part of this commissioner and the splendid work he had been doing, and they thought he ought to have a sum that would cover his actual expenses.

Mr. MILLER of Minnesota. Mr. Chairman, if the gentleman will permit, as I happen to be very familiar with the gentleman and the work of the commission, as it is nearly all performed on the boundary line between Minnesota and Canada, I sincerely trust that the gentleman will not insist on his point of order. The $4-a-day limitation heretofore is insufficient to pay a man's subsistence. This commissioner is frequently compelled to go to Canada, often to the capital, to consult with the commissioner from Canada. It is a matter of common knowledge that you can not even obtain a room at a hotel for $4 a day.

Mr. STAFFORD. Oh, Mr. Chairman, I will have to take issue with that statement. I happened to be a member, back in 1908, of a nonofficial commission that visited Canada, a commission to investigate the question of pulp and paper supply, and we stopped at the King Edward Hotel in Toronto, and the rates were only $3 a day.

Mr. FLOOD. Conditions have changed since then.

Mr. STAFFORD. Mr. Chairman, I hear that all around that conditions have changed and yet outside of Washington the hotel proprietors in Detroit, in Chicago, in my home city, in New York, are not charging more than they did prior to the war or during the war. In this city it is true visitors are held up in an outrageous fashion. The persons who visit here are held up to the very highest point the service will bear. A man reaches here at 11 or 12 o'clock midnight and they increase their rates up to as high as $5 and $6 for lodging, whereas the published rates were $1.50 for a room. It is an outrageous condition.

Mr. MILLER of Minnesota. Just a moment, if the gentleman will permit me to finish my statement. I know he wants to be fair. I would like to indorse all he has said about the hotel charges here in Washington. It has ceased to be keeping a hotel and it has come to be legalized highway robbery.

The Congress compels people over this country to come to Washington to transact public business and they of necessity are compelled to stop at hotels and there they are just simply robbed. There is no relationship of any kind whatever between the accommodations furnished and the charges made. In fact, I advise my friends who come here when they go to one of the three or four leading hotels that they bring enough money to buy the hotel, then stay the three or four days and sell. Their loss will not be greater than the sum they would have been compelled to pay had they stayed there and paid the ordinary charges. It is a crime. Conscience ended when the Washington hotel proprietor came into being. There ought to be a new crime designated to cover this offense and a law should be passed to punish such robbery. There ought to be a penalty placed upon such a practice. Now, then, having those conditions in mind, I would like to have the gentleman really reflect that 1908 is not 1918——

Mr. STAFFORD. Oh, Mr. Chairman——

Mr. MILLER of Minnesota. Let me finish this sentence. I was up to this point indorsing what the gentleman said. Hotel rates in Canada are double what they were; for instance, not room rent is doubled but it is very much advanced, probably 50 per cent, but café rates, meals, are more than doubled, and any man who leaves this country to go up to Ottawa, Toronto, or Montreal, wherever the commission happens to meet—it does not meet very often, and the amount involved is ridiculously small; it is only a few dollars a year, very few—is compelled to meet these increased prices.

Mr. FLOOD. I will say to the gentleman here that in the last fiscal year this commissioner was out of Washington 25 days, and the expense of that, charged to the Government, was $100. During the coming fiscal year he expects to have more conferences, owing to some additional work, and he estimates he will be out of the city on this mission about 60 days.

Mr. STAFFORD. The gentleman must recognize the danger of precedents. We are besieged in the Committee on Appropriations to increase the per diem allowance all the way from $4 to $8 a day. If we allow it to be established here——

Mr. FLOOD. Suppose we make it $6.

Mr. STAFFORD. I do not wish to appear parsimonious, and if the gentleman wishes to make it $6 I have no objection, although I think it should be lower.

Mr. MILLER of Minnesota. We ought to give him enough to pay his honest expenses. He can not live on $6 while traveling in this country or Canada, or in any other place, and I will defy

the gentleman from Wisconsin to ride on a train from here to Chicago or Milwaukee, and come back, and show that he lived on $6 a day. He can not do it and he knows he can not.

Mr. STAFFORD. The gentleman has challenged me to cite an instance. You can get a room in the city of Detroit, and I will take that as an example, in the Hotel Statler, as good a hotel as the gentleman from Minnesota or myself would wish to stop at, and certainly this commissioner would wish to patronize, with bath, at $2.50 a day. This gentleman not only gets his allowance for subsistence but he gets his allowance also for traveling expenses. I would not be so insistent on questioning this amount were it not that if we adopted it here we would have to adopt it in other activities of the Government. And this Congress is not ready to adopt a per diem allowance to its officials, no matter how high an estate they fill, of $8 a day.

Here is the Secretary of Commerce. He is now acting as one of the commissioners in determining the fisheries dispute between Canada and the United States. He is allowed only $5 a day. True, his expenses are much more, and he has to pay them out of his pocket. Those are conditions which may have to befall some of our officials, because we have to adopt a standard for all. It may be hard upon some, but we can not make fish of one and fowl of another. We will have to have some general rule, and to increase the allowance to our officials from $4 to $8 a day is a jump that I do not think this Congress is ready to take.

Mr. MILLER of Minnesota. If the gentleman has completed, I would like to end the sentence I started and let us have this finished. The gentleman can not travel in the United States on $6 a day, and I know it and he knows it, and stop at the Hotel Statler or any other decent hotel in the United States. This man is required to go to Canada on a foreign service. He is not traveling inside the United States. I suppose it would be comportable with the gentleman's idea that this commissioner, representing the United States, should go to Canada, go to some commercial club, and ask to be directed to the cheapest room in town and say, "My country is so poor and so miserable, and thinks so little of having the boundary line properly placed, I have got to hunt the cheapest room in town; and please show me where I can eat at a dairy lunch." I do not know whether that represents the ideas of the gentleman or not, but it would appear so from what he says. I think this man who goes only occasionally as a commissioner, representing the United States in a foreign country, ought to be permitted to spend at least $8 a day, when the Canadians, who have an entire country less in population and wealth than the Empire State alone, give their man very much more than $8 a day for his subsistence—very much more.

Mr. HARRISON of Mississippi. Will the gentleman yield for a suggestion there?

Mr. MILLER of Minnesota. Certainly.

Mr. HARRISON of Mississippi. This bill carries for the court of China an appropriation of $10 a day for a judge, and I understand that under the law all Federal district judges now get $10 a day for expenses.

Mr. MILLER of Minnesota. That is correct.

Mr. STAFFORD. Will the gentleman allow me to correct his impression?

Mr. HARRISON of Mississippi. I will.

Mr. STAFFORD. While the law places a maximum amount of $10 a day, nevertheless in the administration of that law the judges return in many instances much less for expenses.

Mr. MILLER of Minnesota. Ten dollars is the limit.

Mr. HARRISON of Mississippi. This commission here gets as much as $10 a day.

Mr. SMITH of New York. This item says "not in excess of $8 a day."

Mr. MILLER of Minnesota. Let me add one thing further.

This country has had commissions of all kinds representing it on a great variety of international questions. I do not want to reflect on the good work anybody else has done, but I leave it to the Members of this House who know if he has not done the best job for less money than has been done for Uncle Sam by any commissioner on a matter of this kind. He has performed a splendid service, has reduced his requests, almost cut them in two—about half this year of what they were before—and the job is just about done. For efficiency, industry, and all-around capacity he practically stands unique among the men who have been called to deal with foreign countries in behalf of the United States in matters of this kind.

Mr. WALSH. Who is this man?

Mr. MILLER of Minnesota. He is Mr. Barnard, a member of the Coast and Geodetic Survey, who was selected from that important body because of his high scientific and professional qualifications.

Mr. STAFFORD. I have nothing to withdraw after having made my statement. I would not object to this one person, except for the fear of a precedent, and I do not intend to have it established as a precedent for the reasons stated.

Mr. FLOOD. Does the gentleman make the point of order?

Mr. STAFFORD. I do.

Mr. HARRISON of Mississippi. Mr. Chairman, I want to argue the point of order. This is only a limitation on the amount appropriated here and is not subject to a point of order. It is true that in the past we have carried under this proviso only $4 a day for actual expenses, but that is merely a limitation on the amount appropriated, and I submit that it is not subject to a point of order. We limit the amount that can be actually expended for this particular work. I have not the general law here, although I tried to find it, but I do not think it is stipulated that it can not be more than $4 a day.

Mr. STAFFORD. Mr. Chairman, I am quite surprised and other members of the committee will be surprised that the distinguished member of the Foreign Affairs Committee should be so mistaken, and that he should say to the House that there has been carried in this item a proviso limiting the amount at $4 a day. If he will examine last year's appropriation bill he will find that there is no such proviso connected with this item, but if he will examine the general law he will find that there is a limitation placing the amount at $4 a day, carried in one of our appropriation acts, for subsistence where not otherwise provided by existing law.

Mr. HARRISON of Mississippi. I was looking for that statute. Has the gentleman got it at hand?

Mr. STAFFORD. I can easily get it from the Committee on Appropriations. We placed that limit on an appropriation bill some years ago to prevent the practice of allowing officials an unlimited amount in the way of expenses for subsistence.

Mr. FLOOD. I suggest to the gentleman that he withdraw his point of order, and I will offer an amendment making it $6 a day.

Mr. STAFFORD. I wish to be reasonable. I have no objection to that.

Mr. MILLER of Minnesota. I hope the chairman of the committee will not do that. Let us have this settled. If the gentleman wants to exercise his right—and any one man can do it—under the facts and circumstances that are plain and apparent, let him do it. I am willing to pass the hat around and take up enough to give this man a chance to live respectably in Canada.

The CHAIRMAN. Does the gentleman withdraw his point of order?

Mr. STAFFORD. I made the point of order.

Mr. FLOOD. I was going to move to substitute "six" for "eight."

Mr. HARRISON of Mississippi. I want to know if the gentleman from Wisconsin has withdrawn his point of order?

The CHAIRMAN. That is what the Chair is trying to ascertain.

Mr. STAFFORD. Is it the desire of the gentleman from Virginia to insert $6 and have that amount accepted by the committee?

Mr. FLOOD. Yes.

Mr. STAFFORD. Then I withdraw the point of order.

The CHAIRMAN. Does the gentleman withdraw his point of order?

Mr. STAFFORD. I withdraw it under that condition.

The CHAIRMAN. The gentleman from Virginia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 12, line 18, strike out "$8" and insert in lieu thereof "$6."

Mr. MILLER of Minnesota. Mr. Chairman, do I understand the committee is really bound by this arrangement? Would it be considered a breach of faith if the committee should vote down this amendment and it should be left at $8? If the committee votes down the motion just made by the gentleman from Virginia, the point of order having been withdrawn, then, as I understand it, this gentleman will be able to travel to Canada and put up at a decent hotel and the amount will not be in excess of $8 a day.

Mr. LENROOT. In view of what has occurred, does not the gentleman think that if any member of the committee was opposed to this amendment he should have spoken before the gentleman from Wisconsin withdrew his point of order?

Mr. FLOOD. I should think so.

Mr. MILLER of Minnesota. I so stated, and asked the chairman of the committee not to consent to any such arrangement

and not to move to make it any lower. The reason I inquired was to find out if it would be considered a breach of good faith to vote down the amendment.

Mr. FLOOD. I hope the gentleman will let the $6 amendment be adopted. I think we will better serve the purpose we have in view in that way.

The CHAIRMAN. The question is on the amendment of the gentleman from Virginia, reducing the amount to $6.

The amendment was agreed to.

The Clerk read as follows:

For salary of one member of the permanent committee of the International Institute of Agriculture for the calendar year 1919, $3,500.

Mr. BLACK. Mr. Chairman, I move to strike out the last word for the purpose of speaking briefly of the work of the American representative at the International Institute of Agriculture at Rome, Italy. As most of us know, the American representative to this institute is Mr. David Lubin. In my opinion Mr. Lubin is one of the most eminent authorities on agricultural subjects, particularly on the marketing of agricultural products, in the world. A year or two ago Mr. Lubin appeared before our Committee on the Post Office and Post Roads and made a very illuminating statement and argument with reference to the marketing of agricultural products, the fundamental idea of his proposition being to place the consumer in our larger centers of population in communication with the producer out in the country. I hope the Members of the House when they have the opportunity to do so will take the time to study some of these observations that have been gathered by him in his experience and study in European countries. Recently Mr. Lubin sent to this country an urgent report upon the food situation as it affects the nations now engaged in the great war, and during my time I am going to ask the Clerk to read this statement of Mr. Lubin.

The CHAIRMAN. Without objection, the Clerk will read.

The Clerk read as follows:

FOOD FROM UNITED STATES VITAL TO ALLIES, IS WARNING—EUROPE'S CROPS MAY BE WORSE THAN LAST YEAR, DAVID LUBIN REPORTS—MAY CALL OUR WOMEN.

ROME, *January 22.*

"Food is the most important matter now before the allies," David Lubin, American representative in the International Institute of Agriculture, said to-day. "It is useless to deceive ourselves.

"It is necessary to feed our armies well, and in view of the increasing consumption of food and decreasing production we shall be unable to do this unless exceptional weather prevails this spring and unless extraordinary measures are applied.

"I am reporting to the State Department, and also to Congress, that Europe's crops may be worse than last year's, and that the mobilization of women of the United States for farm work may be necessary. We should also consider plans for devoting land in the 11 arid States to grazing purposes, so that the United States will be able to supply cattle for replenishment of the diminishing stocks.

"Our allies are depending upon the United States. Without its help they would reach a condition similar to that in Germany and Austria, in which there is merely food enough for the armies, with the civil population dying off."

Mr. BLACK. Mr. Chairman, does any Member of the House doubt the importance of the situation as outlined by Mr. Lubin in his statement? It is a matter of serious concern that the American people as a whole shall be thoroughly awake to the conditions as they exist. Our allies, who for nearly four long years have beat back with their treasure and their blood the most heartless and cruel military despotism that ever disgraced the annals of human history, must not be neglected in the hour of their mortal peril, and it is inconceivable to me that the people of the United States will fail to do their duty in this supreme hour. Will the American farmer do his duty? He will. But I doubt if it will be possible to speed up production in the United States of agricultural products very much, if any, in 1918 over that of 1917. There are many obstacles in the way, such as shortage of farm labor, high price of seed, unusual droughts, and so forth. But there is one thing which is entirely possible and which is capable of yielding great results, and that thing is an earnest and willing cooperation with the Federal Food Administration in its efforts to husband and conserve the food supply which we now have and will have as a result of 1918 harvests. The savings effected by one family obeying the regulations of the Food Administration is, of course, a small matter within itself, but when multiplied by 10,000,000 families it means a great deal and is the thing which stands between our success or failure.

If the voluntary methods thus far pursued in this important matter are successful, then all well and good. If they are not successful then this Congress must authorize stronger measures. The result must be had, and in accomplishing those results we can not afford to fail. [Applause.]

The CHAIRMAN. The time of the gentleman has expired. Without objection the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

INTERNATIONAL HIGH COMMISSION.

To defray the actual and necessary expenses on the part of the United States section of the International High Commission, arising in such work and investigations as may be approved by the Secretary of the Treasury, $25,000, to be expended under the direction of the Secretary of the Treasury.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the item just read.

The hearings and report disclose that this is a new activity to be undertaken by our already overburdened Secretary of the Treasury, Mr. McAdoo.

It is of a character of work that is performed and has been performed by the State Department and the Department of Commerce. It is now suggested to divide this work and its responsibilities still further by having this commission created as an adjunct to the Treasury Department under the immediate supervision of the Secretary of the Treasury. Its work, as testified before the Committee on Foreign Affairs by the former Assistant Secretary of State, Mr. John Bassett Moore, is to try to bring about uniformity of commercial regulations, uniformity of fiscal regulations, and uniformity of charges and treatment of commercial travelers. We have in the Department of Commerce a bureau that has been attempting to extend the commerce of the United States, to which bureau are attached commercial attachés and commercial agents. We appropriate hundreds of thousands of dollars for the extension of the commerce of the United States under the supervision of that bureau. We have under the Department of State a Bureau of Foreign Commerce. We also have divisions in that department relating to South American affairs, Latin American affairs, Central American affairs, and Mexican affairs. Now it is proposed to establish an independent bureau outside of these two bureaus, where the Government is already performing work of a similar character, and to have it connected with the Treasury Department. Unless some good reason can be assigned for the further differentiation and separation of this work from the two departments that are now performing kindred work, I shall be compelled to make a point of order.

Mr. STAFFORD. Mr. Chairman, just one word, unless the Chair is ready to rule.

The CHAIRMAN. The Chair would be glad to have the act read.

Mr. STAFFORD. Mr. Chairman, the gentleman from Virginia [Mr. FLOOD] predicates his entire case upon the act of February 7, 1916, which was an enabling act to assist the Secretary of the Treasury to confirm in fact the nine delegates of the American section that had been appointed by him at the first meeting of the American Financial Conference that was held in Washington in 1915, so as to attend the meeting that was to be held at Buenos Aires, Argentina, later in the year 1916. The whole phraseology of the act, which I shall read, bears out the contention that it was merely an enabling act, and to confirm the action of the Secretary of the Treasury in appointing the delegates that were to assemble at the financial conference to be held that year at Buenos Aires. Read it closely; even the first paragraph and the second show the temporary character of this legislation:

That the appointment of the nine delegates by the Secretary of the Treasury to represent the United States in the proceedings of the International High Commission to be held in Buenos Aires, Argentina, during the year 1916, in accordance with the action of the first Pan-American Conference held in Washington during the year 1916, pursuant to the provisions of an act of Congress approved March 4, 1915, entitled "An act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1916," be, and the same is hereby, approved and confirmed. Such delegates shall be known as the United States Section of the International High Commission, and shall cooperate with the other sections of the commission to take action upon the recommendations of the first Pan American Financial Conference, and the President is authorized to fill vacancies that may occur in the United States section of said international commission.

Mark you, in construing this act, we have to take all the acts together. That is fundamental. I wish to read the second paragraph, which bears out the contention that it was merely temporary:

For the purpose of meeting such actual and necessary expenses on the part of the United States section of the commission that may arise from its work and investigations, or as may be incidental to its attendance at the meeting—

Not the meetings, but the meeting——

of the said International High Commission, the sum of $40,000 is hereby appropriated out of any money in the Treasury not otherwise appropriated, to be expended under the direction of the Secretary of the Treasury, to be immediately available, and to remain available until expended.

That was the meeting of the Pan American Financial Conference at Buenos Aires in that year, not the meetings, and was to give recognition to an action of the Secretary of the Treasury, for which he had no authority, when he took that action in 1915,

prior to the passage of this enabling act, whereby the appointment of those nine delegates was approved, and any vacancies that should occur before the meeting at Buenos Aires could be filled by the President of the United States. If the Treasury Department officials—and Dr. Rowe is an Assistant Secretary there—had believed that this was permanent, he would not have come before the Committee on Foreign Affairs and asked for permanent legislation as embodied in the proposed act printed in the hearings which has been read by the gentleman from Virginia [Mr. FLOOD]. True, that act is broader in its scope than the language carried in this bill, but there is no authorization for this International High Commission; there has never been any authorization in the Diplomatic and Consular appropriation bill in prior years since we passed the act of February 6, 1916.

Mr. CHARLES B. SMITH. Does not the gentleman realize that the Secretary of the Treasury in appointing the delegates originally had no authority of law whatever, and that that was the reason why he came before Congress to get the authorization?

Mr. STAFFORD. I remember the incident. He came before Congress to gain recognition, so that these delegates when they met at the second conference at Buenos Aires would have the authority to assemble there in that congress as a part of that section, but not to any succeeding congresses.

Mr. CHARLES B. SMITH. But that is the law, giving it a legal status.

Mr. STAFFORD. An act was passed in advance of the passage of the Diplomatic and Consular bill, passed in advance, so that the Secretary of the Treasury would have authority to send them down there and have an appropriation for that purpose prior to the assembling of the congress and prior to the passage of the Diplomatic and Consular appropriation bill.

Mr. FLOOD. May I interrupt the gentleman for a moment?

Mr. STAFFORD. I will be glad to yield.

Mr. FLOOD. We do not contend, and this provision does not provide, that there shall be any delegates to any future conferences. There has been but one Pan American Financial Congress and that was the one held in Washington in 1915; but it is a permanent commission, consisting of a few representatives from each of the Pan American countries, that was created by the financial conference which met here, and the creation of which, so far as the American section of it is concerned, was ratified and approved by act of Congress of February 7, 1916, and these gentlemen constitute the American section of the International High Commission now, and this provision is simply an appropriation to take care of their work and the salary of one or two clerks.

Mr. STAFFORD. While it is true there has been only one Pan American financial conference, there has been a provision carried in the Diplomatic and Consular appropriation bill providing for the holding a second Pan American Financial Conference——

Mr. FLOOD. Oh, no.

Mr. STAFFORD. I can give the gentleman——

Mr. FLOOD. That was not a conference; that was a meeting of this International High Commission.

Mr. STAFFORD. I can give the gentleman authority for that in his own appropriation bill.

Mr. FLOOD. I know that commission met here, but not a conference.

The CHAIRMAN. The Chair is ready to rule.

Mr. GILLETT. Mr. Chairman, if the Chair is ready to rule, I do not desire to detain him.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. GILLETT. As acknowledged by the gentleman from Virginia [Mr. FLOOD], the Secretary of the Treasury had appointed nine delegates to represent the United States in the proposed International High Commission. He had appointed these nine delegates without any authority of law at all, and I suppose when it came to the determination of how they should be paid, he found there must be some authority of law .

Mr. FLOOD. They have never been paid anything.

Mr. GILLETT. Of course their expenses have to be paid.

Mr. FLOOD. The expenses; yes.

Mr. GILLETT. When the Secretary of the Treasury came to decide how it was to be paid he doubtless consulted the statute and found no authority. There has to be some authority, and this statute was enacted. It simply says that the nine delegates which he had already appointed to this International High Commission, appointed, as admitted, without any authority of law, that their appointment is ratified and approved. Now, he certainly did not appoint them as a permanent body, because, in the first place, we know he would not assume to, and in the second place, it says here he simply appointed them as delegates on this commission. Therefore, up to that clause there is no authority at all for holding that they are a permanent commission. This simply approves the appointment of the Secretary of these nine delegates on this commission, and whatever comes after that in this statute, which is depended upon, simply gives them the title and says that the President may fill vacancies. I can not see how there is the slightest shadow of a foundation for claiming that there is any permanent commission here established.

The CHAIRMAN. The Chair is ready to rule.

Mr. CHARLES B. SMITH. I would like to read the statement made by Dr. Rowe I would like to have this put in for the benefit of the Members on the other side:

Mr. ROWE. The International High Commission was organized as the result of a resolution adopted by the Pan American Financial Conference of 1915. That conference was called by the President of the United States and was composed of officially appointed delegates by the Governments of Central and South America, with the exception of Mexico. Diplomatic relations with Mexico had not been resumed at that time, so that Mexico was not represented. The assembled official delegates adopted a resolution organizing the International High Commission, providing for the appointment in each country of a national section. The Governments in each country appointed these national sections, composed of nine members, with the minister of finance chairman of each section. The International High Commission has received the official recognition of all the Governments, in some cases directly through legislation, in other cases indirectly through appropriations made by national legislatures for the support of the commission. The International High Commission constitutes the permanent organization of the financial conference.

Mr. GOOD. Will the gentleman yield right there?

Mr. CHARLES B. SMITH. Yes.

Mr. GOOD. Will the gentleman put his finger on the statute of the United States that provides or indicates that this commission now exists? What the gentleman has read is that other Governments have recognized it. Our Government has only recognized it to the extent of making appropriations for one year, and all the statute does upon which the gentleman relies is to make an appropriation to enable the delegates to make investigation and then to attend a single meeting in 1916. So far as our statutes are concerned, there is not a single syllable that indicates that this commission has any life at all, so far as the Government of the United States is concerned.

Mr. CHARLES B. SMITH. I think the gentleman is entirely mistaken in my opinion. The law creates the commission.

Mr. GOOD. Point to the statute.

The CHAIRMAN. The Chair is ready to rule. The gentleman from Wisconsin [Mr. STAFFORD] makes the point of order against the provision in the bill making an appropriation for the International High Commission on the ground that it is legislation on an appropriation bill not authorized by law. It is undoubtedly the practice of the House under its rules that a committee proposing legislation must show authority of law for the legislation to make it in order on an appropriation bill. The Chair has listened attentively to the arguments and the acts of Congress read bearing on the case. The gentleman from Virginia [Mr. FLOOD] contends that the Secretary of the Treasury appointed delegates to attend a convention, and that those delegates, in connection with delegates from other countries, organized this International High Commission. It is admitted that there was no provision of law authorizing the Secretary of the Treasury to appoint said delegates. Subsequently Congress passed a law ratifying the appointment by the Secretary of the Treasury of the aforesaid delegates and made an appropriation to pay their expenses while attending the conference. The gentleman from Virginia contends that in the act of Congress ratifying the appointment of such delegates, Congress approved their act in establishing the International High Commission and making it a permanent organization.

The Chair will ask if he has not correctly stated the position of the gentleman from Virginia? The Chair is of the opinion there has been no specific authority of law cited the Chair that authorizes the creation of a permanent high commission. The Chair does not believe Congress could be said by simply ratifying the appointment of delegates to a convention to approve the legislation of the convention to which the delegates were accredited unless Congress specifically so stated in the act itself. The Chair does not believe Congress will ever delegate its legislating functions to any other body or convention. Therefore the Chair is constrained to hold that there is no law authorizing the creation of this high commission; that the paragraph is new legislation and is not in order on an appropriation bill. The Chair sustains the point of order.

The Clerk read as follows:

The appropriation of $40,000 "For the purpose of defraying the expenses in Washington City incident to the Nineteenth Conference of the Interparliamentary Union to be held in Washington in 1915, to be expended under such rules and regulations as the Secretary of State may prescribe," made in the act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1915, and extended and made available for the calendar years 1916,

1917, and 1918, not having been expended, is hereby extended and made available for the calendar year 1919: *Provided*, That said sum may, in the discretion of the Secretary of State, be expended within the United States, but not elsewhere: *Provided further*, That an itemized account of all expenditures shall be reported to Congress.

Mr. LONGWORTH and Mr. FLOOD rose.

The CHAIRMAN. The gentleman from Virginia [Mr. FLOOD] is recognized.

Mr. FLOOD. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Virginia offers an amendment, which the Clerk will report.

Mr. FLOOD. I will say, Mr. Chairman, as to that item, that there are a number of items of reappropriation in this bill.

Mr. STAFFORD. Let it be reported, so that a point of order may be made against it.

Mr. FLOOD. All right.

The Clerk read as follows:

Amendment offered by Mr. FLOOD: Page 21, after line 15, insert the following as a new paragraph:

"FIFTEENTH INTERNATIONAL CONGRESS AGAINST ALCOHOLISM.

"Any unexpended balances of appropriations heretofore made for the Fifteenth International Congress against Alcoholism are hereby reappropriated and made available until expended."

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the amendment.

Mr. FLOOD. Mr. Chairman, I want to state that that item was not reported in this bill for the reason that the State Department made no suggestion in reference to it. These items we have just been over are items of reappropriation. The department did not suggest that this unexpended balance be reappropriated, because the construction of the Department of State was that the work had been going on, and they construed the language of the last appropriation bill to make a permanent appropriation of that amount. And so they did not make any suggestion that the unexpended balance be reappropriated. Subsequently I called the department's attention to that, and it was taken up by the State Department with the Treasury Department, and I was informed from the State Department that the Treasury Department thought the unexpended balance would have to be reappropriated or they could not pay warrants on the appropriation. And I think that this appropriation ought to stand on the same footing with these other reappropriations we are making. I am told by these gentlemen that just as soon as the war is over they expect to hold this conference against alcoholism.

Mr. STAFFORD. Will the gentleman yield?

Mr. FLOOD. I will.

Mr. STAFFORD. Do I understand that the Fifteenth International Congress against Alcoholism, which was provided for in the last appropriation bill, did not meet?

Mr. FLOOD. It did not meet. I think it has been in three appropriation bills. It did not meet, and this is just to put it on the same footing with the Nineteenth Conference Interparliamentary Union that we have been making appropriations for.

Mr. STAFFORD. Of course, if it did not meet and have an opportunity to do the work that was expected of it, I, of course, can not see any reason they should be disappointed at holding a conference some time in the future. Of course, there might not be any occasion for holding it in accordance with the original intention, but it might be a ratification affair or some kind of a jollification affair. I will withdraw the reservation of the point of order.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia [Mr. FLOOD].

The question was taken, and the amendment was agreed to.

Mr. LONGWORTH. Mr. Chairman, I would like to ask the chairman of the committee a question. This seems to be the fourth appropriation for this Interparliamentary Union. Has that conference ever taken place?

Mr. FLOOD. It never has.

Mr. LONGWORTH. Is it ever going to take place?

Mr. FLOOD. I am informed by my friend from Texas [Mr. SLAYDEN], who is chairman of the American section, that it will take place just as soon as the war conditions permit—at the end of the war.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

For salaries of consuls general, consuls, and vice consuls, as provided in the act approved February 5, 1915, entitled "An act for the improvement of the foreign service," $1,208,500. No portion of this sum shall be paid as compensation to vice consuls who are not American citizens: *Provided*, That if in any case the Secretary of State deems it impracticable immediately to secure a competent vice consul who is an American citizen, he may appoint or retain as vice consul and compensate from this fund a person not an American citizen until such time as he is able to designate a competent American citizen for such post. Every consul general, consul, and, wherever practicable, every consular agent shall be an American citizen.

Mr. GOOD and Mr. MOORE of Pennsylvania rose.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. MOORE] is recognized.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word. Will the gentleman from Virginia [Mr. FLOOD] state whether the language beginning on line 17, page 22, "no portion of this sum shall be paid as compensation to vice consuls who are not American citizens," is new?

Mr. FLOOD. No. We have carried that in the bill for some time.

Mr. MOORE of Pennsylvania. Why is that language made to apply to vice consuls only?

Mr. FLOOD. Because they were the only men in the Consular Service who were not American citizens at the time this provision was put in the law.

Mr. MOORE of Pennsylvania. Is there a provision of law against a consul being an alien?

Mr. FLOOD. I do not know that there is any law, but there are no alien consuls.

Mr. MOORE of Pennsylvania. Well, this matter was discussed at some length yesterday, and the expressions heard hereabouts were entirely in favor of having only Americans on guard in these places.

Mr. FLOOD. That is the view of the committee, unanimously the opinion of the committee, that there should be none. In the vice-consular branch of the service there were a good many men who were not American citizens, and this was put there to stop that practice, and to a very great extent aliens have been eliminated from the service. It is thought that in a few years they will be entirely eliminated.

Mr. MOORE of Pennsylvania. I do not know of any consuls that are not American citizens.

Mr. FLOOD. There are none.

Mr. MOORE of Pennsylvania. But some years ago I came in contact with a few vice consuls who were not citizens, and I did not think they should represent us.

Mr. FLOOD. I agree with the gentleman.

Mr. MOORE of Pennsylvania. I think all such officers should be citizens of the United States.

Now, one more question. Does the State Department have a secret service?

Mr. FLOOD. It has.

Mr. MOORE of Pennsylvania. Is provision made for the payment of secret-service agents in this bill?

Mr. FLOOD. We have a lump-sum emergency fund of $700,000.

Mr. MOORE of Pennsylvania. That covers the secret service?

Mr. FLOOD. Yes.

The CHAIRMAN. The pro forma amendment is withdrawn.

Mr. GOOD. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Iowa moves to strike out the last word.

Mr. GOOD. Mr. Chairman, this provision under consideration presents a serious question which, it seems to me, ought to be settled by the executive departments. But if the executive departments can not settle it sooner or later it must be settled by Congress. I suppose that after this war is over no more important question will occupy our attention than that of extending our commerce abroad. This bill carries $1,208,500 for consular agents. The legislative bill carries, as I recall, somewhere between half a million dollars and seven hundred thousand dollars for the Bureau of Foreign and Domestic Commerce. This is the work our Secretary of Commerce is doing to extend our foreign trade.

A few days ago one of the members of the Committee on Foreign Relations appeared before the subcommittee on the legislative, executive, and judicial appropriation bill and made a very complete statement and an impressive one regarding the service. We were impressed with the fact that there is duplication in the work now being done by the State Department and the Department of Commerce through its commercial attachés.

Now, I submit that when people are being taxed to the limit, as they are to-day, that ought not to be. We ought not to have two men doing one man's work in any branch of the service. We ought to cut out every bit of duplication wherever we find it. I know that the committee to which I have referred wants to accomplish that very thing, and I am sure the committee reporting this bill wants to accomplish the same result; but it does seem to me that in all fairness to these two committees of Congress the Secretary of State and the Secretary of Commerce ought to get together on this proposition and agree upon a plan to cut out this useless waste, a waste admitted by both committees that have investigated it and admitted by everyone who makes a thorough and conscientious investigation of the subject.

We must extend our foreign commerce and we must extend it as we have never extended it before, when this war is over; and now it is time for Congress to set to work to cut out this duplication that has been forced upon us by these two branches of the service if they will not eliminate it for us. I do not know what amendments——

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman permit a question there?

Mr. GOOD. Yes.

Mr. COOPER of Wisconsin. Which one of the two Secretaries, in the gentleman's opinion, ought to have jurisdiction of the subject?

Mr. GOOD. That question came up when we first appropriated money for the commercial attachés. A rather novel proposition was advanced in that the commercial attachés were to be appointed by the Secretary of Commerce and accredited to the State Department, and as I recollect, Secretary Bryan said he thought there would be no conflict between the two departments. As to which one of these two great departments should have jurisdiction over carrying on our domestic business abroad and extending our foreign trade I am not prepared to say.

I only know that at the time the commercial attachés were created there seemed to be a need for them. The State Department was not taking all the action and doing all the work it should do to extend our foreign trade. Certainly the Secretary of Commerce is fully awake to the needs for this service. It is a great service; no one wants to cripple it; but we should eliminate duplication.

Mr. COOPER of Wisconsin. Of course, the gentleman knows that a consul has no diplomatic function. His position is that of a business agent. His business is commercial.

Mr. GOOD. That is also true with respect to the commercial attachés. Their business is thoroughly commercial.

Mr. COOPER of Wisconsin. But the commercial attachés were of an origin subsequent to the time when the consuls had this jurisdiction.

Mr. GOOD. But I think the gentleman will agree that both of these agencies, the consular agents and the commercial attachés, have duties that are similar and that are commercial rather than diplomatic. If these duties can not be performed by two separated departments without duplication, as has been claimed, they ought to be under one control, and Congress ought to know that there is no duplication of the work.

Mr. COOPER of Wisconsin. There is one more question I want to ask if the gentleman will permit.

Mr. GOOD. Yes.

Mr. COOPER of Wisconsin. Does not the gentleman think that the State Department has primarily to do with our foreign relations and ought to retain control of the consuls, and that the consuls ought to have jurisdiction over business affairs which relate to foreigners?

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. GOOD. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. GOOD. Yes.

Mr. LONGWORTH. I do not think the statement of the gentleman from Wisconsin is exactly accurate. The consuls, in a sense, have a kind of diplomatic function. While they have not the right of personal access to a sovereign or government, whereby they would exercise in some degree a diplomatic function, they do represent the country diplomatically to a certain extent, so that if you are going to have a consolidation it ought to be under the State Department.

Mr. COOPER of Wisconsin. There is no function exercised by a consular officer that is in any sense of the word diplomatic.

Mr. LONGWORTH. But the consular officer often looks after the interests of American citizens, not particularly business interests, as the commercial attaché would do.

Mr. FLOOD. Mr. Chairman, the State Department has a thoroughly well-organized Consular Service, and, as the gentleman from Iowa [Mr. GOOD] says, the commercial attachés and commercial agents representing the Department of Commerce are not attached to our Consular Service, and yet are in foreign countries doing a duplicate work. I thoroughly agree with him that the work should be consolidated in one department. The State Department has a splendidly organized Consular Service, the best in the world, and that is the department that ought to have it.

Mr. LONGWORTH. I agree with the gentleman.

Mr. GOOD. I am not prepared to say which of these departments ought to have control of this work. The Secretary of Commerce is so admirably qualified to perform this work and is doing this work so efficiently that I should hesitate to deprive him of his duties unless I was satisfied that the State Department could do it better. When Congress made the appropriation providing for the commercial attachés it was on the showing made by the Secretary of Commerce that there was a work that the State Department was not performing, that our manufacturers were not able through the State Department to push their foreign trade to the extent that they felt they ought to push it and could push it, and therefore the appropriation was made by Congress. Congress agreed with the Secretary of Commerce.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. MILLER of Minnesota. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Minnesota moves to strike out the last two words.

Mr. MILLER of Minnesota. Mr. Chairman, I would like to ask the gentleman from Iowa [Mr. GOOD], who has just spoken, a question. Do I understand that the Committee on Appropriations is about to appropriate something like $700,000 or a million dollars for these commercial attachés?

Mr. GOOD. No. The entire appropriation for the Bureau of Foreign and Domestic Commerce, for commercial attachés, and work of that kind, as I recall, is something in excess of $500,000, and I had it in mind that it possibly ran up to $700,000.

Mr. MILLER of Minnesota. It would be, however, a fair statement that they ask and expect to get about half a million dollars?

Mr. GOOD. Yes; for the Bureau of Foreign and Domestic Commerce.

Mr. MILLER of Minnesota. Mr. Chairman, it seems to me we have exemplified here the vice that creeps into our governmental system every now and then, and I suppose always will, growing out of the desire of a department to extend its influence and activities as it sees opportunity for work to be done. As old as nations are is the custom of having representatives of a nation abroad throughout the world, looking after the business interests, looking after the purely international relations between the Governments, and looking after the citizens. It seems to me that the consular system of the United States must continue to exist, and the major part of its functions is commercial. Of course incidental to that everybody knows that the Consular Service throughout the world is performing a great deal of important work in looking after American citizens who travel abroad. In fact, any American citizen traveling abroad will find that he is able to communicate with the legation or embassy at only about one place in the entire country, whereas he finds consuls scattered throughout the region. And they are of the utmost value and importance not only to commercial America but to the citizenship of America in a thousand and one ways. I am surprised to find the extent to which the Department of Commerce has gone in the sending out of these commercial attachés. I had no idea that they were carrying it to the extent indicated by this great appropriation that they are asking for. Apparently, it is a very decided increase over that which they had in the beginning, and I heartily concur in the suggestion made that this work should all be done in one department. It seems to me there can be but one department, and that is the State Department. I am in agreement with the distinguished chairman of this committee [Mr. FLOOD] in his statement that our Consular Service has come to be a remarkably efficient one. It is continually being improved. If our Consular Service had the $500,000 or $700,000 which it is proposed to squander on these commercial attachés, the Consular Service could do all the work that the commercial attachés are expected to do, and vastly more and vastly better.

Mr. GOOD. Will the gentleman yield?

Mr. MILLER of Minnesota. Yes; certainly.

Mr. GOOD. I do not want to be misunderstood. My statement is not that we appropriate $500,000 for the commercial attachés alone. It is for the entire Bureau of Foreign and Domestic Commerce. No such sum as that is appropriated for commercial attachés, but there are other employees abroad under the Department of Commerce. We were asked to eliminate the commercial attachés, but there is no provision in your bill taking them on. The gentleman certainly appreciates the great demand on our industrial and commercial interests that our trade abroad shall be extended.

Mr. MILLER of Minnesota. I can assure the gentleman that if his committee drops the commercial attachés the consular agencies of the United States will take over all the work they

are expected to do, as well as the work that they are doing, and do it at a very greatly reduced expenditure.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. Certainly.

Mr. MOORE of Pennsylvania. Is it not a fact that the consular reports dealing with particular subjects relating to trade are turned over by the Department of State to the Department of Commerce, which gives publicity to them?

Mr. MILLER of Minnesota. It is only because the Department of Commerce——

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. MOORE of Pennsylvania. I move to strike out the last two words. This is a matter of great importance. The gentleman from Iowa [Mr. GOOD] has raised a question which is serious to both the State Department and the Department of Commerce. I have some knowledge of the organization of the commercial attachés connected with the Department of Commerce. They began in a small way. They were specialists sent out through the world with the view of bringing back to the United States information on certain special subjects. For instance, one man who was versed in cotton was sent into various countries to bring back reports as to what foreign countries were doing in cotton, and to inform the Department of Commerce as to the market for cotton throughout the world. Another, who had a specialty, which might be shipbuilding, was sent into foreign countries to ascertain what was being done in this direction, and he would very much better group that information by going as a specialist to various countries where shipbuilding was done than could a hundred consular agents who were reporting only for their particular localities.

Mr. STAFFORD rose.

Mr. MOORE of Pennsylvania. Does the gentleman from Wisconsin desire to ask a question?

Mr. STAFFORD. Only to point out that the gentleman is slightly in error when he refers to the work he has been describing as being undertaken by the commercial attachés. That work is udertaken by so-called commercial agents. The commercial attachés are some eight in all, located at the principal foreign capitals, and these commercial agents that the gentleman refers to are experts who travel through foreign countries examining trade conditions and then coming over here and making their reports.

Mr. MOORE of Pennsylvania. To the Department of Commerce, by whom they are sent out. Now, I question very much whether it would be the proper thing to turn over to the Department of State the collection of commercial statistics, or to rely upon it for their dissemination in the United States. Business men do not expect to go to the Department of State for information relating to trade conditions. Business men expect to go to the Department of Commerce. That was the purpose of the organization of that department—to ascertain trade conditions throughout the world and to disseminate that information to American merchants, manufacturers, and others concerned. The American consuls have a great deal to do besides the commercial work that is imposed upon them. Special inquiries are sometimes sent out and they are expected to make special reports, but that is apart from their general work. I would not want to see the commercial business turned over to the State Department, because we have turned that work over to the Department of Commerce. The business of the State Department is diplomatic. It has little to do with commerce as such.

Mr. MILLER of Minnesota. Will the gentleman yield?

Mr. MOORE of Pennsylvania. I yield to the gentleman.

Mr. MILLER of Minnesota. What the gentleman says about experts now and then delegated by the Department of Commerce to do some special work and make a report thereon is undoubtedly correct; but does not the gentleman recognize a wide difference between that sort of an institution and a regular group of agents of the department in foreign countries, who are there permanently, year after year, assuming to do that general commercial business which our Consular Service heretofore has always done and is expected to do, and is all the time undertaking to do?

Mr. MOORE of Pennsylvania. If these men are supernumeraries, I am not justifying their appointment.

Mr. MILLER of Minnesota. That is exactly what they are.

Mr. MOORE of Pennsylvania. I am addressing myself to the point which was raised by the gentleman from Iowa [Mr. GOOD]. I do not think that information on commercial subjects and intended for the business world should go to the public through the Department of State. These matters should be handled by the Department of Commerce, which was created for that specific purpose.

Mr. GOOD. Mr. Chairman, I move to strike out, in line 17, page 22, the figures "$1,208,500" and insert in lieu thereof the figures "$1,000,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 32, line 17, after the word "service," strike out "$1,208,500" and insert in lieu thereof "$1,000,000."

Mr. GOOD. Mr. Chairman, as I recall, we appropriate $100,000 for the commercial attachés. It is admitted here by the members of this committee that the work done by the commercial attachés is duplication of the work of the consular agents. Therefore there is no use in doing it here. If the Department of Commerce is doing it, and doing it well, and started the work when the State Department was not doing it, there is no use for the Secretary of State hiring other agents in the Consular Service to do that same work. In addition to the $100,000 appropriated for the commercial attachés there is at least $125,000 expended attending their work. So we can safely cut off $208,500 and still accomplish the same thing.

Now, I do not want to hamper in the least this great work, for I realize the importance of extending our foreign trade, but I want to say that if the Secretary of State will not fight for a provision of this kind it is not worth having. The claims of duplication in this regard emanated from the State Department. Here he allows the Secretary of Commerce to come in and do the same work he is doing, and there is not a murmur from the Secretary of State, not a protest from the Secretary of State. It occurs to me that a man who will not fight openly to retain his jurisdiction will not put up much of a fight to extend our foreign trade. The only protest comes from the members of the committee that reported out this bill. They know that the duplication exists. They have called attention to it. That is not sufficient. The State Department having discovered that duplication exists in this regard, the Secretary of State and the Secretary of Commerce should get together, settle this question, and eliminate all duplication and pare down their appropriations.

Mr. FLOOD. Mr. Chairman, this seems to be a most remarkable proposition, to cut off the salaries of a great number of our consuls, vice consuls, and consular agents, or to reduce them, because the Committee on Appropriations of the House has established a new branch in the foreign service.

Mr. GOOD. The Congress authorized that branch of it, and not the Committee on Appropriations.

Mr. FLOOD. It came in in an appropriation bill.

Mr. GOOD. But it was discussed on the floor of the House.

Mr. FLOOD. Of course; but it started in an appropriation bill in the Appropriations Committee. If the Appropriations Committee, of which the gentleman is a member, had desired to get the advice of the Secretary of State and had invited him to appear before the committee, I have no doubt that he would have done so and given his advice; but I do think it is a criticism made against the Secretary of State that is not justified to say that he ought to come here and argue before a committee of Congress that another department of Government of which he is a part ought not to have such appropriations as that department has asked for.

Mr. GOOD. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. GOOD. Does not the gentleman know that it is the opinion of the Secretary of State that there is duplication in this class of work that is being performed by the two departments of the Government?

Mr. FLOOD. I do not know what the Secretary of State says, but I do know that we have had gentlemen who have been connected with the State Department before the Committee on Foreign Affairs and asked them the question, and they said that it was a delicate question and one they did not care to answer.

Mr. LONGWORTH. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. LONGWORTH. The functions of a consular officer are very much wider than that of a commercial attaché, and the proposition of the gentleman from Iowa is to cut down the salary of the consular officers evidently to the extent that they are performing these functions.

Mr. GOOD. Oh, no.

Mr. FLOOD. That is the point I was going to make. We have a law fixing the salaries of the consular officers and this appropriation is to pay the officers in the field to-day, and the gentleman wants to reduce it so it would limit the appropriation to an amount insufficient to pay those consular officers.

Mr. GOOD. Of course I do not want to do that, but I want to ask this question: The gentleman has stated that a duplication exists; that we are wasting money. What is the gentleman's proposition to correct the evil?

Mr. FLOOD. I should say for the Committee on Appropriations to refuse to make the appropriation to the Department of Commerce for consular agents.

Mr. GOOD. Does the gentleman think we should do that when the last statement before the Appropriations Committee from the State Department was that there was no objection to the Secretary of Commerce doing the work which the Secretary of Commerce said was not being performed, and that the commercial and industrial interests of the United States demanded should be performed?

Mr. FLOOD. The gentleman understands that the Secretary of State would feel a delicacy in coming here and making a contest about such a matter. Such action would certainly degenerate into an unseemly contest between two departments of the Government. The responsibility is not on the Department of State or the Secretary, but upon the Appropriations Committee for making an appropriation for commercial attachés.

Mr. GOOD. Does the gentleman contend that the Secretary of State's feeling of delicacy would extend so far that he would be willing that hundreds of thousands of dollars should be taken out of the Treasury of the United States in the performance of duplicate work rather than to go to the Secretary of Commerce and say, "Let us settle this matter in a business-like way"?

Mr. FLOOD. I do not know; but we had a very distinguished gentleman, the Hon. John Bassett Moore, before our committee, and when we asked him in reference to this matter he said he did not care to take it up and discuss it because it was a delicate question between two departments of the Government, one of which he had been connected with.

Mr. BORLAND. Mr. Chairman, I desire to oppose the amendment. As I recollect it, the appropriation for these commercial agents was originally $50,000 and now has grown to $100,000. The appropriation carried in this bill for the consuls of the United States is $1,208,500. It is apparent that the work done by the consuls is not in any large measure the work done by the agents under the Department of Commerce. The amounts appropriated respectively for these services indicate that. I understand also that the consuls are located at posts usually in commercial cities, seaports and otherwise, where their territorial jurisdiction, even within the country in which they serve, is limited. Their work is fairly well defined, their position is sedentary, and must necessarily be so. There is very little real duplication of work between them and the work that is proposed to be done by these agents under the Bureau of Foreign and Domestic Commerce. The agents under the Foreign and Domstic Commerce Bureau are a counterpart of similar officials which originated, as I understand, under the plan of Germany when that country was first extending its commercial interests into South America, and which plan was afterwards adopted by Great Britain and to some extent by France and possibly by other countries.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. BORLAND. In just a minute. The purpose of these agents is not to duplicate the work of the consuls in any sense. They are to be accredited to the entire country, or possibly a group of countries, and are to be commercial experts from the United States, who make themselves familiar in the first place with the needs of that country in a commercial way, of the particular exports and products that can be used advantageously in that country, and the means of transportation and the best means of placing the product, and then places that information or themselves personally at the service of the American business man in this country. In other words, the agent is, as his name implies, the traveling representative of the entire business world of the United States, designed to acquire information which will be of service to all business men in this country in marketing their products in a foreign country. Manifestly a consul can do a very limited amount of that particular service. No doubt he can do some and in the past has done some, but in no sense does he take the place of these agents of the Department of Commerce. We are not intending to rely upon the Consular Service to secure foreign trade worth billions of dollars to the American business man. I yield to the gentleman from Massachusetts.

Mr. ROGERS. Mr. Chairman, I would like to ask the gentleman two questions. In the first place, is he aware that the commercial attachés of Great Britain or France or Germany, to which he has alluded, are all under the jurisdiction of the minister of foreign affairs in those countries?

Mr. BORLAND. No; and I do not know that that would cut any figure.

Mr. ROGERS. That has a very vital bearing on the question before the House.

Mr. BORLAND. I do not understand that the British Cabinet has a position similar to that of the Secretary of Commerce, unless it is the President of the Board of Trade, who is a member of the British Cabinet. He may be considered analogous in some way, or his functions may, to the Secretary of Commerce, but the functions of the British Board of Trade are more local, except where they are confined to navigation matters. I do not think they have what corresponds to our Department of Commerce, and I think the German Government possibly has from the operation of the Government and the way it extends its trade.

Mr. ROGERS. And also in France?

Mr. BORLAND. Possibly in France.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. ROGERS. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. ROGERS. Mr. Chairman, the gentleman has explained very clearly the difference between the functions of the commercial attachés and the consuls. Will the gentleman explain the difference between the functions of the commercial attachés and the consuls general who have a jurisdiction as wide as the country to which they are accredited?

Mr. BORLAND. The same difference in less degree possibly occurs. The consul general has supervision over the consuls within his country, and, of course, he is in touch with the State Department as to the commercial conditions of that particular country, but he is not at the service of the business men except incidentally. He may, of course, render them great service in special cases, but his chief business is not to promote their interests.

Mr. ROGERS. I submit to the gentleman from Missouri that his chief function is to place himself at the service of the business men of the United States abroad, or doing business abroad, and that there can be no difference pointed out between the services performed by the commercial attachés and the services performed by the consul general.

Mr. BORLAND. I would point out to the gentleman that one of the most efficient governments in the world, and one which made a great success in extending its foreign trade for a decade or more prior to this war—the Government of Germany—found it extremely valuable and profitable to employ commercial agents.

Mr. ROGERS. Germany did that by making the commercial attaché a kind of super consul general. In other words, there was a chain of officers right down the line, all in one scheme of things. The difficulty with our problem is that we have two coordinate officers each responsible to two different Cabinet officers.

Mr. BORLAND. If all that is necessary is coordination, I might agree with the gentleman.

The CHAIRMAN. The time of the gentleman from Missouri has again expired.

Mr. GOOD. Mr. Chairman, I withdraw the amendment, and in withdrawing it I desire to state that I offered it knowing that if it should be adopted it might do some injury to this service. I am now satisfied that it would, and I withdraw the amendment. It was offered more to bring up this subject so that it might be discussed, and I will say to the gentleman from Missouri [Mr. BORLAND] that if he will talk with the Assistant Secretaries and the men in the Secretary of State's office he will find that not one of them will say there is any great difference between the commercial attachés and our consuls, and they will also tell him that there is a duplication of work. This claim of duplication emanates not from me but from the Department of State, but it comes in a diplomatic route. I want to say now to this committee that unless something is brought out in the next appropriation bill from this committee that will remedy this I think there will be some trouble along this line. It ought to be settled by the department and ought not to be settled by this committee.

The Clerk read as follows:

For 40 consular assistants, $75,425: *Provided*, That from and after the 1st day of July, 1918, the salaries of consular assistants shall be at the rate of $1,500 for the first year of continuous service, $1,650 for the second year of continuous service, $1,800 for the third year, and $2,000 for the fourth year of continuous service and for each year

thereafter, and section 1704, Revised Statutes, its amendatory act of June 11, 1874, and all other acts inconsistent with this provision are hereby so amended.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order on this paragraph changing the salaries of our consular assistants. As I understand, the initial salary of a consular assistant at the present time is $1,000, and they are promoted by grades of $200 up to $1,800, which is the maximum. This provision makes $2,000 the maximum grade. I wish to ask this question of the gentleman, whether in these recommendations for increase of salaries he or his committee has considered the possible general recommendation that will be reported either in a provision on an appropriation bill or by a resolution providing for a horizontal percentage increase of salaries of all employees connected with the service?

Mr. FLOOD. We did not take that into consideration, because we did not think it would apply to these consular assistants.

Mr. STAFFORD. For instance, last year the horizontal per cent increase of 5 and 10 per cent applied to every person in the service, except postal employees, and it would have applied to them had it not been that the officers of the postal organizations, as I am informed, opposed the amendment that was added to the Post Office appropriation bill in the Senate, and it was stricken out in conference. Now, it is planned, as I understand it, to introduce a resolution or provision upon an appropriation bill providing for an increase of all in the service, both in the departmental and in the field service, certainly all salaries under $1,800, and very likely above. If we are going to grant the increases provided here the gentleman will give them double what they would ordinarily receive by the horizontal increase.

Mr. FLOOD. As I stated to the gentleman yesterday, I was opposed to an increase personally of any salary at this time and preferred to wait to have the salaries increased when the war ended, but this is an exception. These consular assistants render splendid service in consideration of the small amount which they get.

Mr. STAFFORD. I recognize there may be good grounds for an increase in their salaries, but if we are going to provide a $200 increase above the general law, giving an additional 5 and 10 or more per cent besides, it is just going beyond what you contemplate.

Mr. FLOOD. I will say to the gentleman I did not understand the provision to be proposed in an appropriation bill making a general increase would apply to the foreign service.

Mr. STAFFORD. I understand it would apply to all.

Mr. FLOOD. Of course, if that is the case it would increase these gentlemen more than the committee intended to increase them.

Mr. STAFFORD. I would not make the point of order if that was not in consideration, but I do not believe it was the intention of the chairman of the committee to increase them doubly.

Mr. FLOOD. We intended this to be the full amount.

Mr. STAFFORD. Mr. Chairman, under the circumstances, as the House will presently have an opportunity to pass upon the question of the percentage of increase in the rate of compensation for all those in the service——

Mr. FLOOD. That does not meet the situation with them.

Mr. STAFFORD. I will make the point of order.

Mr. BORLAND. Mr. Chairman, I trust the gentleman will not make that point of order, if the gentleman will yield a moment to me.

Mr. STAFFORD. I will reserve it at the request of the gentleman.

Mr. BORLAND. It is only contemplated, as the gentleman says, that a general resolution containing a horizontal raise shall be introduced, and possibly it will not meet with the approbation of the House when it is introduced.

Mr. STAFFORD. If the gentleman will permit, I can not agree with the gentleman at all in that. It is the almost unanimous sentiment, as I know, to bring in some resolution providing for a horizontal percentage increase of the salaries that the employees of the Government are now receiving.

Mr. BORLAND. If the gentleman will bear with me for a moment I will call attention to the fact that at a meeting of the employees last night they adopted a resolution providing for a commission to readjust and reclassify governmental employees, which, in my judgment, is a vast improvement in every way over a horizontal increase of salary, and if that commission is appointed to reclassify and readjust salaries, which I think is the only fair way to get at it, every one of these cases will be taken care of.

Mr. STAFFORD. I am not one of those, when every employee of the Government at the present time is faced with the dire necessity of paying higher prices for their living, who wants to postpone such increase until a commission reports. I have been too long in Congress not to know that a commission is resorted to as a means of postponement. [Applause.] I am in favor, and I believe Congress has committed itself to the consideration of this arrangement, and that this House is going to bring in a resolution providing for a horizontal percentage increase of salaries of every employee of the Government, whether in the legislative, executive, judicial, postal, or other branch.

Mr. FOSS. I want to say to the gentleman, if he will yield——

Mr. STAFFORD. I will yield.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOSS. That these consular assistants——

Mr. STAFFORD. My time has expired.

Mr. FOSS. I ask that the gentleman may have five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FOSS. I want to say to the gentleman that these consular assistants are not to be confused with consular clerks. They are quite a different proposition entirely. These consular assistants are assigned to assist consuls in other countries, not employed here in the State Department in Washington, and therefore you should not compare them with clerks in the other departments.

They are entirely different from the consular clerks. The clerks in the departments here in Washington are not on the same basis at all.

Mr. STAFFORD. I will say to the gentleman in reply that I am well aware that these consular assistants are high-grade clerks that are promoted ultimately to the Diplomatic Service, and I would not make the point of order were it not for the horizontal increase that is contemplated for all the employees of the Government.

Mr. FOSS. There are only a few of these. There are only 40 in all of these consular assistants.

Mr. STAFFORD. The chairman of the committee said when they made this recommendation that they did not take into consideration the horizontal increase.

Mr. FLOOD. I want to say this, that I do not suppose the horizontal increase the gentleman speaks of would make the increase we propose here. This is the most efficient set of representatives we have abroad, and these men are expected to go there now for $1,000, and stay there for three years, and then they are increased $200 a year.

Mr. STAFFORD. Does the gentleman realize how difficult it is in a general bill providing for the horizontal increase of all our employees, to except certain employees? We have agents and consular agents, we have clerks, we have these assistants, who ought to be covered by reason of the increased cost of living not only at home but abroad.

Mr. FLOOD. Of course, we have got to recognize that the cost of living all over the world has increased tremendously. Does the gentleman think we could get a man who was capable of performing the duty of a consular assistant, such a man as we would entrust with these important duties, for $1,000 a year, to go to one of these posts and stay there for three years before any chance of increase at all?

Mr. STAFFORD. I understand that they are increased $200 a year.

Mr. FLOOD. The rule is that they give him, first, $1,000, and at the end of two years $300, and then $200 more. And we propose to make a right considerable increase in this, because they are the worst-paid officials in the Government service at home or abroad.

Mr. GOOD. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. GOOD. Does the gentleman know the number of hours they serve every day, about?

Mr. FLOOD. I think they should serve as long the gentleman from Missouri [Mr. BORLAND] would require.

Mr. GOOD. Does not the gentleman think, inasmuch as we are fixing an eight-hour day for the clerks here at home, that these representatives abroad ought to be compelled also to serve eight hours a day?

Mr. FLOOD. I think so. The evidence before the committee was that they are very hard worked.

Mr. MILLER of Minnesota. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MILLER of Minnesota. Is this discussion under the reservation of a point of order?

The CHAIRMAN. It is under unanimous consent the gentleman from Wisconsin is proceeding for five minutes.

Mr. STAFFORD. Mr. Chairman, if it were not for the fact that there is contemplated the introduction of a percentage increase, why I would not for a moment think of pressing the point of order. I will withhold it for a moment for the gentleman from Minnesota [Mr. MILLER].

Mr. MILLER of Minnesota. Can I be recognized for five minutes?

The CHAIRMAN. The time of the gentleman from Wisconsin has expired. It depends on whether or not he withdraws the point of order.

Mr. STAFFORD. I withdraw it for the minute.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. MILLER of Minnesota. Mr. Chairman, the gentleman from Wisconsin a few moments ago made a speech that got the applause of the Members hereabouts who heard it. He talked very, very sweetly, and I had great hopes and expectations as to the result of that talk, but his words are no more than taken down by the Official Reporter than he changes. And there is no applause now in evidence when he is about to make the point of order. I think it is only justice, and small justice at that, that he be confronted with the enormity of the crime he is about to commit, and in order that I may contribute slightly to that picture before his eyes I speak these few sentences.

As the law now stands, a young man who wants to aspire to be a great representative of this great, rich country and go into a foreign field like Siberia, where they are now asking for new ones; into various parts of South America, where they are demanding new clerks; into China, where there is great opportunity for commercial expansion by the United States; and into other countries that might be named, and represent this great country with these great interests to be developed, can now receive that magnificent compensation of $1,000 a year. And there is not a girl that comes to this town now to work for Uncle Sam, if she is able to pick up a sheet of paper and lay it down without blotting it, and is not able to do another thing, but that is getting more than $1,000 a year the minute she starts. The increase proposed is to allow these young men that are going abroad $1,000.

Mr. FLOOD. The gentleman should state that they will have to stay in these divisions three years before getting an increase.

Mr. MILLER of Minnesota. I thank the gentleman. I trust the gentleman from Wisconsin is taking this to his tender heart. Now, it is serious, because you can not get men to go out and do it for $1,000. I know of instances during the past 18 months where men have started to enter this service and have quit because they could not go there and live after they got there. Now, these consular agents are men who are started in the service with the expectation that they will make good and eventually become consuls and perhaps consuls general.

You do not propose to give them money enough absolutely to keep the wolf from the door when they go to any parts of the world outside the United States. When the Secretary and his assistants were before our committee I propounded this inquiry: Having in mind all the needs of the foreign service of the United States, is not the greatest among them and the most insistent now to pay an increased compensation to the class of men mentioned in this paragraph? They said, "Yes"; that without an increase our system is practically paralyzed. This $1,000 was the amount named back in 1874, originally, as I understand it.

Mr. STAFFORD. Mr. Chairman, will the gentleman inform the House how many resignations have taken place in this service in the last fiscal year?

Mr. MILLER of Minnesota. I can not give the exact number, but I can assure the gentleman that a number have resigned.

Mr. CARTER of Oklahoma. How many resignations have taken place throughout the service? That is the question. Has the percentage been greater here than in the balance of the service or has it been any less?

Mr. WALSH. I will ask the gentleman from Minnesota [Mr. MILLER], who has recently returned from visiting some foreign countries, whether it is not a fact that $1,000 will go much further in foreign lands than it will go here at home, and if it is not true that the increase in the cost of living is not so great there as it is in the United States?

Mr. MILLER of Minnesota. That was true some years ago, but it is not true now.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. MILLER of Minnesota. Mr. Chairman, I ask for one minute more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. MILLER of Minnesota. In many of the countries the cost of living has increased to a very much greater extent than it has increased in the United States—200, 300, 500 per cent in some places. My attention has been called here to the increased cost of living in the various countries. I might as well insert it now. In Italy it is 65 per cent; in Spain, 25 per cent; in Greece, 200 per cent; in Sweden, 225 per cent; in Denmark, 70 per cent; in France, 20 per cent; in the Netherlands, 60 per cent; and should any of these representatives go into the Russian countries they will find that it has increased several hundred per cent.

Mr. LONGWORTH. I will call the gentleman's attention also to the increased price of coal abroad.

Mr. MILLER of Minnesota. Yes. When I was in Paris it was $90 a ton, and was still going up.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. STAFFORD. As I stated in my previous remarks, I predicted my objection to this increase in salary on the fact that we were preparing a resolution increasing the salaries of all the clerks now receiving below $1,800 to receive a percentage increase. I realize the difficulty confronted by the committee framing that resolution in excepting any branch of the service. I have had no intention to press the point of order against the increase of salaries in this item, but for that fact. I recognize that you secure a better class of employees by giving them higher initial salaries, so as to get a better class of applicants. I may be consulted in framing that percentage increase resolution, and if I am I will try to bear in mind excepting this class of employees. Therefore, Mr. Chairman, I will not press the point of order. [Applause.]

The CHAIRMAN. Does the gentleman reserve or withdraw the point of order?

Mr. LONGWORTH. He withdraws it.

The CHAIRMAN. The gentleman from Wisconsin withdraws the point of order. The Clerk will read.

The Clerk read as follows:

To enable the President, in his discretion and in accordance with such regulations as he may prescribe, to make special allowances by way of additional compensation to consular and diplomatic officers and officers of the United States Court for China in order to adjust their official income to the ascertained cost of living at the posts to which they may be assigned, $800,000.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Wisconsin reserves a point of order on the paragraph.

Mr. STAFFORD. Mr. Chairman, this item, known as the post-allowance fund, to authorize the President to increase the allowance by way of additional compensation of consular and diplomatic officers, in its total this year amounts to almost one-half of the total appropriation for our diplomatic and consular officers. This bill carries a total of $534,500 for our diplomatic officers, and for our consular officers it carries an appropriation of $1,208,000; and here it is provided that we are to authorize an increased compensation to the extent of almost 50 per cent in the salaries of our diplomatic officers.

I have heard in times past, when the subject of providing embassies for diplomatic officers was under consideration that salaries paid by the United States were very much lower, as compared with those paid by foreign countries. Seventeen thousand five hundred dollars is the maximum amount paid to our ambassadors extraordinary and ministers plenipotentiary. Last year, Mr. Chairman, this item was restricted to those diplomatic and consular officers that were living in belligerent countries and countries tributary thereto. Now it is proposed to lift that limitation and make it apply generally to all, to the extent virtually of 50 per cent of the compensation of this force. I think it is incumbent upon the chairman of the committee to make some explanation of this extraordinary increase at one fell swoop in the salaries of all our diplomatic and consular officers. Last year only $100,000 was appropriated, and here $800,000 is asked.

Mr. FLOOD. The appropriation last year carried $200,000.

Mr. STAFFORD. I beg the gentleman's pardon; it was $200,000.

Mr. FLOOD. And the gentleman's Committee on Appropriations added another $100,000 to it, making it $300,000. We in-

creased it to $800,000, because it was shown to the committee that it was necessary in order to take care of the living expenses of our diplomatic and consular officers abroad; not simply the diplomatic officers and consular officers alone, but in some cases the clerks as well.

Mr. STAFFORD. Will the gentleman permit?

Mr. FLOOD. Yes.

Mr. STAFFORD. The phraseology does not grant that authority to the clerks as well. It is limited solely to special allowances by way of compensation to consular and diplomatic officers.

Mr. FLOOD. Well, that embraces the clerks and the consuls and ministers and ambassadors and secretaries and all. They make an allowance to all of this force out of this fund. The gentleman will see that the salaries paid to all of these representatives, including the clerks, is nearly $3,000,000.

Mr. STAFFORD. But this item does not give authorization to pay increased salaries to clerks.

Mr. FLOOD. The diplomatic officers includes those.

Mr. STAFFORD. You do not mean to say that a clerk is a diplomatic officer?

Mr. FLOOD. Yes. Do you not think a secretary is a diplomatic officer?

Mr. STAFFORD. Oh, yes; a secretary of legation is well known to be a diplomatic officer, but not a clerk.

Mr. FLOOD. They make allowances to the clerks from this fund.

Mr. STAFFORD. Then they have made it, in my humble opinion, without authorization of law.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. FLOOD. Even if the gentleman's construction of this item is the construction that would be adopted by the department handling it, still the gentleman sees that it is less than 50 per cent, or not much more than 50 per cent, of the amount paid in salaries to these officers at their posts now.

Mr. STAFFORD. The gentleman would not recommend in one bill an increase of the salaries of the officers of the Government 50 per cent when, in continental United States, we are not providing for any increases of salaries of officers?

Mr. FLOOD. The gentleman heard the statement made here yesterday that the secretaries and lower diplomatic officers at all our posts in France had been increased over 50 per cent during the past year, and the gentleman just heard the gentleman from Minnesota read a statement of what the increase was in the cost of living in the different countries of the world. I was with the gentleman in the position that the salaries of the secretaries should not be increased. The State Department, for instance, asked to increase the salary of the first secretary from $3,000 to $5,000. The committee recommended an increase to $3,500. That was stricken out, and the salary remains at $3,000. But the gentleman understood in our discussion yesterday that these very secretaries get from this fund $1,500 additional, making $4,500 a year for them; and the representatives of the State Department stated to our committee that these men just positively could not live in those countries unless they did that. Of course, there are some of these representatives who have independent means of their own and are not dependent upon their salaries, but there are others who are dependent upon their salaries, and they can not live on their salaries. I agree with the gentleman that the salaries ought not to be increased and that this post-allowance fund ought to be made large enough so that the State Department can during this temporary emergency increase the allowances to these officers.

Mr. STAFFORD. In that connection would the gentleman be willing that this authorization should exist merely during the pendency of the war?

Mr. FLOOD. Absolutely.

Mr. STAFFORD. There is no such limitation.

Mr. FLOOD. I know, but it was put in last year as a war measure.

Mr. STAFFORD. Last year the phraseology was different.

Mr. FLOOD. It was put in as a measure growing out of the existing war, and it was intended only as a war measure.

Mr. STAFFORD. Would the gentleman have any objection to inserting, after the words "special allowances," the words "during the pendency of the existing war and for six months thereafter"?

Mr. FLOOD. Not the slightest.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order and offer the following amendment.

Mr. CHARLES B. SMITH. Mr. Chairman, I should like to suggest to the gentleman from Wisconsin that that amendment would not seem to be pertinent, and I do not see what it would accomplish. This appropriation is for one year. I do not see any harm in it, but I do not see any possible good in it. I have no objection to it.

Mr. FLOOD. Let it go.

Mr. STAFFORD. I offer the following amendment.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Page 24, line 1, after the word "allowances," insert the following: "During the pendency of the existing war and for six months after its termination."

Mr. MOORE of Pennsylvania. Mr. Chairman, I desire to discuss the amendment. I favor it, but would like to ask the gentleman from Virginia [Mr. FLOOD] why it is preferred by the committee to recommend a lump sum of so large an amount for the benefit of these consular officers and others rather than give them a direct increase in salary?

Mr. FLOOD. The Department of State gathers from its representatives, ambassadors, ministers, and consuls to these various countries information as to the increased cost of living, and from this lump sum the attempt is made, as nearly as possible to add to the salaries of these men a sum sufficient to enable them to meet that increased cost of living. The cost of living is variable. It changes from time to time. The committee thought that was a better way to make an allowance to meet the increased cost of living than to increase their salaries.

Mr. MOORE of Pennsylvania. As to the increased cost of living I thoroughly agree with the gentleman, but Congress has always reserved to itself, or has usually reserved to itself, the right to fix these salaries, but in this instance, the only one I recall recently, we propose to turn over to the Secretary of State $800,000, with which he may favor one employee of the department and perhaps not favor another. That is to say, he may make a certain allowance to one man in a certain place, or he may make no allowance at all to another man in another place, which might breed a species of favoritism that would not work well.

Mr. FLOOD. Of course there might be some cases of injustice. I do not think there have been any. I do not think it would be possible to get through a general increase of salaries, and I do not think it would be advisable. I think any salary that is increased now will remain, and will be the salary after peace returns. It might not be a proper salary in normal times.

Mr. MOORE of Pennsylvania. Is it not a fact that leaving this appropriation as it is, this lump appropriation of $800,000, the Secretary of State has it in his power to reward one particular officer of the Government or to punish another?

Mr. FLOOD. Of course he would have that power, but it would be very difficult for him to do so without bringing severe criticism upon himself, because the apportionment is made according to a system. The reports are gotten from a place as to the increased cost of living at that place, and then make the apportionment of this fund and the allowance to the officers there upon that basis.

Mr. MOORE of Pennsylvania. Will the gentleman state what the practice was with regard to the smaller allowance made in last year's bill?

Mr. FLOOD. The same; and in France, for instance, it was stated before the committee that as far as the fund permitted they made an increase of 50 per cent to the officials in Paris.

Mr. MOORE of Pennsylvania. Was that a uniform increase?

Mr. FLOOD. Uniform to all the officials in Paris.

Mr. MOORE of Pennsylvania. In one particular country?

Mr. FLOOD. Yes.

Mr. MOORE of Pennsylvania. Suppose a man happened to be in Africa?

Mr. FLOOD. If the increased cost of living there was ascertained to be 25 per cent, they would undertake to increase the allowance by adding 25 per cent to the salary of the man there.

Mr. MOORE of Pennsylvania. Does that particular consul figure up his expenses in his cost of living and forward a statement of them to the department?

Mr. FLOOD. I will quote from the testimony of Mr. Carr, which makes it clear:

Mr. CARR. Just as we have been doing. I would get the officer's reports first, upon what it would cost him to live, standardizing the thing by making each officer report on certain definite items, such as rent, clothing, etc., and in addition to that I would make him furnish us with a statement, as in the past, of how much an apartment of five rooms will cost, and how much a pair of shoes such as he wears will cost, and how much suitable clothes will cost him, and so on down through the different items, including items of food. I would compare them with the estimate made last year and the estimates made the year before. I would corroborate them also, as far as possible, by the published official reports of each foreign Government. For example,

Great Britain every year issues reports showing the cost of living, with the variation of prices of food and so on, which are very helpful in checking up these reports. On the basis of that I would reduce his report. For instance, an officer at one time estimated that he required $2,000 for clothing for the year. I would cut that down to what seemed a reasonable amount.

They send in a statement of the cost of these articles for the period before we entered the war and the cost of them now, and the State Department puts officials to work to find out a proper basis based upon that information as to what the increase of cost of living is.

Mr. MOORE of Pennsylvania. And it is left wholly to the discretion of the Secretary of State?

Mr. FLOOD. It is based on that system, and the Secretary of State could not depart from that in the interest of any particular person without subjecting himself to detection and severe criticism.

Mr. MOORE of Pennsylvania. Without regard to politics, he could play favorites?

Mr. FLOOD. I suppose he could, but he would violate the proprieties of the situation and the decencies of his office, and, of course, no Secretary of State would do it.

Mr. CHARLES B. SMITH. Mr. Chairman, I move to strike out the last word. I want to say to the gentleman from Pennsylvania [Mr. MOORE] that the gentleman from Wisconsin [Mr. COOPER], a member of the committee, asked Mr. Carr, the Director of the Consular Service, why these salaries were not fixed instead of giving a lump-sum appropriation, and Mr. Carr said:

I should say under normal conditions that there would be no reason why that should be done. Under present conditions, however, I would prefer to see more adaptability to conditions. Congress should fix salaries, but this is not a salary per se. This is what we call a living allowance, which is added to the salary.

It is purely a matter of giving extra money to enable the foreign representatives to live.

Mr. MOORE of Pennsylvania. The gentleman has posted himself in regard to that. Is it or not a fact that consuls have been moved from place to place, involving increased expenses, for diplomatic or other reasons of the department not political?

Mr. CHARLES B. SMITH. I presume they have been transferred for diplomatic reasons. I do not think the State Department would remove them for any other reasons.

Mr. MOORE of Pennsylvania. Suppose it should be learned that one man was not quite efficient according to the requirements of the State Department, and they moved him to another place and did not make an allowance that he thought was sufficient for his proper maintenance?

Mr. FLOOD. Is the gentleman talking about consuls or diplomats?

Mr. MOORE of Pennsylvania. Consuls.

Mr. FLOOD. On account of politics?

Mr. MOORE of Pennsylvania. No; a man might be moved for several reasons. I have been advised that some have been moved and some men did not understand why they were moved. That involves expense; a man might have leased some property on which he would lose.

Mr. FLOOD. The department recognizes that. They ask in this bill for an allowance to pay their expenses when removed. They do move them for various reasons, sometimes because they have not proved efficient in a particular place and have moved them to another place with equal dignity and equal salary. I do not believe they do it for any other reason than for the good of the service. The officials may be mistaken about it, but the Director of the Consular Bureau is a distinguished Republican.

Mr. MOORE of Pennsylvania. Yes; he is a good man.

Mr. FLOOD. I do not believe he would move a man, except for the good of the service.

Mr. MOORE of Pennsylvania. What is desired here is to give the Director of the Consular Service the discretion to move these men back and forth to fill or refill the places?

Mr. FLOOD. He has that authority and discretion under the law that we passed 12 years ago. The only thing this item provides for is to enable him to supplement their salaries with an allowance which he bases on the increased cost of living.

Mr. MOORE of Pennsylvania. I assume that that is the real purpose of the appropriation.

Mr. CHARLES B. SMITH. Mr. Chairman, I think the gentleman is wrong in his belief that they are transferred for political reasons. The only appointments I have been able to get in the State Department was through Secretary KNOX.

Mr. MOORE of Pennsylvania. I think there have been cases—but we barred all that when the gentleman from Missouri [Mr. HAMLIN] made his statement the other day and produced Mr. Lansing as his best witness—there have been cases where the department has found that the incumbent did not come up to requirements, or for other reasons moved him from place to place.

Mr. COOPER of Wisconsin. Mr. Chairman, I move to strike out the last word. I agree entirely with what the gentleman from Pennsylvania [Mr. MOORE] has said as to the unwisdom, generally speaking, of lump-sum appropriations. Public moneys ought to be expended for public purposes, and the legislature which makes the appropriations ought to define specifically those purposes. When I first came to Congress lump-sum appropriations were much more common than is now the practice. Gradually Congress has been putting a stop to that sort of thing. I should have opposed in the committee the incorporation of this paragraph in the bill had it not been for the statement made by Assistant Secretary Carr in respect to the very exceptional circumstances which now confront the country and the whole civilized world. Possibly these circumstances justify this exception, but as I say, generally speaking, Congress should not permit the turning over of great sums of money from the Public Treasury to be expended in the discretion of any executive officer. It is opposed to the whole theory upon which moneys ought to be appropriated in a free country. One great authority has said that those who appropriate the money ought to believe, although it is not always true, that the trustee having charge of money to expend will expend some portion of it for his own advantage, and, therefore, if you make the law strict to prevent that, you do injustice to no executive officer.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken; and on a division (demanded by Mr. STAFFORD) there were—ayes 21, noes 10.

So the amendment was agreed to.

The Clerk read as follows:

ALLOWANCE FOR CLERK HIRE AT UNITED STATES CONSULATES.

Allowance for clerk hire at consulates, to be expended under the direction of the Secretary of State, $818,000.

Mr. ROBBINS. Mr. Chairman, I move to strike out the last word. I want to ask the gentleman in charge of the bill for an explanation of this extraordinary item. We have been condemning an appropriation of $800,000 as a lump-sum appropriation, and here now comes an appropriation of $818,000 as a lump-sum appropriation. The other was to be expended for the diplomatic officers of the Government, and this is to be expended for clerk hire. What is the use of fixing clerk hire if we are to permit the Secretary of State to expend $818,000 in increasing that clerk hire?

Mr. FLOOD. Mr. Chairman, the number of clerks since the war began has enormously increased.

Mr. ROBBINS. This seems to be for just clerk hire; it does not mention additional clerks.

Mr. FLOOD. That is the whole item. It is for those we have now, and those we have taken in since the war began and those that we are going to take in.

Mr. ROBBINS. Did we not just increase the salaries of the clerks a while ago?

Mr. FLOOD. The clerks at embassies and legations.

Mr. ROBBINS. Is there any salary for clerks except what is fixed by the Secretary of State under this clause?

Mr. FLOOD. We have not fixed the salaries of clerks by law.

Mr. ROBBINS. Then this is an allowance that is made to each clerk, in the discretion of the Secretary of State, in addition to the allowance fixed by law for his compensation?

Mr. FLOOD. We have no other item for clerk hire at the consulate than this. This pays for all of the clerks at all of the consulates.

Mr. ROBBINS. And the amount that is paid is fixed by the Secretary of State?

Mr. FLOOD. Yes.

Mr. ROBBINS. Congress has not fixed it in any instance?

Mr. FLOOD. It never has.

Mr. ROBBINS. Does the chairman of the committee think that is a wise plan?

Mr. FLOOD. It has always been the custom. The number of clerks that you need at a consulate varies. Of course this is a larger appropriation than they have ever had before.

Mr. ROBBINS. How much does this exceed the last appropriation? I am advised that the last appropriation was only $493,000. This is almost twice as much as last year. Why is the increase so great?

Mr. FLOOD. The gentleman is correct about the amount carried in the appropriation bill last year being $493,000, but the representative of the State Department went before the Committee on Appropriations and in one of the deficiency appropriation bills obtained $325,000, and what the Foreign Affairs

Committee recommended and the Committee on Appropriations allowed is the amount that we have recommended in this bill.

Mr. ROGERS. Will the gentleman yield?

Mr. ROBBINS. In just a moment. How many clerks are there in the service?

Mr. FLOOD. Nobody knows; they are constantly changing.

Mr. ROBBINS. Well, I would suppose there would be changes, but how many were there last year? The gentleman knows that.

Mr. FLOOD. I do not know; but of course we could find out from the State Department exactly how many there were. I just never undertook to do it.

Mr. ROBBINS. Can the chairman of the committee, who is familiar with this bill, tell us the salary that is paid, either the highest salary or the average salary paid to clerks last year?

Mr. FLOOD. They range from $600 to $2,000.

Mr. ROBBINS. Two thousand dollars would be the highest paid last year, and that was paid under an allowance made by the Secretary of State in his discretion out of the lump-sum appropriation?

Mr. FLOOD. And then the amount authorized by the Appropriations Committee.

Mr. ROBBINS. How much?

Mr. FLOOD. Three hundred and twenty-five thousand dollars added to the amount, and that is carried in this bill this year.

Mr. ROBBINS. Then the $493,000 in the last bill and the $325,000 appropriated by the Committee on Appropriations you add together and make the appropriation in this bill?

Mr. FLOOD. Yes.

Mr. ROBBINS. What does the gentleman expect the Committee on Appropriations to do when it comes along to appropriate for this item?

Mr. FLOOD. We expect this to cover it all.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROBBINS. I ask for two additional minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FLOOD. The expectation of the representatives of the State Department with whom we conferred was that this would cover the entire clerk hire.

Mr. ROBBINS. Can the gentleman assure the committee there will be nothing in the bill from the Committee on Appropriations to cover this item?

Mr. FLOOD. That is the supposition; of course it might be wrong. I can not assure the committee, as the gentleman suggested, because in these times no one can be certain of what the morrow will bring forth.

Mr. ROGERS. Will the gentleman yield on that point?

Mr. ROBBINS. Certainly.

Mr. ROGERS. The report of the committee, on page 14, shows one very important reason for this great increase:

> Since the advent of the United States into the war it has been the policy of the State Department in every way to Americanize the clerical force.

That, of course, almost always necessitates a considerable addition to the salary of the clerical force, because it costs more to get an American citizen here, send him over there, and maintain him than it does to secure a foreigner who is simply picked up in a city where he is to be stationed, and I think the gentleman will agree that that expenditure of money is an extremely wholesome one, especially when the United States is at war.

Mr. ROBBINS. I agree with the contention, because my observation abroad is that there are many foreigners employed in this branch of the service.

Mr. LONGWORTH. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee a question. While we are on this subject of consulates can the gentleman say what consulates are now owned by the United States Government?

Mr. FLOOD. No; I do not think we own any.

Mr. ROBBINS. The gentleman from Ohio means houses?

Mr. LONGWORTH. There are a certain number——

Mr. FLOOD. In the Far East we own some.

Mr. LONGWORTH. I withdraw the pro forma amendment.

The Clerk read as follows:

> Expenses of providing all such stationery, blanks, record and other books, seals, presses, flags, signs, rent (so much as may be necessary), repairs to consular buildings owned by the United States, postage, furniture, including typewriters and exchange of same, statistics, newspapers, freight (foreign and domestic), telegrams, advertising, messenger service, traveling expenses of consular officers and consular assistants, compensation of Chinese writers, loss by exchange, and such other miscellaneous expenses as the President may think necessary for the several consulates and consular agents in the transaction of their business, and payment in advance of subscriptions for newspapers (foreign and domestic) under this appropriation is hereby authorized, $828,000.

Mr. ROBBINS. Mr. Chairman, I move to strike out the last word. I would like to ask the chairman of the committee why this item is increased from $625,000, as carried in last year's bill, to $828,000 in this bill? What is the necessity for any such lump-sum increase at this time for items which are small in their amount? We only have one consular building or two, as has been just stated, in the Far East.

Mr. FLOOD. The gentleman sees a great many other important items contained in this—stationery and telegrams——

Mr. LONGWORTH. And rent.

Mr. FLOOD. And the telegraph service even with consulates has increased tremendously.

All of our business has to be carried on there by cable. The business is important, and the mails are not certain. We had an appropriation last year of $625,000 and an emergency appropriation of $28,000, and some other appropriations were added. The real increase is only about $75,000. So the increase is not as much as it appears; but it is very considerable, and due largely to the tremendous cable service we have.

Mr. ROBBINS. That would be only $653,000 last year. Now you increase it to $828,000.

Mr. FLOOD. You will see that last year we were engaged in war, but this work is increasing all the time.

Mr. ROBBINS. I beg the gentleman's pardon. That appropriation would not be made in contemplation of war last year.

Mr. FLOOD. We were not in war all the time.

Mr. ROBBINS. The appropriation would not be made in contemplation of war, and the appropriation was only $653,000 for the fiscal year.

Mr. FLOOD. We were in war the whole year.

Mr. COOPER of Wisconsin. Will the gentleman permit me to read a statement that was made in the hearings by Mr. Carr on this very point? It will answer completely the gentleman from Pennsylvania.

Mr. ROBBINS. I will be very glad to have it.

Mr. COOPER of Wisconsin. He says:

> Contingent expenses of United States consulates—this is an apparent increase, although in reality it is not an increase, except about $75,000, and $28,000 of that was carried in the war relief appropriation and was taken over in the deficiency bill last fall by special deficiency appropriation into this, and then we put in $75,000 additional to allow for what we considered a normal increase, perhaps, in view of present conditions. Now I find I have left only about $70,000 unallotted balance to carry us through the rest of this fiscal year, and I have very grave doubts as to whether it is going to do that or not. In fact, I am afraid it will not. It may be that upon further examination we may have to submit a recommendation for a still further enlargement of that fund. The conditions are so abnormal that accurate estimates are next to impossible. One can only look a week or so ahead nowadays. It may be that we will have to ask for more money there. Saturday evening, Mr. Long, Third Assistant Secretary, spoke to me about diplomatic clerk hire allowance and said we had suddenly found that we were without a cent for this item beyond that which has been allotted up to June 30, with constant demands coming in by telegraph for clerks; and he asked me to submit to the committee the advisability of providing for about 50 clerks for the rest of the year, or $50,000. For clerk hire for the Diplomatic Service the estimate is $200,000, plus transportation expenses, which I estimate at about $20,000 for the rest of the fiscal year, or about $40,000 for the next fiscal year.

Mr. ROBBINS. That explanation is very complete, and also explains another matter that I heard the gentleman from South Carolina [Mr. RAGSDALE] speak about yesterday, namely, his wanting an extra clerk. I wonder where he is going to get him if we get these? I do not see the gentleman in the House now, but I would like to know where he proposes to get his extra clerk. However, the explanation answers my question.

Mr. RAGSDALE. Mr. Chairman, I wish to ask unanimous consent to revise and extend my remarks made on the floor of the House yesterday. I am doing this at the request of one Member that a part should be eliminated.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to revise and extend his remarks in the RECORD. Is there objection?

Mr. ROBBINS. Reserving the right to object, I will not object if he answers the question as to where he expects to put his extra clerk, in view of the crowded condition of the State Department now.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

> For the erection at the city of San Salvador on ground presented by the Government of Salvador of a suitable building constructed of reinforced concrete for the use of the legation to Salvador, both as a residence of the minister and for the offices of the legation, and for the necessary furniture of the building, $40,000, or so much thereof as may be necessary: *Provided*, That the President is hereby authorized to accept on behalf of the United States the plot of ground graciously presented by the Government of Salvador as the site for the erection of a legation building or buildings.

Mr. WALSH. Mr. Chairman, I reserve a point of order on the paragraph.

I would like to ask the chairman of the committee if estimates have been submitted by the Secretary of State to the Secretary of the Treasury as to the limit of cost on this building?

Mr. FLOOD. They recommended to Congress $25,000.

Mr. WALSH. That is the recommendation set out in the report of the gentleman's committee, but I desire to know if the Secretary of State has submitted to the Secretary of the Treasury estimates as to the limit of cost for this building?

Mr. FLOOD. I suppose they did—the $25,000.

Mr. WALSH. That fact does not appear in the report. I understand this building is designed to take the place of one which was destroyed by an earthquake in San Salvador in June of last year, and they have been occupying temporary quarters since that time. The report calls for an appropriation of $25,000 for the erection of a building, whereas the amount in the item calls for $40,000.

Mr. FLOOD. The Committee on Foreign Affairs decided to change the character of building recommended by the State Department from a frame building to a concrete building, and realizing that it would take more money, they made a larger appropriation.

Mr. WALSH. But there is no limit of cost fixed in this item in the bill, as is required by the statute. It says $40,000, but does not limit the cost at all.

Mr. FLOOD. Oh, yes; it does. That is all it appropriates. It does not appropriate anything beyond that.

Mr. WALSH. They could start to erect an $80,000 building under this item.

Mr. FLOOD. Oh, no.

Mr. STAFFORD. Oh, yes.

Mr. WALSH. I disagree with the gentleman, the chairman of the Committee on Foreign Affairs.

Mr. STAFFORD. Will the gentleman permit? Under this authorization, as there is no limit of cost, the work being initiated, it would enable on an appropriation bill further appropriations to any amount at all. Does not the gentleman believe it is advisable to place in here a limitation and limit the cost to not exceed a certain amount?

Mr. FLOOD. This is the way this character of item has been carried in other bills. We appropriated somewhat over $600,000 for the buildings at Shanghai, and they got the buildings for a great deal less than the items.

Mr. STAFFORD. There the Government was negotiating for certain established buildings, and we got them for less than the amount authorized for their purchase.

Mr. FLOOD. Here was an appropriation for Berne and other places. The gentleman might be right ordinarily. It occurs to me that probably we would have to make an additional appropriation for this building, because, my opinion is, that $40,000 will not build the character of a building we describe and furnish it.

Mr. STAFFORD. Of course $60,000 would be necessary for a concrete building. I do not know why the committee recommended an appropriation of $40,000, except as an initial appropriation.

Mr. FLOOD. The gentleman from Minnesota [Mr. MILLER], who is familiar with buildings of that character in Central America, thought that $40,000 would be sufficient.

Mr. STAFFORD. Has the gentleman from Minnesota any objection to placing a limit of cost, say, at $50,000?

Mr. MILLER of Minnesota. To be perfectly frank about this item, I want to say that no man on earth knows what it will cost to build a concrete building or even a wooden building at San Salvador under the conditions now existing. The proposal to build a wooden building presupposed that it should be constructed of California redwood, which has been found to be the only wood available that would not be destroyed by ants.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MILLER of Minnesota. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. MILLER of Minnesota. It is practically impossible to get the California redwood, even in normal times, anywhere outside of this country, and it is a practical certainty that it could not be procured this year or next year or at any time within reasonable contemplation. I may add that it is very doubtful if California redwood would be absolutely immune from attack by the ants. Anyone knows that no kind of wood except that which is immune from the ants should be used; otherwise the wood would be honeycombed with the ants, and it would be only a question of time when the building constructed would fall as if it were made of sand.

I have a particular reason for asking for concrete, which I will explain in a moment. But before making that statement I desire to say that the statement that $60,000 was estimated for the cost of this building is not accurate. It is as accurate as it could be made from the hearings we had, but the gentleman will find, if he reads the hearing attentively, that the minister to Salvador thought it would cost about $60,000. At least somebody thought it might cost about $60,000.

Mr. STAFFORD. What is the decision of the committee as to the limit of cost on this embassy and legation building?

Mr. MILLER of Minnesota. I will come to that in a moment, if the gentleman is a little more patient.

Mr. STAFFORD. The gentleman is always patient.

Mr. MILLER of Minnesota. I think it can be built for $40,000. It may be, though, that it might cost $50,000. It will not probably cost $60,000. I have observed the buildings constructed by this Government in all its tropical possessions, in Hawaii, in the Philippine Islands, and also in Panama, and if we have arrived at any result through all our experience in the Tropics it is that we should not put a dollar in any kind of a building that is not constructed of reinforced concrete.

For instance, a reinforced-concrete building is not subject to destruction by the ordinary earthquake. In the Philippine Islands there have been constructed school buildings and provincial buildings of reinforced concrete, and, by the way, they do not think of building any other kind of a structure there. Many of those buildings are within an area where they have a hundred, or even three hundred earthquake shocks in a year. None of them have been damaged. Nor can anyone cite an instance where a properly constructed building of reinforced concrete has been injured in an earthquake region.

Besides that, reinforced buildings are the most sanitary of any kind of building that can be erected in the Tropics. Third, it is the coolest kind of building that can be constructed in the Tropics; and, fourth, they will last, and they are the only kind of a building that will last there. I do not care what kind of a wooden structure you erect, there are two things that will soon knock it down. First, the ants will eat holes in it and it falls. In the early years of our occupation of the Philippines we used wood in the construction of school buildings, and those buildings are now in ruins, and are not in use, because it is dangerous to put people in them. The other thing that knocks them down is the hurricane or the typhoon, that works havoc everywhere throughout the Tropics.

So that every consideration of common sense and experience requires that if we build a building of any kind in the Tropics that building should be of reinforced concrete, which is fireproof.

Mr. LONGWORTH. What is the value of the land that is given to us?

Mr. MILLER of Minnesota. That is problematical. The minister said that there was no exact method of determining the value, but he thought probably it was worth $6,000 or $7,000.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired. The gentleman from Massachusetts made a point of order.

Mr. FLOOD. It is not subject to a point of order.

Mr. MILLER of Minnesota. Mr. Chairman, I ask that the gentleman from Massachusetts be given five minutes more.

The CHAIRMAN. The gentleman from Minnesota asks that the gentleman from Massachusetts may have five minutes more. Is there objection?

There was no objection.

Mr. FOSS. Mr. Chairman, with the permission of the gentleman from Massachusetts, I want to say that the minister said that this lot could be bought for about $9,000, in American money.

Mr. WALSH. Including the ants.

Mr. MILLER of Minnesota. Mr. Chairman, if the gentleman from Massachusetts will yield——

Mr. WALSH. I yield.

Mr. MILLER of Minnesota. I want to complete my statement. Under all these conditions the Government ought to build a permanent building, one that will be respectable and take care of all the business interests that we have at that point. It is proposed this building shall house the minister at San Salvador and also the consul general. In other words, the offices of both of these officials are to be inside the building.

Mr. WALSH. How numerous is the force of these officials?

Mr. MILLER of Minnesota. It is not large, if it was we could not possibly build a building for $40,000 or three times that. I think $40,000 or $50,000 will be sufficient to build it. Why can not we estimate it accurately? Because it is impossible.

First, because nobody has been building that class of buildings there; and, second, there is no class of workmen there qualified to do that kind of work. This was the suggestion that influenced me to reach the idea of adopting reinforced concrete. We have on the Panama Zone the most expert concrete workers in the world. We have a force unde the engineering department of the Army under the government on the zone that has the largest experience of any people in the world in building buildings out of reinforced concrete for the Tropics, and I do not except the enormous experience the Government has had in the Philippine Islands, where hundreds of buildings have been constructed of that character. It seemed to me that we could easily take a force of these men to draw the plans, go to the point, and construct the building out of material sent to that country. I do not think that there is any question in the world but what that can be done, and I do not think the expense would be over $40,000, although it may be $50,000 or $55,000. I would not object to putting a limit of $60,000 on it.

Mr. STAFFORD. I think there should be a limit to the amount so that they could not run wild.

Mr. FLOOD. I have no objection to the limitation being put on. There never has been any question in regard to this. We have been making the appropriations for years in exactly the same language. The Shanghai building and the building at Berne were built last year, and the appropriation for the legation in Cuba was made in this language. In the authorization for the building at Costa Rica last year the same language was used. In these cases that was all that anyone in the Department of State or on the committee anticipated would be used. Some of us on the committee thought there would be more money used in this particular case appropriated for to-day on account of the lack of information as to the cost of reinforced concrete in San Salvador, but if the gentleman from Wisconsin desires to offer an amendment putting the limitation at $60,000 I shall not object.

Mr. STAFFORD. There ought to be some limit.

Mr. WALSH. Mr. Chairman, clearly what has been brought out in the discussion during the pendency of the point of order discloses that this item is subject to a point of order. The requirements of the statute are to the effect that a limitation must necessarily be placed in every appropriation which is made for these buildings; and, furthermore, that there shall be some estimates obtained and submitted by the Secretary of the Treasury to the Secretary of State prior to the appropriation being asked for. That has not been done in this case, and in these times, when we are having such great difficulty in housing and providing accommodations for those who work not only here in Washington in the various departments but in getting accommodations for those who work in the shipyards and other industrial activities in connection with this great war, it seems to me the matter of building a concrete residence or mansion for the location of our representative at San Salvador might well be deferred, and although the amount to be saved is small, yet it is worth while to save it. I understand that the gentleman from Wisconsin proposes to insert some language if the point of order is withdrawn limiting the appropriation.

Mr. FLOOD. What is the point of order?

Mr. WALSH. The point of order is, first, that it is new legislation, and, second, that it being new legislation it is not in accordance with the requirements of existing law.

The mere fact that other items in other measures have been enacted in appropriation bills heretofore, not in conformity with existing law, certainly is no justification for the enactment of this legislation in this form. However, if the amendment suggested by the gentleman from Wisconsin [Mr. STAFFORD] is acceptable to the distinguished chairman of the committee [Mr. FLOOD], I am willing to withdraw the reservation of the point of order. I understand the chairman is agreeable.

Mr. FLOOD. The gentleman will not make the point of order that the item is not authorized by law?

Mr. WALSH. And not in accordance with the requirements of existing law.

Mr. FLOOD. Do you make the other point?

Mr. MILLER of Minnesota. I understood that the gentleman would not make the point of order if we accept the proposed limitation of $60,000.

Mr. WALSH. If the limitation is incorporated in the bill, I am willing to waive the other point.

Mr. FLOOD. That is all right; but it is authorized by law.

Mr. WALSH. It is not authorized by law in this manner.

Mr. FLOOD. The appropriation is authorized by law.

Mr. WALSH. Of course the appropriation is authorized by law in a certain way and after certain things are done; but until those things are done there is no authorization for making the appropriation.

Mr. FLOOD. Now, will the gentleman from Wisconsin offer his amendment?

Mr. WALSH. I will withdraw the reservation of the point of order on the assurance of the distinguished chairman of the Committee on Foreign Affairs that the proposition to insert the limitation is acceptable to the committee.

The CHAIRMAN. The gentleman withdraws the point of order.

Mr. STAFFORD. Mr. Chairman, I offer an amendment, after the word "building," in line 22, page 26, to insert the words "at a limit of cost not to exceed $60,000."

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Page 26, line 22, after the word "building," insert the following: "at a limit of cost not to exceed $60,000."

Mr. WALSH. Will the gentleman yield?

Mr. STAFFORD. I am glad to yield to my generous friend.

Mr. WALSH. I notice you increase this amount some $20,000. I want to ask if the purpose of that increase is to destroy some of those rapacious ants that they have down there in that country?

Mr. STAFFORD. I am not acquainted with the ant population. I will yield to the gentleman from Massachusetts, who is very alert, to go down there and see how many there are to be killed.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ROBBINS. Is it not necessary to change the amount of $40,000, on page 27, to conform to the amendment which has just been inserted on motion of the gentleman from Wisconsin?

Mr. FLOOD. No. This is the appropriation for this year. The other is the limitation on the total amount.

Mr. STAFFORD. The $40,000 is the amount that is available at the present time.

Mr. ROBBINS. The other is for the building?

Mr. STAFFORD. No; we appropriate $40,000 at the present time for this building and furniture. Later they may call upon us for subsequent appropriations, but under the existing authorization they can not ask for more than $60,000 in all. That is the purpose of the limitation usually carried in public building appropriation bills.

Mr. FLOOD. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the amendments and with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HUMPHREYS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 9314) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1919, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. RODENBERG, for 10 days, on account of important business.

ORDER OF BUSINESS.

Mr. JOHNSON of Kentucky. Mr. Speaker, on Wednesday last the gentleman from Missouri, Judge ALEXANDER, by unanimous consent was granted leave to call up as a privileged matter the bill S. 3389, relating to housing facilities, after the passage of the Diplomatic and Consular appropriation bill. Monday next is District day under the rule. I therefore ask unanimous consent that after the disposal of Judge ALEXANDER'S bill a day be given for the consideration of District business.

The SPEAKER. The gentleman from Kentucky asks unanimous consent that at the conclusion of the consideration of the bill S. 3389, which the gentleman from Missouri [Mr. ALEXANDER] has made privileged, a day shall be given to the consideration of District business. Is there objection?

Mr. JOHNSON of Kentucky. The next day after the disposal of that bill.

The SPEAKER. The next day after the disposal of that bill, not to interfere with Calendar Wednesday or privileged matters. Is there objection?

Mr. MAPES. Mr. Speaker, reserving the right to object, can the gentleman from Kentucky tell us what legislation will be brought up at that time? Will it be the bill reported by the committee to fix the rents in the District of Columbia?

Mr. JOHNSON of Kentucky. The bill undertaking to stop profiteering in rents in the District of Columbia is the one that I propose to call up.

Mr. MAPES. That is the only one?

Mr. JOHNSON of Kentucky. That is the only one.

The SPEAKER. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 13 minutes p. m.), in accordance with the order heretofore made, the House adjourned until to-morrow, Sunday, February 10, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the chief clerk of the Court of Claims, transmitting list of cases dismissed by the court December 10, 1917 (H. Doc. No. 924); to the Committee on War Claims and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting, in accordance with the provisions of section 4 of the river and harbor act, a list of claims for damages which have been adjusted and settled by the Chief of Engineers and approved by the Secretary of War (H. Doc. No. 925); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of the Treasury, transmitting estimates of appropriations for marine hospitals and marine stations (H. Doc. No. 926); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. SIMS, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (S. 1854) to save daylight and to provide standard time for the United States, reported the same with amendment, accompanied by a report (No. 293), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (H. R. 9685) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes, reported the same without amendment, accompanied by a report (No. 294), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DENT, from the Committee on Military Affairs, to which was referred the bill (H. R. 9100) to authorize the Secretary of War to grant furloughs without pay and allowances to enlisted men of the Army of the United States, and for other purposes, reported the same with amendment, accompanied by a report (No. 295), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (H. R. 9163) to provide for reimbursement of actual expenses or flat per diem for enlisted men traveling on duty under competent orders, reported the same without amendment, accompanied by a report (No. 296), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (H. R. 9098) to suspend for the period of the present emergency sections 45, 46, and 56 of "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, and for other purposes, reported the same without amendment, accompanied by a report (No. 297), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (H. R. 8409) to amend an act entitled "An act to authorize condemnation proceedings of lands for military purposes," approved July 2, 1917, and for other purposes, reported the same with amendment, accompanied by a report (No. 298), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (H. R. 9571) to authorize the appointment of officers of the Philippine Scouts as officers in the militia or other locally created armed forces of the Philippine Islands drafted into the service of the United States, and for other purposes, reported the same without amendment, accompanied by a report (No. 299), which said bill and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. GRAHAM of Pennsylvania: A bill (H. R. 9712) to prevent and punish the sale of Army and Navy uniforms to persons not authorized to wear them; to the Committee on the Judiciary.

By Mr. MILLER of Washington: A bill (H. R. 9713) granting pensions to honorably discharged soldiers and sailors in the military or naval forces of the United States during the Civil War, fixing the amount of the same, and making classifications thereof; to the Committee on Invalid Pensions.

By Mr. CARLIN: A bill (H. R. 9714) for the purpose of limiting the activities of certain officers and employees of the Government; to the Committee on the Judiciary.

By Mr. GOODWIN of Arkansas: A bill (H. R. 9715) extending the time for the construction of a bridge across the Bayou Bartholomew, in Ashley County, Wilmot Township, State of Arkansas; to the Committee on Interstate and Foreign Commerce.

By Mr. McKENZIE: A bill (H. R. 9716) to authorize the Secretary of War to lease and sublet land within military reservation camps, cantonment and aviation fields, and proving grounds for agricultural and other purposes; to the Committee on Military Affairs.

By Mr. FIELDS: A bill (H. R. 9717) to create a commission on illiteracy to be known as the American Illiteracy Commission; to the Committee on Education.

By Mr. EMERSON: A joint resolution (H. J. Res. 239) to waive certain requirements for citizenship from soldiers and sailors during the present war; to the Committee on Immigration and Naturalization.

By Mr. BARNHART: A joint resolution (H. J. Res. 240) to provide further for the national security and defense by securing to the Government of the United States an adequate supply of print paper at a fair price and by insuring a supply and equitable distribution at fair prices to the industries of the United States; to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BOOHER: A bill (H. R. 9718) granting an increase of pension to Hiram J. Pitsenbarger; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9719) granting an increase of pension to Henry C. Edminston; to the Committee on Invalid Pensions.

By Mr. CANTRILL: A bill (H. R. 9720) granting an increase of pension to John M. Willoughby; to the Committee on Invalid Pensions.

By Mr. ELLIOTT: A bill (H. R. 9721) granting an increase of pension to Joseph L. Middleton; to the Committee on Invalid Pensions.

By Mr. FESS: A bill (H. R. 9722) granting a pension to Virginia Hill; to the Committee on Invalid Pensions.

By Mr. FIELDS: A bill (H. R. 9723) granting an increase of pension to Morris Springfield; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9724) granting an increase of pension to Henry D. Combs; to the Committee on Invalid Pensions.

By Mr. FULLER of Illinois: A bill (H. R. 9725) granting an increase of pension to Ruth McClay; to the Committee on Pensions.

By Mr. GOOD: A bill (H. R. 9726) granting an increase of pension to Lewis Meskimen; to the Committee on Invalid Pensions.

By Mr. KELLEY of Michigan: A bill (H. R. 9727) granting a pension to James P. Curtis; to the Committee on Pensions.

By Mr. McKINLEY: A bill (H. R. 9728) granting an increase of pension to Sarah E. Jackson; to the Committee on Pensions.

By Mr. MAPES: A bill (H. R. 9729) granting an increase of pension to Elizabeth Lucas Lapine; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9730) granting a pension to Lena McLain; to the Committee on Invalid Pensions.

By Mr. NEELY: A bill (H. R. 9731) granting an increase of pension to John Right; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9732) granting an increase of pension to Sumnett Bee; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9733) granting an increase of pension to Charles W. Roper; to the Committee on Pensions.

Also, a bill (H. R. 9734) granting a pension to Ella V. Altmeyer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9735) granting a pension to Bertha Margaret Watkins, Helen L. Watkins, James O. Watkins, and Dortha G. Watkins; to the Committee on Pensions.

Also, a bill (H. R. 9736) granting six months' pay to Fanny Appleby, mother of Robert W. Appleby, deceased, who served in Headquarters Company, Eighth Infantry, Ohio National Guard, border defense; to the Committee on Military Affairs.

By Mr. POLK: A bill (H. R. 9737) granting an increase of pension to John W. Lewis; to the Committee on Invalid Pensions.

By Mr. SCOTT of Pennsylvania: A bill (H. R. 9738) granting a pension to Dallas Mills; to the Committee on Pensions.

By Mr. SMITH of Idaho: A bill (H. R. 9739) granting a pension to Thomas A. Starrh; to the Committee on Pensions.

Also, a bill (H. R. 9740) granting a pension to Nels Christenson; to the Committee on Pensions.

By Mr. SMITH of Michigan: A bill (H. R. 9741) granting a pension to Isaac Holley, alias Isaac Holey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9742) granting a pension to Eva M. Bevier; to the Committee on Invalid Pensions.

By Mr. STEPHENS of Nebraska: A bill (H. R. 9743) granting an increase of pension to Thomas E. Langdon; to the Committee on Pensions.

By Mr. STEVENSON: A bill (H. R. 9744) granting an increase of pension to Henry Langly; to the Committee on Invalid Pensions.

By Mr. WELTY: A bill (H. R. 9745) granting an increase of pension to Eli Abbott; to the Committee on Invalid Pensions.

By Mr. WHITE of Ohio: A bill (H. R. 9746) granting a pension to Maria Wilson; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of the Civil Liberties Bureau, asking for a congressional investigation of wartime violations of constitutional right, mob violence, censorship, and the efforts to use the war to crush labor; to the Committee on the Judiciary.

Also (by request), resolution of the Corning (N. Y.) Clionian Circle, against the zone system for postage on periodicals; to the Committee on Ways and Means.

Also (by request), resolutions from the Ladies' Auxiliary of the Presbyterian Church, Cloquet, Minn.; Current Events Club, Madison, Ind.; Penelopian Club, Cadillac, Mich.; and the Business Men's League, Hot Springs, Ark., asking for the repeal of the periodical amendment to the war-revenue act; to the Committee on Ways and Means.

Also (by request), resolution of the Cleveland Tractor Co., objecting to the increased rates of postage on periodicals; to the Committee on Ways and Means.

By Mr. CAREW: Resolution of the Woman's Missionary Society of the United Presbyterian Church, Fort Morgan, Colo., asking for the repeal of the second-class postage provisions of the war-revenue act; to the Committee on Ways and Means.

By Mr. CARY: Petition of the Cleveland Tractor Co., and resolutions of Romeo Monday Club, Romeo, Mich.; Business Men's League, Hot Springs, Ark; Current Events Club, Madison, Ind.; the Ladies' Auxiliary of the Presbyterian Church, Cloquet, Minn.; Corning (N. Y.) Clionian Circle; and the Maryville (Mo.) Commercial Club, objecting to the second-class postage provisions of the war-revenue act; to the Committee on Ways and Means.

By Mr. CLARK of Pennsylvania: Petition of M. Griswold, jr.; H. A. Nye; J. W. Burnett; and 20 others, praying for the passage of House bill 7995, for the preservation of the *Niagara*, Commodore Perry's flagship in the Battle of Lake Erie; to the Committee on Naval Affairs.

By Mr. DALE of New York: Letter from the Cleveland Tractor Co., and resolutions from the following organizations: The Ladies' Auxiliary of the Presbyterian Church, Cloquet, Minn.; Penelopean Club, Cadillac, Mich.; the Woman's Missionary Society of the United Presbyterian Church, Fort Morgan, Colo.; Business Men's League, Hot Springs, Ark.; Current Events Club, Madison, Ind.; Maryville Commercial Club, Maryville, Mo.; the Sorosis Club, St. Peter, Minn.; Corning (N. Y.) Clionian Club; and the Romeo Monday Club, Romeo, Mich., all asking for the repeal of the second-class postage rates of the war-revenue act; to the Committee on Ways and Means.

Also, resolution of the Chamber of Commerce of the State of New York, asking for the survey of the Delaware & Hudson and other abandoned canals, with a view to their use in transportation of coal; to the Committee on Rivers and Harbors.

Also, petition of William H. Walker & Co., Buffalo, N. Y., in favor of the immediate passage of the daylight-saving law; to the Committee on Interstate and Foreign Commerce.

Also, petition of Lewis S. Pilcher, M. D., asking favorable consideration of House bill 9563; to the Committee on Military Affairs.

By Mr. ESCH: Petition of the rural mail carriers of Black River Falls, Wis., praying for an allowance covering necessary upkeep expenses; to the Committee on the Post Office and Post Roads.

Also, petition of the Cleveland Tractor Co., objecting to the increased postage rates for second-class matter in the war-revenue act; also resolutions of the same import from the Ladies' Auxiliary of the Presbyterian Church, Cloquet, Minn.; Penelopean Club, Cadillac, Mich.; Business Men's League, Hot Springs, Ark.; the Woman's Missionary Society of the United Presbyterian Church, Fort Morgan, Colo.; and the Corning (N. Y.) Clionian Circle; to the Committee on Ways and Means.

By Mr. GALLIVAN: Petition of the Cleveland Tractor Co., and resolutions of the Penelopean Club, Cadillac, Mich.; the Ladies' Auxiliary of the Presbyterian Church, Cloquet, Minn.; Current Events Club, Madison, Ind.; the Sorosis Club, St. Peter, Minn.; the Woman's Missionary Society of the United Presbyterian Church, Fort Morgan, Colo.; Corning (N. Y.) Clionian Circle; and the Business Men's League, Hot Springs, Ark., objecting to the second-class postal provisions of the war-revenue act; to the Committee on Ways and Means.

By Mr. HAMLIN: Papers to accompany House bill 2094, a bill to pension John M. Jackson; to the Committee on Invalid Pensions.

By Mr. KELLEY of Michigan: Memorial of Romeo Monday Club, of Romeo, Mich., protesting against proposed postal increase on periodicals; to the Committee on Ways and Means.

By Mr. KELLY of Pennsylvania: Petition of Pittsburgh Methodist Episcopal ministers, favoring immediate war prohibition; to the Committee on the Judiciary.

By Mr. TAGUE: Petitions of Ladies' Auxiliary of the Presbyterian Church, Cloquet, Mich.; Penelopean Club, Cadillac, Mich.; Cleveland Tractor Co., Cleveland, Ohio; Corning Clionian Circle, Corning, N. Y.; Maryville Commercial Club, Maryville, Mo.; Sorosis Club, St. Peter, Minn.; Current Events Club, Madison, Ind.; Business Men's League, Hot Springs, Ark.; and Romeo Monday Club, Romeo, Mich., objecting to the increased rates of postage on periodicals; to the Committee on Ways and Means.

Also, memorial of Bohemian National Alliance, New York City, commending the President's war aims; to the Committee on Foreign Affairs.

Also, petition of the Woman's Missionary Society, Fort Morgan, Colo., and New England Association of Circulation Managers of New Bedford, Mass., opposing increased rates of postage on periodicals; to the Committee on the Post Office and Post Roads.

HOUSE OF REPRESENTATIVES.

SUNDAY, *February 10, 1918.*

The House met at 12 o'clock noon, and was called to order by Mr. SHERWOOD as Speaker pro tempore.

Rev. George Robinson, United States Army, retired, offered the following prayer:

Almighty God, our Heavenly Father, we recognize Thee as the author of life, the arbiter of our destiny. We thank Thee that Thou hast given life to men, that Thou art the former of our bodies, so fearfully and wonderfully made, and the Father of the spirits of all men. We thank Thee, too, that in these spirits of ours everywhere Thou hast implanted a longing for and a belief in a life beyond this life.

We thank Thee, O Lord Jesus Christ, who came from Heaven to give life and to give it more abundantly, that Thou didst confirm this hope and belief in the hearts of men, that Thou didst teach that Thou art the source of life, that Thou didst prove by Thy resurrection from the dead, and by infallible proofs to Thy disciples that Thou hadst risen, that this life was in Thee. This gives us hope in the death of those whom we love; and we pray Thee that on this occasion Thou wilt confirm this hope and this belief to each and every one of us. Do

Thou grant to her who has been caused so greatly to mourn the influence and the gift of Thy holy spirit, to put into her heart the sympathy of Him who once stood beside the grave and adown His cheeks coursed the tears of pity and of sympathy. He is the same yesterday, to-day, and forever. He can speak to wounded spirits. He can bind up broken hearts. We pray Thee that Thou wilt give to her the sympathy and comfort that she so much needs. And to all who mourn his loss, to all his friends, may there be spoken in this hour the warnings and the encouragement to live nearer to the Christ; and may we all take new devotion from these ceremonies to give our energies, especially in this great crisis of the world, to make all sacrifices necessary in order that we may finish the task that has been given to this Nation to do.

Thou, O God, art the power that worketh for righteousness on this earth. We believe that in this warfare we are in sympathy with Thee, and that Thou art in sympathy with us. Therefore we pray Thee that Thou wilt bless our efforts to bring to the earth peace, founded on righteousness and truth and justice. We ask all for Christ's sake. Amen.

THE JOURNAL.

The Clerk proceeded to read the Journal of yesterday.

Mr. ASHBROOK. Mr. Speaker, I move to dispense with the reading of the Journal.

The SPEAKER pro tempore. The gentleman from Ohio asks unanimous consent to dispense with the reading of the Journal. If there be no objection it will be so ordered.

There was no objection.

THE LATE REPRESENTATIVE BATHRICK.

The SPEAKER pro tempore. The Clerk will read the special order.

The Clerk read as follows:

On motion of Mr. SHERWOOD, by unanimous consent,

Ordered, That Sunday, February 10, 1918, be set apart for addresses upon the life, character, and public services of Hon. ELLSWORTH R. BATHRICK, late a Representative from the State of Ohio.

Mr. ASHBROOK. Mr. Speaker, I offer the following resolution.

The SPEAKER pro tempore. The gentleman from Ohio offers a resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution No. 246.

Resolved, That the business of the House be now suspended, that opportunity may be given for tributes to the memory of Hon. ELLSWORTH R. BATHRICK, late a Member of this House from the State of Ohio.

Resolved, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of these exercises, shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolution was agreed to.

Mr. GORDON. Mr. Speaker, the death of ELLSWORTH R. BATHRICK was a striking example of the fact that no one can know when "the pale horse and his rider" will call to deliver the final summons to go hence to that final "bourne, whence no traveler returns."

In the prime of life and apparently in full health and vigor only a few months before, no one would have been likely to suggest that in the whole membership of this House he would be the next to pass away.

The recent large increase of the death roll in both the Senate and House, many of whom had not yet passed the meridian of life, furnishes startling evidence of that general law of mortality to which all mankind is subject, and leads us to reflect upon the solem fact that death comes like a thief in the night and that no one can foretell or forestall his coming.

The boast of heraldry, the pomp of pow'r,
And all that beauty, all that wealth ere gave,
Await alike the inevitable hour.
The paths of glory lead but to the grave.

Since the Sixty-fifth Congress convened in extraordinary session on April 2, 1917, four Senators and six Members of this House have departed this life, during a period of less than 10 months, a most significant commentary upon the uncertainty of human existence and the remorseless and persistent mortality among men before the devouring "scythe of Time."

Mr. BATHRICK had served two former terms in this House, in the Sixty-second and Sixty-third Congresses and, so far as my information extends, he enjoyed the friendship of every man with whom he came in contact during his entire public service. He was invariably cheerful and kindly in temperament and disposition and agreeable and friendly in his association with his colleagues. My service here began with his second term; and it is a great pleasure for me to record the fact that I have never heard an unkind or unfriendly word spoken in Washington of or concerning Congressman BATHRICK. It is indeed true, as Tennyson has said—

Kind hearts are more than coronets,
And simple faith than Norman blood.

The House of Representatives, constituted as it is of men elected from every part of all the States of the Union, is more typical and representative of the whole people of the United States than any other body of our citizens can possibly be. The prejudices, faults, and frailties as well as the virtues and ideals of our people are found in the membership of this body. Unless thrown into daily contact and association by membership on the same committee, or by living at the same hotel, members of so large a body as this are unable to weigh fully or to judge fairly all the elements which make up the character of a colleague, and are therefore likely to judge harshly the faults and weaknesses of a fellow Member and to underestimate or entirely ignore many of his virtues and attainments which should be considered in forming a just estimate of his worth as a Member. Long service ultimately discloses a Member to the men who serve with him in his true character; but many men elected to this House serve not to exceed two or three terms, and their capacities are not fully disclosed or developed. Is not this an appropriate time and occasion for every Member to ask himself whether or not he has been hasty and premature in pronouncing judgment upon the character and capacity of a colleague whom he may not have fully known or understood? A rule of this House wisely prohibits a Member from arraigning the motives of one with whom he disagrees upon a question under discussion. Does not this rule suggest the proper attitude of mind and heart which each should maintain toward every other Member of the House? And ought not this to control the daily speech and conversation of Members, public and private, both on and off the floor?

The highest duty that Members of this House owe to their country, next to the obligation imposed by their oath of office, is to protect the character and dignity of this, the greatest legislative body on earth. We should perform this duty by a course of conduct both on and off the floor which will reflect no discredit upon it by reason of our membership in it, and by always remembering that the rights and privileges of Members are equal under the Constitution and the laws; by a strict observance of the rules and the equal rights of all Members; by the widest liberty of opinions and the utmost freedom to express them, and a courteous and charitable regard for the rights of those who may disagree with us.

In essentials—Unity.
In nonessentials—Liberty.
In all things—Charity.

As we pay this last tribute of respect to the memory of our departed colleague, let us renew our faith in and allegiance to our country, its Constitution, and the principles they were founded to perpetuate and defend. We are assailed by a foreign foe; but justice, liberty, and truth are mighty and must prevail, or government of the people for the people and by the people will perish from the face of the earth.

As public officials and as men, let us throw off all false pride and resolve anew to perform our full duty during the brief period of our sojourn here on earth, reminded, as we are, by this solemn occasion, of the brief and transitory character of human existence.

Oh why should the spirit of mortal be proud?
Like a fast-flitting meteor, a fast-flying cloud,
A flash of the lightning, a break of the wave,
He passes from life to his rest in the grave;
For we are the same our fathers have been;
We see the same sights our fathers have seen;
We drink the same stream, we view the same sun,
And run the same course our fathers have run.

Mr. ASHBROOK. Mr. Speaker, I first became acquainted with ELLSWORTH R. BATHRICK during the campaign of 1910, when he was first elected to Congress. I was pleased with his personality then, and as the years passed on, as I learned to know him well, our friendship became strongly welded. I became his good friend and he became my good friend. I met him at Columbus, Ohio, at a meeting of the Democratic congressional candidates of the several districts in the State. I believe every one of the twenty-two candidates were present. No doubt all had at least a vain hope that they might be elected at the following November election; but I am sure that no one present, except our friend "BATH," as we affectionately called him, believed that he had a ghost of a chance to win in the nineteenth district. No one would have been foolish enough to hazard a thing of value, even at great odds, on his success. But he was elected, and, if I mistake not, overcame a Republican

majority of something like 13,000 and had the honor to be the first Democrat ever elected from that district. I believe he was one of the most successful campaigners in Ohio. I did not then understand how he could possibly be elected from such a strong Republican district; but when I became better acquainted with him, I understood why it was he overcame such great odds. The people knew him; they believed in his honesty of purpose and trusted him, and he never violated their trust. In these days politics cuts but little figure with the people. Their faith and trust in a man is far greater than their loyalty and adherence to party or platform.

He gave such satisfactory accounting of his stewardship here in the Sixty-second Congress that he was returned to the Sixty-third Congress. In the meantime, however, the State had been gerrymandered and he was thrown in a new district, which resulted in his defeat for the Sixty-fourth Congress; but his reputation as a legislator became better known in his new district when he was nominated for the fourth time, and he was elected to the Sixty-fifth Congress by a good safe majority. He came to Washington last spring, when the extra session was called, from a hospital in the Southland, and remained here faithfully during the nearly six months of that strenuous session, devotedly doing his duty and loyally upholding the President during the great world-wide war crisis forced upon us. He was not a well man. He knew it. One less brave and courageous would have sought environments more conducive to the restoration of his health. Doubtless, had he done so, he would have been alive to-day. During the months of that historic session I often urged him to go away and leave this terrible grind and try to recuperate his health. He refused all such friendly advice and remained at his post of duty. I would not say that he did not sacrifice his life on the altar of his country just as surely as the brave soldier who falls in the trenches. He did more than his bit, bravely and well, and his name will long be remembered and honored by a grateful people and a grateful country.

When the last session of Congress ended, on October 7, our good friend was hopeful that he would be ready for his duties at the regular session in December. I bade him good-by, not believing that it was for the last time; but

> 'Tis the wink of an eye, 'tis the draught of a breath,
> From the blossom of health to the paleness of death.

The disease which had firm hold on him soon thereafter again brought him low, and, while everything possible was done by loved ones, skilled surgeons, and practitioners, he gave up the unequal fight with our common enemy at his home in Akron, Ohio, on December 22, 1917. While still in the prime of life, his useful and honored career was brought to an untimely end. Had he lived until the 6th of the following month he would have been but 55 years of age. I attended the service held at his home on December 27 last, in charge of his pastor, who was his next door neighbor and friend. Without paint or color he truthfully and beautifully gave honest expression of an intimate and personal acquaintance of many years. I would that I might merit as high tribute when that last sad hour comes to me, and to you, my colleagues, as was the eulogy pronounced for our friend. His remains were laid to rest in the beautiful cemetery of his home city.

Congressman BATHRICK was born in Oakland County, Mich., where he spent his young manhood. He had a varied and interesting career, often related to me; but I will speak only briefly of his service here. I might say, however, that it was his early ambition to be elected to Congress. That was his life's goal. I have heard many Members also declare that early in life they set stakes for a seat in Congress. High ambition, without doubt, is most helpful and valuable to all, as it was to him. Ambition spurs us to make the best of our talents and opportunities. He reached his goal and worthily adorned this, the greatest law-making body in the world. He fought valiently for the best interests of his district; but he was more than a Representative of the nineteenth Ohio district. He concerned himself for the general good of all the people.

I do not believe there are a half dozen Members of Congress to-day who are better informed on the subject of rural credits than was our late colleague. He studied the question deeply and devotedly. He believed in it. He talked it intelligently and insistently, and much of the credit for this law can be laid at his door, although the legislation was enacted during the Sixty-fourth Congress.

He was early an ardent advocate of a big Navy. Before war was declared by Germany on our allies his friends dubbed him "Battleship BATH" because of his intense concern in this now vital question. He had both brains and vision. He was a writer and author of no mean ability. His book, Please Don't Worry, is a gem worthy to adorn any library. Last summer he ran across some old manuscript written 25 years ago which was eagerly accepted by a prominent publication at so much per line. He had a fertile brain, a fluent tongue, a ready pen; but, best of all, a warm and sympathetic heart, a generous disposition. Void of deceit and hypocrisy he was steadfast and true to his friends. He was conscientious in his every act, open always to conviction, but when once firmly convinced that he was right was a most determined contender. He possessed so much to be commended and so little to fault, and his virtues so bedimmed his frailties, that I will ever hold in fond recollection the memory of my good friend, ELLSWORTH R. BATHRICK.

Mr. BARNHART. Mr. Speaker, "God moves in a mysterious way His wonders to perform," is a truism that more fully impresses us each succeeding year of our lives. I once passed through the ordeal of standing at the bedside of one very dear to me and day after day watching the peaceful ebb of a life of usefulness and happiness at a time when it seemed that the very fullness of life's possibilities ought to be shedding their radiance where the shades of death were surely falling. I looked about me and saw the hopeless and the friendless anxious to be called from their distress and despair. I saw the dissipated and the loafer—men and women living with no purpose except their own selfish pleasures or the gratification of base desires—and I saw the careless and the pampered reveling in daily nothingness. Then I compared the helpful and happy life going out with those which were to live on in helplessness and carelessness and uselessness, and I said, surely "God moves in a mysterious way His wonders to perform." And the wonder of taking the happy and the helpful and leaving the miserable and the slothful abides with me on and on, mysterious and incomprehensible.

So when I see a man like Congressman BATHRICK, in the very prime of life, and who has risen to a place of helpfulness for his fellow man, called by death, I look at fate and stand in mute bewilderment.

I knew Mr. BATHRICK well, but not intimately. I knew him as an industrious, conscientious man, who, when he made up his mind what he thought was right, fought for it with an open intrepidity always commanding, although not always persuasive. Was he industrious? Yes. Was he honest? Yes. Was he dependable? Yes. Was he moral? Yes. Was he true to his convictions? Yes. Was he fearless? Yes. Was he solicitous for the welfare of others? Yes.

What higher personal tribute, then, could we pay him? He was not a politician in the sense that he would sacrifice conviction for policy; and he was not a trimmer, setting his sails for every popular wind that blew. He had honest convictions and often expressed them in manner not conducive to disarming his opponents, but always with an earnestness that left no doubt of his sincerity and his devotion to his conclusions.

Such a man is always a benefactor to a community or to any assembly of people's delegates. He is never awed by place or power, and usually he is heedless of fame or oblivion. He goes ahead, out in the open, in sight of his people and his God, and does his best with the instruments of justice and logic with which his Maker has endowed him. And his pæans of praise will always be eloquent with plaudits of a free people who honor a man who has convictions and is not afraid to express them.

Mr. BATHRICK was primarily a business man, and he came to Congress as a Representative of a large business constituency in his home city of Akron. He talked much of the business and labor interests that he represented in the National Congress, and yet he was more than a business man—he was an humble philanthropist. He always had a ready offering for the "down and out" and the deserving in want. I have many times seen the Salvation Army lassies canvass crowds with their inverted tambourines, and they never appealed to BATHRICK in vain; and the professional beggar found him an easy mark. Moreover, he took much interest in the idealistic and the impressive in oratory and literature. I once told him of a wonderful word picture I heard a great man paint of the duty of human life and the end of it; and he asked me to please put it in manuscript form; and I did so, as I could best recall; and he often referred to it as a most impressive admonition for us to observe. It was a discourse on the importance of men and women honestly earning and saving money to be used in the world's work—in charity, benevolence, education, and assistance and relief of humanity generally. And after the speaker had gone into the realm of financial endeavor and pointed out the right and wrong of money making and money spending he said he always felt that the men and women who struggled hard to get dollars so as to hoard them for heirs to quarrel over after they had passed on, would better never have been born. For when money has been made and we have

accomplished most of our desires, "Watchman, what of the night?" After we have accumulated wealth, after we have surrounded ourselves with home and family and friends, after we have achieved distinction in professional or scholastic endeavor, and after we have stood in the leadership of men in social and political power; after all of these and probably many more accomplishments, there will come a day when we will weary of it all, and when that day comes we will lie upon a couch that has always furnished us refreshing rest, we will toss feverishly and fretfully about, we will be surrounded by the family and friends that have been our mainstay of strength always, and we will be attended by the most eminent medical skill our abundance of money can employ. But in the midst of these earthly agencies of help we will suddenly turn our backs upon it all and beseechingly implore:

Other refuge have I none;
Hangs my helpless soul on thee.
Leave, oh, leave me not alone,
Still support and comfort me.

Mr. BATHRICK often spoke of this reality, that must come to all of us, as one of beautiful conception for those who live right and one that should be impressed on everybody; and a man with such reverence and thoughtfulness for his final responsibility could scarcely be anything else in his heart than a noble type of upright citizen and American manhood.

And so, hail and farewell to another life we knew and which made its impress for better things in the world. In the hurly-burly of our busy lives frequently we do not see the high qualities in the lives of our friends many times until it is too late to show them loving appreciation and to give them the bouquets of gratitude which humanity owes to them.

Lord God of hosts be with us yet,
Lest we forget, lest we forget.

Mr. SWITZER. Mr. Speaker, the announcement of the death of our lamented colleague, the late Representative of the fourteenth congressional district of Ohio, came to me as a great surprise and left in its wake the deepest sorrow.

I had not been apprised of his long and serious illness, of which I later learned, and I therefore was wholly unprepared for the most unwelcome message. But this merely illustrates the usual human frailties and our general unwillingness to believe that the final summons ever hovers near.

It was my good fortune to have had more than a casual acquaintance with our deceased colleague, as we lived for quite a while at the same hotel during a part of the long session of the Sixty-third Congress. I well remember that during some of the monotonous periods of that session, when the House was marking time waiting on the Senate, we frequently enjoyed summer evening strolls upon the beautiful avenues and streets of the Capital City. On these occasions we freely spoke our minds upon the various public questions of the day and the current events. It was then that I became impressed with his comprehensive vision and analytical mind, as well as with his winning colloquial powers, and it was then that I learned to admire his independent thought and frank expression upon the topics of the day.

No party man was less hampered by party ties or partisan motives when approaching the discussion of a public question than Hon. ELLSWORTH R. BATHRICK; and when debate had ended and the time arrived for casting the final vote on a pending measure, no Representative of this or any other Congress was freer from party restraint or ever recorded a more sincere conviction.

He never allowed political expediency to interfere with or in any wise warp his judgment in the discharge of public duty; and wherever duty demanded his presence, whether in the halls of legislation or on the public rostrum in a political campaign or in some great civic movement, he never hesitated to courageously come to the fore and express his conscientious convictions, regardless of popular opinion.

A close observer and a diligent searcher for the truth, a student of social conditions, as well as exclusively political propositions, and quick to notice the evils flowing from many existing industrial, economic, and imperfect governmental conditions, his philosophical mind was ever at work devising some legislative scheme for their amelioration, a possible remedy for the passing wrong.

He was an indefatigable worker, and his well considered conclusions on matters public and private were highly prized and much sought after by his friends, both in and out of Congress. His work bespoke a promising legislative career.

But in the prime of manhood and in the middle of his chosen work his earthly career was suddenly ended by the grim reaper, whose deathly scythe is so swiftly and surely garnering the present generation, as well as it has the past, to the home of the fathers. His presence among us will be no more; his ever-generous welcome and hearty handshake will undoubtedly be missed; but our minds will often recur to his manly form and stately bearing, his clean and honorable life; and our memories will be frequently blessed with the recollection of his delightful company and inspiring association.

With these feeble tributes to his memory, and having an abiding hope that all may be well with those whom he sincerely cherished, especial the one nearest and dearest to his heart—his wife—we trust that his spirit may dwell in that land where pain and sorrow are unknown and joy and friendships never cease.

Mr. SNOOK. Mr. Speaker, it has been made plain by what my colleagues have said that in the death of ELLSWORTH R. BATHRICK the cause for which we as a people are fighting has lost one of its most active friends and supporters. It was not my pleasure to have the intimate acquaintanceship with him that has come to some of our colleagues, for I did not have the privilege of serving with him in the Sixty-second and Sixty-third Congresses. The first time I ever remember meeting him was in Ohio while he was a candidate for Congress in the campaign of 1910. The very first conversation I had with him impressed me that he was a man of courage and conviction. I came to know him better later, and after serving with him in the extra session of the Sixty-fifth Congress I believe I might be able to say that I came to know him as a friend.

The custom so long observed by the House, when one of its Members is taken away, to lay aside all work and pay respect to his character and achievement is to my mind one of the most fitting that it has ever instituted.

The association among Members, even from the same State, is not so close as I believe it should be to bring about that friendship which should obtain; a closer association would often lead to a knowledge of the aims and purposes of each other and result in much good to all of us. And yet, even with that want of close association which prevails in this body, one could not help being impressed with the personality of ELLSWORTH R. BATHRICK.

His habits of industry and the vigor and courage with which he expressed his views made one understand that he possessed a strong vitality; and therefore the news of his illness and death came as a shock and surprise to all of us. I shall always remember him from the picture impressed upon my mind by seeing him in action, pressing home with all the vigor he possessed the weight and force of some truth as it presented itself to his mind.

He was logical and forceful, and always stated his opinions with courage. He was kind and courteous to his friends and associates, but when engaged in a controversy over any question before the House he defended his views without fear and with a courage that commanded the respect of his associates.

A glance at his history as detailed in the Congressional Directory shows the successive steps by which he gained a seat in this body. First, farmer boy, then pupil in a country school, high school, and business college, with a postgraduate course in the school of experience as a business man.

I am sure you will agree with me if we could round out this brief statement of his achievement by the details from his own lips of what it cost in labor and sacrifice the story would be an inspiration to the young men of his district and the country.

In traveling the road which leads from the farm to the House of Representatives he learned in the school of experience that the obstacles necessary to be overcome could be removed only by making such sacrifices as were necessary to build a character that would stand every test. That he was successful in building such a character is proven by the fact that though he was a Democrat he was three times elected to Congress in a district where a great majority of the voters adhered to the policies advocated by the opposing party.

I have no doubt that it was the courage and the sincerity of the man that enabled him to gain and hold the confidence of his people. He was the type of man that the President had in mind when in one of his speeches he gave expression to this thought:

We shall fight for the things which we have always carried nearest our hearts—for democracy, for the right of those who submit to authority to have a voice in their own government.

He was intensely loyal to his Government, for there was no man in the House who took a firmer stand in support of the conduct of the war. He had no patience with its critics, and always stood ready to make any sacrifice that might be necessary to bring the war to a speedy and successful conclusion. The death of a friend like this, just as he had reached the hour of his greatest opportunity for service, while life was full of promise for future achievement, brings one face to face with the greatest of

all mysteries and fills one with a longing for an answer to its challenge.

Shall we stop here and in anguish at our loss acknowledge that there is no solution and no hope for an answer? I love to believe that there is reason in the thought that comes to every one of us at this time; that surely all this toil and sacrifice have not been in vain; that somehow there will be found in God's infinite plan a way to give full expression to that which, on account of the brevity of life, he was able only partially or feebly to express.

Faith makes us bold to speak of this thought, but understanding is too feeble to aptly express it in language. Many have sought to illustrate it by turning to the laws of nature, and this method is now suggested to my mind.

This has been a bitter winter, though it has seemed to lay the icy finger of death on shrub and flower; yet even now we begin to feel the call of spring; "we know the manner in which she has stored up sunshine, leaves, and blossoms;" we know that the bulb and twig which now seem dead will answer to the call of life and deck themselves with leaves of rich green and flowers painted from God's own urn of infinite colors.

So the same faith lends us to believe that the life which failed to reach its full fruition here will blossom and bear full fruitage in a life to come. Nothing can fill the loss that comes to those whom he left to bear life's battles alone; yet to the afflicted there is solace and comfort in the thought I have tried to convey, which is so beautifully and clearly expressed by Whittier, the poet of faith:

> But still I wait with ear and eye
> For something gone which should be nigh;
> A loss in all familiar things,
> In flower that blooms, and bird that sings;
> And yet, dear heart, remembering thee,
> Am I not richer than of old?
> Safe in thy immortality,
> What change can reach the wealth I hold?
> What chance can mar the pearl and gold
> Thy love hath left in trust with me?
> And while in life's late afternoon,
> Where cool and long the shadows grow,
> I walk to meet the night that soon
> Shall shape and shadow overflow,
> I can not feel that thou art far,
> Since near at need the angels are;
> And when the sunset gates unbar,
> Shall I not see thee waiting stand,
> And, white against the evening star
> The welcome of thy beckoning hand?

Mr. GARD took the chair as Speaker pro tempore.

Mr. OVERMYER. Mr. Speaker, the loss of our friend and colleague, Congressman BATHRICK, is the first death in the Ohio delegation in Congress since I have become a Member of the House. To me it seemed like the breaking of a circle, the loss of a member of our official family, the parting with a brother. I can still scarcely bring myself to realize that he is dead.

But I know the sad truth. I know it is so. Sorrowfully we filed past his coffin and looked for the last time on the features of our comrade and friend. Soon thereafter the words "earth to earth, dust to dust," were spoken over his grave and all that was mortal of ELLSWORTH R. BATHRICK was hidden from our view forever, and "the places that knew him shall know him no more."

We have assembled here to-day to pay our respects to his memory—a solemn and sacred duty, a duty that to be performed in keeping with the sentiments to which it gives rise must be done with bowed heads and hearts filled with humility. Our colleague has met that sublime and universal moralist—Death; that great teacher who speaks in a voice which none can mistake, who comes into our midst with a power which none can resist, and, despite our protests and our tears, our pleadings and our prayers, removes those whose words have been a cheer and whose presence has brought exultation. This stern messenger, this mysterious agent of Omnipotence, has come among our numbers and laid his withering hand upon one whom we had learned to honor and respect. Our colleague has gone the way of all the earth, with his good deeds left to cheer us onward and upward, his errors and shortcomings buried within the silent chamber to which his body was consigned.

But there is consolation in the thought that the influence of our friend still abides with us, even though he is no longer here; and to-day, as we contemplate upon the removal from our midst of our colleague and friend, we mourn his departure but glory in the presence of his benign influence. The influence of the dead upon the living is a powerful one. The relations between man and man cease not with life. The dead leave behind them their memory, their example, and the effect of their actions. Their influence still abides with us, their names and character dwell in our thoughts and in our hearts. Those whom we have loved in life are still objects of our deepest affections. Their power over us remains. They are with us in our solitary walks and their voices speak to us in the silence of midnight. The world is filled with the voices of the dead. They speak to us in a thousand remembrances, incidents, events, and associations; and the world is filled also with their labors. Almost all the literature in the world, the discoveries of science, the glories of art, the ever-enduring temples, the comforts and improvements of life—in fact, the very framework of society, the institutions of nations, the fabrics of empire—all are the works of the dead. By these they who are dead yet speak.

If this were not true the death of a person would be absolutely the end of that individual, just as the destruction of any earthly thing removes it from our thoughts. But the human body is more than clay. There is within that body a soul, something separate and apart from the body itself, which we love and cherish even after death. Not so with the destruction of earthly things. When the ingenuity of man raises before our eyes a twenty-story structure, we stand in awe and admiration and behold the beauties of that building with something akin to reverence; but when the flames and earthquake in their wrath reduce that stately structure to ashes and ruins we do not place upon that pile of brick and mortar a wreath of mourning. We console the owner in his loss but shed no tears of grief. But when we stand above the last resting place of one who in life was dear to us, we feel how keen was our loss in his death; and, as we place upon that grave sweet tokens of love and memory, we whisper to the soul that we feel is present "I love thee still!"

The sorrow for the dead is the only sorrow from which we refuse to be divorced. The love that survives the tomb is one of the noblest attributes of the human soul. Where is the mother who would willingly forget the tender infant that perished like a blossom from her arms, though every recollection is a pang? Where is the child that would willingly forget a tender parent, though to remember is but to lament? When grief and anguish are calmed into gentle tears of recollection, it may sometimes throw a cloud over the hour of gayety or throw a deeper shadow over the hour of gloom; but there is a voice from the tomb sweeter than song, a remembrance of the dead to which we turn, even from the charms of the living.

What a splendid time for meditation, then, it is when we call up in long review the history of the virtues and gentleness, the thousand endearments lavished upon us by departed friends, almost unheeded in the daily intercourse of intimacy. This is a good time for us to settle the accounts with our consciences for every past benefit unrequited and every past endearment disregarded. If you as a child have added a sorrow to the soul or a furrow to the silvered brow of an affectionate parent; if you as a husband have ever caused the fond bosom that ventured its happiness in thy arms to doubt one moment of thy kindness; or if you as a friend have ever wronged in thought or word or deed or have given one unmerited pang to any true heart that now lies cold, resolve henceforth to be more faithful to the living.

The desire to live is the strongest desire implanted in the human heart. In youth and middle life no struggle is too great for us to make in our effort to retain life. But as age advances this desire grows less and less insistent. God has a way of weaning us away from the desire to live. Our mental powers fail, the eyes grow dim, the limbs feeble, and our capacity for enjoyment of life grows limited, and then, indeed,

> Death is beautiful as feet of friend,
> Coming with welcome at our journey's end.

Our colleague had not reached that period in life when his usefulness was over. On the contrary, he was just at the zenith of his ability and power to do good. Why he was taken at this time we do not know; we only know he was taken. When our own summons shall come we do not know; that it will come we do know. Our plain duty then is to have our houses in order, to do all the good we can in every moment that is given us.

Concerning our colleague's religious views I know nothing. A man's professions are not always the fairest judgment of his character or faith. Basing my judgment of him upon a brief personal acquaintance and upon sentiments expressed by him in a published volume, I believe he most fairly represented the true spirit and teaching of the great Master, that spirit of charity for all mankind "which suffereth long and is kind, which thinketh not of itself but of the welfare and happiness of others."

In a small volume entitled "The Don't Worry Book," published by Mr. BATHRICK a few years ago, we find, among others, the following gems:

> In the remote past we began to live. The first birthday was far back, at some crossroad of time. The wonder-working matter of the ages, the teachings of savants, the clash and death grapple of armies, the upheavals of nature, the admixture of races, the inventions of man, and dispensations of God have shaped our course.
>
> Is it not the better plan to follow it calmly, making the most of what we are, and without futile rebellion?

Even beyond death, Hope holds out its promise. So do we follow on through the inexplicable labyrinth of life. Footsore and weary though we be, we must travel bravely on.

We know that sometime we shall enter into the deeper puzzle of the Realm of Silence, and when that hour arrives the messenger of the Shadowy King, clothed in the glorious garb of Hope, will take us by the hand and lead the way. But while we remain to tread the tortuous paths and the life-soul hungers for human things, it shall not be always in vain.

—

Above all, learn to forget. Forget the wrong, but be wary of he who inflicted it. Do not hate. It will give you more worry than the object of it. Forget all that is useless. It is the discarding of the dross of life, the casting aside of used timber to make way for the new.

Our lives should not be overcast by gloom of the past or future. Neither possesses the substance of the present. Both are mere reflections. The past should reflect the light of pleasant memories upon the present, and contemplation of the future should shed its rays of hope upon our to-day.

There is no shadow without light. Turn yourself around.

—

Disposing of yesterday as material only for pleasant meditation, center your mind upon to-day as the sole period of your activities. Resolve that you will absorb only the good and will discard the bad.

Having been loyal to resolution, lie down at night and sleep, gathering from the peace of slumber new vigor for brain and body. Sleep is the anodyne of tribulation. In the darkness of your chamber do not call upon the mind to see that which the eye can not.

—

Fortified in your endeavor by this valiant aid, don the armor of High Resolve and fare forth to the battlefields of life ready to receive or give blows in the conflict. It is childish to wish for triumph and fear defeat. It is cowardly to take winnings and whimper at losses.

—

Put the bricks on the wall to-day where, according to your best judgment, they should be. If the future brands your labor as error, still forget, still endeavor. Put aside puerile self-condolence for real or imaginary misfortunes. It is sufficiently weakening to have friends sympathize with us, but much more so when we sympathize with ourselves.

—

When you pity yourself, look about you and see the brave smiles upon the faces of those who have met with a fate worse than yours. There are millions of other human souls whose unsatisfied desires are as your own.

Bear in mind, Fate may be friend as well as foe. The condition which you worry about may be a kindly circumstance in the plot to be yet unraveled. There are other pages in the book of life which you have not read.

—

We must pay. Eternal Justice will keep a fair account, and we shall also be paid. For every pain we shall receive a joy, and they will be fairly measured.

Our accounts must balance in the great summary of deeds of kindness, of pleasant words, of selfishness, of intolerance.

—

Memory should be a golden cord, glimmering back to the vanished hours, connecting our hearts with the smiles of loved ones, with the exaltations of success, and the joy of conquered obstacles.

Forget the losses, the dark and rugged road, the storms, disappointments, and failures. Drive them from your mind into oblivion. Say unto them, as you would say to Satan: "Get thee behind me!"

Surely, my friends, the sentiments which I have just read, and of which Congressman BATHRICK was the author, are sentiments to which all of us can subscribe. To him a creed or a ritual would mean but little. But a broad faith in fundamentals, a belief in God and his fellowmen, practicing charity, dispensing cheer, building up hope, he presents a character based upon a firm and safe foundation; and I can testify that in his life he exemplified the sentiments he proclaimed. I shall remember ELLSWORTH R. BATHRICK as a courageous, able, sincere, manly man, a conscientious and honest public servant, a loyal and patriotic citizen, and a true friend. His death is his own victory; the loss is ours.

What is Death? 'Tis to be free!
No more to love, or hope, or fear—
To join the great equality.
All alike are humble there!
The mighty grave
Wraps lord and slave;
Nor pride nor poverty dares come
Within that refuge-house, the Tomb!

Mr. SHERWOOD. Mr. Speaker, ELLSWORTH R. BATHRICK belonged to that class known as self-made men. His educational qualifications were in the common schools, the high school, and the commercial school. Like all self-educated men, he was thoroughly practical and thoroughly imbued with that knowledge that counts best in the business and commercial world. During his three terms in Congress, Mr. BATHRICK made a record as a capable and successful Member and accomplished results in valuable and vital legislation not excelled by any Member of equal service since the Civil War.

It is conceded that a college education is a help to a public man, but not a necessary help to the highest achievements, either in law, legislation, or the broad domain of civics. To illustrate, George Washington, the foremost general and statesman in the epoch of the War of the Revolution, was very moderately educated. Gen. Grant, who, in his time, was the foremost man of all the world, was only moderately educated, except as a cadet of West Point Military Academy. Gen. Jackson, born in poverty and poorly educated, was twice President and the foremost man of two generations. Henry Clay, born poor, self-educated, was the foremost orator of his time and the idol of his party. Abraham Lincoln, born in a log cabin, who learned to read books at night by the light of a pine-knot fire, who in youth never saw the inside of a university, was the foremost statesman and the popular idol of his country.

This is a fitting time, on this sacred memorial day, to make the occasion an object lesson of value to the living.

Mr. BATHRICK's career as a young man, struggling against what seemed an adverse fate, should prove a valuable and a hopeful incentive to every poor young man with an ambition for an honorable career.

The brightest gleam of hope for the poor young man of to-day is the knowledge that the greatest men who have ever served or honored the high places of power in this Republic were born poor, with limited opportunities for a liberal education.

Few of Mr. BATHRICK's colleagues knew of his literary genius. That was because of his innate modesty. Let me tell the story, as it is fitting here.

About 25 years ago, when Mr. BATHRICK was a reporter on a Cleveland newspaper, he wrote the text of a very beautiful children's story, but was dissatisfied with it, and in his youthful modesty threw it into a trunk with a number of other papers; and there it lay for all these years until a couple of years ago, when he found it in looking over the accumulations in the trunk. He showed it to a friend jokingly, remarking about his literary ambition as a youth. His friend, however, was interested, and reading the manuscript was at once impressed with the beauty and literary merit of the story, and urged that he submit it to a publisher. Mr. BATHRICK was inclined to laugh away the idea, but the friend persisted, and, to oblige him, Mr. BATHRICK sent it to a New York publishing house. Shortly thereafter he received a letter highly commending the manuscript and suggesting a revision and expansion with the view to publishing it as a book. Mr. BATHRICK's health at that time was poor—this was during his first term in Congress—and he improved the opportunity afforded by a winter in Florida, where he was seeking to recover his health, in rewriting and supplementing the story. It was then sent to the publishing company, accepted, and only recently was published in book form. Mr. BATHRICK derived more real pleasure from this achievement, he confided to his friends, than from any success he had achieved in business or in politics. The story was a delightfully imaginative one, such as might honor the pen of Hans Christian Andersen or any other creator of those delightful children's stories.

For the above I am indebted to Mr. Carl D. Ruth, an accomplished Washington journalist and correspondent.

To write a successful children's story requires deep sympathy and kindly humane instincts. Our departed friend had these commendable qualities, added to an alert mind, a courageous determination to do his duty to his constituents, coupled with high practical ideals—all learned in the rugged school of experience.

On this sacred Sabbath day, in this historic Chamber, let us consecrate ourselves to that fervent patriotism, that high purpose to serve the people we are honored to represent with the fidelity and courage which characterized our departed friend—a colleague whose friendship added to our joys of living and whose example and character give us hope to achieve the best ideals in popular government.

ADJOURNMENT.

The SPEAKER pro tempore. In accordance with the resolution heretofore adopted the House will stand adjourned.

Accordingly (at 1 o'clock and 20 minutes p. m.) the House adjourned until to-morrow, Monday, February 11, 1918, at 12 o'clock noon.

SENATE.

MONDAY, *February 11, 1918.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, the Father of our spirits, the Author of every good and perfect gift, with Thee we have to do, for Thou art the Judge of men, and our lives and destinies are in Thy hands. We recognize Thee; we acknowledge Thee to be the Lord. We pray that according to the precious promise of Thy word Thou wilt direct our steps. For Christ's sake. Amen.

The Vice President being absent, the President pro tempore [Mr. SAULSBURY] assumed the chair.

The Secretary proceeded to read the Journal of the proceedings of Friday last, when, on request of Mr. VARDAMAN and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the joint resolution (S. J. Res. 128) granting to certain persons in the active war service an extension of time within which application for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917.

The message also announced that the House agrees to the amendments of the Senate to House concurrent resolution 33, providing for the printing of extra copies of the Income-Tax Primer for the use of the Senate and House of Representatives.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 9314. An act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1919;

H. R. 9506. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors;

H. R. 9612. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; and

H. R. 9641. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors.

The message also announced that the House had passed a concurrent resolution providing that the two Houses of Congress assemble in the Hall of the House of Representatives on Monday, the 11th day of February, 1918, at 12 o'clock and 30 minutes in the afternoon, for the purpose of receiving such communication as the President of the United States shall be pleased to make to them, in which it requested the concurrence of the Senate.

ENROLLED RESOLUTION SIGNED.

The message further announced that the Speaker of the House had signed the enrolled joint resolution (S. J. Res. 128) granting to certain persons in the active war service an extension of time within which application for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917, and it was thereupon signed by the President pro tempore.

JOINT MEETING OF THE TWO HOUSES.

The PRESIDENT pro tempore laid before the Senate the following concurrent resolution (No. 35) of the House of Representatives, which was read:

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Monday, the 11th day of February, 1918, at 12 o'clock and 30 minutes in the afternoon, for the purpose of receiving such communication as the President of the United States shall be pleased to make to them.

Mr. MARTIN. I move that the Senate agree to the concurrent resolution of the House of Representatives.

The concurrent resolution was agreed to.

PETITIONS AND MEMORIALS.

Mr. McCUMBER. I present a resolution from the North Dakota Branch of the Association of Collegiate Alumnæ, which I ask may be printed in the RECORD without reading. It is very short.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

GRAND FORKS, N. DAK., *February 2, 1918.*

Senator PORTER J. McCUMBER,
Senate Office Building, Washington, D. C.

DEAR SIR: At the regular monthly meeting of the North Dakota Branch of the Association of Collegiate Alumnæ, action was passed unanimously in favor of the Federal suffrage amendment, and the secretary was instructed to advise you of this action, which was as follows:

"*Resolved*, That the North Dakota Branch of the Association of Collegiate Alumnæ urge the Senate of the United States to pass the Federal suffrage amendment at this session of Congress in order to establish at home that democracy for which the men of this country have been called to fight abroad.

"*Resolved*, That the North Dakota Branch of the Association of Collegiate Alumnæ earnestly request that this resolution be presented to the Senate of the United States and that it be read into the CONGRESSIONAL RECORD."

The North Dakota branch urges you in particular, Mr. McCUMBER, to vote "yes" on the Federal suffrage amendment when it comes up for action in the Senate at this session of Congress, and also urges you to do all in your power to secure its passage in the Senate.

Will you please state what your attitude is in this matter and what you are willing to do for the passage of the Federal suffrage amendment at this session of Congress?

Very truly, yours,

MARY E. McCUMBER,
Secretary North Dakota Branch Association Collegiate Alumnæ.

Mr. JONES of Washington. I have a telegram from the Central Labor Council of Tacoma, Wash., representing 16,000 workers, protesting against the action of the Committee on Agriculture and Forestry upon the Borland amendment. I move that it be referred to that committee.

The motion was agreed to.

Mr. JONES of Washington. I also have a telegram from D. C. Imrie, president of Federal Employees' Union No. 9, of Tacoma, Wash., expressing disappointment at the action of the Committee on Agriculture and Forestry upon the Borland amendment, and also a telegram from Henry A. Monroe, president of the Federal Employees' Union, of Seattle, urging the nonadoption of the Borland amendment. I move that the telegrams be referred to the Committee on Agriculture and Forestry.

The motion was agreed to.

Mr. PHELAN presented a petition of the Labor Council of San Francisco, Cal., praying for an increase in the salaries of postal employees, which was referred to the Committee on Post Offices and Post Roads.

Mr. THOMPSON presented a memorial of the Kansas Editorial Association, of Alma, Kans., remonstrating against any change in the present law relative to second-class postage, which was referred to the Committee on Post Offices and Post Roads.

Mr. MYERS presented resolutions adopted by the Commercial Club of St. Ignatius, Mont., favoring an appropriation of $750,000 for work on the Flathead reclamation project, in that State, which were referred to the Committee on Indian Affairs.

Mr. TILLMAN. I present resolutions adopted by the Chamber of Commerce of Rock Hill, S. C., which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Resolved: First. That the Chamber of Commerce of Rock Hill, representing the crystallized public opinion of this section of South Carolina, tenders to the President of the United States and those charged with the administration of public affairs, its sympathy in this time of profound national stress, its confidence in their ability and integrity of purpose, and pledges anew its loyalty to the Government of the United States and the great principles for which this world war is being fought.

Second. That the Hon. B. R. TILLMAN, the distinguished Senator from South Carolina, is requested to convey this expression of our sentiments to the properly constituted authorities at Washington.

Mr. LEWIS. I present a memorial from the Hungarian Union, of Illinois, pledging their loyalty to the Government, which I ask may be referred to the Committee on Foreign Relations.

The PRESIDENT pro tempore. It will be so referred.

LINCOLN AND DEMOCRACY.

Mr. LEWIS. Mr. President, while I am on my feet may I, sir, give notice that I purpose in the morning, after the end of the routine business, to deliver a short address upon Lincoln and democracy in commemoration of the day, it being Lincoln's birthday?

RAILROAD CONTROL.

Mr. KELLOGG. Mr. President, I give notice that on Wednesday, after the close of the business of the morning hour, if opportunity permits, I shall address the Senate on the subject of the railroad bill, now pending before this body.

REPORTS OF COMMITTEES.

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 3299) authorizing the President to reappoint Maj. Chalmers G. Hall, retired, to the active list of the Army (Rept. No. 268);

A bill (S. 3433) requiring the Government to furnish uniforms to officers of the Army, and for other purposes (Rept. No. 256);

A bill (S. 3527) to amend an act entitled "An act to provide for the settlement of the claims of officers and enlisted men of the Army for loss of private property destroyed in the military service of the United States," approved March 3, 1885 (Rept. No. 257);

A bill (S. 3691) to provide for reimbursement of actual expenses or flat per diem for enlisted men of the Army traveling on duty under competent orders (Rept. No. 258);

A bill (S. 3693) to prescribe the personnel of the Army Nurse Corps, the qualifications for appointment and the method of

appointment therein, the pay, allowances, and leave of absence of members of said corps, and the conditions under which they may be retired (Rept. No. 259);

A bill (S. 3736) to provide for the payment of six months' pay to the widow, children, or other designated dependent relative of any officer or enlisted man of the Regular Army whose death results from wounds or disease not the result of his own misconduct (Rept. No. 260);

A bill (S. 3779) to create in the Army the grades and establish the pay of first-class bugler and corporal bugler, to increase the pay of buglers, and for other purposes (Rept. No. 261); and

A bill (S. 3780) to authorize the appointment of officers of the Philippine Scouts as officers in the militia or other locally created armed forces of the Philippine Islands drafted into the service of the United States, and for other purposes (Rept. No. 262).

He also, from the same committee, to which was referred the joint resolution (S. J. Res. 123) providing for the calling into immediate military service of certain classes of persons registered and liable for militray service under the terms of the act of Congress approved May 18, 1917, entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States," reported it with amendments and submitted a report (No. 263) thereon.

Mr. MYERS, from the Committee on Public Lands, to which was referred the bill (S. 3797) validating certain applications for and entries of public lands, and for other purposes, reported it without amendment and submitted a report (No. 264) thereon.

Mr. GORE, from the Committee on Agriculture and Forestry, to which was referred the bill (H. R. 9054) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1919, reported it with amendments and submitted a report (No. 267) thereon.

Mr. JOHNSON of South Dakota, from the Committee on Pensions, submitted a report (No. 265), accompanied by a bill (S. 3798) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, which was read twice by its title, the bill being a substitute for the following Senate bills heretofore referred to that committee:

S. 73. Abel H. Hall.
S. 139. Frankie Esselstyn.
S. 197. Samuel Breitigan.
S. 240. Edward Sweeney.
S. 331. Arthur Rose.
S. 477. Lucie Kellogg.
S. 588. William P. Robinson.
S. 675. William D. Harrington.
S. 687. Fannie H. Maffitt.
S. 765. Minnie H. Wolf.
S. 882. Charles E .Sanders.
S. 912. John M. Dikes.
S. 981. James W. McKay.
S. 996. Adam S. Bridgefarmer.
S. 1174. Charles H. Ferriss.
S. 1177. Van Ogle.
S. 1242. Reuben Waller.
S. 1443. Thomas M. Woods.

RAILROAD CONTROL.

Mr. CUMMINS. I present my minority views (S. Rept. 246, pt. 2) upon Senate bill 3752, commonly known as the railroad bill, and ask that they be printed.

The PRESIDENT pro tempore. That order will be made.

BILLS INTRODUCED.

By Mr. CHAMBERLAIN:

A bill (S. 3800) to provide for restoration to their former grades of enlisted men discharged to accept commissions, and for other purposes;

A bill (S. 3801) to amend section 8 of "An act to authorize the President to increase temporarily the Military Establishment of the United States," approved May 18, 1917;

A bill (S. 3802) authorizing appropriations made for the national security and defense to be used for the purchase of real estate, or the use thereof, when such purpose is not specifically stated in said appropriations; and

A bill (S. 3803) authorizing the President during the existing emergency to sell war supplies, materials, and equipment heretofore or hereafter purchased, acquired, or manufactured by the United States; to the Committee on Military Affairs.

A bill (S. 3804) to provide for the regulation of stockyards, corrals, and other places where animals are collected or exhibited for public sale, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. SMITH of Georgia:

A bill (S. 3805) to establish engineering experiment stations in the States, Territories, and the District of Columbia in connection with State supported universities or engineering schools for the promotion of engineering and industrial research as a measure of industrial military, and naval preparedness in times of peace or war; to the Committee on Education and Labor.

By Mr. McCUMBER:

A bill (S. 3806) conferring jurisdiction on the Court of Claims to permit the Yankton and Cuthead Bands of Sioux Indians to intervene in the action of the Sisseton and Wahpeton Bands of Sioux Indians against the United States (Docket No. 33731) and to hear, determine, and render judgment in said action in claims of Yankton and Cuthead Bands of Sioux Indians against the United States; to the Committee on Indian Affairs.

By Mr. THOMAS:

A bill (S. 3807) to appoint Col. D. L. Howell a brigadier general on the retired list (with accompanying papers); to the Committee on Military Affairs.

By Mr. SHEPPARD:

A bill (S. 3808) to amend an act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1918, and for other purposes"; to the Committee on Post Offices and Post Roads.

By Mr. GALLINGER:

A bill (S. 3809) granting an increase of pension to Elijah C. Lawrence (with accompanying papers); to the Committee on Pensions.

By Mr. SUTHERLAND:

A bill (S. 3810) granting an increase of pension to Edward A. Hamner to the Committee on Pensions.

By Mr. BORAH:

A bill (S. 3811) granting an increase of pension to Matthew W. Clark (with accompanying papers); and

A bill (S. 3812) granting an increase of pension to Edward A. Rowley (with accompanying papers); to the Committee on Pensions.

By Mr. FERNALD:

A bill (S. 3813) granting an increase of pension to Thomas B. Wiggin, jr.;

A bill (S. 3814) granting a pension to Clarence M. Smith (with accompanying papers);

A bill (S. 3815) granting a pension to Philomene Dawley (with accompanying papers);

A bill (S. 3816) granting an increase of pension to Andrew J. Martin (with accompanying papers);

A bill (S. 3817) granting an increase of pension to Charles J. Higgins (with accompanying papers);

A bill (S. 3818) granting an increase of pension to James J. Hamilton (with accompanying papers);

A bill (S. 3819) granting an increase of pension to Lydia Wixon (with accompanying papers); to the Committee on Pensions.

By Mr. NORRIS:

A bill (S. 3820) granting an increase of pension to Charles F. Marble; to the Committee on Pensions.

RAILROAD CONTROL.

Mr. CUMMINS submitted five amendments intended to be proposed by him to the bill (S. 3752) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes, which were ordered to lie on the table and be printed.

ADDITIONAL MESSENGER.

Mr. NELSON submitted the following resolution (S. Res. 204), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Sergeant at Arms of the Senate be, and he hereby is, authorized and directed, on and after the 4th day of March, 1918, to place on the Senate rolls a messenger for the minority at the rate of $1,200 per annum, to be paid from the miscellaneous items of the contingent fund of the Senate until the 1st day of July, 1918.

LOCAL RESULTS OF PROHIBITION.

Mr. JONES of Washington. Mr. President, I have a short statement from the Washington Star with reference to local results of prohibition. It is not a discussion of any particular proposition, but a statement of the facts as shown by the record of the first three months of prohibition in the District of Columbia. I ask that it may be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows.

LOCAL RESULTS OF PROHIBITION.

Local prohibition has now been in force for three months, and the effect has already been noticeable in a diminution of the cases brought before the police court, according to figures compiled at police headquarters. These statistics show a decrease in arrests not only for intoxication but for offenses which often grow out of the use of intoxicants. Comparing the first three months under prohibition with the corresponding period of a year previous, the results are striking. There were in that time 1,664 fewer arrests for drunkenness under the Sheppard law than before it went into effect, 2,406 having been made during the "wet" November, December, and January and only 742 during the dry period.

But the most significant effect of the new condition appears in the comparison regarding arrests for offenses other than intoxication. Cases of disorderly conduct fell from 829 to 337 in this period, a reduction of 552; cases of assault fell from 423 to 205, or 218 less; housebreaking cases were reduced by 85—from 156 to 71; cruelty to animals caused 148 arrests before the "dry" law went into effect and only 77 afterwards, a reduction of 71; cases of carrying weapons fell from 47 to 39, or 8 less. The total reduction of arrests under these five headings is impressive—from 1,603 in the three months a year ago to 719 under prohibition, or 884 less. Combining all cases—intoxication and offenses often attributable to it—the result is a convincing showing of betterment—4,009 arrests under the "wet" conditions and 1,461 under the "dry" law, or a reduction of 2,548.

Considering that each arrest means work for the police, work for the court, and usually work for the custodians of those sentenced to imprisonment, and that each arrest also means loss of employment, loss of wages, and suffering for families, the net gain to the District economically is tremendous. Life and property are undoubtedly safer under the present conditions than before. If traffic in intoxicants from Baltimore were cut off, this showing on all counts would without question be much better. As it is Washington is distinctly the gainer through the enforcement of the Sheppard law.

HOG ISLAND SHIPPING PLANT.

Mr. VARDAMAN. Mr. President, it is my judgment, and I think my views are shared by every thoughtful American in or out of Congress, that the matter of most important and vital concern to this Republic at this time is the building of ships. To furnish the necessary supplies to sustain our allies in this war and provide adequate shipping facilities to carry the men and munitions for America to do the part assigned to her in this unfortunate war it will become necessary to bridge the Atlantic Ocean as it were with a chain of ships. America has the material. She has the man power to accomplish this herculean task, if our men shall go to work with the spirit of determination which the exigencies of this desperate emergency demand.

Much has been said in criticism of the laborers who refuse to do extra work at this time. We are told that instead of pulling wide open the throttle and moving with that enthusiasm and celerity which ought to characterize the efforts of every American citizen in the performance of his duty to the Nation at this time that they are inclined to hold back. I have no words of condonation for such conduct. It is unfortunate and, if willfully done, highly reprehensible. But I am inclined to think that the conduct which manifests a feeling of indifference to results on the part of the laboring men is due very largely to the greed, the grafting, the mercenary, the criminal profiteering on the part of capital, the possessors of which have vied with each other in their lip service to the Government. While these patriots for pelf are standing in the limelight of publicity proclaiming their willingness to do and to die if need be for the flag, they are receiving enormous profits from agencies which they themselves have put into operation and which are concealed from public view. The editorial from the Washington Post, which appeared in this morning's edition of that paper is pertinent, and I ask that it be read and printed in the RECORD.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Secretary will read.

The Secretary read as follows:

HOG ISLAND.

Witnesses appearing before the Senate Commerce Committee in the Shipping Board inquiry have told amazing stories of reckless extravagance in the construction of the Government's ship-fabrication plant at Hog Island, together with instances of glaring inefficiency. They have told that the price of the land upon which the plant is located was advanced 100 per cent in price within a year; of 1,300 loaded freight cars standing in the yards waiting to be unloaded, while workmen were idle and the country was staggering under a freight congestion that demanded every car available; of salaries doubled; of favoritism in contracts; of the original cost estimates vastly exceeded with the work but 60 per cent completed.

Inefficiency and profligacy of expenditures have run a race at Hog Island, it is claimed, with the result a tie. It is charged that the Emergency Fleet Corporation adopted a policy of noninterference, as a result of which this orgy of waste went on uninterrupted.

If the testimony adduced accurately represents conditions at the Hog Island yard, the inquiry undertaken by the Senate Commerce Committee has been amply justified. The country is entitled to know the facts, however disagreeable they may be.

The vital, urgent need for ships is understood by every American. The allies have impressed upon us the fact that they are more needed for the winning of the war than anything else America can produce. Everybody knows this, and knowing it everybody in official life and out of it understands that if there is one department of the Government in which efficiency is demanded above all others it is among those having charge of the construction of the ships which are to save this Nation.

Is it possible that under these conditions and with such tremendous responsibilities resting upon the United States men have dallied with this important work, have used the Hog Island project for profiteering, have trafficked in the honor and safety of the Nation? If it be true that buccaneers of business have profited unfairly in this matter, they should not be permitted to retain a dollar they have wrung from the Public Treasury, and their names should be written at the top of the scroll of infamy. The Commerce Committee should probe to the very bottom of the case and ventilate all the facts.

Mr. McCUMBER. Mr. President, may I ask the Senator a question? The editorial, I understand, is based upon testimony taken before the Committee on Commerce, which testimony shows, and shows conclusively, I think, that for this same land for which the Government paid $2,000 an acre there was an

agreement that a purchaser could have it for $1,000 an acre. It also shows that cranes were purchased by the Government for about $20,000 which were sold only a very short time ago for about $7,000.

We passed an act through Congress some time ago granting power to the administration to condemn the land and take it for the Government. We granted authority to condemn and take those cranes and any such property for what it was reasonably worth.

Now, will the Senator explain to us who is responsible for paying for this land three or four times what it is worth, and paying for those cranes from 300 to 400 per cent above their real value, when the authority was given the department to take them for what they were actually worth by condemnation, if necessary?

Mr. VARDAMAN. Mr. President, I should like to go into the discussion of this question. It is a long story of malfeasance and misfeasance, disloyalty, greed for gain, and pecuniary aggrandizement which the Commerce Committee I hope will bring to the attention of the American people. I have not words with which to condemn the loose method which has been employed in the building of that great shipping plant; but I can not oblige the distinguished Senator by going into a discussion of it now. It is not in order, and I am trespassing upon the time of the Senate to say what I have said and desire to say at this time. I arose simply to call attention to this transaction. A little later it will be my unhappy duty, or some other Senator's, to call the attention of the American people to this matter in all of its hideous nakedness.

Mr. President, I have infinite faith in the saving grace of the honesty and patriotism of the average American citizen. I believe that he loves his country with a devotion which will cause him to make readily any sacrifice necessary for the triumph of his flag and the preservation of American institutions. I believe the way to approach the average American laborer is to appeal to his patriotism, to tell him the truth, and let him know just what is demanded of him, and I believe he will do his bit with verve, energy, pluck, and pertinacity. Let him know that this is his country and that he is going to be secured a square deal and the part he is to perform in this emergency is for his own personal protection and the preservation of his Government for the good of his posterity. I would appeal to the better side of his character, to the lofty qualities of his soul.

I have no sympathy with the proposition to conscript labor. I have no sympathy with the sentiment that is being generally expressed that you can not trust without proscription the average American laboring man to perform his patriotic duty. And I will say further that you can not convert Caucasian men and women born of free parents into a vassal or a subject in one generation. You may force a man to remain in the shops a certain number of hours each day, but you can not compel him to work effectively.

He must be given a free hand; he must be treated as a citizen and not as a subject. It is his country and he is entitled to be consulted about the Government and what he himself should do. If the courts of the country should send a few of these patriots for pelf who are taking advantage of this desperate emergency to make money for themselves to the penitentiary, and if Congress should take from them the opportunity to rob and plunder the Public Treasury it will have a most wholesome and salutary effect upon the psychology of the masses. It will fire their patriotism and encourage them to heroic effort, which is necessary to meet the exigencies of the extraordinary situation.

If laborers have shown a disposition to lag when industry should characterize their conduct, it may be due to the fact that they see a few men high in business circles robbing and plundering the Government and taking advantage of war conditions to grow richer and richer still. If the ingenuity displayed in the matter of devising ways and means to get money out of the Public Treasury which has been shown by some of these plutocratic patriots of the Hog Island enterprise was displayed in the matter of building ships, we would have had an entire fleet constructed by this time.

THE LOCAL COAL SITUATION.

Mr. SHERMAN. Mr. President, I send to the Secretary's desk a news item cut from the Washington Post this morning. I ask unanimous consent for about two minutes to make a statement in reference to it.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Senator from Illinois will proceed.

Mr. SHERMAN. The inclement winter has brought to the surface evidence of the operation of the rules of civilized society. I deem it worthy of preservation in some permanent form. Posterity mayhap will value this fleeting reminiscence as a corner stone from which to estimate improvement in future years. It will be a matter of profound satisfaction for future generations to know that the multitude gathered in Washington were not deprived of tobacco, theatrical entertainment, moving-picture shows, and the blessings of billiard halls while the coal shortage afflicted us.

The Washington public schools closed the afternoon of January 29, 1918, and remained closed until this morning, February 11, 1918, because no coal could be had. At least one Sunday since the fuel order was promulgated all the churches in Washington were closed to save coal. The saving of fuel of course was to win the war, so churches and schoolhouses suspended their activities as stated. During this period when no coal could be had for the institutions named, 65 moving-picture shows, 16 theaters, 1,567 cigar stores, and 171 billiard halls were open and doing business as usual except on heatless Mondays or Tuesdays.

The Washington Post of to-day contains the following news item announcing the opening of the public schools in this city to-day. I ask that the news item cut from the Washington Post of this morning announcing the opening of the public schools be printed in the CONGRESSIONAL RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

PUBLIC SCHOOLS WILL OPEN TO-DAY—COAL SITUATION CLEARS AND BUILDINGS HAVE ENOUGH FUEL.

All public schools in Washington will open this morning, according to an announcement made last night by Superintendent of Schools Ernest L. Thurston. No matter what the amount of future arrivals of coal will be, some of the schools, including all of the high schools, will remain open until June, Mr. Thurston said.

Mr. Thurston said reports showed that every school building in the District had a supply of coal on hand, enough to heat the building. On account of the seriousness of the coal situation in Washington, the public schools were closed January 29.

The warm weather yesterday greatly helped the situation. If the favorable weather continues this morning, Mr. Thurston does not expect any of the schools to be closed on account of disabled heating facilities.

District labor was used yesterday in hauling coal to the schools, and janitors of the schools worked until late at night firing the furnaces.

ADDRESS BY W. G. M. THOMAS, OF TENNESSEE.

Mr. SHIELDS. Mr. President, Hon. W. G. M. Thomas, one of the ablest lawyers of Tennessee and a profound student of governmental conditions, and who has given the causes which brought on this great war in which we are engaged careful study, recently delivered an address in Chattanooga, Tenn., which I believe it is to the interest of the country that it be given the widest publicity and be read by every American citizen.

I believe that Mr. Thomas in this able address has conclusively established, as we all believe, that this fearful war and unparalleled sacrifice of human life and treasure was deliberately brought about by the Imperial Government of Germany to effect a long-premediated dream and effort of world-wide conquest and dominion.

The comparison which Mr. Thomas makes of the autocracy of Germany and the unscrupulous, merciless, and inhuman practices which it is willing to adopt in order to carry out its purposes and the great principles of American democracy, conceived and established in this country and advocated and maintained by numerous great Americans, including our present Chief Executive, is one of the ablest presentations of these questions that has been made during the war. I ask unanimous consent that the address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

The world has some acquaintance to-day with things of which it might have known, and of which it ought to have known many years ago. Antedating the month of July, 1914, it was not supposed to be a possible fact to deceive all the world a part of the time, or a part of the world all the time. Indeed, not until after this memorable month of that year were people outside the boundaries of Germany aware that the whole world had been deceived, and that a part of the world was still being deceived, but, since July, 1914, nine-tenths of all the globe and nine-tenths of the people of the globe have been engaged in a settled, determined course of action to convince the other one-tenth that it is not possible to deceive all the world all the time.

Unbelievable as it may appear to be, the world has had another revelation, namely, that the very easiest method of certain deception is to be found in the use of the palpably incredible—incredible truth presented openly in plain outline—and in exact detail and plan. And still another fact has been revealed—that Germany is the one conspicuous example in the art of this unique method of deception.

Antedating Austria-Hungary's ultimatum to Serbia, and the horrible consequences which followed that document, nowhere in the world, beyond German borders, was it even thinkable that any incredible fact or any number of incredible facts could be successfully used to deceive. So completely were people misled that they do not longer doubt that an easy and certain means of deception is the incredible dressed in unadorned simplicity.

For at least one-quarter of a century preceding the present war the reading public throughout the earth were buying and using German books. The student who aspired to scholarship felt moved to believe that to attain his ambition he must pass through a German university. German professors were called into chairs in institutions of higher

learning. That American schoolmen might possess the kultur of Germany, and that American youths might sit at the feet of German professors, universities in the United States and universities in Germany exchanged their professors. Everybody who visited Europe visited Germany. If his tour led him into a German city, he observed that a woman's right of way along a German sidewalk was subordinate that of the German Army officer. He observed, too, that at ticket windows the German Army and Navy assumed precedence over the line of civilian men, women, and children. A tourist in Germany witnessed the movements of German commerce and industry, and he found himself interested in the volume of business which appeared to render necessary so many important railway lines leading to the boundaries of Belgium and other border States.

It was quite incredible to the foreigner that railroads built prior to 1914 meant anything save Germany's peaceful progress and prosperity. It was unthinkable that these street scenes in Germany were anything more than mere isolated instances of rudeness on the part of German soldiers. It was unbelieveable to students that there was any real harm in the rationalism and other "isms" found in the utterances of the German professors, and it was quite incredible to all readers that the German books and German spokesmen on law, and right and wrong, or on war and might and cruelty, meant anything more than irresponsible utterances of such a madman as a Nietzsche, or of such a panegyrist of the Hohenzollerns as a Treitschke.

To-day it is known to everyone that neither German books, nor professors, German soldiers, nor railways, betrayed Germany. Not one of these, in itself, nor all of them combined, betrayed Germany, for the incredible was discovered to be not a betrayer.

Since July, 1915, the world has been taught the new and novel lessons that the incredible is sometimes not at all incredible, and that these German scenes, these German professors, these German books, were pointing unerringly and with bold frankness to the present world war. Under the crimson light of three and one-half years of war, Germany now stands revealed. The incredible prior to 1914 is anything but incredible to-day and when we turn to the facts, we wonder how the world could have been misled.

OUT OF GERMANY'S OWN MOUTH.

"The Teutonic race is called to circle the earth with its rule," says Weltmann.

"If fate has selected us to assume the leadership in the kultur life of the peoples, we will not shrink from this great and lofty mission." (Pazaurek.)

"The German soul is the world's soul. God and Germany belong to one another. The German soul is God's soul; it shall and will rule over mankind." (Pastor Lehmann.)

"He who does not believe in the divine mission of Germany had better hang himself, and rather to-day than to-morrow." (Chamberlain.)

"A good Providence watches over the fate of the German people, which is destined to the highest things on this earth." (Sonbart.)

"The German people is always right, because it is the German people and 87,000,000 souls." (Tannenberg.)

"We want to become a world people." (Meinecke.)

"Germany is the center of God's plans for the world." (Pastor Lehmann.)

"Germany will be the schoolmaster of all the world, as every German has a bit of schoolmaster in him." (Prof. Blume.)

"Might is right, and right is decided by war." (Bernhardi.)

"There is but one sort of right—the right of the stronger." (Lasson.)

"It is foolish to talk of the rights of others." (Peters.)

"Right and wrong are notions needed in civil life only." (Tannenberg.)

"Might is the supreme right, and the dispute as to what is right is decided by the arbitrament of war. War gives a biologically just decision." (Bernhardi.)

"What does right matter to me? I have no need for it. What I can acquire by force, that I possess and enjoy; what I can not obtain, I renounce. * * * I have the power to do." (Stirner.)

"The law of the strong holds good everywhere." (Bernhardi.)

"There is no legal obligation upon a State to observe treaties." (Lasson.)

"No right is so inviolable that it must not yield to necessity, and in action dictated by necessity there is violation of right." (Prof. Kohler.)

"No power is bound to sacrifice important interests of its own on the altar of faithfulness to her alliance." (Bismarck.)

"A State knows no arbiter and draws up all its treaties with this implied reservation * * * and is consequently entitled to repudiate its treaties." (Treitschke.)

"When a diplomat is guilty of obscuring facts in a diplomatic negotiation he is thinking of his country." (Treitschke.)

GERMANY AND WAR.

"Without war humanity would sink into materialism." (Moltke.)

"Nothing is more immoral than to consider and talk of war as an immoral thing. War is the mother of all good things." (Prof. Haase.)

"When one really meditates war, one must say no word about it; one must enevelope one's designs in a profound mystery; then, suddenly and without warning, one leaps as a thief in the night." (Wirth.)

"The lessons of history confirm the view that wars which have been deliberately provoked by far-seeing statesmen have had the happiest results." (Bernhardi.)

"We must not think merely of external foes who compel us to fight. A war may seem to be forced upon a statesman by the condition of home affairs or by the pressure of the whole political situation." (Bernhardi.)

"Thanks to his [Bismarck's] diplomatic adroitness, he forced upon his adversaries the outward appearance of declaring war, while in reality Prussian-Germany was the assailant." (Strantz.)

"If Belgium takes part in this war, she must be wiped off the map of Europe." (Theuden.)

"Let us laugh with all our lungs at the old women in trousers who are afraid of war, and therefore complain that it is cruel and hideous. No; war is beautiful. Its august grandeur elevates the heart of man high above all that is commonplace and earthly." (Gottberg.)

"We have become a nation of wrath; we think only of the war." (Pastor Lehmann.)

"The German is a hero born and believes he can hack and hew his way through life." (Treitschke.)

"God calls us to murderous battles, even if worlds should thereby fall to ruins." (Pastor Francke.)

"War forms part of the eternal order instituted by God." (Moltke.)

GERMANY AND PEACE.

"We must not look for permanent peace as a result of this war. Heaven defend Germany from that!" (Schmitz.)

"Only over the black gate of the cemetery * * * can be read the words 'Eternal peace for all peoples.' For peoples who live and strive, the only maxim and motto must be eternal war." (Wagner.)

"The highest steps of kultur have not been mounted by peaceable nations in long periods of peace, but by warlike peoples in the time of their greatest combativeness." (Theuden.)

"Perpetual peace is a dream, and it is not even a beautiful dream." (Moltke.)

"We children of the future * * * do not by any means think it desirable that the kingdom of righteousness and peace should be established on the earth." (Nietzsche.)

"Whoever can not prevail upon himself to approve, from the bottom of his heart, the sinking of the *Lusitania*—whoever can not conquer his sense of the gigantic cruelty to unnumbered perfectly innocent victims * * * and give himself up to honest delight at this victorious exploit of German defensive power—him we judge to be no true German." (Pastor Baumgarten.)

"Not against our will were we thrown into this gigantic adventure. We willed it; we were bound to will it." (Harden.)

"Terrorism is seen to be a relatively gentle procedure, useful to keep in a state of obedience the masses of the people." (Hartmann.)

"Whoever enters upon a war in future will do well to look only to his own interests, and pay no heed to any so-called international law." (By a German, 1900.)

"It is a gratuitous illusion to suppose that modern war does not demand far more brutality, far more violence, and an action far more general than was formerly the case." (Hartmann.)

"I warn you against pity." (Nietzsche.)

"We hold that hardness, violence, slavery, danger in the street and in the heart, secrecy, stoicism, arts of temptation and deviltry of all kinds; that everything evil, terrible, tyrannical, wild-heartlike, and serpentlike in man contributes to the elevation of the species just as much as the opposite—and in saying this we do not even say enough." (Nietzsche.)

"No sooner are airships invented than the general staffs set to work to devise methods of applying them to destruction." (Gumplowicz.)

"Much that is dreadful and inhuman in history, much that one hardly likes to believe, is mitigated by the reflection that the one who commands and the one who carries out are different persons—the former does not behold the sight, therefore does not experience the strong impression on the imagination; the latter obeys a superior, and therefore feels no responsibility." (Nietzsche.)

"The proud conviction forces itself upon us with irresistible power that a high, if not the highest, importance for the entire development of the human race is ascribed to the German people." (Bernhardi.)

"In our German people peaceful disposition and warlike prowess are so happily mixed that in this respect no other people on the earth can rival us, and none seems so clearly predestined to light humanity on the way to true progress." (Lange.)

"Where in the whole world can a people be found who have such cause for manly pride as we? But we are equally far removed from presumption and from arrogance." (Pastor Rump.)

"Germany is the future of humanity." (Pastor Lehmann.)

"We must vanquish, because the downfall of Germanism would mean the downfall of humanity." (Pastor Konig.)

"That it will be German kultur that will send forth its rays from the center of our continent there can be no possible doubt." (Prof. Gierke.)

"It was given and assigned to us, and we read in it the original text of our destiny, which proclaims to mankind salvation or disaster, according as we will it." (Pastor Rump.)

"It was the hidden meaning of God that He made Israel the forerunner of the Messiah, and in the same way He has by His hidden intent designated the German people to be His successor." (Dr. Preuss.)

INSINCERITY OF KAISER.

On July 29, 1914, the Czar of Russia telegraphed the Kaiser: "A disgraceful war has been declared on a weak nation; the indignation at this, which I fully share, is immense in Russia." In reply to this wire the Kaiser said: "I can not consider Austria-Hungary's action 'disgraceful war.' Austria-Hungary knows by experience that Serbia's promises, when they are merely on paper, are quite unreliable. According to my opinion Austria-Hungary's action is to be looked upon as an attempt to secure full guaranties that Serbia's promises shall also be turned into deeds."

These are the German Emperor's own words, that a nation's signed engagement should never be unreliable—that it is not "a scrap of paper," that it should be turned into deeds, and that an attempt, even by force of arms, so to turn it is not 'disgraceful war.'"

Was the Kaiser sincere when he dictated this telegram? He sent it at a time when his Government was under written obligation, guaranteeing the independence and neutrality of Belgium; and here are some provisions of that agreement:

"Belgium * * * shall form an independent and perpetually neutral State It shall be bound to observe such neutrality toward all other States."

"The territory of neutral powers is inviolable."

"Belligerents are forbidden to move troops or convoys of either munitions of war or supplies across the territory of a neutral power."

"A neutral power must not allow any of the acts referred to * * * to occur on its territory."

"The fact of a neutral power resisting, even by force, attempts to violate its neutrality can not be regarded as a hostile act."

These words were more than the promise of Germany to Belgium; they were Germany's pledge entered into in writing. The Kaiser telegraphed the Czar that such a promise should not be unreliable—that it should be turned into deeds.

On August 4, 1914, less than a week after the Emperor's telegram to the Czar, the imperial chancellor, in a speech before the German Diet, said: "Gentlemen, we are now acting in self-defense. Necessity knows no law. Our troops have occupied Luxemburg and have possibly already entered on Belgium. The injustice—I speak openly—the injustice we thereby commit we will try to make good as soon as our military aims have been attained. He who is menaced as we are and is fighting for his all can only consider the one and best way to strike.

Here is Germany's official recognition of the Belgium treaty and of international law; and it is furthermore the official admission that Germany had breached that law, had ignored the rightful protests of Belgium, and that Germany's conduct was an act of injustice to Belgium. The sole excuse offered is that "necessity knows no law"; that a nation

when menaced "can only consider the one and best way to strike"; and that such consideration must be without regard at all to the breaking of pledges or to the rights of others.

At a later hour of August 4, 1914, the British ambassador to Berlin, with instructions from his Government that Germany must not disregard her contract with Belgium, called upon the imperial chancellor. "Just for a word—'neutrality'—a word which in war time had so often been disregarded—just for a scrap of paper—Great Britain was going to make war on a kindred nation," was the chancellor's reply to the ambassador.

Here is the German chancellor's measure of the value of a nation's engagement and of the force of the law of nations—"a scrap of paper"; and it can not be urged justly that this was an idle utterance of the chancellor for which he and his Government should be free of responsibility, for the record of fact traces the term used to the very highest authority in Germany.

GERMAN DIPLOMACY.

The use of the term, "a scrap of paper," and the German estimate of the virtue and integrity of a treaty did not originate with the chancellor. "Do not be ashamed," said Frederick II, "of making interested alliances from which you yourself can derive the whole advantage. Do not make the foolish mistake of not breaking them when you believe your interests require it. Above all, uphold the following maxim: 'To despoil your neighbors is to deprive them of the means of injuring you.' When he is about to conclude a treaty with some foreign power, if a sovereign remembers he is a Christian he is lost." Later, on April 11, 1847, in a speech from the throne, King Frederick William IV asserted that "All written constitutions are only scraps of paper," and, again, in 1862, when in a quarrel between Emperor William and the Prussian diet, he was reproached with his defiance of the law, he replied that he would do his duty as he saw it, without regard to "scraps of paper called constitutions."

It is quite impossible to assume that the Kaiser may have been ignorant of the use of these terms by former Emperors in 1847 and 1862, or of the Hohenzollern creed as stated by Frederick II; and all fair men must admit that on August 10, 1914, he did know that his chancellor had stated in the diet on the preceding August 4 that in the face of menace neither national obligation nor the dictates of justice need be given consideration; that imperial Germany "can only consider the one and best way to strike." The Kaiser knew that his war lords had marked Belgium as the one and the best way across which to strike France; he knew, and his war lords knew, that to move troops or munitions of war over the borders and into Belgium would be a breach of the Belgium treaty and a violation of Belgian territory, and that it would be an act of the most glaring injustice to that country and people. With all these facts before his eyes he penned with his own hand a telegram on August 10 to President Wilson, and he handed it to the American ambassador for transmission to Washington. In that message he restates, in substance, his telegram of July 29 to the Czar of Russia, that "the Serbian promises on paper should be fulfilled in reality," and he asserts in so many words that Germany's neutrality contract with Belgium "had to be violated on strategical grounds." In other words, the Kaiser telegraphed President Wilson on August 10 that no signed promise or covenant of the German Empire would be allowed to stand across the path of the science of projecting and directing Germany's military movements.

Unfortunately the Kaiser set up one standard for Serbia and quite another for Germany. In his telegram to the Czar he complains "that Serbia's promises, when they are merely on paper, are quite unreliable," and that Austria-Hungary had the right "to secure full guaranties that Serbia's promises shall also be turned into deeds;" and he states as much in his wire to President Wilson, but he lowers that standard—in fact, he strikes it to the ground—when he declared that "on strategical grounds" Germany had to march into Belgium, notwithstanding the injustice committed by the act.

Viewing these facts, drawn altogether from official pronouncements of four German rulers and a German chancellor, the level of German ethics is seen to be that her promises, even when on paper are both quite unreliable and subject to be broken at will; and, indeed, are not to be fulfilled if performance might prevent or hinder German military advantage; that Germany's contracts may be disregarded as "scraps of paper" if they be found to stand opposed to military aims; that in Germany "might makes right," and "necessity knows no law"; and that in Germany it is a maxim in morals that he who is menaced can only consider the one and the best way to strike; and this without regard to his own obligation or honor, or to the legal or moral right of the one against whom the stroke is directed.

THE WORLD AND GERMAN DOCTRINE.

The world will never bow down before or accept any such doctrine; it must be wholly repudiated and reversed; and the world war is being waged to reverse it. The war is much more than centralized power against representative government, much more than autocracy against the people; it is tyranny against freedom; it is brutal might against human liberty; it is wanton destruction against conservation; it is barbarism against civilization; it is savagery against humanity; it is unrighteousness against righteousness; it is the Iron Cross against the Red Cross; it is the spirit of Satan against God.

So long as Germany shall think it not "by any means desirable that the kingdom of righteousness and peace should be established on the earth," she will find the world against her. So long as she shall teach that "only over the black gate of the cemetery can we read the words, 'eternal peace for all people,'" she will be the world's enemy. So long as she shall continue in her expressed faith that "war is the mother of all good things," and that "might is the supremacy of right," she must find herself alone upon the earth. So long as it is the purpose of the Teutonic race "to circle the earth with its rule," just so long Germany will find no friend beyond her own borders. The Kaiser must lose his crown or else he must repudiate the Hohenzollern creed that national covenants are "scraps of paper"; that "to despoil your neighbors is to deprive them of the means of injuring you"; and that "when he is about to conclude a treaty with some foreign power, if a sovereign remembers he is a Christian, he is lost."

The purpose of Germany "to circle the earth with its rule" and her deeds of lawlessness and savagery are now known world wide. The black record is now open to all men. With unexampled patience and forebearance, the United States and her people bore much and suffered much; but longer patience became impossible when Germany made war upon our country and upon the freedom, liberty, and independence which Americans had gained for themselves, and under which they propose to live their own lives and to pass on to their children. America is defending their good heritage. America is defending more than this. "The object of this war," as President Wilson has stated it to all the world, "is to deliver the free people of the world from the menace and the actual power of a vast military establishment, controlled by an irresponsible Government, which, having secretly planned to dominate the world, proceeded to carry the plan out without regard either to the sacred obligations of treaty or the long-established practices and long-cherished principles of international action and honor, which chose its blow fiercely and suddenly, stopped at no barrier either of law or of mercy, swept a whole continent within the tide of blood—not the blood of soldiers only, but the blood of innocent women and children also, and of the helpless poor—and now stands balked but not defeated, the enemy of four-fifths of the world."

Innocent and defenseless women and children have the right to security in the home, and an airplane that wantonly would wreck a home and destroy life is an assassin. Upon the high seas, ruthlessly and without warning, to sink a passenger ship and her human freight is deliberate murder. To drop from the air a bomb upon offenseless children in a schoolhouse is savagery. To mock all laws of war and humanity is superlative and barbarism. To fire upon the Red Cross is satanic.

SHALL NEVER RULE.

German "kultur" shall never rule over our land, and it must be assured that it shall not rule over any other land. It is a base falsehood that "might is right." A nation's word is not "a scrap of paper."

Over against the German code that "it is foolish to talk of the rights of others" America sets up the Golden Rule—"Do unto others as you would have others do unto you."

A nation whose treaty agreement is not as binding as its bonds is not a nation with which honorable peoples care to deal. A nation whose accredited ambassador would set a network of intrigue among the people to whom he is accredited, and whose country would promote and decorate him in reward for his base service is a nation whose ways must be mended if it shall expect relations with respectable folks. A nation that would purposely, by shell or torpedo and without notice or warning, sink a merchant ship plying the high seas and leave the crew to their fate in the waves is an outlaw nation. A nation that would organize incendiarism and dispatch its paid agents to blow up industries ought to be put out of business. A nation that wills the oppression of Europe and that plots and schemes to extend its brutal might across the sea and over free America is a nation whose fiendish lordship must and shall be met and stopped before it shall ever touch these shores.

A prince, whatever be his name or title, who would set in motion any such horrers is unfit to be the ruler of a free people; and a people who support such a prince are not free. A nation that would will injustice and harm to other nations is entitled to no place in the councils of men. Such a nation is a world menace, and any such a nation must be rendered powerless to exercise such a will, or else its people must be made to establish for themselves a very different form of government.

It is to defend our own people and country, and all peoples, against this German menace and to assure all the world that the horrors of the last three and a half years never shall happen again, that the United States and her 15 allies are standing against Germany. The whole history of America shows that our people never could be moved to take any other stand.

AMERICA'S RECORD.

In his farewell address Washington expressed the hope that "the happiness of the people of these States, under the auspices of liberty, may be made complete by so careful a preservation and so prudent a use of this blessing as will acquire to them the glory of recommending it to the applause, the affection, and adoption of every nation which is yet a stranger to it."

Here is almost the prediction by America's first president that the people's happiness, under the authority and guidance of liberty, would some day become so complete that to America would be accorded the glory of recommending like liberty to the applause, affection, and adoption of every nation still a stranger to it.

Washington stated this in 1796, and it is more than a significant fact that in 1917—a century and a quarter later—America not only made such a recommendation world-wide, but, through President Wilson, the Nation declared that "the world must be made safe for democracy."

Twenty years antedating this utterance of Washington, the Declaration of Independence declared that all people possessed the free and independent right "to assume among the powers of the earth the separate and equal station to which the laws of nature and of nature's God entitle them"; and that the people of America hold certain truths to be self-evident; "that they are endowed by their Creator with certain unalienable rights; that among these are life, liberty, and the pursuit of happiness. That to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed."

Here it is claimed, as an endowment of the Creator, that a people have the untransferable right of self-government—"the government," as President Lincoln expresses it, "of the people, by the people, for the people." Such form of government is the right of independence and liberty; indeed, it is independence and liberty; and America possesses each of the two because both, as Washington states it, "are the work of joint councils and joint efforts of common dangers, sufferings, and successes."

From the utterances and action of the German Government, and German Emperors and people, we have had to stoop low in order to see the level of their standard of conduct among themselves, and toward other nations and people; and now that America has recommended her own freedom and liberty to all the world, and, along with this recommendation, and to the exalted end that government of, by, and for the people may be made safe throughout the earth, has pledged the lives and the fortunes of her people, and her own sacred honor, it is with just pride that Americans may place their country's record alongside the record of the Nation's enemies. Indeed, the heart of every American, native or foreign born, should rise in gratitude and praise to Almighty God for His leadership and guidance from Washington to Wilson, and for His blessings upon us as a Nation and people. To-day, in this world holocaust, nine-tenths of the earth's area and inhabitants are standing with and on the side of the United States, battling for all these exalted, just, and righteous principles for which Americans have always stood, and for which, if need be, they have ever been ready to offer their lives.

WORDS OF AMERICA'S PRESIDENTS.

Washington wrote a page of the record in his farewell message to his countrymen: "Observe good faith and justice toward all nations. Cultivate peace and harmony with all. Religion and morality enjoin this conduct. And can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt that in the course of time and things the fruit

of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it? Can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature."

Here are noble words and, indeed, the prophecy of Washington that, at no distant day, the United States would be a great Nation, and would give to the world an example of a people "always guided by an exalted justice and benevolence."

Can any sincere man, casting his eyes along the past years, and looking about him in these tremendous times, doubt the fulfillment of this prophecy?

President Jefferson adds this further word to the record: "We are firmly convinced, and we act on that conviction, that with all nations, as with individuals, our interests, soundly calculated, will ever be found inseparable from our moral duties; and history bears witness to the fact that a just nation is trusted on its word, when recourse is had to armaments and wars to bridle others."

President Madison says that it is a duty and privilege of Americans "to foster a spirit of independence too just to invade the rights of others, too proud to surrender our own, too liberal to indulge unworthy prejudices ourselves, and too elevated not to look down upon them in others."

President Monroe: "National honor is national property of the highest value."

President J. Q. Adams: "Union, justice, tranquility, the common defense, the general welfare, and the blessings of liberty—all have been promoted by the Government under which we have lived."

President Jackson: "Turning our eyes to other nations, our great desire is to see our brethren of the human race secured in the blessings enjoyed by ourselves, and advancing in knowledge, in freedom, and in social happiness."

President Lincoln: "This country, with its institutions, belongs to the people who inhabit it. * * * Why should there not be a patient confidence in the ultimate justice of the people? Is there any better or equal hope in the world?'

President Grant: "In regard to foreign policy, I would deal with nations as equitable law requires individuals to deal with each other, and I would protect the law-abiding citizen, whether of native or foreign birth, wherever his rights are jeopardized or the flag of our country floats. I would respect the rights of all nations, demanding equal respect for our own."

President Garfield: "We can not overestimate the fervent love of liberty, the intelligent courage, and the sum of common sense with which our fathers made the great experiment of self-government."

"President Harrison: "We have not sought to dominate or absorb any of our weaker neighbors, but rather to aid and encourage them to establish free and stable governments resting upon the consent of their own people."

President Roosevelt: "Great privileges and great powers are ours, and heavy are the responsibilities that go with these privileges and these powers. Accordingly, as we do well or ill, so shall mankind in the future be raised or cast down. We belong to a young nation, already of giant strength, yet whose political strength is but a forecast of the power that is to come."

President Taft: "Our international policy is always to promote peace."

President Wilson: "I am proposing, as it were, that the nations should, with one accord, adopt the doctrine of President Monroe as the doctrine of the world; that no nation shall seek to extend its polity over any other nation or people, but that every people should be left free to determine its own polity, its own way of development, unhindered, unthreatened, unafraid, the little along with the great and powerful.

"I am proposing that all nations henceforth avoid entangling alliances which would draw them into competitions of power, catch them in a net of intrigue and selfish rivalry, and disturb their own affairs with influences intruded from without.

"I am proposing government by the consent of the governed; that freedom of the seas which in international conference after conference representatives of the United States have urged with the eloquence of those who are the convinced disciples of liberty; and that moderation of armaments which makes of armies and navies a power for order merely, not an instrument of aggression or of selfish violence.

"These are American principles, American policies. We could stand for no others. And they are also the principles and policies of forward-looking men and women everywhere, of every modern nation, of every enlightened community. They are the principles of mankind and must prevail."

Germany opposes these American principles; and Gumplowicz gives the basis of the opposition: "No sooner are airships invented than the general staffs set to work to devise methods of applying them to destruction"—the misuse of things.

Germany must be made to recognize a higher sense of moral and human responsibility. Her need is not less scientific knowledge, but such knowledge better directed and used. To paraphrase Bishop Candler: Germany must be taught, and she is about to be taught, that men and nations must be as pious as they are scientific and powerful, or they will be a peril to both themselves and others.

W. G. M. THOMAS.

HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred to the Committee on Pensions:

H. R. 9506. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors;

H. R. 9612. An act granting pensions and increase of pensions to certain soliders and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; and

H. R. 9641. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

H. R. 9314. An act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1919, was read twice by its title and referred to the Committee on Appropriations.

JOINT MEETING OF THE TWO HOUSES.

The PRESIDENT pro tempore (Mr. SAULSBURY in the chair). The hour having arrived at which, under the concurrent resolution, the Senate is to proceed to the Hall of the House of Representatives for the purpose of hearing such communication as the President of the United States may desire to make to the Congress, the order will now be carried out.

Thereupon the Senate, preceded by its Sergeant at Arms and headed by the President pro tempore and the Secretary, proceeded to the Hall of the House of Representatives.

At 1 o'clock p. m. the Senate returned to its Chamber, and the President pro tempore resumed the chair.

ADDRESS BY THE PRESIDENT OF THE UNITED STATES.

The address of the President of the United States this day delivered at a joint session of the two Houses of Congress is as follows:

Gentlemen of the Congress, on the eighth of January I had the honor of addressing you on the objects of the war as our people conceive them. The Prime Minister of Great Britain had spoken in similar terms on the fifth of January. To these addresses the German Chancellor replied on the twenty-fourth and Count Czernin, for Austria, on the same day. It is gratifying to have our desire so promptly realized that all exchanges of view on this great matter should be made in the hearing of all the world.

Count Czernin's reply, which is directed chiefly to my own address of the eighth of January, is uttered in a very friendly tone. He finds in my statement a sufficiently encouraging approach to the views of his own Government to justify him in believing that it furnishes a basis for a more detailed discussion of purposes by the two Governments. He is represented to have intimated that the views he was expressing had been communicated to me beforehand and that I was aware of them at the time he was uttering them; but in this I am sure he was misunderstood. I had received no intimation of what he intended to say. There was, of course, no reason why he should communicate privately with me. I am quite content to be one of his public audience.

Count von Hertling's reply is, I must say, very vague and very confusing. It is full of equivocal phrases and leads it is not clear where. But it is certainly in a very different tone from that of Count Czernin, and apparently of an opposite purpose. It confirms, I am sorry to say, rather than removes, the unfortunate impression made by what we had learned of the conferences at Brest-Litovsk. His discussion and acceptance of our general principles lead him to no practical conclusions. He refuses to apply them to the substantive items which must constitute the body of any final settlement. He is jealous of international action and of international counsel. He accepts, he says, the principle of public diplomacy, but he appears to insist that it be confined, at any rate in this case, to generalities and that the several particular questions of territory and sovereignty, the several questions upon whose settlement must depend the acceptance of peace by the twenty-three states now engaged in the war, must be discussed and settled, not in general council, but severally by the nations most immediately concerned by interest or neighborhood. He agrees that the seas should be free, but looks askance at any limitation to that freedom by international action in the interest of the common order. He would without reserve be glad to see economic barriers removed between nation and nation, for that could in no way impede the ambitions of the military party with whom he seems constrained to keep on terms. Neither does he raise objection to a limitation of armaments. That matter will be settled of itself, he thinks, by the economic conditions which must follow the war. But the German colonies, he demands, must be returned without debate. He will discuss with no one but the representatives of Russia what disposition shall be made of the peoples and the lands of the Baltic provinces; with no one but the Government of France the "conditions" under which French territory shall be evacuated; and only with Austria what shall be done with Poland. In the determination of all questions affecting the Balkan states he defers, as I understand him, to Austria and Turkey; and with regard to the agreements to be entered into concerning the non-Turkish peoples of the present Ottoman Empire, to the Turkish authorities themselves. After a settlement all around, effected in this fashion, by individual barter and concession, he would have no objection, if I correctly interpret his statement, to a league of nations which would undertake to hold the new balance of power steady against external disturbance.

It must be evident to everyone who understands what this war has wrought in the opinion and temper of the world that no general peace, no peace worth the infinite sacrifices of these years of tragical suffering, can possibly be arrived at in any such fashion. The method the German Chancellor proposes is the method of the Congress of Vienna. We cannot and will not return to that. What is at stake now is the peace of the world. What we are striving for is a new international order based upon broad and universal principles of right and justice,—no mere peace of shreds and patches. Is it possible that Count von Hertling does not see that, does not grasp it, is in fact living in his thought in a world dead and gone? Has he utterly forgotten the Reichstag Resolutions of the nineteenth of July, or does he deliberately ignore them? They spoke of the conditions of a general peace, not of national aggrandizement or of arrangements between state and state. The peace of the world depends upon the just settlement of each of the several problems to which I adverted in my recent address to the Congress, I, of course, do not mean that the peace of the world depends upon the acceptance of any particular set of suggestions as to the way in which those problems are to be dealt with. I mean only that those problems each and all affect the whole world; that unless they are dealt with in a spirit of unselfish and unbiased justice, with a view to the wishes, the natural connections, the racial aspirations, the security, and the peace of mind of the peoples involved, no permanent peace will have been attained. They cannot be discussed separately or in corners. None of them constitutes a private or separate interest from which the opinion of the world may be shut out. Whatever affects the peace affects mankind, and nothing settled by military force, if settled wrong, is settled at all. It will presently have to be reopened.

Is Count von Hertling not aware that he is speaking in the court of mankind, that all the awakened nations of the world now sit in judgment on what every public man, of whatever nation, may say on the issues of a conflict which has spread to every region of the world? The Reichstag Resolutions of July themselves frankly accepted the decisions of that court. There shall be no annexations, no contributions, no punitive damages. Peoples are not to be handed about from one sovereignty to another by an international conference or an understanding between rivals and antagonists. National aspirations must be respected; peoples may now be dominated and governed only by their own consent. "Self-determination" is not a mere phrase. It is an imperative principle of action, which statesmen will henceforth ignore at their peril. We cannot have general peace for the asking, or by the mere arrangements of a peace conference. It cannot be pieced together out of individual understandings between powerful states. All the parties to this war must join in the settlement of every issue anywhere involved in it; because what we are seeking is a peace that we can all unite to guarantee and maintain and every item of it must be submitted to the common judgment whether it be right and fair, an act of justice, rather than a bargain between sovereigns.

The United States has no desire to interfere in European affairs or to act as arbiter in European territorial disputes. She would disdain to take advantage of any internal weakness or disorder to impose her own will upon another people. She is quite ready to be shown that the settlements she has suggested are not the best or the most enduring. They are only her own provisional sketch of principles and of the way in which they should be applied. But she entered this war because she was made a partner, whether she would or not, in the sufferings and indignities inflicted by the military masters of Germany, against the peace and security of mankind; and the conditions of peace will touch her as nearly as they will touch any other nation to which is entrusted a leading part in the maintenance of civilization. She cannot see her way to peace until the causes of this war are removed, its renewal rendered as nearly as may be impossible.

This war had its roots in the disregard of the rights of small nations and of nationalities which lacked the union and the force to make good their claim to determine their own allegiances and their own forms of political life. Covenants must now be entered into which will render such things impossible for the future; and those covenants must be backed by the united force of all the nations that love justice and are willing to maintain it at any cost. If territorial settlements and the political relations of great populations which have not the organized power to resist are to be determined by the contracts of the powerful governments which consider themselves most directly affected, as Count von Hertling proposes, why may not economic questions also? It has come about in the altered world in which we now find ourselves that justice and the rights of peoples affect the whole field of international dealing as much as access to raw materials and fair and equal conditions of trade. Count von Hertling wants the essential bases of commercial and industrial life to be safeguarded by common agreement and guarantee, but he cannot expect that to be conceded him if the other matters to be determined by the articles of peace are not handled in the same way as items in the final accounting. He cannot ask the benefit of common agreement in the one field without according it in the other. I take it for granted that he sees that separate and selfish compacts with regard to trade and the essential materials of manufacture would afford no foundation for peace; neither, he may rest assured, will separate and selfish compacts with regard to provinces and peoples.

Count Czernin seems to see the fundamental elements of peace with clear eyes and does not seek to obscure them. He sees that an independent Poland, made up of all the indisputably Polish peoples who lie contiguous to one another, is a matter of European concern and must of course be conceded; that Belgium must be evacuated and restored, no matter what sacrifices and concessions that may involve; and that national aspirations must be satisfied, even within his own Empire, in the common interest of Europe and mankind. If he is silent about questions which touch the interest and purpose of his allies more nearly than they touch those of Austria only, it must of course be because he feels constrained, I suppose, to defer to Germany and Turkey in the circumstances. Seeing and conceding, as he does, the essential principles involved and the necessity of candidly applying them, he naturally feels that Austria can respond to the purpose of peace as expressed by the United States with less embarrassment than could Germany. He would probably have gone much farther had it not been for the embarrassments of Austria's alliances and of her dependence upon Germany.

After all, the test of whether it is possible for either government to go any further in this comparison of views is simple and obvious. The principles to be applied are these:

First, that each part of the final settlement must be based upon the essential justice of that particular case and upon such adjustments as are most likely to bring a peace that will be permanent;

Second, that peoples and provinces are not to be bartered about from sovereignty to sovereignty as if they were mere chattels and pawns in a game, even the great game, now forever discredited, of the balance of power; but that

Third, every territorial settlement involved in this war must be made in the interest and for the benefit of the populations concerned, and not as a part of any mere adjustment or compromise of claims amongst rival states; and

Fourth, that all well defined national aspirations shall be accorded the utmost satisfaction that can be accorded them without introducing new or perpetuating old elements of discord and antagonism that would be likely in time to break the peace of Europe and consequently of the world.

A general peace erected upon such foundations can be discussed. Until such a peace can be secured we have no choice but to go on. So far as we can judge, these principles that we regard as fundamental are already everywhere accepted as imperative except among the spokesmen of the military and annexationist party in Germany. If they have anywhere else been rejected, the objectors have not been sufficiently numerous or influential to make their voices audible. The tragical circumstance is that this one party in Germany is apparently willing and able to send millions of men to their death to prevent what all the world now sees to be just.

I would not be a true spokesman of the people of the United States if I did not say once more that we entered this war upon no small occasion, and that we can never turn back from a course chosen upon principle. Our resources are in part mobilized now, and we shall not pause until they are mobilized in their entirety. Our armies are rapidly going to the fighting front, and will go more and more rapidly. Our whole strength will be put into this war of emancipation,—emancipation from the threat and attempted mastery of selfish groups of autocratic rulers,—whatever the difficulties and present partial delays. We are indomitable in our power of independent action and can in no circumstances consent to live in a world governed by intrigue and force. We believe that our own desire for a new international order under which reason and justice and the common interests of mankind shall prevail is the desire of enlightened men everywhere. Without that new order the world will be without peace and human life will lack tolerable conditions of existence and development. Having set our hand to the task of achieving it, we shall not turn back.

I hope that it is not necessary for me to add that no word of what I have said is intended as a threat. That is not the temper of our people. I have spoken thus only that the whole world

may know the true spirit of America,—that men everywhere may know that our passion for justice and for self-government is no mere passion of words but a passion which, once set in action, must be satisfied. The power of the United States is a menace to no nation or people. It will never be used in aggression or for the aggrandizement of any selfish interest of our own. It springs out of freedom and is for the service of freedom.

DISTRICT STREET RAILROADS.

Mr. JONES of Washington. I submit a resolution and ask for its present consideration.

The resolution (S. Res. 203) was read, as follows:

Resolved, That the Public Utilities Commission of the District of Columbia be directed to furnish the Senate the following information:

First. How many new cars have the electric railway companies in the District of Columbia put on during the last two years?

Second. Have they put on any new cars during the last year; and if so, how many?

Third. Are they making any provision now for adding new cars to their equipment; and if so, how many, and when are they to be put on?

Fourth. What other steps are being taken by the electric railway companies to meet the congested traffic conditions of the present and the future?

Fifth. What steps has the Public Utilities Commission taken to meet the present street car traffic congestion in the District?

Sixth. Is the existing railway trackage adequate to meet the traffic requirements as they are now, and as they are likely to be for some time to come; and if not, what steps are being taken to increase such trackage?

Seventh. What action has the commission taken under the authority given it to secure "adequate" service by the street railways of the District of Columbia?

Eighth. What action has the commission taken under the authority given it "to require and compel" the street railways of the District of Columbia to comply with the provisions of law looking to the furnishing of adequate service by such companies?

Ninth. What suggestions has the Public Utilities Commission to make to Congress for meeting the present congested conditions of traffic on the railways of the District of Columbia?

Mr. GALLINGER. Mr. President, I do not object to the resolution, because I think it is a very important one, but I want to make an observation about the traffic situation in the District of Columbia. Two or three days ago I received a letter from a well-known citizen complaining of the great inconvenience people have in getting from the suburban portions of the District of Columbia to the central part of the city, and he urged that some immediate action should be taken, reminding me of the fact that for many years I served upon the committee, as chairman of the committee, and he thought I ought to immediately concern myself about it. My reply to him was substantially in these words: "I remember the time when the surface cars of the cities of New York and Boston were adequate to take care of the convenience and comfort of the traveling public. A time arrived when elevated roads in both those great cities became a necessity, and they were built. Time went on and the congestion on both the surface and the elevated roads was such that it was evident subways should be constructed, and they were constructed in both those cities and in other cities of the country; and even now in New York and Boston a man practically takes his life in his hands at certain hours of the day to get a seat or accommodation of any kind on either an elevated road or in a subway car."

My conclusion was, Mr. President, that the corporations serving the people of the District of Columbia at the present time are doing the best they can. They are under the control of the Public Utilities Commission. They have an expert here now studying the subject. I feel confident that they simply can not accomplish the purpose that they have in view, and that what ought to be done would be for the Public Utilities Commission or Congress itself immediately to consider the question whether it is not necessary for us to have subways to relieve the congestion. I do not imagine that any of us will agree that we should have elevated roads in the District of Columbia; but that we ought to have subways, and must have subways in the near future, is, to my mind, so conclusive that there is no need for discussing the subject.

The PRESIDENT pro tempore. The Senator from Washington asks for the immediate consideration of the resolution which has just been read.

The resolution was considered by unanimous consent and agreed to.

ALLOWANCES TO SOLDIERS' FAMILIES (S. DOC. NO. 711).

Mr. HITCHCOCK. Mr. President, I ask to have printed in the RECORD a letter from the Secretary of the Treasury in response to a resolution which I introduced concerning the payment of allowances to the families of soldiers and sailors. Complaint has been quite general that the family allowances have not been paid. The Secretary's letter shows that the payment of November allowances was completed January 14; that the payment of the December allowances was completed February 6; and that the payment of the January allowances is now going forward and checks are being sent out at the rate of between 40,000 and 50,000 a day. In order to give it as much publicity as possible, I ask that the letter may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TREASURY DEPARTMENT,
Washington, February 6, 1918.

The PRESIDENT OF THE SENATE:

SIR: In reply to Senate resolution 200, of February 5, asking to what extent, if any, allowances to soldiers' families for the month of November, 1917, have been paid, also to what extent they have been paid for the month of December, 1917, and also for the month of January, 1918, I have the honor to inform you that the mailing of November checks was completed January 14; the mailing of December checks was completed to-day, and the mailing of January checks to Navy dependents was completed to-day, and the mailing of January checks for the other branches of the service will begin to-morrow. These checks will be mailed at the rate of between forty and fifty thousand a day, and be completed on or before February 18.

Because of the distance of many of the soldiers from Washington the bureau is still receiving daily a considerable number of applications providing for allotments and allowances for the months of November and December. All such applications are given priority, and the payments for the two months are covered in one check.

While the war-risk insurance act was passed October 6, 1917, practically no applications for allotments and allowances were received prior to December 1, 1917. Up to the close of business to-day the bureau has received 1,170,458 applications. In 730,000 cases these applications showed that the soldiers had no dependents, and therefore no allotments were made, nor could any allowances be granted. Of the balance of 441,000 cases, awards were made in 426,000 cases and all checks for November and December and the Navy checks for January have been mailed, and the January checks for other branches of the service will be mailed before February 18, as stated above. These checks aggregate $16,500,000. In the remaining 15,000 cases it has not been possible to make payments because the applications were so incomplete as to require correspondence with the soldiers or with their beneficiaries. This correspondence is being conducted with the greatest expedition and every effort is being made to forward checks at the earliest possible moment.

Of the checks forwarded approximately 10,000 that could not be delivered have been returned by the Post Office Department because the dependents had moved and left no forwarding address, because the addresses given by the soldiers were not complete, or because the applications were written so illegibly that the clerks misread the addresses in preparing the records from which the checks were drawn. These cases are being handled with the greatest dispatch.

By the end of February the work of the bureau will be current so that checks will be mailed immediately after the close of the month for which the checks are due.

Respectfully,

WM. G. MCADOO,
Secretary of the Treasury.

MAJ. CHALMERS G. HALL.

Mr. OVERMAN. I ask unanimous consent for the present consideration of the bill (S. 3299) authorizing the President to reappoint Maj. Chalmers G. Hall, retired, to the active list of the Army. It is a bill reported from the Committee on Military Affairs this morning, and it is heartily indorsed by the War Department. It affects only one man, who wishes to go to France, and unless this bill is passed he can not go.

Mr. GALLINGER. Must he go immediately?

Mr. OVERMAN. He is ready to go, and he can not go unless this bill is passed.

The PRESIDENT pro tempore. The Senator from North Carolina asks for the present consideration of the bill he has indicated.

Mr. GALLINGER. Let it be read for the information of the Senate.

The PRESIDENT pro tempore. The Secretary will read the bill.

The Secretary read the bill, as follows:

Be it enacted, etc., That the President is hereby authorized to reappoint to the Cavalry arm as an extra number, with such rank as he would have had if he had never been retired, Maj. Chalmers G. Hall, of the United States Army, retired.

Mr. SMITH of Georgia. I should like to ask if the law does not already make provision for this case?

Mr. OVERMAN. The trouble is the law was limited in its effect to the 1st of October.

Mr. SMITH of Georgia. I merely wanted the information.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

COST OF OFFICERS' UNIFORMS.

Mr. JONES of Washington. There was a bill, Senate bill 3433, reported by the chairman of the Committee on Military Affairs to-day relating to the purchase of soldiers' uniforms. I spoke to the chairman of the committee about calling up the bill, and he had no objection; but he is not here. He has one or two amendments that he desires to offer to the bill, to which I shall have no objection. I simply wish to say that I hope to call up the bill sometime this afternoon when the chairman of the

committee is here. He has been sent for, but I think he is engaged and can not be here just now.

Mr. GALLINGER. Mr. President, I think we are falling into a rather bad practice in having bills reported in the morning and within an hour called up for consideration, even before they are printed and on our desks. I do not know that I shall object to this bill, but I apprehended that a single day will not make any special difference about the matter, and that we ought to have an opportunity to read it before we are asked to consider it. I hope the Senator will let it go over until to-morrow.

Mr. JONES of Washington. I wish to say to the Senator that this is a bill concerning soldiers' uniforms, and——

Mr. GALLINGER. I am in great sympathy with the purpose of the bill.

Mr. JONES of Washington. I realize the force of the suggesbill up to-morrow by unanimous consent.

Mr. GALLINGER. Doubtless the Senator can do so.

Mr. JONES of Washington. I realize the force of the suggestion of the Senator. So I shall not call it up this afternoon, but hope to be able to call it up to-morrow morning in the morning hour.

The PRESIDENT pro tempore. The morning business is closed.

RAILROAD CONTROL.

Mr. SMITH of South Carolina. I move that the Senate proceed to the consideration of the bill (S. 3752) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes.

The motion was agreed to, and the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. TOWNSEND. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hitchcock	New	Smoot
Beckham	James	Norris	Sterling
Borah	Johnson, Cal.	Nugent	Thomas
Colt	Johnson, S. Dak.	Phelan	Thompson
Culberson	Jones, N. Mex.	Pittman	Tillman
Curtis	Jones, Wash.	Poindexter	Townsend
Dillingham	Kellogg	Pomerene	Trammell
Fernald	Kenyon	Reed	Vardaman
France	Kirby	Robinson	Weeks
Gallinger	McCumber	Saulsbury	Williams
Gerry	McKellar	Shafroth	Wolcott
Gronna	McNary	Sheppard	
Harding	Martin	Shields	
Henderson	Nelson	Smith, S. C.	

Mr. TRAMMELL. I desire to announce the unavoidable absence of my colleague [Mr. FLETCHER] on account of illness.

The PRESIDENT pro tempore. Fifty-three Senators have answered to their names. There is a quorum present.

Mr. SMITH of South Carolina obtained the floor.

Mr. ROBINSON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Arkansas?

Mr. SMITH of South Carolina. I do.

Mr. ROBINSON. This is a measure of very great importance, and I suggest to the Senator, if it will not interfere with his remarks, that the bill be read.

Mr. SMITH of South Carolina. That course will be agreeable to me.

The PRESIDENT pro tempore. The Secretary will read the bill.

The Secretary read the bill, as follows:

Be it enacted, etc., That the President, having in time of war taken over the possession, use, control, and operation (called herein Federal control) of certain railroads and systems of transportation (called herein carriers), is hereby authorized to agree with and to guarantee to any such carrier making operating returns to the Interstate Commerce Commission that during the period of such Federal control it shall receive as just compensation not exceeding an annual sum (herein called standard return), payable in reasonable installments, for each year and pro rata for any fractional year of such Federal control, equivalent as nearly as may be to its average annual railway operating income (including therein such income of lines acquired by, leased to, or consolidated with such carrier between July 1, 1914, and December 31, 1917) for the three years ended June 30, 1917, and in addition thereto an annual sum payable likewise in reasonable installments, reckoned at a rate per cent to be fixed by the President upon the cost of any additions or betterments, less retirements, or road extensions, made during the six months ended December 31, 1917. In the computation of such income, debits and credits arising from the accounts called in the monthly reports to the Interstate Commerce Commission equipment rents and joint facility rents shall be included. The standard return and the cost of such additions, betterments, or road extensions are to be ascertained by the Interstate Commerce Commission from the reports, books, and other pertinent data of such carrier and certified by it to the President. Its certificate shall, for the purpose of such agreement, be taken as conclusive of the amount of such average annual railway operating income and of such cost. Until otherwise ordered by the President, operating revenues may be received by the carriers as heretofore and expended by them, subject to the provisions of this act, as heretofore, but any net railway operating income in excess of such standard return shall be paid into the Treasury of the United States and placed in the revolving fund created by this act.

Every such agreement shall provide that any Federal taxes under the act of October 3, 1917, or acts in addition thereto or in amendment thereof, commonly called war taxes, assessed for the period of Federal control beginning January 1, 1918, or any part of such period, shall be paid by the carrier out of its own funds, or shall be charged against or deducted from the standard return; that other taxes assessed under Federal or any other governmental authority for the period of Federal control or any part thereof, either on the property used under such Federal control or on the right to operate as a carrier, or on the revenues or any part thereof derived from operation (not including, however, assessments for public improvements or taxes assessed on property under construction and chargeable under the classification of the Interstate Commerce Commission to investment in road and equipment), shall be paid out of the revenues derived from railway operations while under Federal control; that all taxes assessed under Federal or any other governmental authority for the period prior to January 1, 1918, whenever levied or payable, shall be paid by the carrier out of its own funds or shall be charged against or deducted from the standard return.

The President is further authorized to make in such agreement all reasonable provisions for the maintenance, repair, and renewals of the property for the depreciation thereof and for the creation of necessary reserve funds in connection therewith to the end that at the termination of Federal control the property shall be returned to each carrier in substantially as good repair and in substantially as complete equipment as at the beginning of Federal control and that all just and proper accounting and adjustments be made, due consideration being given to the standards of maintenance and depreciation used by each carrier during the three years ended June 30, 1917, and to the condition of the property at the beginning and at the end of Federal control.

The President is further authorized in such agreement to make all other reasonable provisions, not inconsistent with the provisions of this act or of the act of August 29, 1916, that he may deem necessary or proper for such Federal control or for the determination of the mutual rights and obligations of the parties to the agreement arising from or out of such Federal control.

If the President shall find that the condition of any nondividend-paying carrier was during all or a substantial portion of the period of three years ended June 30, 1917, because of nonoperation, receivership, or where recent expenditures for additions or improvements or equipment when not fully reflected in the net operating railway income of the said three years or a substantial portion thereof, or other undeveloped or abnormal conditions, so exceptional as to make the basis of earnings, hereinabove provided for, plainly inequitable as a fair measure of just compensation, then the President may make with the carrier such agreement for such amount as just compensation as under the circumstances of the particular case he shall find just.

SEC. 2. That if no such agreement is made, the President may nevertheless pay to any carrier while under Federal control an annual amount, payable in reasonable installments, not exceeding 90 per cent of the estimated annual amount of just compensation, remitting such carrier to its legal rights for any balance claimed to the remedies provided in section 3 thereof. Any amount thereafter found due such carrier above the amount paid shall bear interest at the rate of 6 per cent per annum, and any excess amount paid hereunder shall be recoverable by the United States with interest at the same rate.

SEC. 3. That all claims for just compensation not adjusted as provided in section 1 shall, on the application of the President or of any carrier, be submitted to boards, each consisting of three referees to be appointed by the Interstate Commerce Commission, members of which and the official force thereof being eligible for service on such boards without additional compensation. Such boards or referees are hereby authorized to summon witnesses, require the production of records, books, correspondence, documents, and other papers, view properties, administer oaths, and may hold hearings in Washington and elsewhere, as their duties and the convenience of the parties may require. Such cases may be heard separately or together or by classes, as the Interstate Commerce Commission or any board of referees to which any such case shall be referred may determine. Said boards shall give full hearings to such carriers and to the United States; shall consider all the facts and circumstances; and shall report as soon as practicable in each case to the President the just compensation, calculated on an annual basis and otherwise in such form as to be convenient and available for such agreement as is authorized in section 1. The President is authorized to enter into an agreement with such carrier for just compensation upon a basis not in excess of that reported by such board and may include therein provisions similar to those authorized under section 1. Failing such agreement, either the United States or such carrier may file a petition in the Court of Claims for the purpose of final ascertainment of the amount of such just compensation, and in the proceedings in said court the report of said referees shall be prima facie evidence of the amount of just compensation and of the facts therein stated.

SEC. 4. That the just compensation that may be determined as hereinbefore provided by agreement or that may be adjudicated by the Court of Claims shall be increased by an amount reckoned at a reasonable rate per cent to be fixed by the President upon the cost of any additions and betterments, less retirements, and upon the cost of road extensions to the property of such carrier made by such carrier with the approval of or by the President while such property is under Federal control: *Provided*, That there shall be no increase of compensation for any additions, improvements, or betterments constructed out of or purchased by the earnings for investment or surplus earned during the period of Federal control.

SEC. 5. That no carrier while under Federal control shall, without the prior approval of the President, declare or pay any dividend in excess of its regular rate of dividends during the three years ending June 30, 1917: *Provided, however*, That such carriers as have paid no regular dividends or no dividends during said period, may, with the prior approval of the President, pay dividends at such rate as the President may determine.

SEC. 6. That the sum of $500,000,000 is hereby appropriated out of the Public Treasury from any funds not otherwise appropriated, which, together with any funds available from any operating income of said carriers, may be used by the President as a revolving fund for the purpose of paying the expenses of the Federal control, and so far as necessary the amount of just compensation, and to provide terminals, motive power, cars, and other necessary equipment, such terminals, motive power, cars, and equipment to be used and accounted for as the President may direct, and to be disposed of as Congress may hereafter by law provide.

The President may also, on or in connection with the property of any carrier, make or order any carrier to make any additions, betterments, or road extensions necessary or desirable for war purposes or in the public interest. He may from said revolving fund advance to such carrier all or any part of the expense of such additions, betterments, and road extensions so ordered and constructed by such carrier or by the President, such advances to be charged against such carrier and to bear interest at such rate and be payable on such terms as may be determined by the President to the end that the United States may be fully reimbursed for any sums so advanced.

Any loss claimed to accrue to any carrier by reason of any such additions, betterments, or road extension so ordered and constructed may be determined by agreement between the President and such carrier; failing such agreement the amount of such loss shall be ascertained as provided in section 3 hereof.

From said revolving fund the President may expend such an amount as he may deem necessary or desirable for the utilization and operation of canals or for the purchase, construction, or utilization and operation of boats, barges, tugs, and other transportation facilities on the inland and coastwise waterways and may in the operation and use of such facilities create or employ such agencies and enter into such contracts and agreements as he shall decree in the public interest.

SEC. 7. That for the purpose of providing funds requisite for maturing obligations or for other legal and proper expenditures, or for reorganizing railroads in receivership, carriers may, during the period of Federal control, issue such bonds, notes, equipment trust certificates, stock and other forms of securities, secured or unsecured by mortgage, as the President may approve as consistent with the public interest. The President may purchase for the United States all or any part of such securities at prices not exceeding par, and may sell such securities whenever in his judgment it is desirable at prices not less than the cost thereof; any sums available from the revolving fund provided in section 6 may be used for such purchases.

SEC. 8. That the President may execute any of the powers herein and heretofore granted him with relation to Federal control through such agencies as he may determine, and may fix the reasonable compensation for the performance of services in connection therewith; and may utilize the personnel and facilities of the Interstate Commerce Commission and call upon members of such commission, or any of its employees, or employees of any department of the Government for such services as he may deem expedient. No such Federal official or employee shall receive any additional compensation for such services.

SEC. 9. That nothing herein contained shall be construed as modifying or restricting the powers heretofore conferred upon the President to take possession and assume control of any or all systems of transportation; and the President, in addition to the powers conferred by this act, shall have, and is hereby given, such other and further powers necessary or appropriate to give effect to the powers herein and heretofore conferred. The provisions of this act shall also apply to any carriers to which Federal control may be hereafter extended.

SEC. 10. That carriers while under Federal control shall, in so far as is not inconsistent therewith, or with the provisions of this act, or any other act applicable to such Federal control, or with any order of the President, be subject to all laws and liabilities as common carriers, whether arising under statutes or at common law; and suits may be brought by and against such carriers and judgments rendered as now provided by law. But no process, mesne or final, shall be levied against any property under such Federal control.

That whenever in his opinion the public interest requires the President may initiate rates by filing the same with the Interstate Commerce Commission. Said rates shall be fair, reasonable, and just and shall take effect at such time and upon such notice as he may direct, but the Interstate Commerce Commission shall, upon complaint, enter upon a hearing concerning the justness and reasonableness of so much of any order of the President as establishes or changes any rate, fare, charge, or classification of any carrier under Federal control, and may consider all the facts and circumstances existing at the time of the making of the rate. After full hearing the commission may make such findings and orders as are authorized by the act to regulate commerce as amended.

SEC. 11. That every person or corporation, whether carrier or shipper, or any receiver, trustee, lessee, agent, or person acting for or employed by a carrier or shipper, or other person, who shall knowingly violate or fail to observe any of the provisions of this act, or shall knowingly interfere with or impede the possession, use, operation, or control of any railroad property, railroad, or transportation system hitherto or hereafter taken over by the President, or shall violate any of the provisions of any order or regulation made in pursuance of this act, or of any other act concerning such possession, use, operation, or control, shall be guilty of a misdemeanor, and shall, upon conviction, be punished by a fine of not more than $5,000, or, if a person, by imprisonment for not more than two years, or both. Each independent transaction constituting a violation of, or a failure to observe, any of the provisions of this act, or any order entered in pursuance hereof, shall constitute a separate offense. For the taking or conversion to his own use or the embezzlement of money or property derived from or used in connection with the possession, use, or operation of said railroads or transportation systems, the criminal statutes of the United States, as well as the criminal statutes of the various States where applicable, shall apply to all officers, agents, and employees engaged in said railroad and transportation service while the same is under Federal control, to the same extent as to persons employed in the regular service of the United States. Prosecutions for violations of this act, or of any order entered hereunder, shall be in the district courts of the United States, under the direction of the Attorney General, in accordance with the procedure for the collection and imposing of fines and penalties now existing in said courts.

SEC. 12. That all pending cases in the courts of the United States affecting railroads or other transportation systems brought under the act to regulate commerce approved February 4, 1887, as amended and supplemented, including the commodities clause, so called, or under the act to protect trade and commerce against unlawful restraints and monopolies, approved July 2, 1890, and amendments thereto, shall proceed to final judgment as soon as may be, as if the United States had not assumed control of transportation systems; but in any such case the court having jurisdiction may, upon the application of the United States, stay execution of final judgment until the further action of Congress in respect of control of transportation systems by the United States.

SEC. 13. That the Federal control of railroads and transportation systems herein and heretofore provided for shall not continue longer than 18 months after the proclamation of peace terminating the war in which the United States is now engaged: *Provided, however,* That the President may, prior to July 1, 1918, relinquish control of all or any part of any railroad or system of transportation further Federal control of which the President shall deem not needful or desirable; and the President may at any time during the period of Federal control agree with the owners to relinquish all or any part of any railroad or system of transportation: *Provided further,* That the President may relinquish all railroads under Federal control at any time he shall deem such action needful or desirable. No right to compensation shall accrue to any owner from and after the date of relinquishment for property relinquished under authority of this section. But this act is expressly declared to be emergency legislation enacted to meet conditions growing out of war; and nothing herein is to be construed as expressing or prejudicing the future policy of the Federal Government concerning the ownership, control, or regulation of carriers or the method or basis of the capitalization thereof.

Mr. ROBINSON. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. POINDEXTER in the chair). The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Gronna	Norris	Sutherland
Beckham	Harding	Nugent	Thomas
Borah	Hardwick	Poindexter	Thompson
Chamberlain	James	Ransdell	Tillman
Cummins	Johnson, S. Dak.	Robinson	Townsend
Curtis	Jones, Wash.	Shafroth	Vardaman
Dillingham	Kellogg	Sheppard	Watson
Fernald	Kenyon	Simmons	Wolcott
France	Lewis	Smith, S. C.	
Gallinger	McKellar	Smoot	
Gerry	New	Sterling	

Mr. SUTHERLAND. I wish to announce the absence of my colleague [Mr. GOFF] on account of illness.

Mr. GRONNA. I wish to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] is absent because of illness in his family. I will let this announcement stand for the day.

The PRESIDING OFFICER. The call of the roll shows that 41 Senators are present, not a quorum. The Secretary will call the names of the absentees.

The Secretary called the names of the absent Senators, and Mr. ASHURST, Mr. JOHNSON of California, Mr. KING, Mr. MARTIN, Mr. SAULSBURY, and Mr. WARREN answered to their names when called.

Mr. OVERMAN, Mr. HENDERSON, Mr. HITCHCOCK, Mr. SWANSON, Mr. MCNARY, Mr. OWEN, Mr. UNDERWOOD, and Mr. SHERMAN entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty-five Senators have answered to their names. There is a quorum present. The Senator from South Carolina will proceed.

Mr. SMITH of South Carolina. Mr. President, I am sorry that because of the lunch hour there are so few Senators here, as I have been informed by those in authority to speak, that the settlement of the railroad question, now that the Government has assumed control of the railroads, is one of paramount importance, for the reason that it is seriously affecting the financial situation. The railroads, as we all know, through their property and their securities, are related to the financial and commercial world in such a vital manner that it is jeopardizing the whole interests of the country for this matter of determining their status under the new condition to be suspended.

Mr. President, I hope that as far as possible all other business and subjects of debate will be laid aside until a disposition is made of the bill. It is not that I am seeking to have passed a bill that I have in charge by virtue of my position as chairman of the committee, but it is because of the vital necessity to the Nation that this question, involving practically twenty billions of dollars, shall be settled.

The action precipitating the necessity of legislation on the part of the Senate has already been taken. The roads are now in the possession and control of the Government of the United States, while the property is still in the hands of the private owners. That situation creates uncertainty and doubt and is reflecting itself, at this crucial time in our history, in such embarrassment in the financial world that we ought to see to it that it is now disposed of at the earliest possible time; and I hope that the Senate may be able to continue the consideration of this bill until it shall finally act and determine what disposition it shall make of it.

Mr. President, some very vital principles were necessarily involved by this radical and, perhaps, unprecedented change from the system heretofore obtaining in the management of our common carriers. They are in part public property and in part private property. They have been operated by private individuals during all the time since their introduction into our economic life, and they are now operated by the public, with private individuals still maintaining their ownership. The whole question is so vast and so vital to us at this time that I sincerely hope we may expedite the consideration of this measure to its final conclusion without any unnecessary hindrance.

In order that we may get clear the viewpoint of a majority of the committee in considering the bill before the Senate, it is perhaps well to give some of the facts that have led up to and resulted in the Government assuming possession and control of these properties.

The policy of the Government in relation to the railroads, up to the time of assumption of control by the Government, was to encourage competition amongst the several railroads, at least so far as service was concerned. Governmental regulation properly began with the creation of the Interstate Commerce Commission by the act of 1887. Since the creation of the commission the regulation and control of railroads, particularly in reference to rate, has been progressive.

The original act of 1887 empowered the commission to order carriers to cease from any violation of the act and to award reparation for past injuries. In 1906 the act was further amended, giving the commission the power to prescribe maximum rates for the future and to prescribe divisions of through rates. In 1910 it was still further amended by giving the commission the power to suspend rates, upon its own initiative or upon complaint, pending the investigation of such rates as to their justness and reasonableness, and in 1917 the act was still further amended, for a definite period—that is, that it should be operative up till January 1, 1920, requiring the railroads to obtain permission of the commission before filing tariffs containing any increased rates.

From this series of progressive statutory regulations it will be seen that the railroads, so far as their revenues were concerned, were practically under the control of the Interstate Commerce Commission; that the income that they received for rendering service to the American public was practically in the hands of a Federal body constituted by Congress, to which were delegated certain legislative functions.

The outbreak of the war in Europe, even before the entrance of America into the conflict, created a vastly increased volume of traffic for the railroads. This volume increased as the war proceeded, until the war traffic, plus the domestic traffic in certain railroad districts, was taxing the facilities of the roads beyond their power to adequately handle it. The congestion in these districts reacted throughout the country, so that it seriously affected the movement of all classes of freight.

The New England States, being largely a manufacturing center, and the port of New York principally, also Baltimore and Philadelphia, being the outlet for this traffic, all lines converging to these points, both in the carrying of their raw material and their finished product to these ports. The result was that the mouth of the funnel, to use an illustration, was so blocked that empty cars could not be gotten out and loaded cars could not be gotten in, thereby affecting the entire traffic of the country.

In the hearings before our committee the difficulty that was testified to by most of those who appeared before us was not that there were not, perhaps, adequate railroad facilities for meeting the conditions that were upon us, but that the concentration of freight and traffic at certain points so tied up the facilities—cars, box cars, coal cars—that actually when they were emptied they could not be gotten out on account of the roads being so congested with other freight. To relieve this situation there was organized in Washington under the auspices of the Council of National Defense a subcommittee known as the Railroad War Board. This board consisted of certain railroad officials, whose object was to cooperate, as far as the law would allow, with the Government in mobilizing as best they might the traffic of the country in the emergency. The result of their efforts was not satisfactory, at least it did not give the relief that the circumstances imperatively demanded.

This failure, in part at least, grew out of the restrictive laws in the interstate commerce act, forbidding the pooling of cars and of freight. It also may be noted, in connection with the two restrictive powers above mentioned, that the interstate commerce act gave to the shipper the right to route his freight over whatever lines he chose. This also was an obstacle in the way of distributing freely and efficiently the traffic of the country.

On May 29, 1917, in what is known as the Esch car-service act, the Interstate Commerce Commission was given the power "whenever the commission shall be of opinion that the necessity exists for immediate action * * * at once, if it so orders, without answer or other formal pleading with the interstate carrier or carriers, and with or without notice herein with the making or filing of a report * * * to suspend the operation of any or all rules, regulations, or practices then established with respect to car service for such time as may be determined by the commission, and also authority to make such just and reasonable directions with respect to car service during such time as in its opinion will best promote car service in the interest of the public and the commerce of the people."

This enabled the railroads, in cooperation with the commission, without violation of law to utilize the car service more effectually. It did not, however, change the law in reference to the right of the shipper to route his shipments. This act was helpful and was utilized by the railroad commission to its fullest, but the situation still did not improve to the extent that the circumstances demanded. Therefore, the right of the shipper to route his freight still being in force, there resulted a continued congestion of traffic in the great centers for manufacture and export in spite of the Esch Act and in spite of the effort on the part of railroads. The shippers of the country naturally ordered from and shipped to during this emergency the points that they had been in the habit of using, and the routes and the rates established by the railroads under the supervision of the Interstate Commerce Commission had been utilized for a long period of time by them; they were familiar with them, had regulated their business according to them, and therefore, for commercial reasons, there was no change in the situation so far as routing over congested roads was concerned. The congestion at the great eastern termini and its resulting effects upon the entire traffic of the country still remained so acute that it was threatening both the war activities and the commerce of the entire country.

On August 29 Congress enacted the following:

The President, in time of war, is empowered, through the Secretary of War, to take possession and assume control of any system or systems of transportation, or any part thereof, and to utilize the same to the exclusion, as far as may be necessary, of all other traffic thereon for the transfer or transportation of troops, war material, and equipment, or for such other purposes connected with the emergency as may be needful or desirable.

On December 1, 1917, the Interstate Commerce Commission made the following report in reference to the situation. I assume at this point, Mr. President, that those who have appreciated the importance of this legislation and the gravity of the situation have acquainted themselves with the recommendations made by the Interstate Commerce Commission. Under the laws they were required from time to time to make such recommendations as they thought pertinent and proper, and they made a recommendation which, without reading, I ask to have incorporated in my remarks.

The PRESIDING OFFICER (Mr. WATSON in the chair). Without objection, it is so ordered.

The matter referred to is as follows:

SPECIAL REPORT OF THE INTERSTATE COMMERCE COMMISSION.

WASHINGTON, D. C., *December 1, 1917.*

To the Senate and House of Representatives:

The act to regulate commerce requires the commission to transmit to the Congress such recommendations as to additional legislation relating to regulation of commerce as the commission may deem necessary. Under this mandate the commission submits the following special report, supplementing its annual report, with reference to transportation conditions as affecting and affected by the war in which the United States is now engaged.

The railroads of the country came into being under the stimulus of competition. From the outset their operation and development have been responsive to a competition which has grown with the growth of population and industry. This competitive influence has been jealously guarded and fostered by State laws and constitutions, as well as by the Federal law. The keenness of rivalry naturally drew to the front those who were quick to seize and resolute to retain every available point of vantage for their respective roads. Terminals, if confined to exclusive use, were not only of strategic importance, but profit-yielding assets. Out of competition grew rate wars, pooling, mergers, and consolidation into systems, as well as the rebating and other preferential treatment of shippers which the act to regulate commerce was primarily framed to prevent.

In that act the Congress, accepting the competitive principle as salutary, has thrown about it prohibitions against compacts for the pooling of freights or divisions of earnings of different and competing railroads, and, while the original act is but the nucleus of the act we now administer, that prohibition has remained unchanged.

But original act and successive amendments were alike framed in times of peace and for times of peace. They looked to protection of the shipper and the public against unjust or unfair treatment by the carrier and not to protection of the Nation and its commerce in time of war by utilization of all the forces and resources of its transportation systems to their fullest extent.

Since the outbreak of the war in Europe, and especially since this country was drawn into that war, it has become increasingly clear that unification in the operation of our railroads during the period of conflict is indispensable to their fullest utilization for the national defense and welfare. They must be drawn, like the individual, from the pursuits of peace and mobilized to win the war. This unification can be effected in one of two ways, and we see but two.

The first is operation as a unit by the carriers themselves. In the effort along this line initiated early in this year they are restricted by State and Federal law, and the idea is the antithesis of that which heretofore has controlled their activities. Their past operations have been competitive, although since the Hepburn Act, and especially since the Mann-Elkins Act, the prescription by this commission of reasonable maximum rates and charges for rail carriers subject to the act, and the exercise of its power to require abatement of unjust discrimination or undue prejudice, have in great degree restricted that competition to the field service. But whether or not perpetuation of the competitive influence is desirable under a system of Government regulation, it is

apparent that operation of our railroads as a unit involves the surrender by each of exclusive use of terminal facilities, surrender at times of profitable traffic to other carriers, and acceptance of less profitable traffic, with resultant loss of revenue, wherever economy of movement or greater freedom from congestion would dictate that course if the various carriers were in fact but one.

The alternative is operation as a unit by the President during the period of the war as a war measure under the war powers vested in him by the Constitution and those which have been or may be conferred by the Congress.

As bearing upon the alternatives thus stated it will be recalled that since the beginning of the war in 1914 the traffic offered to and moved by the railroads has increased enormously. Prior thereto there had been occasional periods of car shortage, usually restricted in territory, but it may be said that from 1907 down to 1916 the number of cars in the country exceeded the demand. This subject is treated in our annual report.

The sudden, unforeseen, and unprecedented demand for transportation occasioned by the war placed a strain upon the facilities and equipment of the railroads which they were not and are not prepared to meet. There was created a need for immediate and extensive additions to existing facilities and equipment. This need is coincident with demands upon capital, as well as upon labor, manufactures, and natural resources, such as we have never known. Important additions and betterments will require new capital.

The railroads propose essentially that we allow increases in freight rates of such magnitude that their increased earnings will attract investors by dividends declared or by the prospect of dividends in competition with securities issued by Federal, State, and municipal Governments, public-utility corporations, and industries organized and operating primarily for gain as distinguished from public service. Some of the latter have yielded large profits since the outbreak of the war.

An attempt to secure new capital would come at a time when the rising cost of living has made it difficult for those dependent for support upon their earnings to meet their current expenses; after the absorption by American capital of two-thirds of the American securities owned abroad prior to August 1, 1914, the railroad securities returned to this country alone amounting to from $1,700,000,000 to $2,000,000,000; after financing in this country of loans to our present allies; and after subscription for almost $6,000,000,000 of liberty loan bonds.

Even if the railroads had more money, the immediate construction of necessary facilities and equipment could not readily be effected. Labor is scarce and the cost is mounting. So with materials and supplies. Car and locomotive builders are largely engaged in producing equipment needed abroad, both by our allies and by our own forces in the conduct of the war. The steel and other materials needed for such construction, as well as the labor, are also needed in other phases of the conflict. Under such conditions and pending the acquisition of such additional facilities and equipment it is indispensable that those now in existence should be used to their fullest capacity, primarily for the uses which are most vital to the country's defense and welfare, but without unnecessary hindrance to the industry and commerce of our people, upon which their ability to contribute toward the success of the war so largely depends.

The act to regulate commerce was not enacted to meet such a situation. The carriers have the right to demand at our hands, and it is our duty to approve, just and reasonable rates sufficient to yield fair returns upon the value of the property devoted to public use after necessary expenditures for wages, fuel, and supplies, reasonable expenditures for maintenance, renewals, and betterments properly chargeable to operating expenses, and appropriate depreciation. Measured in dollars, the gross revenues of the carriers during the past and current fiscal years exceed any in their history. But what the dollar will buy in labor, material, and supplies is substantially less.

We are sensible of the vital and imperative need of the hour that our railroads shall not be permitted to become less efficient or less sufficient. We realize the gravity of a serious breakdown of our transportation facilities. It is unthinkable that this breakdown would be permitted if it could be prevented. Increased charges for carriage, if found necessary to take care of unavoidable increases in operating expenses, would not at this time bring new capital on reasonable terms in important sums.

In our opinion the situation does not permit of temporizing. All energies must be devoted to bringing the war to a successful conclusion, and to that end it is necessary that our transportation systems be placed and kept on the plane of highest efficiency. This can only be secured through unification of their operation during the period of the war.

If the unification is to be effected by the carriers, they should be enabled to effect it in a lawful way. To that end, in our judgment, the operation of the antitrust laws, except in respect of consolidations or mergers of parallel and competing lines, as applied to rail and water carriers subject to the act to regulate commerce, and of the antipooling provision of section 5 of that act, should be suspended during the period of the war, and until further action by the Congress. In addition, they should be provided from the Government Treasury with financial assistance in the form of loans or advances for capital purposes in such amounts, on such conditions, and under such supervision of expenditure as may be determined by appropriate authority. As a necessary concomitant the regulation of security issues of common carriers engaged in interstate commerce should be vested in some appropriate body, as has been recommended in our annual reports. The rights of shippers for reasonable rates and nondiscriminatory service under the present jurisdiction of the commission need not seriously be interfered with by such unified control. Some elastic provisions for establishment of new routes would probably be needed.

If the other alternative be adopted and the President operates the railroads as a unit during the period of the war, there should be, in our opinion, suitable guaranty to each carrier of an adequate annual return for use of the property, as well as of its upkeep and maintenance during operation, with provision for fair terms on which improvements and betterments made by the President during the period of his operation could be paid for by the carrier upon return to it of the property after expiration of that period.

HENRY C. HALL, *Chairman.*

Attest:

GEORGE B. MCGINTY, *Secretary.*

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Iowa?

Mr. SMITH of South Carolina. I do.

Mr. CUMMINS. Did the Senator from South Carolina include in his request for printing the report of Mr. McChord, of the Interstate Commerce Commission? The Senator will remember that there were two reports—one made by the majority and the other by Mr. McChord.

Mr. SMITH of South Carolina. I did not incorporate that.

Mr. CUMMINS. I think it would serve a good purpose and be very well if the Senator would ask that the McChord report be printed at the same time.

Mr. SMITH of South Carolina. I will make that request, because I think in all fairness to the commission it should be included.

Mr. CUMMINS. It is in exact accord with what we have since done.

Mr. SMITH of South Carolina. Yes.

The PRESIDING OFFICER. Without objection, that will also be included in the RECORD.

The matter referred to is as follows:

WASHINGTON, D. C., *December 5, 1917.*

To the Senate and House of Representatives:

The special report of the majority of the commission leaves unsaid some things which should be plainly stated if prompt and sure relief is to be brought to the present transportation situation. That the lack of adequate railroad service, particularly in eastern territory, is serious at the present time and is a cause of grave concern for the coming winter months needs no demonstration. Everyone knows it who knows anything about present business conditions. That the industries of the country engaged in making war materials as well as those not so occupied require the very best service which can be given by the railroads is also clear. I fully concur in the statement of the majority report that "it is necessary that our transportation systems be placed and kept on the plane of highest efficiency," and also that "this can only be secured through unification of their operation during the period of war." But the majority report takes the position, at least by implication, that this unification may "be effected by the carriers" themselves. With that judgment I wholly disagree.

The carriers' cooperative effort at the present time is in charge of the "executive committee of the special committee on national defense of the American Railway Association." This committee in its public announcements calls itself the Railroad War Board. It is the fifth committee that the railroads have had in Washington to deal with the transportation situation since November, 1916. The first two of those committees were given no real authority, although the commission was advised by the executives that they had been given full power, or, as it was expressed in the case of the first committee, "all the power of the executives." These committees therefore were unable to cope with the situation despite earnest and praiseworthy efforts of their individual members, who were hampered by the unwillingness of certain railroads, acting under the restraint of executive influence, to carry out their instructions. These facts have been reported by the commission. (Car Supply Investigation, 42 I. C. C., 657.) In that report both the majority and the minority expressed the view that the situation could be improved by a committee of railroad officers to act in cooperation with this commission if the committee were given plenary power by all the railroads. In apparent response to that suggestion a third committee was sent to Washington, in January, 1917, but it also had not been given the promised power and was therefore not received. In February, 1917, a fourth committee was sent to Washington to enforce certain car-service rules. Not all of the railroads believed that these rules were workable, and hence the agreement giving power to this committee was incomplete and inadequate. With this experience behind it, the American Railway Association, on April 11, 1917, formed its special committee on national defense and centered the chief authority in its executive committee. The resolution by which this committee was formed recites that the railroads of the United States pledged themselves, with the Government of the United States, with the governments of the several States, and with one another, that during the present war they would—

"Coordinate their operations in a continental railway system, merging during such period all their merely individual and competitive activities in the effort to produce a maximum of national transportation efficiency."

It was understood that the coordination of railway operations in a continental railway system meant that cars would be used interchangeably and sent where they were most needed; that track and terminal facilities would be opened up to all railroads, so as to relieve congestion; and that locomotives would be at once requisitioned from some of the strong and less burdened railroads for use on the important lines which have been unable to give efficient service, largely because they were badly in need of motive power. Yet as late as November 24 the carriers' committee made an announcement from which the following is quote:

"The Railroad War Board to-day adopted revolutionary measures in order to relieve the congestion of traffic on the eastern railways. It directed that 'all available facilities on all railroads east of Chicago be pooled to the extent necessary to furnish maximum freight movement.' The effect will be that to the full extent that conditions render it desirable these railways will be operated as a unit, entirely regardless of their ownership and individual interests.

"The operating vice presidents of the eastern lines have been appointed a committee to operate as a unit all the lines involved, and have been given instructions and authority to adopt all measures which in their judgment may be necessary to relieve the present situation and assure the maximum amount of transportation.

* * * * * * *

"An important part of the plan adopted for the operation of the eastern lines is that of placing at their disposal the facilities of railways in other territories to such extent as may be necessary."

These measures—the pooling of cars, the operation of railways as a unit, the placing of facilities at the disposal of railways in other territories as needed—are essential steps in the coordination of railway operations "in a continental railway system," using the phrase of the resolution of April 11, but were not taken until November 24.

I do not wish to be understood as saying that the carriers' committee has not accomplished results, nor that the shippers have not cooperated with the carriers to get greater service from the available equipment, for the heavier car loading has been a very material factor of improvement. But our experience with railroad committees during the past year makes me believe that no voluntary committee can accomplish what the situation demands. One of the principal reasons is that the element of self-interest, the traffic influence, is a persistent factor in postponing and resisting measures that seek to safeguard individual rights in the effort to secure transportation results as a whole. The "merely individual and competitive activities" and the established operating practices have their effect, despite directions or recommendations that have no sanction to enforce them except a voluntary agreement which is very general in character. There runs also in the activities of these committees the self-evident purpose to do whatever appears to be necessary to prevent the governmental authority from acting. For these and other reasons which it is not necessary to state I can not concur in a report to the Congress which apparently acquiesces in a continuation of control over the transportation situation by a committee appointed by the carriers themselves. The suggestions with reference to the antitrust laws, the antipooling provision of section 5 of the act, the desirability of Government loans for capital purposes, and the regulation of security issues undoubtedly have merit, but in my judgment their enactment into law will not make it possible for any committee appointed by the carriers to secure the full measure of transportation service which the present conditions demand.

The "unification" needed if our transportation systems are to be placed and kept on the plane of highest efficiency" is the unification of the present diversified governmental control. At the present time there are several Federal agencies authorized by law to issue orders or directions with respect to transportation. This commission, by the car-service act approved May 29, 1917, was given very broad powers to issue summary directions with respect to the movement, distribution, exchange, interchange, and return of cars. The priority director, designated by the President for that purpose under the act approved August 10, 1917, is authorized to direct that traffic essential to the national defense shall be given priority in transportation, and he has made certain orders of that character. The transportation of troops and material of war, under the amendment to the act to regulate commerce approved August 29, 1916, is required upon the demand of the President to be given preference over all other traffic in time of war, and by direction of the Army and Navy Departments and the United States Shipping Board preference orders have been given for the transportation of a very large tonnage of war materials and supplies of all kinds. The administrations controlling fuel and food, to which adequate transportation is, of course, vital, have taken an active interest in the movement of those commodities through their appointed agents. Under this diversified control the carriers are not able to meet the requirements of the increasingly heavy tonnage which must be moved. In consequence the industries devoted to war purposes and those engaged in their normal business are suffering. There is no institution in which regularity of operation is more requisite than in transportation, but railroad operation is approaching a chaotic condition. A coherent plan must be worked out which shall provide for both the needs of the Government in the energetic prosecution of the war and the needs of general commerce. It is imperative that war material be given preference in transportation, but the financial sinews of war depend in large measure upon the successful operation of our manufacturing plants and business establishments.

I concur in the view that "the situation does not permit of temporizing," but I am convinced that the strong arm of governmental authority is essential if the transportation situation is to be radically improved. That authority must be unified to make possible action that is both vigorous and consistent. If the President elects to exercise the power given him under the act approved August 29, 1916, to take possession and assume control of the transportation systems, I believe that vastly improved transportation conditions can be promptly secured. For this course legislation assuring the carriers a fair return may be appropriate. If the President does not so elect, it is my judgment that the authority over the regulation of railroad operations now vested in the several agencies referred to, with such amplification as may be necessary, should be promptly centralized by act of Congress. All of the forces now at work upon the problem, including the carriers' executive committee and its numerous subcommittees, could be at once utilized under a single governmental administrative control.

C. C. McCHORD, *Commissioner.*

Mr. SMITH of South Carolina. Mr. President, on December 26 the President issued the following proclamation of governmental control of the railroads, together with an explanatory statement in reference thereto, which I presume all are familiar with, and, without reading, I ask that it be incorporated in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

GOVERNMENT CONTROL OF RAILROADS.

By the President of the United States of America.

A PROCLAMATION.

Whereas the Congress of the United States, in the exercise of the constitutional authority vested in them, by joint resolution of the Senate and House of Representatives bearing date April 6, 1917, resolved:

"That the state of war between the United States and the Imperial German Government which has thus been thrust upon the United States is hereby formally declared; and that the President be, and he is hereby, authorized and directed to employ the entire naval and military forces of the United States and the resources of the Government to carry on war against the Imperial German Government; and to bring the conflict to a successful termination all of the resources of the country are hereby pledged by the Congress of the United States."

And by joint resolution bearing date of December 7, 1917, resolved:

"That a state of war is hereby declared to exist between the United States of America and the Imperial and Royal Austro-Hungarian Government; and that the President be, and he is hereby, authorized and directed to employ the entire naval and military forces of the United States and the resources of the Government to carry on war against the Imperial and Royal Austro-Hungarian Government; and to bring the conflict to a successful termination all the resources of the country are hereby pledged by the Congress of the United States."

And whereas it is provided by section 1 of the act approved August 29, 1916, entitled "An act making appropriations for the support of the Army for the fiscal year ending June 30, 1917, and for other purposes," as follows:

"The President in time of war is empowered, through the Secretary of War, to take possession and assume control of any system or systems of transportation, or any part thereof, and to utilize the same, to the exclusion, as far as may be necessary, of all other traffic thereon, for the transfer or transportation of troops, war material, and equipment, or for such other purposes connected with the emergency as may be needful or desirable."

And whereas it has now become necessary in the national defense to take possession and assume control of certain systems of transportation and to utilize the same, to the exclusion, as far as may be necessary, of other than war traffic thereon, for the transportation of troops, war material, and equipment therefor, and for other needful and desirable purposes connected with the prosecution of the war:

Now, therefore, I, Woodrow Wilson, President of the United States, under and by virtue of the powers vested in me by the foregoing resolutions and statute, and by virtue of all other powers thereto me enabling, do hereby, through Newton D. Baker, Secretary of War, take possession and assume control at 12 o'clock noon on the 28th day of December, 1917, of each and every system of transportation and the appurtenances thereof located wholly or in part within the boundaries of the continental United States and consisting of railroads and owned or controlled systems of coastwise and inland transportation engaged in general transportation, whether operated by steam or by electric power, including also terminals, terminal companies, and terminal associations, sleeping and parlor cars, private cars and private car lines, elevators, warehouses, telegraph and telephone lines, and all other equipment and appurtenances commonly used upon or operated as a part of such rail or combined rail-and-water systems of transportation; to the end that such systems of transportation be utilized for the transfer and transportation of troops, war material, and equipment, to the exclusion so far as may be necessary of all other traffic thereon; and that so far as such exclusive use be not necessary or desirable such systems of transportation be operated and utilized in the performance of such other services as the national interest may require and of the usual and ordinary business and duties of common carriers.

It is hereby directed that the possession, control, operation, and utilization of such transportation systems, hereby by me undertaken, shall be exercised by and through William G. McAdoo, who is hereby appointed and designated Director General of Railroads. Said director may perform the duties imposed upon him, so long and to such extent as he shall determine, through the boards of directors, receivers, officers, and employees of said systems of transportation. Until and except so far as said director shall from time to time by general or special orders otherwise provide, the boards of directors, receivers, officers, and employees of the various transportation systems shall continue the operation thereof in the usual and ordinary course of the business of common carriers, in the names of their respective companies.

Until and except so far as said director shall from time to time otherwise by general or special orders determine, such systems of transportation shall remain subject to all existing statutes and orders of the Interstate Commerce Commission and to all statutes and orders of regulating commissions of the various States in which said systems or any part thereof may be situated. But any orders, general or special, hereafter made by said director shall have paramount authority and be obeyed as such.

Nothing herein shall be construed as now affecting the possession, operation, and control of street electric passenger railways, including railways commonly called interurbans, whether such railways be or be not owned or controlled by such railroad companies or systems. By subsequent order and proclamation, if and when it shall be found necessary or desirable, possession, control, or operation may be taken of all or any part of such street railway systems, including subways and tunnels; and by subsequent order and proclamation possession, control, and operation in whole or in part may also be relinquished to the owners thereof of any part of the railroad systems or rail-and-water systems, possession and control of which are hereby assumed.

The director shall, as soon as may be after having assumed such possession and control, enter upon negotiations with the several companies looking to agreements for just and reasonable compensation for the possession, use, and control of their respective properties on the basis of an annual guaranteed compensation above accruing depreciation and the maintenance of their properties equivalent, as nearly as may be, to the average of the net operating income thereof for the three-year period ending June 30, 1917, the results of such negotiations to be reported to me for such action as may be appropriate and lawful.

But nothing herein contained, expressed or implied, or hereafter done or suffered hereunder, shall be deemed in any way to impair the rights of the stockholders, bondholders, creditors, and other persons having interests in said systems of transportation or in the profits thereof to receive just and adequate compensation for the use and control and operation of their property hereby assumed.

Regular dividends hitherto declared and maturing interest upon bonds, debentures, and other obligations may be paid in due course; and such regular dividends and interest may continue to be paid until and unless the said director shall from time to time otherwise by general or special orders determine; and, subject to the approval of the director, the various carriers may agree upon and arrange for the renewal and extension of maturing obligations.

Except with the prior written assent of said director, no attachment by mesne process or on execution shall be levied on or against any of the property used by any of said transportation systems in the conduct of their business as common carriers; but suits may be brought by and against said carriers and judgments rendered as hitherto until and except so far as said director may, by general or special orders, otherwise determine.

From and after 12 o'clock on said 28th day of December, 1917, all transportation systems included in this order and proclamation shall conclusively be deemed within the possession and control of said director

without further act or notice. But for the purpose of accounting said possession and control shall date from 12 o'clock midnight on December 31, 1917.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done by the President, through Newton D. Baker, Secretary of War, in the District of Columbia, this 26th day of December, A. D. 1917, and of the independence of the United States the one hundred and forty-second.

WOODROW WILSON.

By the President:

ROBERT LANSING,
Secretary of State.
NEWTON D. BAKER,
Secretary of War.

STATEMENT OF THE PRESIDENT.

I have exercised the powers over the transportation systems of the country which were granted me by the act of Congress of last August because it has become imperatively necessary for me to do so. This is a war of resources no less than of men, perhaps even more than of men, and it is necessary for the complete mobilization of our resources that the transportation systems of the country should be organized and employed under a single authority and a simplified method of coordination which have not proved possible under private management and control. The committee of railway executives who have been cooperating with the Government in this all-important matter have done the utmost that it was possible for them to do; have done it with patriotic zeal and with great ability; but there were difficulties that they could neither escape nor neutralize. Complete unity of administration in the present circumstances involves upon occasion and at many points a serious dislocation of earnings, and the committee was, of course, without power or authority to rearrange charges or effect proper compensations and adjustments of earnings. Several roads which were willingly and with admirable public spirit accepting the orders of the committee have already suffered from these circumstances and should not be required to suffer further. In mere fairness to them the full authority of the Government must be substituted. The Government itself will thereby gain an immense increase of efficiency in the conduct of the war and of the innumerable activities upon which its successful conduct depends.

The public interest must be first served and, in addition, the financial interests of the Government and the financial interests of the railways must be brought under a common direction. The financial operations of the railways need not then interfere with the borrowings of the Government, and they themselves can be conducted at a greater advantage. Investors in railway securities may rest assured that their rights and interests will be as scrupulously looked after by the Government as they could be by the directors of the several railway systems. Immediately upon the reassembling of Congress I shall recommend that these definite guarantees be given: First, of course, that the railway properties will be maintained during the period of Federal control in as good repair and as complete equipment as when taken over by the Government; and, second, that the roads shall receive a net operating income equal in each case to the average net income of the three years preceding June 30, 1917; and I am entirely confident that the Congress will be disposed in this case, as in others, to see that justice is done and full security assured to the owners and creditors of the great systems which the Government must now use under its own direction or else suffer serious embarrassment.

The Secretary of War and I are agreed that, all the circumstances being taken into consideration, the best results can be obtained under the immediate executive direction of the Hon. William G. McAdoo, whose practical experience peculiarly fits him for the service and whose authority as Secretary of the Treasury will enable him to coordinate as no other man could the many financial interests which will be involved and which might, unless systematically directed, suffer very embarrassing entanglements.

The Government of the United States is the only great Government now engaged in the war which has not already assumed control of this sort. It was thought to be in the spirit of American institutions to attempt to do everything that was necessary through private management, and if zeal and ability and patriotic motive could have accomplished the necessary unification of administration it would certainly have been accomplished; but no zeal or ability could overcome insuperable obstacles, and I have deemed it my duty to recognize that fact in all candor, now that it is demonstrated, and to use without reserve the great authority reposed in me. A great national necessity dictated the action, and I was therefore not at liberty to abstain from it.

WOODROW WILSON.

Mr. SMITH of South Carolina. It will be noted that one of the recommendations of the Interstate Commerce Commission was closely followed in principle by the proclamation of the President. On December 28, through the Secretary of War, he formally took possession and control of the railroads of the country. As indicated in his proclamation, the operation of the roads under Government control was extended so as to include the entire traffic of the country as well as war material. It therefore became necessary to enact legislation in order to carry into effect the powers conferred by the act of August 29 and such other powers as were granted or implied in the declaration of war.

The bill under consideration was drafted by the administration and modified by the Interstate Commerce Committee of the Senate to meet the situation. The first essential point was what compensation would be offered to the railroads by the Government for the use of their properties while under Federal control and what should be the basis of computing this compensation. In the proclamation of the President, and in the bill drafted by the administration, it was suggested that the time of the taking over of the properties and the conditions existing when taken over should be considered, and that the earnings by the roads under war conditions should become the basis of their compensation during the war period or the tenure of the Federal control. Therefore it is proposed in the bill, in pursuance of this idea, that the three war years—the fiscal years of 1915, 1916, and 1917—be taken as the basis to determine the average earning of the roads during the war period and to make compensation in accordance therewith. This seemed to the committee to be a fair basis of compensation, when it is considered that while all other corporate enterprises, as well as individual enterprises, not being subject to Federal regulation in regard to rates and charges were the beneficiaries of the extraordinarily high prices obtaining during the war period, the railroads, under the rules and regulations of the Interstate Commerce Commission, authorized by the commerce act, could not during this period increase their revenues except as those revenues were increased by increased traffic and travel, entailing on the railroads an increased service in comparison with the increased revenues from that service. There was an increase granted in rates in certain instances in the eastern district, but in the main the roads were practically operating under antewar rates, and it is but just to say that though this increase was granted it was not put into operation in sufficient time to be reflected to any appreciable extent in the returns of the roads up to June 30, 1917, the terminus of the period contemplated as a basis for compensation, so that the compensation for the roads contemplated in the bill will not now reflect that increase in rates which was granted to them and which they would have enjoyed had they been left in possession of the property.

This basis of compensation is made to enable the President to enter into an agreement with the roads in lieu of all their lawful and constitutional rights, thereby avoiding the delays and difficulties that would necessarily result from attempting to ascertain what would be just compensation by due process of law.

It is believed, and confidently hoped, that the carriers will make the agreements, as provided in this bill, in order to avoid delay, and in order that the entire railroad and carrier facilities of the country may be utilized freely and whole-heartedly to meet the exigencies of the emergency that is now upon us. This contemplated compensation should appeal to the roads and the public in view of the fact that it is probable that this is approximately the amount that they would be likely to receive from a court decision.

The committee also gave due consideration to the financial situation that now exists and which influenced the committee in dealing with this subject of compensation. The basis of compensation is such as to guarantee to the security holders of these properties their usual interest and dividends, and to take care of such other obligations as they normally provide for, thus creating confidence in these securities and avoiding the embarrassment that might arise were they not secured at least at the rate that they had been receiving previous to and during the war.

The question of the real value of the property was not considered by the committee as a proper subject for this emergency legislation; that is, the committee took the facts as they appear in the reports to the Interstate Commerce Commission, filed in accordance with the law, as being the proper basis for them to act upon. The committee recognizes that the value of the properties is not definitely ascertainable. The Interstate Commerce Commission has not yet completed the valuation of the properties under the valuation act. From time to time the Interstate Commerce Commission has taken the investment in the properties, as stated in the annual reports, as providing the best basis available to show the trend of expenses and revenues in relation to the stated investment, and as representing the most accurate figure now available. The committee, therefore, in the absence of an accurate investment figure, has taken the aggregate net earnings of the properties as the basis to be applied under this act. In other words, the committee took the result of the railroad operations under the regulating power of Congress as a just basis to compute their compensation in time of this emergency. We did not think it was the time or the place to go into an exhaustive analysis to ascertain just what was the actual, real investment and what the roads might, as a result of that analysis, be entitled to. That would necessarily involve both time and litigation, and the result hoped for under this bill would have been made impossible.

The total property investment of all roads, as reported to the Interstate Commerce Commission, for the year ended June 30, 1916, was $18,156,659,872. Class 1 roads, or those having annual operating revenues of more than $1,000,000 and which receive approximately 96 per cent of the net operating revenue, had a property investment of $16,872,373,900, as of June 30,

ment. This includes the investment of their nonoperating subsidiaries. It is estimated that on June 30, 1917, this investment of class 1 roads amounted to $17,250,000,000.

Mr. THOMAS. May I interrupt the Senator for a moment?

Mr. SMITH of South Carolina. Certainly.

Mr. THOMAS. What does the Senator mean by the term "nonoperating" roads?

Mr. SMITH of South of Carolina. That means the properties that are not actually used in operating activities. They have investments outside. The Senator, of course, will recall in his mind properties that are in no way actively employed in the railroad-operating activities. These class 1 roads receive about 95.87 per cent of the net operating revenues of all the roads, and the compensation provided for in this bill would approximate on their property $893,259,264 per year. On this basis the $896,-259,264 for class 1 roads becomes when made to include all the roads of the country approximately $935,000,000 annually.

It might be well for me to state here that certain reports that have gone abroad are to the effect that the Government is now considering a bill that will commit it to an annual payment to the railroads of approximately $935,000,000, which is not correct.

Mr. SIMMONS. Is that the amount the Government would have to pay to the railroads?

Mr. SMITH of South Carolina. To the railroads if they took all the roads and made the compensation upon the basis that is suggested to be made to class 1 roads.

Mr. SIMMONS. That is based upon the prewar period?

Mr. SMITH of South Carolina. Yes.

Mr. SIMMONS. It has no reference to the value of the property out of which the money is earned?

Mr. SMITH of South Carolina. No.

Mr. SIMMONS. The question I want to ask the Senator is this: Suppose a railroad had no net earnings during the period which is made the basis of calculation, it would get no more than its earnings, though that might be less than the actual expense of operating the road.

Mr. SMITH of South Carolina. I will say to the Senator from North Carolina that there is provision made in another section of the bill for a basis of agreement with such roads as he has in mind.

Mr. SIMMONS. Suppose a railroad makes a million dollars after paying expenses——

Mr. SMITH of South Carolina. If the Senator will allow me, a little later I will come to that particular phase and see what provision the bill has made to take care of that situation.

Mr. SIMMONS. Of the deficit?

Mr. SMITH of South Carolina. Of the deficit.

Mr. SIMMONS. Very well.

Mr. SMITH of South Carolina. Of course, no definite figures can even be approximated until it is known definitely just what roads will be taken and operated under the act. There is a provision in the bill which gives the Government the right to make rejections of any road or roads up to July 1, 1918, after which time they can only be released during the period of the war by mutual agreement between the carriers and the Government.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Iowa?

Mr. SMITH of South Carolina. I do.

Mr. CUMMINS. Before the Senator from South Caroiina leaves section 1, which he has been discussing——

Mr. SMITH of South Carolina. I have not left it yet. This is just explanatory to another phase of section 1.

Mr. CUMMINS. I wish to ask the Senator a question. I do not know whether he has considered the matter very carefully or not, because it was not much discussed before the committee, but it will aid me in presenting the views which I intend to present during the consideration of the bill. I have a table in my office taken from the records of the Interstate Commerce Commission, comprising, I think, 17 roads or systems, just for illustration. These roads have now on hand more than $800,-000,000, either in cash or in nonrailroad property. I do not know nor do I suppose anyone could discover just how they have invested these sums of money. This particular item has no reference, of course, to physical railroad property which is being used in rendering the people of the country the service which is rendered. My question is, Has the Government taken over as a part of the railroad property, in the case of these 17 or 18 railroads, the $800,000,000 which they now have on hand, not used in the operation of their systems of transportation?

Mr. SMITH of South Carolina. I will say frankly to the Senator that the hearings before the committee, the language of the bill, and the proclamation of the President do not contemplate taking over that property. I see the point that the Senator makes.

Mr. THOMAS. The act of August 29, 1916, would not permit it.

Mr. SMITH of South Carolina. It of course would become a factor in the argument that the Government is being taxed on the basis of property that they are not given the use of. I see the force of that.

Mr. CUMMINS. The question is not put in a disputatious way.

Mr. SMITH of South Carolina. I understand that.

Mr. CUMMINS. But it is really important for us to know whether the Government has taken over this vast sum of money which is now in the hands of the railroads.

Mr. SMITH of South Carolina. I understand that.

Mr. CUMMINS. I confess that it is a little difficult to reach a satisfactory conclusion upon the terms of the bill or upon the terms of the act of 1916. I think we shall be compelled to put an interpretation upon the law in that respect before we can advance safely toward a conclusion as to what is proper compensation. I would very much like to have the opinion of the Senator from South Carolina on that point. I say frankly that in my judgment neither the law of 1916 nor the bill we now have before us together with the action of the President puts this surplus or this money or property in the hands of the Government.

Mr. THOMAS. May I say a word here?

Mr. SMITH of South Carolina. I yield.

Mr. THOMAS. I was the author of the amendment to the act of August 29, 1916, which was quoted by the Senator from South Carolina a moment ago. I am not entirely familiar now with the exact phraseology that was used, but I certainly in preparing it had no intention of making it so operate as to invest the President with anything more than the power to control the possession of the physical property of the railroads for war purposes.

Mr. CUMMINS. I have always believed that to be the intent of the legislation and I think the language used was quite appropriate to express that intent, but it is claimed in some quarters that these railway corporations have been taken over as instrumentalities so that all their surplus and all their accumulations and all their profits, no matter whether necessary to the movement of traffic or not, have been taken over, and that we are awarding compensation to the corporations for all they have rather than for the instrumentalities of commerce in the way of transportation and service.

Mr. SMITH of South Carolina. I am sure the Senator has had presented to him tables showing the actual amount claimed to be invested in the physical property or in the operating property as contradistinguished from certain investments in nonoperating property, but the determination perhaps may be important before the conclusion of the consideration of this bill.

Mr. SIMMONS. If the Senator from South Carolina will permit me to interrupt him, the nine hundred million and odd dollars which the Senator spoke of a moment ago represented the net earnings of these railroads. Does that include the earnings from the nonoperating property to which he refers?

Mr. SMITH of South Carolina. No.

Mr. SIMMONS. It only includes the earnings of railroads proper, the physically operated railroad?

Mr. SMITH of South Carolina. Yes, sir.

Mr. WATSON. In regard to the phase of the subject which the Senator from Iowa [Mr. CUMMINS] has been discussing, the Senator from South Carolina will remember that the question as to whether or not cash in hand had been actually taken over by the proclamation of the President was dealt with by but one witness, as I now recall it, and he was Commissioner Anderson. My recollection is—if I am wrong the chairman will correct me—that his opinion was that cash in hand was not taken over nor were the other nonoperating properties. I recall that the question was asked him, for instance, as to the open ground north of the Senate Office Building, which, I think, belongs to the Baltimore & Ohio Railroad, "In your opinion was that taken over?" He said, "No; it was not." I recall also that it was the opinion of some of the railroad men who were present, as far as they were able to get any information on the subject, that that property was not taken over. But, on the other hand, my recollection is that the Director General has been construing the proclamation as placing in his hands that class of property also; that is, to pay the cash in hand.

Mr. SMITH of South Carolina. I am of opinion that before this debate is concluded I shall have a definite statement from those who are to take charge or who are now charged with the execution and administration of the law as to their construction of the point raised by the Senator from Iowa. What we are now

discussing in the bill, or the point to which I am addressing myself now, is the revenues the road received from operating activities, from which are to be subtracted the expenses incurred in such operation, and then the net is to be the compensation.

It is estimated that the net operating income of the roads in class 1 for the year ending June 30, 1917, was $1,020,800,000. In 1916 the net operating income of these roads was $984,872,959 and in 1915 it was $683,104,833. It will be seen by these figures that in the fiscal year ending June 30, 1917, they had earned approximately $36,000,000 more than in the year 1916 and $337,000,000 more than in 1915, so that the average for the three years, which approximates the compensation that might be paid, is $124,000,000 less than they earned during the fiscal year ending June 30, 1917.

Of course, it is a matter of mere speculation as to whether this increase, as reflected in the fiscal year 1917, would have been maintained, but the increase reflected in the returns of 1916 and 1917 makes it reasonable to suppose that they would have at least maintained the income of 1917. So that a majority of the committee believe that the basis of the proposed agreement was under the circumstances just.

Mr. CUMMINS. Mr. President, the figures which have just been stated by the Senator from South Carolina do not sound familiar to me, and I have given pretty close study to the subject. Unless there has been deducted from the net railway operating income of the year 1917 an estimate of the war taxes which the companies may be compelled to pay, the amount stated by the Senator, I think, is incorrect. I am sure he is in error with regard to the net railway operating income for 1915. I do not ask the Senator to recast his statement, but I could not allow it to stand without a suggestion that, as I understand the figures, they are not the ones that have been just reported by the Senator.

Mr. SMITH of South Carolina. Well, in justification of the quotation made by the Senator from South Carolina, I will state that these were the figures furnished me by the Interstate Commerce Commission as of yesterday. That commission is the final source of information, so far as I am concerned, and I will state also that the figures will be furnished to the Senator.

Provision is made in the bill, of course, to provide for such roads as are taken over as to which no agreement can be reached. That is the point to which the Senator from North Carolina called my attention.

Mr. THOMAS. Mr. President, the Senator from South Carolina is making a most intelligent and interesting exposition of one of the most important bills that ever came before the Senate or which ever will come before the Senate, and yet he is speaking to empty seats. In order, if possible, to induce Senators to remain and listen to this illuminating discussion, I again suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HENDERSON in the chair). The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Beckham	Johnson, S. Dak.	Norris	Smith, S. C.
Borah	Jones, Wash.	Overman	Smoot
Chamberlain	Kellogg	Pittman	Sterling
Culberson	Kenyon	Poindexter	Sutherland
Cummins	King	Pomerene	Thomas
Curtis	Kirby	Robinson	Thompson
Dillingham	Lewis	Saulsbury	Tillman
Fernald	Lodge	Shafroth	Trammell
France	McCumber	Sheppard	Underwood
Gallinger	McKellar	Shields	Vardaman
Gore	McNary	Simmons	Warren
Henderson	Myers	Smith, Ga.	Watson
James	New	Smith, Mich.	Wolcott

Mr. CURTIS. Mr. President, I desire to announce the absence of the Senator from New Mexico [Mr. JONES], the Senator from Arizona [Mr. ASHURST], the Senator from North Dakota [Mr. GRONNA], and the Senator from Idaho [Mr. NUGENT] on official business.

Mr. CUMMINS. I desire to say in behalf of the Senator from Wisconsin [Mr. LA FOLLETTE] that he is detained at home on account of illness in his family.

Mr. VARDAMAN. I desire to announce the absence of the Senator from Louisiana [Mr. RANSDELL], the Senator from Minnesota [Mr. NELSON], the Senator from Ohio [Mr. HARDING], and the Senator from California [Mr. JOHNSON] in attendance on the Committee on Commerce.

Mr. MYERS. My colleague [Mr. WALSH] is still detained from attendance upon the floor of the Senate by the state of his health.

Mr. TRAMMELL. I desire to announce the unavoidable absence of my colleague [Mr. FLETCHER] on account of illness.

The PRESIDING OFFICER. Fifty-two Senators having answered to their names, there is a quorum present.

Mr. SMITH of South Carolina. Mr. President——

Mr. WATSON. Mr. President, before the Senator from South Carolina proceeds, will he allow me to interrupt him for a question?

Mr. SMITH of South Carolina. Certainly.

Mr. WATSON. I should like to ask whether or not, in the figures which the Senator gave, he was stating the aggregate for class 1 or for classes 1, 2, and 3?

Mr. SMITH of South Carolina. I was stating the aggregate in the one set of figures for all the roads, of course, but in the last figures of those roads which are reporting to the Interstate Commerce Commission there were included classes 1, 2, and 3.

Mr. WATSON. Well, does the Senator desire to modify those figures or to stand on them?

Mr. SMITH of South Carolina. I shall stand on them, subject to such modifications as further investigation may justify; in other words, the Senator from South Carolina desires to be thoroughly accurate in his statement of those figures; and if, upon examination, he finds that they should be modified to any appreciable extent, or to any extent, he will call attention to the matter.

To resume. Provision is made in the bill, of course, to provide for such roads as are taken over as to which no agreement can be reached. Section 2—and I will read section 2 in this connection, because it is directly connected with section 1 in forming a basis of agreement between the Government and the roads outside of the courts—provides:

> That if no such agreement is made, the President may nevertheless pay to any carrier while under Federal control an annual amount, payable in reasonable installments, not exceeding 90 per cent of the estimated annual amount of just compensation, remitting such carrier to its legal rights for any balance claimed to the remedies provided in section 3 thereof. Any amount thereafter found due such carrier above the amount paid shall bear interest at the rate of 6 per cent per annum, and any excess amount paid hereunder shall be recoverable by the United States with interest at the same rate.

It is also provided in section 3 "that all claims for just compensation not adjusted as provided in section 1 shall, on the application of the President or of any carrier be submitted to boards" or certain referees, who are empowered to require records, books, and correspondence, documents, and other papers, and after a full hearing of the case the President is authorized, upon the finding of these referees, to enter into an agreement with the carrier for just compensation upon a basis not in excess of that reported by such board, and may include therein provisions similar to those authorized under section 1.

In this section provision is also made for the Court of Claims to settle the amount of just compensation if the parties fail to agree.

The Government obligates itself, in the case of agreement, to keep the roads in practically the same repair as when taken over by the Government. It is provided that this may be done either by the roads out of their own funds or by the Government, as the particular case may require, but that records shall be kept in order that a just and fair settlement may be made and the extent to which the Government has kept its obligations be ascertained.

Provision is also made whereby any betterments and improvements may be taken care of by the roads, and the amount of compensation reckoned thereon, subject to the approval of the President, while such property is under Federal control. But it is provided that there shall be no increase of compensation for any additions, improvements, or betterments constructed out of or purchased by the earnings during the period of Federal control.

This is one of the difficulties that have presented themselves to the committee, and it is perhaps the most fruitful source of contention from some quarters. It is, in effect, that the railroads, out of their surplus, should not be allowed to make a capital investment of that surplus; that the railroads should be restricted in their earnings to a fair and reasonable percentage upon their actual capital investment; that fair and reasonable return to be an amount sufficient to pay the interest on their bonds and dividends on their stock, any amount above that to be denied in the rate making.

That theory might be all right, but in practice it amounts to this: Under our system of Federal control we have attempted to force competition in service by equalizing and rendering uniform, as far as possible, rates within competitive territory. This is absolutely necessary if we are to have competition of any sort. Let me illustrate: Four roads, I will say, run from Washington to New York; they are competing for the traffic; they can not compete in rates, because if preferential rates are given

to one road, then the others might as well go out of business, but the rates being made uniform they all compete for the business in service. It develops that road A gets twice as much traffic under the uniform rates as road B gets, and hence earns twice as much money as road B earns, and road A, therefore, earns a surplus beyond what would be a reasonable dividend and interest on the investment. If we lower the rate to road A in order that it may make a just and reasonable amount on the investment, we have still further increased its power to kill its competitor, because it will carry goods cheaper, while if we raise the rate to help road B we still further increase the surplus of road A. Now, the question arises if road A earns a surplus under conditions that we have created, and from which there seems to be no reasonable escape, shall it or shall it not be allowed to take this surplus which the circumstances have guaranteed and put it back into the property in the form of additions and betterments on which subsequently to charge another tax to the people? I confess that at this stage of my investigation of this question I can not see the difference between the money thus earned under rules and regulations that we have established and which when earned is being invested in further increasing the facilities of the property, and money not earned but borrowed from the bank invested in the property and being charged to it.

Mr. KELLOGG. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Minnesota?

Mr. SMITH of South Carolina. I yield.

Mr. KELLOGG. I should like to suggest to the Senator from South Carolina, as to the figures which the Senator gave on which the guaranteed income is based, that they are aggregate, and, I think, are arrived at in this way: The net operating income for 1917 was $1,020,800,000. That includes class 1 railroads, embracing railroads having an operating revenue of more than $1,000,000.

Mr. SMITH of South Carolina. That is correct.

Mr. WATSON. Is that for the calendar year?

Mr. KELLOGG. No; that is for the year ending June 30, 1917. Now, for the year 1916 the operating income was $984,572,959.

Mr. SMITH of South Carolina. Those are exactly the figures I quoted.

Mr. KELLOGG. And for 1915, $683,104,833. The average of those would amount to $896,259,264, but as this did not include all the railways——

Mr. SMITH of South Carolina. That is right.

Mr. KELLOGG. The Interstate Commerce Commission arrived at the total for all railways by applying a percentage to that and made the guaranty on that basis $935,000,000 in round figures.

Mr. SMITH of South Carolina. I made that statement.

Mr. KELLOGG. I did not know the Senator had done so.

Mr. SMITH of South Carolina. Yes; I made that statement, as will appear from the RECORD.

Mr. CUMMINS. Mr. President, I did not understand that the Senator from South Carolina limited his statement to class 1 roads.

Mr. SMITH of South Carolina. I did.

Mr. CUMMINS. I think when the Senator comes to review his remarks he will find that he omitted that qualification.

Mr. SMITH of South Carolina. I took pains, I thought, to call attention to the fact that class 1 roads received as compensation for their service about 96 per cent of the total, and therefore I proceeded upon that assumption, and stated that if all the roads were included the amount would be $935,000,000.

Mr. CUMMINS. The Senator stated in the majority report that it would be $945,000,000.

Mr. SMITH of South Carolina. Yes.

Mr. CUMMINS. And that amount would be increased from ten to fifteen million dollars by the added compensation for the increased investment after the 30th of June, 1917, and prior to the 1st of January, 1918.

Mr. SMITH of South Carolina. Yes. I will call the Senator's attention to the fact that the report was interpreted as facts, when it was really based upon the estimate of all the roads being taken in.

I am very sorry that the discussion on the point to which I have just adverted could not be heard by more of those who will have to vote on this bill, because it is one of the points of contention, and is one that will be perhaps debated more than any other in this bill. Because there was a difference of opinion, there was a provision put in this bill to this effect, as I have said, that there shall be no increase of compensation for any additions, improvements, or betterments constructed out of or purchased by the earnings during the period of Federal control. Of course, that will come up for discussion later. In section 5 it is provided——

Mr. CUMMINS. Will it embarrass or unduly divert the Senator if I ask him a question upon the point that he has just been discussing or stating?

Mr. SMITH of South Carolina. I shall be very glad to have the question asked.

Mr. CUMMINS. I should like those who are here to have it in mind. The Senator from South Carolina has very frankly and clearly stated the difficulty in railway-rate regulation. It is what everybody concedes to be an unsolvable problem in adjusting rates for transportation, namely, that two roads or three roads or four roads being competitive rates that will make one company excessively rich will barely pay the expenses of another. The Interstate Commerce Commission has found it utterly impossible to reduce the rates for the more favored companies to the point that would pay only an adequate return upon the capital because the consequence of doing so would be to destroy another road that must be maintained in order to serve the community through which it passes.

Now, one of the questions that the Senate will have to determine is this: Does this impossibility of adequate regulation on the part of the Interstate Commerce Commission pass over to the lawmaking body when it comes to ascertain the just compensation for the use of the several properties; in other words, must we award to the so-called favored company a compensation that will be vastly in excess of the amount required for adequate return upon the investment for the reasons that compel the Interstate Commerce Commission to do the same thing in rate making? That is one of the vital, cardinal points in this bill; and I interrupted the Senator from South Carolina only to suggest that the obstacles in the way of the Interstate Commerce Commission are not in our way. Those obstacles do not relate to the ascertainment of the values of the property or the value of the use of the property, and we are free to do what is just and fair and right, although the Interstate Commerce Commission in adjusting rates could not limit rates as to some companies so that only adequate compensation for the service would be paid.

I wanted the Senators who are here to understand clearly the point of view from which I look at the subject, and which I intend, before we have finished, to elaborate and emphasize as fully and completely as it is within my power to do.

Mr. SMITH of South Carolina. Mr. President, I do not think the point raised by the Senator, or raised by myself and spoken of by the Senator, is one that we can lightly disregard. I heartily agree with him that the prohibition under which the Interstate Commerce Commission finds itself acting does not extend to this body. This body created that body and can modify at its will the rules under which its creature operates. But at this time, while we are in the throes of an emergency the like of which we will never see again, I do not think we can attempt to settle a question that pertains to times of peace without defeating the very purpose and object of this bill.

Railroad legislation was bad in times of peace, perhaps. I do not deny that it may have been. I am not committing myself one way or the other, because I have not had time to investigate this vexed and abstruse problem so as to get my bearings thoroughly. But I do maintain that this is not the time for us to undertake to settle problems that we inherit from peace times, which were perhaps bad then, as claimed by the Senator from Iowa, and have projected themselves into this emergency, calling for the most careful, painstaking readjustment, and final solution, for the reason, amongst others, that the personal equation is in this problem. I do not charge that the railroads are not as patriotic as other citizens; but I do state here and now that personal interest will, in spite of ourselves, affect us even in the discharge of the most sublime patriotic service, and if we attempt now to regulate the railroads as it is claimed they should have been regulated before the war period and should remain thus regulated after the war period, while we are debating that question here—necessarily without any reference to the war—it would defeat the purposes of the bill. The question raised by the Senator from Iowa is one of dollars and cents and not of service, in the crucial hour of America's travail. It is a question whether the commercial interests of America have been getting too much or too little service or whether the railroads have been getting too many dollars and cents. We are not discussing that now. We are discussing the service to be rendered by an indispensable element in our commercial life and how we can best get that service.

I am perfectly willing to leave that question for solution to a time when the shadow of impending disaster shall have passed, and then I will join the Senator from Iowa in solving what to my mind is the crux of the whole business—this very question

raised here; but I hope the Senator will understand that those of us of the committee who did not insist upon—who, in fact, opposed—entering into the discussion of that problem now did not do it because of a leaning toward the railroads or an indifference to the American people, the shippers. We did it because we recognized that even if it took $200,000,000 to pour on the machinery of personal interest in order to get the greatest efficiency, we would pour it on in the greater interest of efficiency during times such as these. That is what actuated me, and I believe it is what actuated other members of the committee.

Mr. KELLOGG. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Minnesota?

Mr. SMITH of South Carolina. I do.

Mr. KELLOGG. If the Senator will pardon me, I should like to suggest that the point raised by the Senator from Iowa, as I understood it, was that the Interstate Commerce Commission was embarrassed because it could not reduce the rates of some road fortunately situated, earning too much, because if it did a competitor less fortunately situated would not earn enough, but that that condition does not bind the Congress.

It is true that if the Congress could simply appoint a commission or refer each railroad to the court to try through years of litigation and determine as to each road just how much was reasonable as just compensation for the use, that could be done; but that court would never find out how much should be paid until the time of use had passed, and, as I remember, the Senator from Iowa did not offer any amendment that secured that equalization. If he did, I should like to see it.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Iowa?

Mr. SMITH of South Carolina. I yield.

Mr. CUMMINS. If the Senator from South Carolina will allow me, I will present my amendment in due time and will discuss it. It is sufficient to say now that, if adopted, it will save the American people about $200,000,000 per year as compared with the compensation proposed in the bill. But I can not allow the impression to go abroad that I desire to bring about a situation in which all these roads must have their damages assessed in a legal tribunal, although the machinery for that is provided in the bill.

I understand and recognize as well as anyone can the desirability of an immediate adjustment; but I do not believe that in order to secure an immediate adjustment it is necessary to authorize the President to make just such agreements as the railroad companies demand. I am not willing to assume that their willingness to do right must be either coerced or bought. I am not willing to assume that they will not go forward and cooperate with the Director General in the operation of these roads so that they will be as efficient as they can be made.

The Director General is operating these roads now. He is not waiting for this bill, and could not wait for it. We are doing nothing more than, first, providing a means for ascertaining what the just compensation is; and, second, authorizing the President to make an offer which may result in a voluntary agreement that will settle the whole matter.

I hope we will authorize the President to make an offer that can be, in justice and good conscience, accepted by the railroads; but, in order to arrive at that standard, we will not find it necessary to settle the great problem to which the Senator from South Carolina refers. All that we will have to do, and that we must do in any event, is to reach a conclusion with regard to a standard that will afford just compensation for the use of these properties.

The Senator from South Carolina and the majority of the committee felt that a standard which was equal to the average net operating income for the last three years would be just. I do not think so. I have proposed another standard that is just as easy to analyze and apply as the standard proposed in the bill as it originally came from the administration. We are compelled to reach a conclusion upon it. We can not postpone it. I think I shall be able to demonstrate, and, I hope, convincingly, to the Senator from South Carolina that the standard which we here adopt will, as applied to at least 86 of the railroads and railroad systems of this country, give them a compensation of nearly $200,000,000 per year more than they ought to have.

We must not forget, if the Senator from South Carolina will permit me, that when we make an arrangement that somebody shall receive money we at the same time make an arrangement by which somebody must pay money; and we have been looking altogether too much toward the satisfaction of those who are to receive the money, and altogether too little to the protection of those who are to pay the money.

I have not, and never have had, the very least doubt about the fidelity of the chairman of the committee. I know that he is just as wholly and thoroughly devoted to the public interest as I could claim to be, and I think that is true of every member of the committee. It is simply a difference of opinion. It will be fought out upon the floor of the Senate. I know that it will be fought out with complete recognition upon the part of every Senator of the integrity and uprightness of all other Senators. Let us make this, anyhow, an example of a debate in which there can be expressed difference of opinion without the least imputation concerning the motives of anybody who may be involved in the debate. I know that is the view of the Senator from South Carolina, and I intend to help him in every way I know how to preserve that atmosphere in this debate.

Mr. SMITH of South Carolina. I heartily concur in that.

In section 5 it is provided that without the prior approval of the President no roads under Federal control shall pay any dividend in excess of the regular rate of dividends during the year ending June 30, 1917. This was approved by the committee because of the possibility of serious market disturbances that might result from any abnormal increase of dividends on certain securities by railroads while under Federal control. They may have in hand a large surplus which they have under private control set aside for certain purposes that might not be needful while under Federal control, and in paying extraordinary dividends they might create a disturbance that at this time might be hurtful.

In section 6 a revolving fund of $500,000,000 is provided for to meet any expenses that the Government might deem necessary in carrying out to the fullest extent the purposes of Federal control.

And this $500,000,000 revolving fund might be added to by any net railway operating income in excess of the standard return.

The railroads under section 7 are authorized, with the approval of the President for purposes of reorganization in receivership or for meeting maturing obligations, and for other legal purposes, to issue such bonds, notes, equipment trust certificates, and other forms of securities as may be deemed consistent with public interest.

And the President is further authorized to purchase "all or any part of such securities at a price not exceeding par, and may sell such securities, whenever in his judgment it is desirable, at prices not less than the cost thereof." This is done in order to contribute to the stabilizing of the market and to avoid the dangers incident to such securities being allowed to be manipulated entirely by corporations or individuals during this period of necessary monopolization of financing by the Government.

Now, Mr. President, we come to the next question which, perhaps, gave the committee the greatest difficulty—the rate-making question. The trend of all regulation under the commission in reference to rates was to stabilize them, to make certain, as nearly as may be, rates and classifications and to eliminate the dangers of fluctuation. The whole rate structure as now obtains is so intimately interwoven with the commercial life of the country that a radical disturbance might result in disaster. It might create such confusion and embarrassment as a consequence as to jeopardize, if not destroy, the purposes of this bill. This has reference, of course, to the conditions in which we now find ourselves, the emergency that is now upon us.

It may be that the system and machinery of rate making is altogether wrong, that tares are in the wheat. The question is, Is this the time to eliminate them?

It is of course true that to avoid congestion or to remedy congestion, to mobilize and move the freight and traffic of this country expeditiously and satisfactorily it will become necessary to establish new routings and new rates. It may also become necessary to care for unforeseen increases and expenses to increase the revenue of the carriers by an increase of rates.

The difficulty presented therefore to the committee was that of the two conflicting principles—one to maintain as far as possible the stability of rates, the other to grant the power to change rates to meet the changed conditions incident to the emergency now on us. Therefore a compromise was reached as embodied in this bill, to the effect that the rules, regulations, classifications, and rates as now obtain in the tariffs filed with the Interstate Commerce Commission shall continue, except where the Director General deems it in the interests of the public and for the carrying out of the purposes of this war-emergency act, to initiate new rates and new routings to meet that condition. And in the event of a new rate and a new routing being initiated, upon complaint the Interstate Commerce Commission is still vested with the power to review the rates as heretofore and make their findings and orders as heretofore.

In other words, the progressive stages of the legislation regarding rate regulation had in the interest of rate stability

gradually taken away from the carriers in practical effect the power to initiate rates except upon the prior approval of the commission. That power is now restored to the Director General, subject, however, to the review of the Interstate Commerce Commission.

The bill provides—and to this I invite the attention of the Senators, and particularly the attention of the Senator from Iowa—that a railroad or railroads, system or systems, or any part thereof, may be rejected or released from Federal control prior to July 1, 1918, and it is probable that quite a per cent of the railroads will not be taken under Federal control. Some difficulty may arise as to the adjustment of the two rate-making forces that will then exist. The Interstate Commerce Commission will have jurisdiction, as now, over such roads as are not taken over, governed by the regulating statutes now existing, while a radical modification will be in existence in reference to the Government-controlled roads.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Iowa?

Mr. SMITH of South Carolina. I do.

Mr. CUMMINS. I am very glad the Senator from South Carolina emphasized the point he has just made. He will remember, of course, that I was one of the members of the committee who did not accept the amendment which now appears in the bill; and the thought just suggested by the Senator was one of the reasons which compelled me to dissent from it.

I offered an amendment, out of which probably the compromise grew, which provided—and I shall offer it again on the floor of the Senate—that as to rates for general commerce, not rates for Government troops or Government property, the President should have no other power than is now exercised by the carriers. If that amendment had been adopted—as I hope it will be adopted when it comes to the Senate—the difficulty pointed out just now by the Senator from South Carolina would disappear, and we would not have two tribunals making rates for the transportation of property in general commerce.

Mr. SMITH of South Carolina. Mr. President, the reason why I called the Senator's attention to it was that this difficulty occurred to me in my investigations of this matter while I was preparing myself for the effort that I am now making. I was desirous that the Senate should know the problems sought to be solved in the bill; upon the Senate in part rests the responsibility of its ultimate solution. I shall not comment on this. I am calling attention to the fact that if, as now seems to be probable, a considerable per cent of the roads are left outside of Government control, they will, ipso facto, be under the jurisdiction of the Interstate Commerce Commission, while the balance of the roads, with which they cooperate and exchange freight and move and do the commerce of the country, will be under another jurisdiction.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Colorado?

Mr. SMITH of South Carolina. I yield.

Mr. THOMAS. It would seem that the simpler solution of that problem would be to provide in this bill that all the lines of transportation should be taken over and operated under one system by the Government.

Mr. SMITH of South Carolina. The alternative whether all shall be operated by the Interstate Commerce Commission or whether they shall all be operated by the Government is the question, it seems to me, that will appeal to the intelligence of this body.

Mr. CUMMINS. Mr. President, I want to say in that regard that I offered in the committee, and I have now presented to lie on the table of the Senate, an amendment which provides that there can be no competition between the Government and privately owned railroads. In other words, it provides——

Mr. THOMAS. Mr. President, I suppose the Senator means that there should be no competition. Of course there can not be, as a matter of fact.

Mr. CUMMINS. Well, I meant that there should be none, rather than that there could be none. It provides that as to any independent line—that is, a line not owned or operated or controlled by another line—if its trunk-line competitor is, or its trunk-line competitors are, taken over and operated by the Government, then this line shall also be taken over and operated by the Government and shall be entitled to all the benefits of the provisions of this bill. There is no other way of even approaching justice, in my judgment.

Mr. THOMAS. I think the Senator is right.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Ohio?

Mr. SMITH of South Carolina. I yield.

Mr. POMERENE. I have a very distinct recollection of the amendment to which the Senator from Iowa has referred, and one of the very great difficulties that I had in passing upon it was to determine when the one road was in competition with the other. I should like to have the Senator advise the Senate, if he can, how many roads would be taken under that plan which would not be taken under the present bill, or how many would be left out.

Mr. CUMMINS. Mr. President——

Mr. SMITH of South Carolina. If the Senator will pardon me, I have only a few minutes more.

Mr. CUMMINS. Allow me to answer that question for a moment, because the Senator from Ohio has asked it as though it were difficult to answer. It is not.

Mr. POMERENE. I shall be very glad to hear the explanation.

Mr. CUMMINS. It is very, very easy to determine whether one railroad competes with another or with others for business. That is a question of fact which mere observation always settles. The other question which the Senator proposes, and which I suppose was not really directed to me, is, How do we know what roads have been taken over and what roads have not been? I can not answer that question. Because nobody knows what roads have been taken over. That is one of the difficulties about this whole thing up to the present time. There has not been a definite notice given to any railroad company in the United States that it has been taken over and its operation assumed by the Government. There have been general notices given to all the railroads, which, however, the Director General—and I can easily see how he reached that conclusion—declared were sent out as matters of form and were not intended to fix the attitude of the Government toward the properties owned by the companies to which the notices were sent.

Mr. POMERENE rose.

Mr. SMITH of South Carolina. I shall have to insist upon proceeding. I have only a few more remarks to make. However, I would like before leaving the point that is now at issue to call attention to the conclusion that seems to have been reached by some of the Senators, which is that it has had to throw the Government in entire control in the rate-fixing field with the commission. I should like to throw out this suggestion without comment for the Senators to be thinking upon pending such time as the final decision on that point. You must also take into consideration the purpose for which this bill was drafted. It is to keep the confidence of the shipping public in the stability of their rates as nearly untouched as may be. You and I can theorize, but you know and I know that there is no more terrific influence which can be brought to bear upon the machinery of commerce or finance than uncertainty as to the methods under which they are to do business, and as long as that is subject to violent fluctuation and uncertainty you are likely to paralyze the very sinews upon which this war is to be determined.

A majority of the committee agreed that the period at which Federal control should terminate should be 18 months after the declaration of peace.

This length of time was given because if between the cessation of hostilities and the termination of the 18-month period conditions should be obvious that demanded treatment, a sufficient time should be provided to meet the conditions thus arising.

Railroad operations during the war have made radical changes imperative to meet the emergency. Everything, every force and energy of the American people, should be held in readiness for the service of the Government in protecting itself and in maintaining its institutions.

Every necessary grant of power should be given to accomplish this purpose, and the powers thus granted should be used with all the wisdom and care that the executors and administrators of these powers can command. They should exercise these powers with the same care, hesitancy, and scrutiny with which we grant them, because the fate of the American people in the wise execution of these powers is precedent to the extension of still further powers.

The Nation is willing to sacrifice and is sacrificing whatever it is called upon to sacrifice for the supreme purpose in view; but it must be borne in mind that the sacrifices now made are for the successful prosecution of the war. When success shall come, as it will come, the problem of readjustment, of gathering up the lines that have fallen during this period of conflict, the prosecution of business upon the return of peace can not determined until that time. We are now meeting the abnormal conditions growing out of the war, and meeting them with principles radically opposed to the principles invoked and operated during times of peace.

Democracy is making the supremest sacrificate that can be made, temporary suspension of certain precious principles, in order that she may perpetually preserve those principles for her progress and development in times of peace.

The PRESIDING OFFICER (Mr. HENDERSON in the chair). The bill is before the Senate as in Committee of the Whole and open to amendment.

Mr. THOMAS. If there is no further important business before the Senate I move that the Senate adjourn.

The motion was agreed to; and (at 3 o'clock and 35 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, February 12, 1918, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

MONDAY, *February 11, 1918.*

The House met at 12 o'clock noon.

The Rev. William Couden, of Washington, D. C., offered the following prayer:

Heavenly Father, new every morning is the love our wakening and uprising prove. Be with us in our conscious thought throughout the day. And renew within us our homage to Thee, our interest in our work, our fidelity to duty, our fealty to honor, and our loyalty to our country. As disciples of Jesus the Redeemer we ask these things. Amen.

The Journal of the proceedings of Saturday, February 9, and Sunday, February 10, was read and approved.

EXTENSION OF REMARKS.

Mr. SLEMP. Mr. Speaker, I ask unanimous consent to insert in the RECORD an article by Vernon C. Barker, entitled "The Criminal *v.* International Law."

The SPEAKER. The gentleman from Virginia asks unanimous consent to extend his remarks by printing an article entitled "The Criminal *v.* International Law." Is there objection?

Mr. WALSH. Mr. Speaker, I object.

Mr. REAVIS. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. REAVIS. To ask unanimous consent, Mr. Speaker, to extend my remarks by inserting in the RECORD a newspaper article written by the gentleman from Indiana [Mr. BLAND] concerning the trip to the Hawaiian Islands of the congressional party recently made.

The SPEAKER. The gentleman from Nebraska [Mr. REAVIS] asks unanimous consent to extend his remarks in the RECORD by printing an article written by the gentleman from Indiana [Mr. BLAND] on his observations in the Hawaiian Islands. Is there objection? [After a pause.] The Chair hears none.

JOINT MEETING OF THE TWO HOUSES.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the resolution which I send to the Clerk's desk.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the resolution.

The Clerk read as follows:

House concurrent resolution 35.

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Monday, the 11th day of February, 1918, at 12 o'clock and 30 minutes in the afternoon, for the purpose of receiving such communication as the President of the United States shall be pleased to make to them.

Mr. WALSH. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Massachusetts rise?

Mr. WALSH. To reserve the right to object. I desire to ask the gentleman from North Carolina if he thinks so important a resolution as this should be considered with so few Members of the House here?

Mr. KITCHIN. Well, I rather think this could be considered and after that the gentleman could have a roll call if he desires.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on agreeing to the resolution.

The question was taken, and the resolution was agreed to.

Mr. BARNHART. Mr. Speaker, I make the point of order there is no quorum present.

The SPEAKER. The gentleman from Indiana makes the point of order that there is no quorum present. The Chair will count.

Mr. BARNHART. Mr. Speaker, I withdraw the point of order.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had passed without amendment the following resolution:

House concurrent resolution 35.

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Monday, the 11th day of February, 1918, at 12 o'clock and 30 minutes in the afternoon for the purpose of receiving such communication as the President of the United States shall be pleased to make to them.

ENROLLED JOINT RESOLUTION SIGNED.

The SPEAKER announced his signature to enrolled joint resolution of the following title:

S. J. Res. 128. Joint resolution granting to certain persons in the active war service an extension of time within which application for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917.

HOUSING FOR SHIPYARD EMPLOYEES.

The SPEAKER. The gentleman withdraws the point of order. The House automatically resolves itself into the Committee of the Whole House on the state of the Union for the consideration of Senate bill 3389.

Mr. ALEXANDER. Mr. Speaker, as I understand from the statement of the Chair, the House will go into the Committee of the Whole House on the state of the Union automatically on this bill?

The SPEAKER. The Chair made a mistake. The bill is to be considered in the House as in Committee of the Whole House on the state of the Union.

Mr. ALEXANDER. I do not understand——

Mr. GILLETT. Under what rule is it to be considered in the House?

The SPEAKER. Why, the ordinary rule. The Chair has got the thing wrong the second time. This bill is to be considered in the Committee of the Whole House on the state of the Union under the five-minute rule.

Mr. ALEXANDER. Mr. Speaker, the agreement, I think, was to this effect, that the bill be made a special order following the Diplomatic and Consular appropriation bill and that the House amendment by way of a substitute to the Senate bill should be considered as an original bill. There is only one section in the bill, and it was further agreed that it should be considered by paragraphs under the five-minute rule. I suppose it is in order to move to go into the Committee of the Whole House on the state of the Union for the consideration of this bill (S. 3389).

Mr. MADDEN. Mr. Speaker, I would like to ask the gentleman from Missouri a question, or rather to make a statement. While it was agreed that the bill should be considered under the five-minute rule that did not preclude the right of general debate on the bill.

The SPEAKER. That is exactly what the Chair would hold if he were presiding over the Committee of the Whole House on the state of the Union.

Mr. GILLETT. May I ask the gentleman a question?

The SPEAKER. The Chair will read the order:

On motion of Mr. ALEXANDER, by unanimous consent,

Ordered, That consideration of the bill S. 3389 shall be in order immediately after the final disposition of the bill (H. R. 9314) making appropriations for the Diplomatic and Consular Service, etc.; that the House substitute for said Senate bill (S. 3389) shall be considered in lieu thereof, as an original bill, and that said substitute shall be considered in the Committee of the Whole House on the state of the Union under the five-minute rule and read by paragraphs for amendments.

Mr. GILLETT. May I ask the gentleman from Missouri—the gentleman did not intend by that to cut off all general debate?

Mr. ALEXANDER. No; and before going into the Committee of the Whole House on the state of the Union I was going to ask unanimous consent that general debate in the Committee of the Whole House on the state of the Union may be confined to two hours, the debate to be upon the merits of the bill, half of the time to be controlled by myself and the other half by the ranking minority member, the gentleman from Massachusetts [Mr. GREENE].

Mr. GREENE of Massachusetts. Mr. Speaker, I have had a number of requests for time on the bill, and it was thought by those who have talked to me about it that they would like to have at least two hours of general debate.

Mr. GILLETT. Mr. Speaker, I think there would be no disposition not to agree that the debate be confined to the bill. I expect we would agree to that, but I think the gentleman would admit that on an important bill of this kind there ought to be a liberal amount of general debate if it was confined to the bill.

Mr. KITCHIN. If we are to have liberal debate under the five-minute rule, could we not compromise on an hour and a half on a side?

Mr. GILLETT. The gentleman says that the members of the gentleman's own committee want about two hours for general debate.

Mr. GREENE of Massachusetts. On my side of the House.

Mr. ALEXANDER. Mr. Speaker, I would like to conclude the consideration of the bill and pass it to-day, if possible, on account of the emergency; and I would be very glad if we could confine the general debate to an hour and a half on a side and have liberal debate under the five-minute rule.

Mr. GREENE of Massachusetts. I will agree to that. We want to get the bill through.

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that the debate in the Committee on the Whole House on the state of the Union be limited to an hour and a half and the debate confined to the merits of the bill, one half of the time to be controlled by the gentleman from Massachusetts [Mr. GREENE] and the other half by myself.

The SPEAKER. Is the gentleman asking for an hour and a half altogether?

Mr. ALEXANDER. An hour and a half on a side—three hours altogether.

The SPEAKER. The gentleman from Missouri [Mr. ALEXANDER] asks unanimous consent that the general debate on this bill be limited to three hours, of which he will control an hour and a half and the gentleman from Massachusetts [Mr. GREENE] an hour and a half. Is there objection? [After a pause.] The Chair hears none. The House resolves itself into the Committee of the Whole House on the state of the Union for the——

Mr. MASON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MASON. I understood the gentleman to ask unanimous consent that the debate was to be limited to the merits of the bill.

The SPEAKER. Yes.

Mr. MASON. I did not so understand the Speaker. If so, I desire to object.

The SPEAKER. To what does the gentleman desire to object?

Mr. MASON. If the unanimous consent goes to the point of discussion as to the merits of this bill?

The SPEAKER. The unanimous-consent request was for three hours of general debate, an hour and a half to be controlled by the gentleman from Missouri and an hour and a half by the gentleman from Massachusetts [Mr. GREENE], and that debate be limited to the bill. Is there objection?

Mr. MASON. I object.

Mr. ALEXANDER. I think that the gentleman from Illinois can understand the imperative need of passing this bill as soon as possible.

Mr. MASON. I quite agree with you.

The SPEAKER. It is not debatable.

Mr. ALEXANDER. Mr. Speaker, I move that the general debate on this bill be limited to three hours.

Mr. WALSH. Mr. Speaker, a point of order.

The SPEAKER. For what purpose does the gentleman from Massachusetts rise?

Mr. WALSH. I make the point of order that the motion is not in order. You can not do that by a motion.

The SPEAKER. Was the gentleman making a motion?

Mr. WALSH. Yes. He was attempting to do so.

The SPEAKER. The gentleman from Virginia [Mr. SAUNDERS] will take the chair.

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes.

Mr. ALEXANDER. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The Chair will state that the House is now automatically in the Committee of the Whole House on the state of the Union pursuant to the unanimous-consent order. The gentleman from Missouri [Mr. ALEXANDER] asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. ALEXANDER. Mr. Chairman, it is now about 20 minutes after 12 o'clock, and in a very few minutes the President of the United States is expected to be here to address the House, and it will not be possible now in presenting this bill to have that attention which the importance of the subject demands.

Mr. KITCHIN. How much appropriation does the bill carry?

Mr. ALEXANDER. The bill carries an authorization of $50,000,000, to be expended in providing housing facilities at the shipyards of the United States at which ships are being built for the Government now.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

The CHAIRMAN. Will the gentleman from Missouri yield to the gentleman from Pennsylvania?

Mr. MOORE of Pennsylvania. I have one question to ask. I wanted to know if he intended to press this bill in the excitement that is now on?

Mr. ALEXANDER. Oh, no. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. SAUNDERS of Virginia, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 3389 and had come to no resolution thereon.

RECESS.

Mr. KITCHIN. Mr. Speaker, I move that the House stand in recess until 12.25 o'clock.

The motion was agreed to.

Accordingly (at 12 o'clock and 20 minutes p. m.) the House stood in recess until 12.25 p. m.

JOINT MEETING OF THE SENATE AND HOUSE.

At 12 o'clock and 26 minutes p. m. the Doorkeeper, J. J. Sinnott, announced the President pro tempore [Mr. SAULSBURY] and the Members of the United States Senate.

The Members of the House rose.

The Senate, preceded by the President pro tempore, and by their Secretary and Sergeant at Arms, entered the Chamber.

The President pro tempore took the chair at the right of the Speaker and the Members of the Senate took the seats reserved for them.

The SPEAKER. The Chair appoints on behalf of the House the following committee: Mr. KITCHIN, Mr. SHERLEY, Mr. WEBB, Mr. DIXON, Mr. MANN, Mr. GILLETT, and Mr. CANNON.

The PRESIDENT pro tempore of the Senate. The Chair on behalf of the Senate appoints Senators MARTIN, SIMMONS, ROBINSON, OVERMAN, GALLINGER, LODGE, and NELSON.

At 12 o'clock and 30 minutes p. m. the President of the United States, escorted by the committee of Senators and Representatives, entered the Hall of the House and stood at the Clerk's desk, amid prolonged applause.

The SPEAKER. Gentlemen of the Sixty-fifth Congress, I present the President of the United States. [Applause.]

ADDRESS OF THE PRESIDENT.

The PRESIDENT. Gentlemen of the Congress, on the eighth of January I had the honor of addressing you on the objects of the war as our people conceive them. The Prime Minister of Great Britain had spoken in similar terms on the fifth of January. To these addresses the German Chancellor replied on the twenty-fourth and Count Czernin, for Austria, on the same day. It is gratifying to have our desire so promptly realized that all exchanges of view on this great matter should be made in the hearing of all the world.

Count Czernin's reply, which is directed chiefly to my own address of the eighth of January, is uttered in a very friendly tone. He finds in my statement a sufficiently encouraging approach to the views of his own Government to justify him in believing that it furnishes a basis for a more detailed discussion of purposes by the two Governments. He is represented to have intimated that the views he was expressing had been communicated to me beforehand and that I was aware of them at the time he was uttering them; but in this I am sure he was misunderstood. I had received no intimation of what he intended to say. There was, of course, no reason why he should communicate privately with me. I am quite content to be one of his public audience.

Count von Hertling's reply is, I must say, very vague and very confusing. It is full of equivocal phrases and leads it is not clear where. But it is certainly in a very different tone from that of Count Czernin, and apparently of an opposite purpose. It confirms, I am sorry to say, rather than removes, the unfortunate impression made by what we had learned of the conferences at Brest-Litovsk. His discussion and acceptance of our general principles lead him to no practical conclusions. He refuses to apply them to the substantive items which must constitute the body of any final settlement. He is jealous of international action and of international counsel. He

accepts, he says, the principle of public diplomacy, but he appears to insist that it be confined, at any rate in this case, to generalities and that the several particular questions of territory and sovereignty, the several questions upon whose settlement must depend the acceptance of peace by the twenty-three states now engaged in the war, must be discussed and settled, not in general counsel, but severally by the nations most immediately concerned by interest or neighborhood. He agrees that the seas should be free, but looks askance at any limitation to that freedom by international action in the interest of the common order. He would without reserve be glad to see economic barriers removed between nation and nation, for that could in no way impede the ambitions of the military party with whom he seems constrained to keep on terms. Neither does he raise objection to a limitation of armaments. That matter will be settled of itself, he thinks, by the economic conditions which must follow the war. But the German colonies, he demands, must be returned without debate. He will discuss with no one but the representatives of Russia what disposition shall be made of the peoples and the lands of the Baltic provinces; with no one but the Government of France the "conditions" under which French territory shall be evacuated; and only with Austria what shall be done with Poland. In the determination of all questions affecting the Balkan states he defers, as I understand him, to Austria and Turkey; and with regard to the agreements to be entered into concerning the non-Turkish peoples of the present Ottoman Empire, to the Turkish authorities themselves. After a settlement all around, effected in this fashion, by individual barter and concession, he would have no objection, if I correctly interpret his statement, to a league of nations which would undertake to hold the new balance of power steady against external disturbance.

It must be evident to everyone who understands what this war has wrought in the opinion and temper of the world that no general peace, no peace worth the infinite sacrifices of these years of tragical suffering, can possibly be arrived at in any such fashion. [Applause.] The method the German Chancellor proposes is the method of the Congress of Vienna. We cannot and will not return to that. What is at stake now is the peace of the world. What we are striving for is a new international order based upon broad and universal principles of right and justice,—no mere peace of shreds and patches. Is it possible that Count von Hertling does not see that, does not grasp it, is in fact living in his thought in a world dead and gone? Has he utterly forgotten the Reichstag Resolutions of the nineteenth of July, or does he deliberately ignore them? They spoke of the conditions of a general peace, not of national aggrandizement or of arrangements between state and state. The peace of the world depends upon the just settlement of each of the several problems to which I adverted in my recent address to the Congress. I, of course, do not mean that the peace of the world depends upon the acceptance of any particular set of suggestions as to the way in which those problems are to be dealt with. I mean only that those problems each and all affect the whole world; that unless they are dealt with in a spirit of unselfish and unbiased justice, with a view to the wishes, the natural connections, the racial aspirations, the security, and the peace of mind of the peoples involved, no permanent peace will have been attained. They cannot be discussed separately or in corners. None of them constitutes a private or separate interest from which the opinion of the world may be shut out. Whatever affects the peace affects mankind, and nothing settled by military force, if settled wrong, is settled at all. [Applause.] It will presently have to be reopened.

Is Count von Hertling not aware that he is speaking in the court of mankind, that all the awakened nations of the world now sit in judgment on what every public man, of whatever nation, may say on the issues of a conflict which has spread to every region of the world? The Reichstag Resolutions of July themselves frankly accepted the decisions of that court. There shall be no annexations, no contributions, no punitive damages. Peoples are not to be handed about from one sovereignty to another by an international conference or an understanding between rivals and antagonists. National aspirations must be respected; peoples may now be dominated and governed only by their own consent. "Self-determination" is not a mere phrase. It is an imperative principle of action, which statesmen will henceforth ignore at their peril. We can not have general peace for the asking, or by the mere arrangements of a peace conference. It cannot be pieced together out of individual understandings between powerful states. All the parties to this war must join in the settlement of every issue anywhere involved in it [applause]; because what we are seeking is a peace that we can all unite to guarantee and maintain and every item of it must be submitted to the common judgment whether it be right and fair, an act of justice, rather than a bargain between sovereigns.

The United States has no desire to interfere in European affairs or to act as arbiter in European territorial disputes. She would disdain to take advantage of any internal weakness or disorder to impose her own will upon another people. She is quite ready to be shown that the settlements she has suggested are not the best or the most enduring. They are only her own provisional sketch of principles and of the way in which they should be applied. But she entered this war because she was made a partner, whether she would or not, in the sufferings and indignities inflicted by the military masters of Germany, against the peace and security of mankind; and the conditions of peace will touch her as nearly as they will touch any other nation to which is entrusted a leading part in the maintenance of civilization. She can not see her way to peace until the causes of this war are removed, its renewal rendered as nearly as may be impossible.

This war had its roots in the disregard of the rights of small nations and of nationalities which lacked the union and the force to make good their claim to determine their own allegiances and their own forms of political life. Covenants must now be entered into which will render such things impossible for the future; and those covenants must be backed by the united force of all the nations that love justice and are willing to maintain it at any cost. [Applause.] If territorial settlements and the political relations of great populations which have not the organized power to resist are to be determined by the contracts of the powerful governments which consider themselves most directly affected, as Count von Hertling proposes, why may not economic questions also? It has come about in the altered world in which we now find ourselves that justice and the rights of peoples affect the whole field of international dealing as much as access to raw materials and fair and equal conditions of trade. Count von Hertling wants the essential bases of commercial and industrial life to be safeguarded by common agreement and guarantee, but he can not expect that to be conceded him if the other matters to be determined by the articles of peace are not handled in the same way as items in the final accounting. He cannot ask the benefit of common agreement in the one field without according it in the other. I take it for granted that he sees that separate and selfish compacts with regard to trade and the essential materials of manufacture would afford no foundation for peace. Neither, he may rest assured, will separate and selfish compacts with regard to provinces and peoples.

Count Czernin seems to see the fundamental elements of peace with clear eyes and does not seek to obscure them. He sees that an independent Poland, made up of all the indisputably Polish peoples who lie contiguous to one another, is a matter of European concern and must of course be conceded; that Belgium must be evacuated and restored, no matter what sacrifices and concessions that may involve; and that national aspirations must be satisfied, even within his own Empire, in the common interest of Europe and mankind. If he is silent about questions which touch the interest and purpose of his allies more nearly than they touch those of Austria only, it must of course be because he feels constrained, I suppose, to defer to Germany and Turkey in the circumstances. Seeing and conceding as he does, the essential principles involved and the necessity of candidly applying them, he naturally feels that Austria can respond to the purpose of peace as expressed by the United States with less embarrassment than could Germany. He would probably have gone much farther had it not been for the embarrassments of Austria's alliances and of her dependence upon Germany.

After all, the test of whether it is possible for either Government to go any further in this comparison of views is simple and obvious. The principles to be applied are these:

First, that each part of the final settlement must be based upon the essential justice of that particular case and upon such adjustments as are most likely to bring a peace that will be permanent;

Second, that peoples and provinces are not to be bartered about from sovereignty to sovereignty as if they were mere chattels and pawns in a game [applause], even the great game, now forever discredited, of the balance of power; but that

Third, every territorial settlement involved in this war must be made in the interest and for the benefit of the populations concerned, and not as a part of any mere adjustment or compromise of claims amongst rival states; and

Fourth, that all well defined national aspirations shall be accorded the utmost satisfaction that can be accorded them

without introducing new or perpetuating old elements of discord and antagonism that would be likely in time to break the peace of Europe and consequently of the world.

A general peace erected upon such foundations can be discussed. Until such a peace can be secured we have no choice but to go on. [Applause.] So far as we can judge, these principles that we regarded as fundamental are already everywhere accepted as imperative except among the spokesmen of the military and annexationist party in Germany. If they have anywhere else been rejected, the objectors have not been sufficiently numerous or influential to make their voices recently audible. The tragical circumstance is that this one party in Germany is apparently willing and able to send millions of men to their death to prevent what all the world now sees to be just. [Applause.]

I would not be a true spokesman of the people of the United States if I did not say once more that we entered this war upon no small occasion, and that we can never turn back from a course chosen upon principle. [Applause.] Our resources are in part mobilized now, and we shall not pause until they are mobilized in their entirety. [Applause.] Our armies are rapidly going to the fighting front, and will go more and more rapidly. Our whole strength will be put into this war of emancipation—emancipation from the threat and attempted mastery of selfish groups of autocratic rulers—whatever the difficulties and present partial delays. We are indomitable in our power of independent action and can in no circumstances consent to live in a world governed by intrigue and force. [Applause.] We believe that our own desire for a new international order under which reason and justice and the common interests of mankind shall prevail is the desire of enlightened men everywhere. Without that new order the world will be without peace and human life will lack tolerable conditions of existence and development. Having set our hand to the task of achieving it, we shall not turn back.

I hope that it is not necessary for me to add that no word of what I have said is intended as a threat. That is not the temper of our people. I have spoken thus only that the whole world may know the true spirit of America—that men everywhere may know that our passion for justice and for self-government is no mere passion of words but a passion which, once set in action, must be satisfied. [Applause.] The power of the United States is a menace to no nation or people. It will never be used in aggression or for the aggrandizement of any selfish interest of our own. It springs out of freedom and is for the service of freedom. [Prolonged applause.]

At 12 o'clock and 40 minutes p. m. the President retired from the Hall of the House.

At 12 o'clock and 46 minutes p. m. the Speaker announced that the joint session had dissolved.

Thereupon the President pro tempore and Members of the Senate returned to their Chamber.

HOUSING FOR EMPLOYEES OF SHIPYARDS.

Mr. ALEXANDER. Mr. Speaker, I renew my request for unanimous consent that the general debate on this bill be limited to three hours, to be confined to the subject matter of the bill, one half to be controlled by myself and the other half by the gentleman from Massachusetts [Mr. GREENE].

The SPEAKER. The gentleman from Missouri renews his request for unanimous consent that the general debate on this bill be limited to three hours, one half to be controlled by himself and the other half by the gentleman from Massachusetts [Mr. GREENE], and that the debate be confined to the subject matter of the bill. Is there objection?

There was no objection.

The SPEAKER. The House automatically resolves itself into——

Mr. STAFFORD. Mr. Speaker, a question of order. How can the House automatically resolve itself?

The SPEAKER. Because of the rule, under a previous order of the House, printed on the first page of the Calendar. The House automatically resolves itself into Committee of the Whole House on the state of the Union, with the gentleman from Virginia [Mr. SAUNDERS] in the chair.

Thereupon the House resolved itself into Committee of the Whole House on the state of the Union for the consideration of the bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, and otherwise acquire improved or unimproved lands, houses, buildings, and for other purposes, with Mr. SAUNDERS of Virginia in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill S. 3389, which the Clerk will report by title.

The Clerk read as follows:

A bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes.

The CHAIRMAN. The gentleman from Missouri [Mr. ALEXANDER] is recognized.

Mr. ALEXANDER. Mr. Chairman, it is not my purpose to detain the committee long in the discussion of the provisions of this bill. This is a Senate bill that was referred to the Committee on the Merchant Marine and Fisheries on the 21st day of January. It has been given quite careful consideration by the committee, and was reported back to the House on the 4th day of February.

After considering the provisions of the Senate bill, various amendments were suggested in committee, and it was thought best to report to the House an amendment by way of a substitute for the Senate bill. A careful reading of the provisions of the Senate bill and a comparison with the provisions of the House substitute will disclose, I think, that there is no fundamental difference between the Senate bill and the House substitute.

In the House substitute we undertake to express more clearly and comprehensively the powers intended to be conferred by the Senate bill. Under the provisions of the shipping act the Shipping Board is given power to build ships. What are the implied powers of the Shipping Board under the express power conferred to build ships it is not necessary to speculate. The United States Shipping Board Emergency Fleet Corporation, in undertaking to carry out and exercise the powers conferred by the law, finds it necessary to provide houses for the workmen in our shipyards and we wish to remove every doubt as regards their power to do so. Just how the work may be done, whether the Government in the first instance shall buy the land, erect the houses, and rent them to the employees, or loan money to persons, firms, or corporations for that purpose, is a question the committee did not undertake to deal with, for the reason that the problems in the different shipyards are different; the local conditions are different, and the policy that might be best if applied to one shipyard might not be wise if applied to another.

You will note in subdivision (d) that we give the Emergency Fleet Corporation the power to loan money to persons, firms, and corporations, to be utilized in providing housing facilities for workmen engaged in building ships for the Emergency Fleet Corporation.

The committee discussed the question whether or not it would be practicable to place limitations on that power in the bill. Obviously it would be desirable if practicable. Representatives of the Emergency Fleet Corporation came before the committee and outlined their plans, which are quite comprehensive and businesslike, and if carried out I am quite sure will safeguard the interests of the Government so far as it is possible to do so.

We should not overlook the fact, however, that this is an emergency proposition; that these houses must be built as speedily as possible; that in some localities after the war the shipbuilding industry may not be as flourishing as it is now, the demand for houses may not be as great as now, and a loss will result to the Government. The Emergency Fleet Corporation does not know of any way to safeguard the Government against that possible loss. What we are interested in primarily is that this money shall be spent where the need is greatest and that it shall be economically spent; that waste will not occur in the expenditures for housing as it has occurred already in some shipyards, if not all of them, in other activities.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Missouri yield to the gentleman from Pennsylvania?

Mr. MOORE of Pennsylvania. Will it disturb the gentleman if I interrupt him now?

Mr. ALEXANDER. I yield.

Mr. MOORE of Pennsylvania. Has the committee given consideration to the advisability of providing in the law somewhere that contracts shall be awarded after advertising in the usual lawful way?

Mr. ALEXANDER. No; the committee has not, because the committee does not regard it as practicable to do so in view of the emergency and the uncertainties in the labor and material markets.

Mr. MOORE of Pennsylvania. I will say to the gentleman that some discussion has arisen, we might say advanced almost to the point of scandal, with regard to the awarding of contracts carrying a percentage plus commission, instead of having contracts awarded according to law, after advertisement. That

seems to have been an impediment in the way of the present Shipping Board's operations.

Mr. ALEXANDER. That is the most desirable plan, if it did not involve any delay. But these scandals, I will say, which have developed recently in connection with operations in certain shipyards, and especially Hog Island, can not be prevented unless the Emergency Fleet Corporation has direct and complete supervision and control over the expenditure of money, and I think that is what we all desire.

Now, if the gentleman will pardon me I will proceed. This bill provides—

That the United States Shipping Board Emergency Fleet Corporation is hereby authorized and empowered within the limits of the amounts herein authorized—

(a) To purchase, lease, requisition, or acquire by condemnation or otherwise any improved or unimproved land or any interest therein suitable for the construction thereon of houses for the use of employees of shipyards in which ships are being constructed for the United States.

(b) To construct on such land houses and all other necessary or convenient facilities, upon such conditions and at such price as may be determined, and to sell, lease, or exchange such houses, land, and facilities upon such terms and conditions as it may determine.

In some instances it may not be necessary to acquire the fee simple title to the land, hence the bill provides that the board are authorized—

(c) To purchase, lease, requisition, or acquire by condemnation or otherwise any houses or other buildings, together with the land on which the same are erected, or any interest therein, and all necessary and proper fixtures and furnishings therefor; to manage, repair, sell, lease, or exchange such lands, houses, buildings, fixtures, and furnishings upon such terms and conditions as it may determine to carry out the purposes of this act.

(d) To make loans to persons, firms, or corporations in such manner and upon such terms as it may determine from time to time to provide houses for the employees of such shipyards.

Mr. DOWELL. Will the gentleman yield for a question?

Mr. ALEXANDER. Just for a question.

Mr. DOWELL. How much is it anticipated by the committee will be used for these purposes?

Mr. ALEXANDER. The bill carries an authorization of $50,000,000. I think the survey made by the Emergency Fleet Corporation up to this time, if their plans are carried out, would involve an expenditure of less than that sum. I think their plans, as stated by Mr. Hurley in the hearings before the Committee on Commerce of the Senate, in the investigation of the Shipping Board, involves the expenditure of $35,000,000.

Mr. DOWELL. I think the gentleman did not get the meaning of my question. For the services just suggested by the gentleman, for the loaning to private persons to furnish equipment, how much will be required?

Mr. ALEXANDER. They have made no definite estimate yet. They can not say. The purpose is only to provide housing facilities at those shipyards where such facilities are absolutely necessary. If the difficulties can be solved by improving the means of transportation from the centers of population to the shipyards, it is preferable to do it in that way, because they recognize the probable loss in any investment made in housing facilities at the shipyards. But the problem is a difficult one. It had to be met in England. The testimony before our committee was to the effect that England has spent more than $700,000,000 to house employees, not only in the shipyards but in those centers where her war industries are being carried on.

Mr. GILLETT. I do not wish to interrupt the thread of the gentleman's argument, but I wish at some time he would tell us why this legislation is necessary. I supposed that the shipbuilding corporation already had the legal power. Of course, I appreciate that an appropriation is necessary; but I wondered if the gentleman would at some time in his remarks discuss the question of the lack of power now in the corporation and whether it is necessary to pass this bill to give them this power.

Mr. ALEXANDER. The only power the corporation has under existing law is to build ships.

Mr. GILLETT. And to establish shipyards.

Mr. ALEXANDER. Of course, their legal department has advised them, so I understand, that they may exercise all the powers necessary to carry out the power to build ships; but I question whether or not it was the intent of Congress to vest in them the comprehensive powers that are intended to be conveyed by this bill, and I have been advised to the effect that the counsel for the shipyards where some of these housing facilities are to be provided question the power of the United States Shipping Board Emergency Fleet Corporation, without the enactment of this legislation, to go forward in the development of this housing plan. It would certainly be unfortunate if there should be any question about it.

In every instance where it is practicable I would rather that the Emergency Fleet Corporation should loan the money to persons, firms, or corporations and let them provide the housing facilities. The plan suggested before the committee was that wherever practicable the shipyards would be required to provide the land, free and clear of incumbrance, and generally to invest at least 20 per cent of the total cost of the improvements. A small corporation would be organized for that purpose. The Emergency Fleet Corporation would provide that the stock in the corporation should be assigned to the Emergency Fleet Corporation. The Fleet Corporation would name the directors of the corporation. The money loaned would be secured by a first-mortgage lien on the land and all the improvements placed on the land. The Emergency Fleet Corporation would have control of the housing, the renting, and all the facilities. In other words, the purpose and intent is to provide the housing, but without any profit to the shipyards out of the housing proposition itself.

Mr. DOWELL. Will the gentleman yield for just one question there?

Mr. ALEXANDER. I yield to the gentleman.

Mr. DOWELL. Under this plan of loaning, is it the purpose of the committee, or do I understand the committee are entirely satisfied that all of this money will be returned again to this corporation making a loan, and if a loan is made that it will be entirely secure so far as the investment is concerned?

Mr. ALEXANDER. I think not, for this reason: A shipyard under contract to build ships is not willing to secure the Government by a first-mortgage lien not only upon the land on which the housing facilities are to be erected but on the whole of their shipbuilding plant. They are not willing to do that. They do not care to involve their shipbuilding plant proper in possible loss, but they are willing to purchase the land and give the Emergency Fleet Corporation a first-mortgage lien upon it, let the improvements be made with funds provided by the board, and finally in the liquidation, if it takes the land in order to make the Government whole, very well and good. But, as I say, that is one proposition that the Emergency Fleet Corporation is considering, and the committee did not think it practicable to write into the law all the provisions and limitations under which these loans should be made. As far as the hearings go, Mr. Flannery, who is the director of housing; Mr. Hurley, the president of the Emergency Fleet Corporation; and all officers who will be charged with the duty of carrying out the housing scheme directly interested are keenly alive to the importance of protecting the interests of the Government to the utmost. At the same time they are not unmindful of the fact that there will be ultimate loss to the Government unless improvements are made in communities that are growing, where the industry will not languish after the war, and where real estate values and the demand for houses will be stable or possibly increase.

Now, I will take just a few minutes to show the conditions at present. There are now about 180,000 men employed in the shipyards, according to a statement made before the committee by Admiral Bowles.

Mr. FOSS. How many shipyards are there?

Mr. ALEXANDER. One hundred and thirty-odd now devoted to building ships for the Government.

Mr. FOSS. Does this housing of employees provide for housing their families?

Mr. ALEXANDER. Mr. Flannery, director of housing, has that in view. It will be necessary to make provision for the employees and their families where the men are married; and where the men are unmarried they may be properly housed and cared for in clubhouses, or in some such way.

Mr. FOSS. Is it the intention to have the Shipping Board fix up some standard house to be built by private corporation or by the Government?

Mr. ALEXANDER. Yes. A housing commission has given great consideration to this question. Plans will depend on the location of the houses and whether or not we may expect them to be permanent in character after the war.

In New York, on Staten Island they have four yards close together. They employ about 5,500 men. They ought to employ from 11,000 to 12,000 to utilize their present facilities to their maximum capacity.

Now, it is the opinion of the Emergency Fleet Corporation that the problem may be solved in part by increasing the transportation facilities. But it is taking too optimistic a view of the situation to hope that ample provision for workmen in the shipyards on Staten Island will be made in that manner. It is very clear that an immense increase in the number of workmen must be made not only on Staten Island but at Bristol, Hog Island, Sparrows Point, and Newport News, and elsewhere or we cannot hope to turn out from four to five million tons of shipping this year, which is absolutely necessary if we are to provide for the loss of ships by enemy submarines and make ample provision for the increasing demand for ships to trans-

port our troops and munitions of war and food supplies to the front.

At Sparrows Point, Md., where the shipyard is capable with its present output to work 7,000 men, we only have 3,500 men. If we could provide houses for 3,500 more men, says Admiral Bowles, manager of the division of steel construction for the Emergency Fleet Corporation, we could obtain 75,000 tons of shipping additional at Sparrows shipyard annually.

The Hog Island shipyard, in Pennsylvania just a few miles out of Philadelphia, must be provided with ample housing facilities to accommodate the workmen. That is a Government shipyard in which the American International Corporation is under contract to build for the Government a large fleet of ships. The same condition is true at Newark, N. J., where the Submarine Boat Co. is under contract to build for the Government.

At Bristol, Pa., another Government yard is being built under the direction of the Emergency Fleet Corporation. At Bristol the Merchant Ship Building Corporation is under contract with the Emergency Fleet Corporation to build fourteen 9,000-ton ships for the Government.

At Hog Island the American International Corporation is under contract with the Emergency Fleet Corporation to build fifty 7,500-ton ships and seventy 8,000-ton ships. They are now engaged in building the shipyard and providing the facilities as agent of the Emergency Fleet Corporation. Not a keel has been laid yet, but much material has been assembled. The cost of the work thus far has been enormous and the progress very far from satisfactory. The housing facilities must be provided for the workmen in this shipyard, and as soon as possible, if we can hope to have the necessary workmen when the yard is completed and the building of ships is begun.

At Newark, N. J., the Submarine Boat Corporation is under contract to build for the Emergency Fleet Corporation 150 5,000-ton ships. In all, 410 ships, with an aggregate tonnage of 2,945,000 tons, are under contract to be built at the three yards named. These contracts were let by the Emergency Fleet Corporation many months ago, and it is the hope that the building of ships may soon go forward at a high rate of speed and the building program planned for the present year may be completed within the present year. These contracts provide for what are termed fabricated ships of standard types; and when once the shipyards are ready the keels of ships may be laid and the ships pushed very rapidly to completion.

Mr. HUSTED. Will the gentleman yield?

Mr. ALEXANDER. Yes; with pleasure.

Mr. HUSTED. The gentleman said that England had loaned money to private corporations for this purpose?

Mr. ALEXANDER. I said that she had expended $700,000,000 for housing.

Mr. HUSTED. Loaned it to corporations?

Mr. ALEXANDER. There were different plans in different communities, and I would not undertake to state in detail what the plans were in each instance.

Mr. LINTHICUM. Will the gentleman yield?

Mr. ALEXANDER. Yes.

Mr. LINTHICUM. The gentleman stated that the shipyards were willing to purchase the land and give the Government a first mortgage?

Mr. ALEXANDER. Yes; in some places it may be more desirable to do so.

Mr. LINTHICUM. That would give a mortgage on the improvements, as well as the land.

Mr. ALEXANDER. The Government would hold a first lien on the land and improvements.

Mr. LINTHICUM: If the shipyards did not continue after the war, where would the Government stand?

Mr. ALEXANDER. That would be the Government's loss if there were no further demand for the houses and would be added to the cost of building the ships. We need the ships. That is the matter of prime consideration.

Mr. LINTHICUM. Speaking about Sparrows Point, I realize that housing facilities must be furnished them in order to get their full efficiency. They are building a repair shop for automobiles already near the shipyard at Sparrows Point which will employ three or four thousand men. Ought there not to be some provision for housing these people?

Mr. ALEXANDER. The emergency is to house people employed in building ships, and if other industries are being developed at Sparrows Point, so much the better, because our investment will be that much safer and there may be less loss at the end of the war.

Mr. WALDO. Will the gentleman yield?

Mr. ALEXANDER. Yes.

Mr. WALDO. Can the gentleman state what time it is going to take to erect these buildings? Are they going to be built immediately?

Mr. ALEXANDER. Not immediately. The plans are now under way and the building will begin as soon as authorized by Congress. It will take time, of course, to provide housing for an army of workmen.

Mr. WALDO. How long?

Mr. ALEXANDER. I can not state. We have seen some buildings go up in Washington as if by magic, to take care of the increased activities of the Government growing out of the war; if the buildings are of a temporary nature they can be built quickly. If more permanent, it will take longer. At Philadelphia, I am told, there are ample facilities. The house-building industry is dull all over the country at this particular time. Our information is to the effect that there will be plenty of skilled labor in the building trades available for that purpose.

Mr. HICKS. Can the gentleman inform the House how many ships at the present time have been built and turned out by the Shipping Board?

Mr. ALEXANDER. I can not. If the gentleman will turn to part 1 of the hearings before the Senate Committee on Commerce in the Shipping Board Emergency Fleet Corporation investigation, he will find the whole shipbuilding program from its inception, set out in great detail. I have not the time to go into it now.

Mr. LINTHICUM. This is a very important matter and I want to say that there was a gentleman in my office on Saturday who said he had a large number of houses a short distance from Sparrows Point upon which the Government had an option and that the Government had renewed the option, and yet they have not taken over the property. Is that because they are waiting the passage of this bill?

Mr. ALEXANDER. Yes; they have no power yet to take that property over.

Mr. LINTHICUM. I think there are a couple of hundred of these houses.

Mr. ALEXANDER. Obviously wherever houses are available, they want to take them over.

Mr. LINTHICUM. And they can not do it until this legislation is passed?

Mr. ALEXANDER. No.

Mr. MILLER of Washington. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. Yes.

Mr. MILLER of Washington. Is there any provision for assisting in the housing facilities at navy yards where vessels are under construction?

Mr. ALEXANDER. I can not say whether there are any funds available for that purpose now or not; I do know that the Secretary of the Navy has the question under consideration. The Secretary of War has the same problem to solve, as it may be necessary to provide housing facilities at points where the Government has warehouses for munitions and supplies; but this proposition of the Shipping Board has been under consideration for three months past. They have advanced their plans as far as they can until this legislation is enacted, and hence it is important to enact this bill into law as speedily as possible. At a conference between the Secretary of War and the Secretary of the Navy, the chairman of the Shipping Board, and the Secretary of Labor a few days ago, at which were also present Senator FLETCHER, the chairman of the Senate Committee on Commerce, and myself, representing the Committee on the Merchant Marine, that whole question was brought up and discussed in an informal way. The Secretaries of War and the Navy called attention to their requirements, and if all the departments had coordinated their efforts in the first instance and one concrete proposition had been worked out and presented to apply to the Army and the Navy and the requirements of the Shipping Board, manifestly that would have been best, but that has not been done. The Shipping Board has done so, so far as the needs of the shipyards are concerned, and rather than incur delay and change the plan it was agreed all around that this proposition should go forward. We all agreed that the great problem of this war is ships with which to transport our men and munitions and foodstuffs to Europe and that the emergency brooks no delay. We can not provide ships unless we provide ample facilities to build the ships, and we can not provide ample facilities to build the ships unless we provide necessary housing for the workmen. I feel that to do so and to do it speedily will necessarily involve loss, loss in the sense that the Government will not get back 100 cents for every 100 cents spent in building

houses, but if we can meet the emergency, and if we can be assured of the expenditure of this money without unnecessary waste, the country will have reason to congratulate itself.

If I had time I would like to discuss conditions at the Hog Island shipyard. Perhaps they will be discussed before we get through. Up to this time great waste has obtained at Hog Island. The contract with the American International Corporation was in part framed by Gen. Goethals, but not consummated, and afterwards revised with the utmost care by Admiral Capps, who succeeded Gen. Goethals as manager of the Emergency Fleet Corporation, before signing. He thought he had safeguarded in every possible way the interests of the Government. He thought when he entered into a contract with the American International Corporation, the chairman of the board of directors of which is Mr. Frank A. Vanderlip, and whose president is Mr. C. A. Stone, of Stone & Webster that that was a guaranty that the contract would be honestly carried out on the part of the corporation as the agent of the Government, and I would be reluctant to say that the American International Corporation, which is the child of the National City Bank and of the subsidiary corporation directly engaged in building the plant at Hog Island, did not intend to carry out their contract in good faith and safeguard in every possible way the interests of the Government. But they have failed, signally failed, thus far to do so. But great waste is in evidence everywhere, and the manner in which the Government funds have been squandered is a public scandal, and I want to say that a member of our committee, the gentleman from Pennsylvania [Mr. EDMONDS], who lives in Philadelphia, got in touch with that rotten situation, and great credit is due to him for bringing it to the attention of the Shipping Board and the Senate investigating committee. I hope that the waste will stop and that the Government in the future will get full value for its expenditures. It may be well at this point to place in the RECORD information in regard to the American International Corporation taken from Moody's Manual, 1917 edition. It will be interesting to note the names of the officers and directors of that corporation and their standing in the financial world:

AMERICAN INTERNATIONAL CORPORATION.

Incorporated November 23, 1915, in New York, under a charter broad enough to authorize it to engage in any kind of business (except banking), subject to the restrictions provided by the laws of the States and countries in which it may operate. The main object of the formation of the corporation is to create facilities for the successful promotion of American commerce and business in foreign countries. It will be its endeavor to advance the interests of American overseas trade; to develop new enterprises abroad; to finance existing enterprises, and to take over, if offered, investments heretofore made by people in European countries. The corporation has its own representatives in Argentina, Great Britain, France, Russia, and China. While not controlled by the National City Bank, New York, it is closely affiliated in interest and can avail itself of the experience that institution has acquired in the establishment of foreign branches. Under the powers conferred by the Federal reserve act the National City Bank has established branches in Argentina, Brazil, Chile, Uruguay, the West Indies, Italy, and Russia, and plans are under way for the establishment of other branches in the principal financial centers of South America. Through the acquisition of the International Banking Corporation by the National City Co., the bank has branches in Japan, China, Philippines, Panama, Colombia, and India. The American International Corporation proposes to utilize the information gained through these branches to further the interests of American business and to give the initial impetus to American enterprise in fields not hitherto explored by it.

The following are some of the varied interests of the corporation:

Pacific Mail Steamship Co.: In connection with its associates, W. R. Grace & Co., the corporation in December, 1915, acquired control of the Pacific Mail Steamship Co. (See General Index.)

Allied Machinery Co. of America: In February, 1916, company acquired the entire capital stock (consisting of $100,000 common and $100,000 preferred) of the Allied Machinery Co. of America, which conducts an export business in machine tools, with its own offices in France, Italy, Switzerland, and Russia.

Uruguayan contract: In March, 1916, the American International Corporation, in association with Messrs. Stone & Webster and the Ulen Contracting Co., took a contract to construct waterworks and sewerage systems in the towns of Salto, Paysandu, and Mercedes, Uruguay. The corporation agreed to take $4,000,000 6 per cent gold bonds of the Uruguayan Government in payment for this work, which is now well under way.

Latin American Corporation: The importance of thoroughly investigating propositions in South America which have been presented, and the necessity of properly supervising the work during the construction period, led to the formation of the Latin American Corporation, in which the American International Corporation and Messrs. Stone & Webster are jointly interested.

Work in Russia: On August 31, 1916, Frederick Holbrook, an engineer and head of the Holbrook, Cabot & Rollins Corporation, was chosen vice president of the American International Corporation to represent its interests in Petrograd, Russia. The corporation has received orders from the Russian Government for a large amount of steel rails and other railway equipment.

Rosin & Turpentine Export Co.: This company was incorporated in June, 1916, to aid American manufacturers to investigate and develop the rosin and turpentine export business. In April, 1917, this company increased its capital stock from $300,000 to $800,000.

International Mercantile Marine Co.: During 1916 an interest was acquired in the securities of the International Mercantile Marine Co. (see General Index), which aided that company to discharge its receiver on October 6, 1916, and place its affairs in the hands of a board of directors.

United Fruit Co.: During 1916 the corporation also acquired an interest in the United Fruit Co. (See General Index.)

American International Terminals Corporation: In July, 1916, this company was formed with $100,000 capital for the purpose of studying the problems in connection with the development of the terminal facilities of the port of New York.

China Corporation and Siems-Carey Railway & Canal Co.: These two companies were organized in July, 1916, for the purpose of investigating the possibility of negotiating contracts for the improvement of canals and construction of railroads in China. The American International Corporation holds the controlling interest in these companies and the Seims-Carey Co., an engineering and contracting firm of St. Paul, Minn., the remainder. A contract was signed on September 30, 1916, with the Chinese Government for the construction of 1,100 miles of railway in China.

Carter, Macy & Co. (Inc.): In August, 1916, the American International Corporation became interested in this concern, an old established firm doing business in the importation and sale of teas and having offices in China, Japan, India, and Ceylon. The American International Corporation provided additional capital and acquired a controlling interest in the business, and in this manner acquired representation in the Orient.

New York Shipbuilding Co.: The corporation in November, 1916, purchased the entire property of the New York Shipbuilding Co., Camden, N. J., and invited the International Mercantile Marine Co., W. R. Grace & Co., and the Pacific Mail Steamship Co. to join in shipbuilding operations. A new corporation, the New York Shipbuilding Corporation, has been organized, in which the American International Corporation owns the controlling interest and the other two companies the remainder. In addition to $20,000,000 of contracts for ships under construction a contract has been received for the construction of two battleships for the United States Government for $22,900,000.

Capital stock: Authorized and outstanding, $49,000,000 common and $1,000,000 preferred ("managers' shares"); par, $100. Of the stock $25,000,000 common was set aside to be offered to stockholders of the National City Bank, New York, to an amount equal to their holdings of that institution's stock as of December 1, 1915. Subscriptions were to be made 10 per cent forthwith, 10 per cent January 15, 1916, and the remaining 80 per cent at the discretion of directors. Further installments of 10 per cent each were called payable June 9, July 10, and August 10, 1916, making the stock 50 per cent paid up. Preferred stock is entitled to receive out of surplus profits dividends at the same rate as that paid on common until 7 per cent shall have been paid or declared on both classes in any one year; thereafter preferred stock shall be entitled to receive one-fifth of any further distribution of surplus during that year and common the remaining four-fifths. Upon liquidation of the corporation and distribution of its assets, preferred shall be entitled to receive an amount equal to the par value thereof before any distribution is made on the common stock; then common shall be entitled to receive an amount equal to the par value thereof; after which preferred stock shall be entitled to receive one-fifth of the assets then remaining and the common the remaining four-fifths. Transfer agents: National City Bank, New York. Registrar: Farmers' Loan & Trust Co., New York. Listed on New York curb. Initial dividends of 75 cents per share on both preferred and common stocks were paid December 30, 1916.

Consolidated income account, year ended December 31, 1916: Earnings from operations, $3,337,450; miscellaneous expenses, $908,278; foreign and domestic taxes, $447,656; net earnings, $1,981,516; interest and dividends received, $502,427; total income, $2,483,943; dividends, $375,000; surplus for one year, $2,108,943.

Consolidated balance sheet, Dec. 31, 1916.

Officers: F. A. Vanderlip, chairman of board; C. A. Stone, president; G. J. Baldwin, senior vice president; H. D. H. Connick, Phillip W. Henry, Robert F. Herrick, Frederick Holbrook, William S. Kies, R. B. Sheridan, Willard Straight, R. P. Tinsley, vice presidents; Cecil Page, secretary; T. W. Streeter, treasurer; K. F. Clark, assistant secretary; Percy Mayes, assistant treasurer, New York.

Executive committee: F. A. Vanderlip, C. A. Stone, O. H. Kahn, Ambrose Monell, P. A. Rockefeller, T. N. Vail, William Woodward.

Directors: J. Ogden Armour, C. A. Coffin, W. E. Corey, Robert Dollar, J. P. Grace, R. F. Herrick, Pierre S. duPont, Otto H. Kahn, R. S. Lovett, Ambrose Monell, H. S. Pritchett, Percy A. Rockefeller, John D. Ryan, W. L. Saunders, J. A. Stillman, C. A. Stone, Guy E. Tripp, T. N. Vail, F. A. Vanderlip, E. S. Webster, A. H. Wiggins, Beekman Winthrop, William Woodward.

Annual meeting, first Wednesday in April.

General office, 120 Broadway, New York.

New York Shipbuilding Corporation (controlled by stock ownership): Incorporated November 28, 1916, in New York; successor to New York Shipbuilding Co. (see Manual for 1916, industrial and public utility volume, p. 3149). The entire property of the latter company had been

purchased in November, 1916, by the American International Corporation, in connection with the International Mercantile Marine Co., W. R. Grace & Co., and the Pacific Mail Steamship Co. The American International Corporation owns a majority of the stock of the new corporation. The arrangement between the four concerns participating in the enterprise provides that a certain portion of the capacity of the yard shall be devoted to the construction of ships for these companies at cost plus a percentage basis. Business is the manufacture and construction of ships, marine engines and boilers. The corporation has a large modern shipbuilding plant at Camden, N. J., the property including 163½ acres of land, with 4,700 feet of water front on the Delaware River. There are five shipways equipped and two additional large ways under construction.

Capital stock: Authorized and outstanding, 200,000 shares of no par value. A majority of the stock is owned by American International Corporation.

Bonded debt: $7,500,000 first sinking fund 5s; due November 1, 1946. Authorized, $25,000,000.

Officers: George J. Baldwin, chairman of board; S. M. Knox, president; H. A. Magoun, first vice president; N. de Taube, second vice president; J. T. Wickersham, secretary and treasurer; Cecil Page, assistant secretary; A. G. Connell, assistant secretary and assistant treasurer; A. D. Brigham, assistant secretary; Percy Mayes, assistant treasurer; H. J. Smith, assistant treasurer.

Executive committee: George J. Baldwin, P. A. S. Franklin, Lawrence H. Shearman.

Directors: George J. Baldwin, Joseph A. Bennett, P. A. S. Franklin, Joseph P. Grace, E. W. Harden, Robert E. Herrick, W. S. Kies, S. M. Knox, Ambrose Monell, William F. Morgan, James H. Perkins, L. H. Shearman, Charles A. Stone, E. P. Swenson, H. H. Wehrhane.

Annual meeting, third Wednesday in March, at 120 Broadway, New York.

General office, Camden, N. J.

(Moody's Manual of Railroad and Corporation Securities, 1917, Industrial section, pp. 74, 75, 76, 77.)

American International Corporation (see also statement on p. 74): Common stock listed—common stock of company was listed on New York Stock Exchange on July 5, 1917.

(Moody's Manual of Railroads and Corporations Securities, 1917, Industrial section, p. 2549.)

Mr. Chairman, I reserve the the balance of my time.

Mr. GREENE of Massachusetts. Mr. Chairman, in the consideration of this bill by the Committee on the Merchant Marine and Fisheries they spent considerable time before concluding to strike out the Senate bill and to report this bill as an amendment thereto. We spent time in looking it over in order to get what we thought was a reasonable and proper bill to meet the conditions that had been outlined by the Shipping Board, who came before us and told us what they thought they ought to have. I believe the bill as amended and as it is now before you is well drawn, and that it ought to be adopted. Of course, as you all know, I did not vote for the original creation of the Shipping Board or for the original appropriation of $50,000,000. I never have regretted my vote against that proposition. I believed at that time that the money would be wasted, and I have never seen any report of what has been done with that vast sum, and I believe it has been wasted and used up without any good result, except possibly to enable the Shipping Board to learn a little something about the shipping business.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. GREENE of Massachusetts. Yes.

Mr. MOORE of Pennsylvania. I did not want to take any more of the time of the gentleman from Missouri [Mr. ALEXANDER], but I would like to get the opinion of the gentleman, who is the ranking Republican on this committee, as to the wisdom of incorporating in this bill somewhere a provision that would require contracts to be advertised in accordance with law rather than to permit them to be at the option and will of the holding corporations that have power to do substantially what they please when they get the Government's money.

Mr. GREENE of Massachusetts. Mr. Chairman, so far as I am concerned, I do not say that this bill ought not to be subjected to any amendment. Perhaps we did not go into it as far as we ought to have gone. I think there was a feeling that there was need of speeding up operations and building ships. If the gentleman from Pennsylvania desires to offer an amendment providing for action according to law I should interpose no objection. I should think, perhaps, it would be wise. We can not always get all of the wisdom in one committee.

Mr. MOORE of Pennsylvania. The gentleman has referred to waste.

Mr. GREENE of Massachusetts. Yes.

Mr. MOORE of Pennsylvania. The gentleman from Missouri has admitted there was waste, and that waste is due to the manner in which these contracts have been awarded, and it seems that now we are to appropriate $50,000,000 it will be up to us to put certain limitations in the bill which would prevent that waste if possible. We have heard no word of protest from the administration, so far as I can learn. They have simply permitted one corporation to pass this on to another corporation, and in the passage of this money and the contracts relating thereto, waste has occurred and unquestionably there has been extravagance, probably duplication of work and duplication of salaries and excessive salaries, and all that sort of thing.

Mr. GREENE of Massachusetts. I certainly shall not object if the gentleman wishes to offer any such amendment.

Mr. FARR. Was the waste due to ignorance or innocence or to profiteering?

Mr. GREENE of Massachusetts. Where?

Mr. FARR. At Hog Island.

Mr. GREENE of Massachusetts. Oh, I do not know anything about the propositions to which the gentleman from Pennsylvania [Mr. FARR] alludes. In the first place, I think that Hog Island is a poor place to put a shipyard if the statements made before the Senate Committee on Commerce are found to be facts. I have never been to Hog Island. It may be the best place in America to locate a shipyard. I certainly hope that it is if the money of the people is to be expended there.

Mr. MOORE of Pennsylvania. I will say to the gentleman in reply to that that it is in a very desirable situation. There may be some low land.

Mr. GREENE of Massachusetts. I have been told that considerable filling will be needed there. If the promoters spend their own money no one can complain.

Mr. MOORE of Pennsylvania. And other land would possibly need grading. But it is an eligible point for a shipyard and has a deep-water front.

Mr. GREENE of Massachusetts. We have got to handle this great proposition and we have got to go through with it and let us make the most of it. But let me say this, it has been brought to my attention there has been a yard established in New Hampshire on the Piscataqua River. This shipyard has made a contract or agreement, I do not know which, to build 18 vessels. Now, that shipyard can not build 18 vessels in time enough to take care of this war unless the war lasts for an indefinite time. I am further informed that the yard as located is obstructed by the Boston & Maine Railroad, which has a bridge extending across the water front. The information first given to me was that it had no draw and therefore the vessels could not get out, but worse than that, I was informed it had a draw in the railroad bridge, but the first vessel begun under the Shipping Board, or under whoever it was constructed, is 22 feet wider than the draw in the bridge. That is not good sense; I am sorry to have to say that it is not common business sense. It is a waste of money and I am sorry to have to record it. I was in hopes I would not have to say anything of the kind, but that is a fact that can not be denied, for I obtained the information from a gentleman from New Hampshire, a Member of this House, and he told me that the boat was 22 feet wider than the draw. Now, the vessel has got to be pared down or the draw widened before you can get the vessel out, and that is a very poor business operation.

Mr. ALEXANDER. Will my colleague yield?

Mr. GREENE of Massachusetts. Yes.

Mr. ALEXANDER. I was in conversation with Mr. Hurley, president of the Shipping Board Emergency Fleet Corporation, this morning, and I called his attention to the matter which my colleague [Mr. GREENE of Massachusetts] had called to my attention some days ago, and he did not seem to know just what the facts were. My colleague told me he has a shipyard at Fall River, where they can build ships, and I believe he stated to me that the Emergency Fleet Corporation is going to commandeer the material and take it somewhere else, and I called that situation to Mr. Hurley's attention, and I suggested they ought to annul the contract on that river in New Hampshire if it were true that they had not begun to build ships there and build them at Fall River or elsewhere where they have the material and facilities.

Mr. GREENE of Massachusetts. Let me state what was stated to me this morning by the gentleman from New Hampshire [Mr. BURROUGHS]. He was in New Hampshire over Sunday, and he tells me a vessel was there, and she was 22 feet wider than the opening in the draw. He told me that this morning because I asked him. I wanted to know whether it was true or not, and he says it is true. Now, the question of commandeering the gentleman speaks about, let me say a little something about that. I was in the Shipping Board trying to get some of these 18 vessels that can not be built in time to be of any account unless they build them somewhere else where there is a yard all fitted with ways, with men, and with housing, and with everything else that is necessary to build ships. I asked them to let me take three of those vessels to build—not let me take them, but to let the people of my district who have the yard, who have created this yard and put their capital into it and were ready to build the vessels at once—let them take three of those vessels. They said they would have to refer it to the legal department. They referred it to the legal department, and the legal department looked over the agreement with whoever this concern is up in New Hampshire—I do not know what

it is—and they found under the legal agreement they could not take any of these 18 vessels away from this ship corporation—I do not know whether it is public or private—but they can not take them away from them. Then I said, "Well, why not let the shipyard at Fall River, Mass., build three vessels? They can build them at once. They have a well-equipped yard and competent workmen." "Oh," he said, "we are making a survey of all the lumber interests of the country. We are going from the Atlantic to the Pacific to see where the lumber is, and when we find where the lumber is then we will know what we can do." "Well," I said, "the yard that is located in my city has the lumber." He asked me where it was, and I said that I could not tell, only that they stated they have the lumber. He said, "When we make this survey and find out where it is we will commandeer it damn quick." That was the answer.

Now, if that is the way the Shipping Board is going to do business, I will tell you it is pretty hard lines for any private individual or private corporation who wants to do business and to aid the United States to carry on the war to be met by newly fledged public officials in that spirit. I would not have said anything about that if the statement had not been made by Chairman ALEXANDER that the chairman of the Shipping Board had told him that he did not know anything about the width of the vessels now being built in New Hampshire, and he had not been able to get any information about it, but my information comes from a Member of this House who has his home in New Hampshire, and it is confirmed by Mr. WASON, a Member of the House from New Hampshire. These are facts that can not be denied. It seems strange that a copper-fastened contract should be made several months ago for 18 vessels by the Shipping Board at a place where there are no results, and the contract has such binding features that they can not amend any part of it and obtain quick results. Now, I have this feeling in my mind: I am a loyal Member of the United States House of Representatives. At the same time I am a Republican. I do not make any apology for that. Wherever I go, whether it is North, South, East, or West, I have never hesitated in declaring my political principles. I recollect 30 years ago I went to the city of Waco, Tex., and, naturally, having been a postmaster, I went to see the postmaster, and walked up the street with him, and when I walked up the street with him a man said, "You have got the only God damn black Republican there is in Waco." He happened to be postmaster of the city. That is all right. I was proud to walk up the street with him, and I continued to walk with him just the same. I am not talking politics; I am talking right out in this House. This country is in war and we have got to fight this war to the end and we have to unite in this war. We can not divide. We have got but one flag in this country, thank God, and that is the American flag. [Applause.] I do not know another.

Last year we had an exhibition of the Confederate flag in this city. I pitied those poor Confederate soldiers that came up here. They were old and decrepit. I did not blame them for carrying around the flag for which they fought, but when men and women in this city rode through the streets of Washington with Confederate flags waving I tell you it touched my patriotic spirit. It was something I did not like to see. And if I ever see a Confederate flag waving in this city before a banking house, as I did last year, before a business place, out of a private individual's house, I will put a bill into this House to test the patriotic spirit of this body and see whether or not the Confederate flag should not be kept in the States where they want to enjoy it and not here in the Capital of the Nation. To bring it in here at time of war was, in my judgment, a very serious mistake.

Now, I am in for pushing this war in which we are now engaged to the very limit, and for that reason I am going to support this bill. I believe it is necessary. As to the wisdom of the Shipping Board, I have some doubts.

Mr. FESS. Will the gentleman yield for a question?

Mr. GREENE of Massachusetts. Yes.

Mr. FESS. There is undoubtedly an immense amount of waste.

Mr. GREENE of Massachusetts. Yes, sir.

Mr. FESS. We hear it upon every hand, and the reply sometimes is a denial, but not often. At other times, and most frequently, the reply is, "We can not help it." I would like to have the opinion of the gentleman whether the waste such as I have seen in some of the cantonments and in one of the aviation fields, very near which I live, which is very palpable, and the waste that has been related to me but last night, up here at Hog Island, and another one suggested there in the flats of New Jersey, can not be avoided, or a good deal of it, or is it absolutely inevitable?

Mr. GREENE of Massachusetts. Well, if I should answer what I actually think, it seems to me it could be avoided. Notwithstanding all that, the gentleman from Ohio states we are going to put this war through. We have got to put it through, waste and all. We have got to spend the money and try and accomplish results.

Mr. FESS. I thoroughly agree with the Member, but it would seem——

Mr. GREENE of Massachusetts. If we talk about it and express our opinions about it, it may have some effect. I hope it will.

Mr. EDMONDS. Do you not think that this is a good evidence of what we would have if we had Government ownership?

Mr. GREENE of Massachusetts. I do. I believe Government ownership would be a serious mistake.

Mr. FARR. Does not the gentleman think the present management, under the presidency of Mr. Hurley, is doing everything it can to remedy these conditions, curtail the waste, and push the work?

Mr. GREENE of Massachusetts. I will tell you. It had been a long time since the Democratic Party was in power and they had not had any experience in handling great questions until since 1912, or very little experience; and as I said before they came into power, if they ever did come into power they would find such an immense country to take care of they would go wild over it. If they have not gone wild, I do not know much about wildness. It has been wildness personified and doubled over and over, and they have wasted money in every line. They can not help it, but of course we shall hold them to account for it politically. We are going to hold the Democratic Party responsible and the American people are going to hold them responsible. They have been unwisely extravagant. But we can not, as Republicans, withhold our support from the administration, because in time of war we must stand together.

Mr. ALEXANDER. The gentleman from Pennsylvania asks if this was not good evidence of what we would have if we had Government ownership. We are undertaking to carry out this shipbuilding program under the American International Corporation, a private concern, and, I might say in passing, a Republican concern, too.

Mr. GREENE of Massachusetts. It does not make any difference. If you have become entangled with unwise Republicans, string them up, every one of them, that prove themselves traitors in times of war. Any dishonest Republicans in time of war should be strung up if you find them, and if you find a dishonest Democrat, string him up just the same. I would not make any difference between them.

Mr. RAGSDALE. Does the gentleman think that the cause which he advocates, in view of the fact that the sons of Confederate veterans are now in the field fighting, and some of whom have gone down under the wave——

Mr. GREENE of Massachusetts. State your question.

Mr. RAGSDALE. I am only going to ask the question. Does the gentleman think it adds anything to the pleasure of their service or to the sacrifices on their part, for the gentleman to go out of his way and attack the flag of their fathers?

Mr. GREENE of Massachusetts. That is all right. I say that the Confederate flag has no place in the city of Washington, and I stick to it now and I should stick to it if every soldier should be so wise or unpatriotic as to desert the field of war on that account. We would get more men to fill their places. But I am not at all alarmed about that. The sons of soldiers who fought in the Civil War in either the northern or southern side of the struggle are not made of that kind of material.

Mr. RAGSDALE. I wish some unfortunate Members of the House were made of some of their kind of material.

Mr. GREENE of Massachusetts. I have been a Member here a long while and probably shall be a Member for a while longer, and I shall continue to have my views and to express them when I have occasion to do so, and I am not troubled about what the gentleman from South Carolina thinks about it. He can think what he pleases. We have got to have a free hand. This bill we have under consideration is something that I believe is necessary. I believe it ought to be enacted into law. I do not believe in Government ownership, but I do say this, that if the Government paid attention to its business as they ought to—the men who are representing the Government paid attention to their business as they ought to—they could do business very much better than the present results seem to foreshadow. There is but one man here who has been in public life longer than I have, and that is the gentleman from Illinois [Mr. CANNON]. I have had a wide experience in public life. I have had dealings with a great many people, and I never have found that under the Government-ownership plan there has been more efficiency than there would have been under the management of private individuals. But we have come to a place to-day where, if we look back a little over past history, we can see how a great

mistake was made in not adopting another policy. We undertook several years ago, in the early days of my membership in this House, to build up a merchant marine by subsidy. I do not make any apology about it. I believed in subsidies then. Subsidy is not offensive to me now. But we could not get any votes on the other side of the aisle, because they were afraid of subsidies. We could not get any votes in the western part of this country, because they said "We do not need any vessels. Our products are carried across the sea cheaper than they would be if the United States built up a merchant marine." They even went so far as to say that they could get their products carried abroad cheaper in foreign bottoms.

This war has demonstrated the fact that we do need a merchant marine. It has demonstrated the truth of the matter that I then believed in—and it is true—and what I then believed was that the freight on the crops raised in the West was not paid by the American farmer but by the foreigners who bought the products of the soil, and that is exactly the way it has been demonstrated, so that all who run may read. The price of freight is made before the products of the farmer leave this country, and the foreign buyer pays the freight, and, consequently, if we had a larger merchant marine we would have more competition and lower prices. We came very near several times to getting a proposition for an American merchant marine, but we had a lot of timid souls in Washington, in the House. They have been timid a long while. They have been timid in the Senate. I thank God I never had any timidity on the question of an American merchant marine, and I have none now. I am willing to forgive all their errors, as inefficient as I believe the Shipping Board has been, as efficient as I hope they may be by the experience they have had—I am willing to give them a chance to try to build some ships. But I do not like the spirit which says, "If you have any lumber for a yard in your city, we will commandeer it," with the added words, "damned quick, if we can find it." I think it is just as essential to keep up the private yards as it is to keep up Government yards, and I believe that private yards are a great deal more efficient. Private yards have built more vessels thus far than Government yards, and they will build more vessels during the war, and they will build them at less cost than any Government yard. I am willing that the whole record should be written out, the failure and all, whatever it may have been. Let it go to the country just as it is.

I am in favor of providing for the housing of employees, because it seems to me it is absolutely necessary to our getting any ships from these Government and possibly from some private yards, and if we can not get them in any other way, I am willing to get them in this way. We want and need the ships, if extra cost is added we will have to pay it.

We did not hesitate to raise money during the Civil War. People said we would repudiate the public debt after the war was over, but we never did. We paid 100 cents on the dollar in gold. We went back to the gold standard and reestablished it. We will do it again. But we have got to educate these people who are in power to-day, and that is costly. It is costing a great deal of money, and it is going to cost a great deal of money to build ships, and under their management they are not building ships according to the methods used by men who are experts in the building of ships. They ought to use other methods. It is not a time for argument, but a time for action and for speedy action, and notwithstanding all the failures and mistakes that have been made, I am ready to forgive and forget all that. But we want to create a spirit of loyalty.

Let me tell you a thing or two. Here on the Agriculture appropriation bill the other day we had an amendment put on requiring an extra hour on the part of the employees of the Department of Agriculture, with the design, as the gentleman from Missouri [Mr. BORLAND] said, of putting that on all the departments. If he would take the trouble to inquire himself at the different departments he would find there are few people limited to seven hours. A great many of them are not. They are working nights and Sundays and holidays, and they get no extra allowance for it. They have not gotten any extra allowance for it from the time of the Spanish War up to the present time.

It was a mistake to put that provision in the bill. It created a feeling that never should have been created. That amendment ought to have been wiped out before the bill left this House, but very few people knew anything about it. When the conference report comes back I hope the Borland amendment will be stricken out. It ought to be.

The gentleman from South Carolina [Mr. RAGSDALE] is disturbed because I do not want the Confederate flag waved in the Capital. For heaven's sake, have we not lived long enough to know that the Confederate flag went down at Appomattox? Gen. Grant treated his antagonist better than anybody ever did. But the flag went down at Appomattox, and I hope it will never be waved in Washington again. If we can not fight the present war with them we will fight it without them. Soldiers are loyal to the flag. These men have professed their loyalty to the flag. I want them to live up to their protestations and not flaunt that flag here in the Capital.

When we had the woman suffrage question up here we had a flag thrusted in front of the White House. I resented it then, and I resent it now. It was disgraceful then, and it is disgraceful still, and I feel that it was an insult to the public and to the President of the United States, and discreditable to every woman who advocated that method of obtaining woman suffrage. They should have given up that method of warfare, but they did not, and it got so disgusting that a few of the more sensible advocates of suffrage said, "We will not approve of that; we will induce them to retire from this unwise procedure." But at the same time it was a menace and an insult and ought not to have been allowed. I hope we will live long enough to see just one flag, and that flag the flag of the United States. I am in favor of this bill. [Applause.]

Mr. ALEXANDER. Mr. Chairman, the gentleman from Ohio [Mr. FESS] asked awhile ago how many ships had been completed. Admiral Bowles, when before the Committee on Commerce of the Senate on the 21st of December, submitted a table in which he gave a summary of requisitioned vessels completed since the date of requisition as 43, of a total dead-weight tonnage of 253,235 tons.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. ALEXANDER. Yes.

Mr. MADDEN. How does the dead-weight tonnage compare with the live tonnage?

Mr. ALEXANDER. A ship of 5,000 gross tons would be rated at about 7,000 to 7,500 tons net.

Mr. MADDEN. So when you talk about a dead-weight ton, you would say a 5,000-ton ship was of 7,000 tons?

Mr. ALEXANDER. Five thousand tons gross would be equivalent to about 7,000 to 7,500 dead-weight capacity.

Mr. MADDEN. That is what I mean; so that, as a matter of fact, why do we not talk in the language that people understand when we talk about the tonnage of ships?

Mr. ALEXANDER. Admiral Bowles was asked that question by the Senate committee.

Mr. MADDEN. I will tell you why I ask that question. When we talk about dead-weight tons of ships, a great many people think that we are building so many million tons of shipping, when, as a matter of fact, we are building only about 60 per cent of that tonnage. It ought not to go out to the people in that form. Why do we not talk about the actual capacity of the ships that we are building instead of talking about something that people do not understand about?

Mr. ALEXANDER. That is what we are doing when we estimate it in dead-weight capacity, the actual carrying capacity of the ship. That question was asked of Admiral Bowles by the Senate committee, and he said it was a term which was common among shipping men, and which indicated the net carrying capacity of the ship.

Mr. MADDEN. They do not do it in any other country in the world except ours, and never in this country except when we are telling how many million tons of shipping we are going to build, and we have got the people to thinking we are going to build so many million tons when, as a matter of fact, we are only going to build about 60 per cent of that total.

Mr. ALEXANDER. No; we are estimating the tonnage in dead-weight capacity and not in gross tons. That is the only difference. Now, in the Senate hearings, beginning at page 125, is given a summary of the requisitioned vessels completed and retained by the Shipping Board, also those completed and reconveyed to former owners, and from page 127 to page 144 of the Senate hearings that information is given in detail, with a statement of the shipyards where these ships are being built. The total number of vessels with contract price is 364; dead-weight tonnage, 2,505,128 tons; total cost, $361,865,347; vessels constructed on cost-plus basis, 67; dead-weight tonnage, 550,880; total cost, $73,922,439; or a total of 431 vessels; dead-weight tonnage, 3,056,008 tons; total cost, $435,787,896.

These vessels are under construction in different shipyards in the country, and are in addition to those to be built at Sparrows Point, Hog Island, Bristol, and by the Submarine Boat Co. in New Jersey.

Mr. BUTLER. On what page of the Senate hearing is that summary?

Mr. ALEXANDER. The statement begins at page 127 and ends at page 142, part 1.

Mr. FARR. Will the gentleman repeat the total tonnage under contract?

Mr. ALEXANDER. That of the requisitioned ships, 431; total dead-weight tonnage, 3,056,008 tons; total cost, $435,787,896. Those are ships being built in private shipyards all over the country.

Mr. FARR. They are being pushed rapidly?

Mr. ALEXANDER. Yes.

Mr. MADDEN. Will the gentleman yield for one further question?

Mr. ALEXANDER. Yes.

Mr. MADDEN. I should like to ask the gentleman to tell, if he can, how many ships have actually been completed and are ready to sail, if any?

Mr. ALEXANDER. I just gave the gentleman a summary of the commandeered ships.

Mr. MADDEN. I am talking about ships that are being built.

Mr. ALEXANDER. They have been built.

Mr. MADDEN. Not by us.

Mr. ALEXANDER. They have been built or are being built in American shipyards for the Government.

Mr. MADDEN. Yes; but I want to know how many ships have been built under the direction of the Shipping Board.

Mr. ALEXANDER. These have been commandeered, taken over, and built under the direction of the Shipping Board.

Mr. MADDEN. I understand that; but they were private contracts let by private people. Now, can the gentleman tell us what success or progress has been made by the emergency shipping organization? Have they built a single ship and got it out on the sea?

Mr. BUTLER. Completed?

Mr. ALEXANDER. If the gentleman will look at page 228 of the hearings, Admiral Bowles submitted a chart showing——

Mr. MADDEN. I would like to have the gentleman answer my question. The chart will not go into the RECORD, but the gentleman's answer will go into the RECORD.

Mr. ALEXANDER. I would not be able to say offhand. It may be that the hearings contain that information. If so, I will give it later.

Mr. MADDEN. So that the gentleman in charge of the bill really can not tell the House and the country whether a single ship has been completed by the Shipping Board.

Mr. ALEXANDER. I think several ships have been completed and launched.

Mr. MADDEN. Not under the contracts let by the Shipping Board.

Mr. ALEXANDER. Yes; under contracts let by the Shipping Board.

Mr. MADDEN. Of course, I shall be glad if that turns out to be the case.

Mr. ALEXANDER. I think that is true.

Mr. MADDEN. I want to see the ships moving, and I am anxious to expedite their construction.

Mr. ALEXANDER. I think they are moving.

Now I yield 15 minutes to the gentleman from Texas [Mr. HARDY].

Mr. HARDY. Mr. Chairman and gentlemen, this is a bill which was referred to our committee, and after hearing all the evidence offered by those in support of the bill and calling upon the department—that is, upon the representatives of the Shipping Board and Fleet Corporation—for a full presentation of the reasons for the bill the committee, without a dissenting vote, recommended its passage. It appeared to us from the hearings that this is the first great step taken by our Government toward housing the labor necessary to be employed in the production of the ships for the use of the Government. The Secretary of Labor came before us and suggested that it might be desirable to abandon this particular project and authorize a general housing program for all the labor in all the departments working for the Government. But the Shipbuilding Department of the Government had made a survey of its needs and necessities, had progressed toward some definite details as to what they needed, and to tear up their work and start again along broader lines seemed to us would require a reorganization, a reinvestigation, and a reexamination, and would have taken more time, and time was very much of the essence of our needs.

Mr. MADDEN. Would it interrupt the gentleman if I asked him a question at this point?

Mr. HARDY. No; I will yield to the gentleman.

Mr. MADDEN. I would like to ask the gentleman if he knows how many men it is intended to provide housing for under this bill?

Mr. HARDY. I can not say; I have a very poor memory for details. Judge ALEXANDER stated the number of yards where they are now attempting to build ships and those which are not running at the full capacity because they did not have housing facilities. In one yard, I think, there were 3,500 employees, and it had a capacity for 7,500 employees, but not the houses for them.

Mr. MADDEN. I can see the importance of providing housing facilities for men if we intend to expedite the building of ships, but what I want to know is whether the committee has ascertained how many men the Shipping Board expect to assemble in the shipyards for which housing provisions are made under this bill.

Mr. HARDY. If the gentleman undertakes to draw from me exact details, he will trip me up. I can not remember them; and, besides, the Government itself can not tell just exactly how many workmen they will have to build houses for. Admiral Bowles, in testifying before us, said that it might not take as much as $50,000,000 to house all the needed labor. He went on to say, furthermore, that the houses might be used sometimes interchangeably—for other purposes—as it might be convenient to use them for other branches of governmental industry, but at many shipyards they had a capacity for more men than they had houses for, and it was very essential, if we wished to speed up shipbuilding, to provide additional housing.

Mr. MADDEN. Will the gentleman let me interrupt him right there? The statement of Admiral Bowles would presuppose that the shipyards in which the ships are to be constructed are adjacent to other activities manufacturing supplies for the war?

Mr. HARDY. He illustrated by stating some of the uses of housing that had been made at Newport News. Some houses had been used for the Navy and some of the shipbuilding yards. This overlapping use of these houses may in a minor degree take place, but the essential thing contended for by Admiral Bowles was the need for a great many houses to be built for the purposes of the shipbuilding plant.

Mr. WELLING. How soon will these houses be available? How long did the department think it would take to construct them?

Mr. HARDY. I presume some will only take a short time and others will take longer. If they built temporary structures they could be put up in a night, perhaps. Some buildings are intended to be put on ground already owned by the shipyards and some on ground which is to be bought by a corporation organized by the Shipbuilding Co. This corporation will be practically organized without capital and officered by the members of the Shipbuilding Co. It will be administered without profit. They ask the Government assistance because when the work of building ships is over and the boom goes down there is sure to be a shrinkage in the value of some of the property, and the Government is expected to lose possibly 30 per cent of the investment. The shipbuilding companies are not willing to spend their own money for these temporary housings.

At the same time these corporations will be clothed with power to sell the houses, and if they are good houses for the community where they are and likely to be used permanently, many of them will be sold. The law department of the Emergency Fleet Corporation will see to drawing the contracts with the house building company in detail for the preservation of the lien of the Government, and the protection as far as possible of its interests generally.

Now, when this corporation that is organized for the building of houses has performed its functions and the shipbuilding yard is turned back to private purposes these houses will be on hand. Many of them will have been sold but many others perhaps unsold.

Mr. MADDEN. Will the gentleman permit another question?

Mr. HARDY. Yes.

Mr. MADDEN. Does the gentleman or any member of the committee know whether there is sufficient ground along any shipyards that have been established upon which to build these houses, or will the commission have to buy land or commandeer it?

Mr. HARDY. The gentleman will see from the phraseology of the bill, which was worded by the Shipping Board, that there may be occasion to buy land in order to put houses upon it. There may be houses located sufficiently convenient so that they can buy them. The Shipping Board is authorized to buy land, if necessary, in order to construct houses upon it, or to buy or requisition houses.

Mr. MADDEN. The reason I ask the question is that at Fort Sheridan for the accommodation of officers in the training camps they put up enough buildings in 10 days to accommodate 5,000 men. So if we had the ground I do not see why we should not be

able after the law is passed to put up buildings within two or three weeks.

Mr. HARDY. I think the gentleman is right on that. I see no reason to take a great while to build most of these houses.

Mr. EDMONDS. Will the gentleman yield?

Mr. HARDY. Yes.

Mr. EDMONDS. That is to be done at Sparrows Point and Camden both, where they have land in the vicinity that they can put houses on.

Mr. HARDY. I think that answers one of the questions of the gentleman from Illinois [Mr. MADDEN]. At those two yards—at Sparrows Point and at Camden—they have the ground ready to be built on.

Mr. FARR. Mr. Chairman, will the gentleman yield?

Mr. HARDY. Yes.

Mr. FARR. I understand that the Emergency Fleet Corporation will need about a quarter of a million more men to complete this work.

Mr. HARDY. Something like that; and, further answering the gentleman from Illinois [Mr. MADDEN], this bill in itself provides that if they need the land they can take it and adjust the payment for it later, so that no delay ought to be occasioned by that.

This is the first bill of this kind for housing laborers on Government work, and in the hearings before us it was stated time and again that England had long since resorted to the same method of taking care of the laborers employed in her war-making industries, and that she had expended up to now in housing her laborers engaged in war productions over $700,000,000. I hope there will be no occasion for us to go so largely into the expenditure of money for housing, because much of it must necessarily be lost when the war is ended. I hope most of our shipyards will be able to find in nearby towns, and through the increase of transportation facilities, housing enough to care for their labor, and so we looked somewhat into the question of improving transportation facilities. It is an essential necessity for the Government to provide housing facilities for the operatives to build these ships. Whether there is extravagance in building the ships or not, as some one said, we have got to have the ships, with or without extravagance.

Answering some of the remarks of my colleague, Mr. GREENE of Massachusetts, I want to digress far enough to say that this is not a question of Government ownership or private ownership. It would be the pot calling the kettle black for either private or Government ownership to try to get any credit out of the operation of the Hog Island plant. From all I can learn, the American International Corporation, that undertook the building of that plant, is a private corporation and they sublet to private corporations, and there must have been an orgy of extravagance at the expense of the Government all through the operations of the captains of finance and not through any Government-ownership processes. I only hope that in gradually settling down to the administration of the business affairs of this great department of the Government, that covers an expenditure hitherto unparalleled in the annals of Government history, it will come to be run with as little graft and as little extravagance as possible will be found, and that wherever it is found, the man guilty of it will be pilloried in the public estimation, whether he be Frank A. Vanderlip, chairman of the private organization that builds the Hog Island industry, or the most unknown Government employee that there is in the land. I want to see scandal banished from the contracts and conduct of the affairs of this war; and I do know that in private contracts that have been let for the building of ships, there can be no hurtful comparisons made with Government construction by those favoring private contracts, because ships that were being built for $40 and $50 per ton before this war began have been let to private contractors to-day, who say that it costs that much to build them, at from $160 to $200 per ton. I believe when the Government gets straightened out in the operation of these yards that it is supervising, it will demonstrate just what ships can be built for, and build them for that sum, and that that sum will be under the prices they are now paying private contractors.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. HARDY. Yes.

Mr. MOORE of Pennsylvania. I agree with the gentleman from Illinois that we want ships, and we do not want these orgies of extravagance at shipyards to which the gentleman from Texas refers, but what does the gentleman think of the proposition to provide in this bill that the contracts shall be awarded in accordance with law?

Mr. HARDY. The only objection I have to that is no concrete objection. It has simply not been presented to our committee. I do not know what objections there might be to it offhand, or at first blush as the darkey would say. It seems to me that it would be a good proposition if some limitation of cost could be framed. I can not think of any limitation that will prevent dishonesty or graft. That perhaps can only be done by faithful and efficient Government inspection and supervision. These houses must be built as rapidly as possible, and that situation might not give time for the offering of contracts under public competition and award.

Mr. MOORE of Pennsylvania. Of course it would require advertisement and notice.

Mr. HARDY. And time. It seems to me that the Emergency Fleet Corporation or the Shipping Board ought to be trusted to the extent of expending $100,000 here and $100,000 there to build essential necessities, without taking up time for advertising, so that I would hesitate to say that I would support an amendment of the kind the gentleman refers to, not having gone into it to see what the objections might be on the part of Admiral Bowles, who seems to be trying hard to draw something out of the Hog Island situation and to expedite our shipbuilding generally.

Mr. MOORE of Pennsylvania. I think that is true.

Mr. HARDY. If he is an honest man, if he is a good administrator, he could perhaps have these houses, especially the temporary ones, built both expeditiously and economically. I do not know about that. Generally I would be in favor of a public award, to the lowest bidder, for all Government contracts.

Let me say just one word more in answer to my good friend from Massachusetts, Brother GREENE. Fifty years have gone since the North and the South in splendid battle array drew swords against each other, and 50 years have passed since the last gun of that war was fired and the last battle flag of the Confederacy was furled. It is true, as the gentleman says, old soldiers last June walked down Pennsylvania Avenue bearing the flags of the lost cause and of the triumphant Union side by side. Good men all over the land have come to-day to recognize the fact that loyal, true, and noble sons of both the South and of the North each fought for what in their judgment was right. The expressions of the gentleman from Massachusetts do not voice the sentiments of the old soldiers or the best citizens of his own State; to them the rancors of 1861–1865 are dead. The name of Lee to-day sounds as sweet and his memory is as dear to the best manhood of the North as the name of Grant is to the best manhood of the South. Fifty years have passed, and that era that once stirred to strife the sections of our common country is to be followed by an era in which the sections join together under one banner in a struggle which dwarfs the other struggle in its magnitude and vies with it in the extolled grandeur of its consecration, and we trust will surpass it in its glory. If there is nothing else of good in God's providence that comes out of this horrible war, there will be this—that the love of brotherhood will cement again the North and the South, and no longer will there be a criticism because some son of the South still loves the memory, yea, and the flag of his fathers. To-day, except for some rare and strange case here and there, all bitterness is gone and every man, North and South, will salute the flag with one devotion and determination to bear it to victory on the fields of France, and every patriot echoing in his heart the Psalmist's song, "Behold how good and how pleasant it is for brethren to dwell together in unity," rejoices that we are marching to-day to the battle fields—the North, the East, the West, the South—without one dividing line. [Applause.]

Mr. GREENE of Massachusetts. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. ALEXANDER. I yield the gentleman one minute more.

Mr. GREENE of Massachusetts. I just want to say that I made no mention of Gen. Lee; I made no mention of the Confederate soldiers. I never questioned their loyalty to their flag. The gentleman says the war has been over for 50 years. That is true; but I say now—and I do not say it with any disrespect to the South—that we ought to get under one banner. That is where we ought to get, and never have in this Capital two banners.

Mr. HARDY. If the gentleman will permit me, I will say we are under one banner. [Applause.]

Mr. GREENE of Massachusetts. That is all.

Mr. HARDY. I will say further down in the Southland the Stars and Stripes wave over a happy and united people——

Mr. GREENE of Massachusetts. We never questioned that.

Mr. HARDY. And that does not diminish our love for the flag that once was borne by Robert E. Lee.

Mr. GREENE of Massachusetts. That is all right; I know all about that.

Mr. ROBBINS. Mr. Chairman, I would like to ask the gentleman a question in regard to the legal features of this bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROBBINS. I want to ask the gentleman one question.

Mr. ALEXANDER. I yield to the gentleman one minute for that purpose.

Mr. ROBBINS. I notice here this bill allows the condemnation of lands and houses. How are you going to condemn a house if it is in the possession of the owner and is used as a residence?

Mr. HARDY. Under the eminent-domain law I do not think there is any property that can not be condemned for the use of the Government.

Mr. ROBBINS. It says here in line 21, page 5, that you must have the State legislature's consent, and in Pennsylvania no land can be condemned that is in the possession of the owner.

Mr. HARDY. Oh, no. This law provides that we can take possession, without waiting the consent of the State, and adjust all that later.

Mr. ROBBINS. It applies to a house in the possession of the owner, used as a domicile.

Mr. HARDY. To meet that question we have a provision here put in the bill in line 20.

Mr. ROBBINS. There is a legal complication in Pennsylvania——

Mr. HARDY. We investigated that question, and found it would be thoroughly constitutional; or, at least, we believed so.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. GREENE of Massachusetts. I yield three minutes to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. Mr. Chairman, I shall not have much to say about the merits of the bill, but I think the paramount question to-day is the question of transportation, and if we are going to win the war we have got to be able to move the men and the supplies, and if we can not build the ships without furnishing housing facilities our imperative duty is to furnish those facilities. The question of how the contracts shall be let for the houses we decide to build is one that will have to be taken up by the administrative officers of the Government. If we could stabilize the prices of materials that enter into the construction of these houses and also stabilize the price of labor, the way to build the houses would be by contract; but as they are uncertain I apprehend that we are not going to be able to let contracts for any houses we decide to build, and so we will be obliged to go on and build them at cost plus. That, of course, will make them cost more than they otherwise would cost, and I do not believe that we will be able to-day to get any man to take a contract to build those houses at a stipulated price, because he would not know in advance what the conditions would be under which he would be called upon to operate, and the one thing I think we ought to do, and do quickly, is to insist upon the Shipping Board assembling a sufficient force of people to build a sufficient number of ships to carry the supplies and men to the other side. We have men ordered to the other side from time to time who are obliged to wait in New York three or four weeks after they get there before they can get a ship. We have ships that have gone abroad that have had to bring back part of their cargoes. That shows there is bad management somewhere, and we ought to have a management so scientific and systematic, filled with vigor, vision, and imagination, that they can see the things that are necessary to be done. The American people want the war brought to a successful conclusion, and they will not be satisfied with anything else.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. May I have one more minute?

Mr. GREENE of Massachusetts. I yield to the gentleman another minute.

Mr. MADDEN. I realize it is not easy to assemble a great force like the Shipping Board and the other departments of the Government are obliged to assemble in an emergency like this and have everything run smoothly, but we have had opportunity enough now to be able, with the right men at the head, to make an organization that will run and function and get results. We have not had it so far. We want results, results, results, and that is what everybody else wants, and until we begin to get results and get them at a reasonably decent cost, the American people are going to continue to doubt whether we are doing all we can to win the war in which we are engaged. [Applause.]

Mr. GREENE of Massachusetts. I yield 10 minutes to the gentleman from Pennsylvania [Mr. EDMONDS].

Mr. EDMONDS. Mr. Chairman, ordinarily I am opposed to paternalism and, of course, this bill smacks of paternalism. But I do not see how it is possible for us to accomplish the building of these ships without something can be done comfortably to house and take care of the men who are working in the shipyards. After an investigation made by the committee I am convinced that the comfort of the employees and the care necessary to be taken of the labor is going to require us to pass a bill something like this, not only for shipyards but we probably will have to pass one for a great many of the munition plants. It is well known that necessity knows no law, so we have to sink all ideas or principles in a matter of this kind and take a position with reference to this matter where we can accomplish what we are trying to do quickly. There is no desire on the part of the housing commission of the Shipping Board to do any more than they absolutely have to do. I will say when they came first to Philadelphia they talked about building 7,500 houses. It has been reduced to 3,000 houses, not because they are going to build any less ships at this point, but because they plan that by opening up certain streets and advancing some money to increase railroad and street railway facilities they will be able to get along without as many houses as they at first contemplated they would need to have.

Foreign countries have recognized this condition. England has in one plant, the plant at Gretna, two villages, or two towns, you might call them, one at each end of the plant, and the plant, including the town, is over 12 miles long. Mr. Ackerman, who appeared before the committee, investigated this proposition and found that it was absolutely necessary, because it prevented the turnover in labor which was occurring at this plant before the houses were built.

It is said in some of our shipbuilding plants the turnover of labor is over 600 per cent, meaning that the average time a man spent at the plant was about 60 days. In Gretna, after building these houses, the turnover was less than 5 per cent. So you can see that building these homes is going to give the yards stable labor and going to make it contented with the conditions that exist there. In Gretna, England, they have schools and theaters, and everything has been built by the Government. Somebody asked a short time ago here whether the Government was selling these properties. I understand not. I understand the English Government is retaining these properties and intends to sell them at the close of the war, or they will possibly rent the plant as a whole, because their reconstruction committee is intending to utilize this plant for some manufacturing use after the war is over.

It was also noticed in Gretna that the increase in output was rather remarkable, and I would think that building these houses at our plants would increase our output. The work would be done by the Emergency Ship Corporation or by subsidiary companies. The contracts are to be drawn so that the Emergency Ship Corporation will control.

Now, they have two different plans in this bill, and that is one reason why we added section (d) to it. The first plan is that they propose to build on the ground owned by the ship corporation or a subsidiary company of the Emergency Ship Corporation. The corporation, or this subsidiary company of theirs, will own every particle of the property. Now, in the other case, the Emergency Ship Corporation proposes to make contracts with subsidiary companies, the companies composed of the officers of the different private shipbuilding yards, and these contracts will be so made that the Emergency Shipbuilding Corporation will control the handling of the money and also mortgage these properties up to the full extent so that they can get very nearly their money back.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. EDMONDS. Yes.

Mr. GREEN of Iowa. Can the gentleman inform us at how many different places the housing board expects to build these houses?

Mr. EDMONDS. At the present time they have in contemplation building at Newport News, Chester, Wilmington, Sparrows Point, Bristol, and Hog Island. Now, there are applications coming in from some other private concerns on the Pacific coast, I believe, and also from some up in New England. There is really no accurate idea as to how many places they will have to build houses. They do know if they want to take care of and prevent the turnover of labor they have got to do it at Bristol, at Sparrows Point, at Hog Island, and possibly at Newark. I forgot to mention Newark. They have the plans fairly well under way. They went over the plans with us, and it appears to us that they are trying to do everything they can to prevent as much loss as possible, because no man doubts that if we spend this money in this housing, eventually we will make a loss.

Now, in the case of the New York Shipbuilding Co., which was talked about before the committee, the attorney of the board spoke of a piece of ground that they owned upon which they wanted to build houses, and after they have given the ground

to the housing company, and the houses were erected under whatever plan they should agree upon, it was understood the Emergency Shipbuilding Corporation, or their subsidiary housing companies, should have a mortgage both on the houses and grounds. That ought to let us out fairly well in the deal. Undoubtedly the cost of building these houses is going to be 30 or 40 per cent more at the present time than in ordinary times. Whether we can get the money out of the houses eventually is simply a question as to whether they are built in advantageous locations or not.

Mr. GILLETT. Will the gentleman yield?

Mr. EDMONDS. Yes.

Mr. GILLETT. How was it anticipated originally that these workmen could be provided with houses?

Mr. EDMONDS. It was thought originally, I believe, that facilities, railroad or trolley, could be made to bring them to these different points. I can call to mind that in the Hog Island plant they have two trolley roads going there and they also are running motor busses. And then we have two different railroads going into the plant. And yet they do not seem to be able to bring the men in time, and the delays in transprtation are so great that the men are discontented and do not stay long on the work.

Mr. STAFFORD. Will the gentleman yield?

Mr. EDMONDS. Yes.

Mr. STAFFORD. From what distance is this corralled?

Mr. EDMONDS. From the city hall in Philadelphia to Hog Island is about 9 miles.

Mr. STAFFORD. Does the labor come from that radius of activity?

Mr. EDMONDS. I would say it does. The labor comes from all over Philadelphia. The houses in the Philadelphia project will be a mile or a mile and a half from the shipyards.

Mr. ALEXANDER. The gentleman might state what the city of Philadelphia is doing in cooperation with this work.

Mr. EDMONDS. The city of Philadelphia is doing whatever it can. They have advertised for a boulevard to run to Hog Island, on which there will be a two-track high-speed trolley, to enable the men to get to the works promptly, and they are prepared to perform all the necessary municipal work.

Mr. STAFFORD. In the progress of events in Philadelphia, how long does the gentleman think it will be before that boulevard, and trolley in particular, will be built?

Mr. EDMONDS. It was said by the members of the housing board that they thought it could be completed in about four months.

Now, to get back to the question of the gentleman from Pennsylvania [Mr. MOORE] in regard to dropping the cost-plus percentage on contracts, I would like to say this: Upon making an inquiry of Mr. Flannery, who is employed—not a dollar-a-year man—by the Shipping Board——

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. GREENE of Massachusetts. Mr. Chairman, I yield five minutes more to the gentleman.

The CHAIRMAN. The gentleman from Pennsylvania is recognized for five minutes more.

Mr. EDMONDS. Mr. Flannery, as I say, is employed by the Shipping Board. He is not a dollar-a-year man. He is a manufacturer and has a factory in Pittsburgh. He is a business man. Mr. Flannery told me the other day—and the chairman of the committee was present—that it was his intention to use local talent to supply the labor for these houses, and the Government, through the Quartermaster's or some other department, would supply the material. He said that that was rendered necessary at this time because the Government in most places has commandeered all the sand and gravel and lumber. Therefore in order to get this material we would have to go to some of these departments and get it released, so that it could be supplied for the houses. He said his idea was, where he was going to build a couple of thousand houses, to divide it up among five or six contractors who were experienced in building houses.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Pennsylvania yield to the gentleman from Iowa?

Mr. EDMONDS. Certainly.

Mr. GREEN of Iowa. I would like to inquire whether the board has ever considered the matter of modifying these cost-plus contracts—say to allow 5 per cent, which was thought to be a reasonable amount, and then reducing the percentage as the cost advanced, so that there would be some object in reducing the cost?

Mr. EDMONDS. The contracts would not be given on the cost-plus plan. It would be so much to be paid to the man; whether he spent a million dollars or a hundred thousand dollars, he would get no more out of it than the agreed price. The idea was to employ the builder at such and such a price, and no more than that.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. EDMONDS. Yes.

Mr. STAFFORD. There have been in past times large building contractors in Philadelphia who have given themselves over to building large continuous rows of homes. Why does not private capital furnish homes at this island tributary to the navy yard?

Mr. EDMONDS. Because this location is not available at the present time. It will be in the course of three or four years, but it is not now. There is ground nearer the city where they would build in preference to building here.

Now, there are two classes of houses in prospect. First, they are going to build in a place where it is evident that these houses can not be sold afterwards. So far as I am concerned, I do not believe in the idea of the Government selling any of these houses until after the war. But that is a mooted question. Then they are going to build in a place where the houses can be sold afterwards, in a place nearer to permanent industry. They are to be five or six or seven room houses and are going to be built in attractive style, so that they would attract workmen. They believe when they build these houses they eventually will be able to sell them all off, because their venture stops with the war, of course.

Then they are going to build a type of frame house which will either be in a position to be torn down if they can not sell it, so the loss will not be so great. They also will build large clubhouses or hotels or boarding houses out of wood for single workmen. The other houses they are building are for married men, so that they can bring their families there. These clubhouses or lodging houses for single men will be of wood, so that if there is no use for them in the future at the plant they can be torn town and taken somewhere else, just as in the case of cantonments if we can not use them further.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. EDMONDS. I ask unanimous consent to extend my remarks.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to extend and revise his remarks in the RECORD. Is there objection?

There was no objection.

Mr. GREENE of Massachusetts. Mr. Chairman, I make the same request.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr ALEXANDER. Mr. Chairman, I make the same request.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. GREENE of Massachusetts. Mr. Chairman, I yield 10 minutes to the gentleman from Washington [Mr. HADLEY].

The CHAIRMAN. The gentleman from Washington is recognized for 10 minutes.

Mr. HADLEY. Mr. Chairman, the bill is essentially a war-emergency measure. It is intended to deal with facilities that are absolutely necessary, in the view of the committee, in connection with war production, and it is limited to the period of the war with Germany.

Of course, like many bills with which we are familiar which Congress from time to time has had to deal with, this bill deals with principles which would not be welcomed in time of peace or under ordinary conditions. But we have learned that we must treat emergencies as such, and deal with them as we face them according to the conditions.

Mr. WALSH. Mr. Chairman, will it trouble the gentleman if I ask him to yield?

Mr. HADLEY. Not at all.

Mr. WALSH. The gentleman states that this is a war-emergency measure. I desire to ask him what is going to be the situation if the Government is undertaking to construct, say, a thousand of these houses and they are partially completed and unfinished, and then peace should suddenly come? Where is that going to leave the matter? The authority, as I understand it, ends with the proclamation of the President. What will become of these structures and what would be the situation under the condition that I have indicated?

Mr. HADLEY. I understand the gentleman's question, I think. The purpose of the bill is to suspend the operation of the powers which are granted by its terms with the termination of the war. But all existing contractual relations or vested rights, as the case might be, would, under the authority of law, be perpetuated and effectuated and carried out. I do not conceive that there will be anything in this bill that would cut off a contractual or vested right when the war ceases, but the extension of the power which might be exercised now during the period of the war would be cut off at the conclusion of the war.

Mr. WALSH. Then the gentleman's view is that the powers and authority granted are war emergency measures, but the execution of the things undertaken to be done under those powers and authorities necessarily are not emergencies?

Mr. HADLEY. Necessarily the winding up of the investment, so far as the Government is concerned, between it and private parties which would arise under the execution of these powers would have to be effectuated in the ordinary transaction of business after the war closed.

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. HADLEY. Yes.

Mr. ALEXANDER. The committee had that question under consideration, and we thought it unwise just at this time to say just how the business of this corporation should be wound up. We thought we would leave that to the Congress to determine after the war is over, when the conditions are met.

Mr. WALSH. I will not take up any more of the gentleman's time in asking for information.

Mr. HADLEY. The evidence before the committee disclosed, speaking generally, that the Council for National Defense had made a general survey of the housing situation throughout the country as applied to war industries generally, and that the Department of Labor had done the same, including the shipping situation; and it also disclosed the fact that the Emergency Fleet Corporation had devoted considerable time to the investigation of the situation as applied to its own activities. A coordination of all that testimony before the committee demonstrated that the necessity for labor in connection with war industries and the transportation of labor from one point to another had resulted in massing great numbers of workers at common points quickly and suddenly—points where there were no towns, no buildings—or, and in some instances where there were towns and cities, they had become so far overburdened as not to be able to meet the situation at all. The testimony also showed that the purpose of the Fleet Corporation is and has been to meet the situation first without housing, if possible, and that they had done that by means of transportation in many instances. Where they can relieve the condition by aiding in ferryboat service or in trolley-car service and other service in a supplemental way, the purpose of the corporation is to do that, and they resort to those means of relieving the local emergency in a given case only after having exhausted all the possibilities of local relief. It developed, as has been stated by a number of gentlemen who preceded me, that in many localities they were not able to give the necessary relief even through the medium of transportation. Where the center of activity is removed a considerable distance from a city of town, for instance, and transportation is not present, the housing demand is acute.

Secretary of Labor Wilson made a general statement before the committee, which it is interesting to note and from which I submit the following extract:

> Large numbers of those men that are being moved into the lines of industry for the production of war material are skilled men. They have been working heretofore under the conditions of living and under the standards of living that have obtained for skilled men. In bringing them into the communities, with the absence of housing facilities, it is difficult to get them to remain, the result of which is a tremendous turnover of labor. The turnover of labor is a matter, of course, of loss of efficiency. Not only is there a large turnover of labor, which causes a loss in efficiency, but there is also difficulty in getting men to accept employment in places where the housing facilities are insufficient.

And Admiral Bowles, in stating the reason for this legislation, made this statement:

> The reason that we have asked for the authority that is contained in this bill (S. 3389) is this: That we know that, in many cases, houses exist in the neighborhood of shipyards which, if we had the right to requisition—that is, the right to requisition the use of those premises—we would avoid the necessity for building houses to that extent, by using them for the homes of shipyard workers; and that power on our part will put the "fear of God" into the hearts of the real estate speculators who have bought up the property and are holding it at high prices in the neighborhood of all the shipyards in the United States.
>
> That would be a very valuable power to us; and I believe it would be exercised in many cases by the taking of the use of houses; not actually acquiring the title to them, but in acquiring the use of them, for which we would pay a fair rental, upon a basis that we could reasonably adopt, a basis of the value prior to any demand that had raised the prices in the immediate vicinity of the shipyards.

The legislation is necessary in order to vest in the Fleet Corporation the power to acquire title to real estate and other necessary property, a power that they do not have at this time. The only means by which the corporation has been meeting these extraordinary demands in the incidental way I have mentioned without this legislation is through the operation of some provision in the urgent deficiency bill of June 15, 1917. The attorney for the corporation who appeared before the committee expressed a doubt as to the authority to extend relief under that appropriation. I will not refer to the testimony, but he explained that it would be a strained interpretation of language to go further, if they had not already strained it, in fact, in going as far as they had gone.

Something has been said about the contract that is proposed to be made. The land may be taken by purchase, or by lease, or by condemnation. However the title is acquired, it may be that the Emergency Fleet Corporation will proceed to build the houses, or it may dispose of the land, and the laborers may build the houses through loans from the Fleet Corporation. A variety of conditions will arise according to the situation in the given locality. But the plan that they propose is for the shipyard company to create a holding company.

The CHAIRMAN (Mr. BANKHEAD). The time of the gentleman has expired.

Mr. HADLEY. May I have five minutes more?

Mr. GREENE of Massachusetts. How does the time stand?

The CHAIRMAN. The gentleman from Massachusetts has still remaining 36 minutes and the gentleman from Missouri 33 minutes.

Mr. GREENE of Massachusetts. I yield to the gentleman five minutes.

Mr. HADLEY. The stock in the holding company, of course, will be held by the shipyard company, and the plan of the Fleet Corporation is to deal directly with the holding company and to limit the transaction by provisions in the mortgage or by some side agreement. The plan contemplates security. I do not know that the bill specifically provides for the taking of security in connection with the proposed loans, but the plan that was contemplated before the committee, as the testimony showed, was that these loans should be secured upon the property of the holding corporation.

Mr. HARDY. That plan was stated by the attorney for the Shipping Board in very considerable detail.

Mr. HADLEY. Yes. I have it here.

Mr. HARDY. As to the kind of contracts he expected to draw.

Mr. HADLEY. Yes. The shipyard company would not desire to make a mortgage upon its own assets; but by limiting it to the assets of the holding company, of course when the transaction is complete there will be no liability outside of the assets of the holding company.

With the present conditions as to prices of labor and material and other contingencies surrounding the prosecution of business of this kind, the information of the Fleet Corporation was that the shipyard company would not take hold of this as a business proposition, but with the aid of the Government through the holding corporation, with its limited assets and the security upon the assets by the Government, which the Fleet Corporation intends to take, the result would be that the housing could be effected. I am satisfied from the testimony before the committee that the purpose of the Fleet Corporation in this respect is to expend only so much of the funds as are absolutely necessary to meet emergency demands, that they have a conservative plan in view for that purpose, and that it will be adequate to meet the situation if this legislation be enacted.

Now, whether it will take $50,000,000 or not is another question. I do not know how much of that sum will be required. There was some difference of opinion before the committee as to that. I will state frankly that the committee did not have any very definite specifications upon that subject. However, the request was made for that amount, and as you can see, looking the matter squarely in the face, there is ample reason for that.

With a 70 per cent increase of labor in the yards between October 1 and January 1 of this year it requires no stretch of the imagination to see that as the shipbuilding business evolves and develops during the present year and the labor of the country engaged in the industry is centered at these points the conditions in question will become more acute and no one can foresee how much money may be required to meet the situation.

Therefore I am in favor of adopting the request as made to the committee and the Congress through this bill and relying upon the checks which we have—this is only an authorization. It must be met by appropriation subsequently—there will be the judgment of the Fleet Corporation as a check upon it as well as that of the Committee on Appropriations and of the House when it deals with the subject of appropriations.

I am earnestly in favor of the passage of this bill because I deem it absolutely necessary to meet a demand which lies at the very foundation of our war program. All concede that the construction of ships is of the most vital importance at this time. We must have them as fast as men and money can supply them and multiply them as rapidly as possible. [Applause.]

Mr. GREENE of Massachusetts. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman from Massachusetts has 31 minutes remaining and the gentleman from Missouri 34 minutes.

Mr. ALEXANDER. Mr. Chairman, I yield 10 minutes to the gentleman from Maryland [Mr. PRICE].

Mr. PRICE. Mr. Chairman, it is hardly necessary to have had any debate, I think, on this bill, as it comes from the committee with a unanimous report. I believe it will meet the views of nearly all the Members of the House. There are 132 shipyards in this country building ships for the United States, employing on the 1st of January between 180,000 and 190,000 men.

The estimated capacity of these shipyards in labor can be brought up to five or six hundred thousand men if necessary by working on more than one shift. When the Shipping Board faced this problem they realized that it was necessary to greatly expand the labor, and in doing so found that it was impossible to get labor at some points where they were building ships because of the lack of houses. Many of these shipyards are now being constructed at points where the population is slim, where there are no housing facilities, and they have come to Congress for additional power, as they had not the power to build houses, specifically, and acquire land for this purpose.

I think no one will contend that the building of ships is not one of the fundamental things for winning this war. At the present time it is perhaps the most pressing necessity we have before us. The other day a noted Englishman, Sir Walter Roper Laurence, a distinguished commissioner of the late Lord Kitchener, was in this country, and gave out an interview in which he said that the three things he would impress on the American people was, first, ships. He put that at the head of the list. Second, he insisted on riveting attention in the minds of American soldiers in France to the fact that their country is behind them. It might be incidentally remarked that no more convincing argument that we are behind them could be made to our soldiers in France than that we are building ships for the purpose of sending them supplies. Third, that there can be no peace until the Prussian war machine is smashed. Again, the Prussian war machine can not be smashed until America gets into the war with all its power, and America can not get into the war with all its power unless we have ships, and have them quickly.

So that it becomes a paramount need, the need of this hour. This great Englishman says that if he had an American newspaper he would place at the head of its columns in great letters these three words: "Ships, ships, ships."

So that I think that not only Congress but the country realizes that our great need is ships. We all know that to build ships we must have men, and we know that if we employ labor they must live somewhere, and therefore we are undertaking in this bill to provide for that necessity.

At the present time we have about 180,000 men engaged in building ships. This very day we are starting a campaign all over the country to enlist men to build ships, and each State is asked to contribute a certain quota. My own State is asked to furnish 5,000 volunteers. It is found that at these shipyards we are not able to employ half of the men that are necessary, not more than half of the capacity of these yards. Take, for instance, Sparrows Point, in my own State of Maryland, which is one of the points where they contemplate the housing project, there is employed to-day 3,500 men. There can be employed at Sparrows Point 7,000 men; in other words, just double what we have if housing facilities can be provided.

Mr. FESS. Will the gentleman yield?

Mr. PRICE. Yes.

Mr. FESS. Does the shipbuilding industry require some special skilled labor which is difficult to get?

Mr. PRICE. I will say to the gentleman that it does require a great amount of skilled labor, but it developed before our committee that they had taken steps to drill men who are not skilled. To-day they have a school for that purpose where they take the unskilled mechanic and train him to take the place in the shipyard of a skilled workman as the building program develops.

Mr. FESS. I understood that the Vocational Education Board had been asked by the Emergency Building Corporation to assist them in this particular, but I did not know whether it was in action.

Mr. PRICE. It is in effect. Now, as I say, at Sparrows Point we could employ 7,000 men instead of 3,500 men, but there is no place for the men or their families to live, and the transportation facilities have been developed about to the point where they can be developed.

It is also stated in the testimony, in respect to this one particular case, that if these 3,500 other men can be employed at Sparrows Point it will mean an additional tonnage of 75,000 this year. In other words, by building these houses at this one shipyard we will be able to increase the tonnage for our transport service 75,000 a year. You gentlemen realize, as we all do, that that is important, and that the housing project is at the very foundation of our success in building ships, and unless we provide it we perhaps will fall very far short of what we should. The question has been raised here about contracts. I want to say to you, gentlemen, that this is a matter that requires haste, and we all know, as business men, that whenever we are called upon to perform a task in a hurry it costs more money; but do we stop? It is not a question of spending a few thousand dollars, more or less. That is not the question at issue to-day in America. The question at issue to-day in this country is to win this war, regardless of cost, and we should not stop to haggle about it or to amend this bill in any respect that will hamper us in carrying out the purposes for which it is intended.

It is contended and has been stated that the Secretary of War the other day made a very exaggerated statement which the facts did not justify—and his statements have been attacked in Congress—when he stated that we could transport a million men to France this year. The facts are developing and have developed that the Secretary of War knew what he was talking about. To-day we learn that we are adding to our transport service and find that we have acquired German ships interned in Peruvian ports, some 40,000 or 50,000 tons. It has also developed that the Secretary of War knew what he was talking about in that we are utilizing ships furnished by our allies, and it has been necessary that this statement be given out to the country in order that the people may realize that they are not being deceived. To-day the best talent in the country and in the countries of our allies is being utilized to round up the interned German ships all over the world.

We learn that France, one of our allies, has just completed negotiations by which 110,000 tons of German interned ships in Brazil have been added to the allied transport service.

We learn further that our ally, Japan, is relied upon to furnish a million tons additional for transport service in the Atlantic. There are in Chilean ports 165,000 and in Spanish ports 200,000 tons of interned German shipping, which no doubt will eventually be added to our merchant fleet. Besides, there are 500,000 tons of Dutch shipping which has been tied up in American ports which is to be released for our use.

These prospects, added to the two and one-half millions of tonnage now in the transport service, with the assurance by the Shipping Board of from three to five millions new tonnage this year, amply justified the Secretary of War in making the statement that we could place a million men in France in 1918.

It is time to stop faultfinding and expend our energies in winning the war, and we will win it. We must win it. We will win it with ships, and Germany will find that this great, resourceful Nation will put their submarines out of business in one way or another. If we can not eliminate them entirely, we will build or acquire more ships than she can sink. We shall not only transport our men, but we shall supply them and win this war for the freedom of mankind everywhere.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

By unanimous consent, Mr. PRICE was granted leave to extend his remarks in the RECORD.

Mr. GREENE of Massachusetts. Mr. Chairman, I yield 10 minutes to the gentleman from New Jersey [Mr. LEHLBACH].

Mr. LEHLBACH. Mr. Chairman, when the industrial expansion in certain directions necessary for the mobilization of our resources for the war activities was under way, it soon became apparent that the question of housing presented a serious problem and would necessarily engage the attention of the war-making machine. The first study on this subject was given by the committee on labor of the advisory Council of National Defense. That committee created a subcommittee on this subject, the chairman of which was Mr. Eidlitz. This subcommittee gathered information from all possible sources and also examined into the experience that England has had on the question of housing. Since the war has began it is a fact that England has actually expended up to the present time on housing for labor engaged in war industries $700,000,000, and at the present time there is under consideration a budget for that purpose amounting to $1,200,000,000, so that in a short time England

will have expended on housing the sum of about $2,000,000,000. No suggestion of housing on such a scale is made by anyone in this country, and I merely refer to it to show that the problem is a real one and is intimately associated with the successful development of our resources and the successful prosecution of the war. After the Eidlitz commission had gathered the material and made investigations and were ready to submit suggestions, it was determined that this subject might be handled by the Department of Labor, under the Secretary of Labor, and the War Labor Board which was created, of which Mr. John Lind is chairman, was given jurisdiction over the subject. They took the data that was gathered by the Eidlitz commission and proceeded to follow and supplement the investigations and the facts ascertained by that commission. In the meantime lack of housing in the shipbuilding activities, and specifically in several of the shipyards on the Atlantic coast, became pressing, and in the Emergency Fleet Corporation was created a department, of which Mr. J. Rogers Flannery was placed in charge, his title being director of housing, and that department in part using the information gathered by the Eidlitz commission and also the information supplementary to the Eidlitz activity gathered by the War Labor Board, after study of conditions in specific yards, came to the conclusion that immediate relief was necessary. They caused this bill to be drafted and introduced. The bill has been passed by the Senate and is now reported from the committee here. They contemplate solely to take care of the housing proposition as it relates to laborers in the shipyards constructing ships for the Government. They contemplate immediately to avail themselves of the powers granted by this bill at three yards—Sparrows Point, which has been spoken of, Hog Island, and Newport News.

Mr. WALSH. Did I understand the gentleman to include Hog Island in the three yards mentioned?

Mr. LEHLBACH. Yes.

Mr. WALSH. That is the yard in Philadelphia?

Mr. LEHLBACH. It is 9 miles below Philadelphia. That is the yard of the International Shipbuilding Corporation.

Mr. EDMONDS. That is in Delaware County, Pa., not in Philadelphia.

Mr. LEHLBACH. Yes; I said it was 9 miles below Philadelphia. In dealing with the question of housing generally it has occurred to me that where there are several governmental activities at the same point, including shipbuilding, the question of the necessity for and affording facilities for housing should not be dealt with by each department separately, but should be dealt with by the Government through cooperation of the various departments. In order to illustrate this general proposition, I would like to advert to the conditions in the city of Newark, which in part I have the honor to represent. They have there the Submarine Boat Corporation, which is constructing under contract fabricated ships. There are at present employed there about 2,500 men. When this plant is working to capacity Admiral Bowles states that he expects there will be employed about 15,000 men. Contiguous to the shipyard is a tract of land taken by the War Department, where there is being developed a quartermaster base for trans-Atlantic shipments. A good part of all the goods necessary for the support of the expeditionary forces in France is to be gathered there and shipped from there to Europe. When the warehouses and the necessary facilities are complete, it is estimated that possibly in the neighborhood of 30,000 men will be employed there, making in these two plants side by side in the neighborhood of 40,000 to 50,000 people employed directly on Government work. Now the city of Newark is absolutely without the facility to absorb the increase of labor to that extent. The housing question must be met, and necessarily must be met in a measure by the Government. The people of the city of Newark are willing to the extent of their ability to cooperate. This bill, of course, is simply for the Emergency Fleet Corporation and that corporation in the initial activities which it will be empowered to undertake intends only to take care of shipbuilders——

Mr. WALSH. Will the gentleman yield?

Mr. LEHLBACH. I will.

Mr. WALSH. How much is the city of Newark willing to contribute in dollars and cents toward this project by way of cooperation?

Mr. LEHLBACH. The people of the city of Newark?

Mr. WALSH. Yes.

Mr. LEHLBACH. I understand a suggestion has been made that there will be no trouble at all as a starter of raising a million and a half dollars in the city of Newark among the private individuals and business houses, and what we want and what ought to be done when a condition similar to this is met anywhere in this country is not for the Emergency Fleet Corporation to proceed independently and provide for housing under a plan of its own for its immediate employees, and to have the Army under the Quartermaster's Department take steps for the housing of 30,000 or whatever number it may be of those employed in its activities and to have the various concerns that are under the supervision of the Government on war contracts independently to take care of the housing of their employees, but a proposition like this in a community like this ought to be treated as an entirety, and there ought to be cooperation between the Army, the Emergency Fleet Corporation, the board of trade or other agency through which public-spirited men, manufacturers, and men of finance may act in dealing with the question.

Mr. MADDEN. Will the gentleman yield?

Mr. LEHLBACH. I will.

Mr. MADDEN. The gentleman's idea is that this bill should be so amended as to make it a general housing proposition, and then allow the various departments to go to the Committee on Appropriations and get such appropriations as may be authorized under this bill for the activities in cooperation one with the other?

Mr. LEHLBACH. No; I would not amend this bill at all. I think the bill in its terms is broad enough to allow the Emergency Fleet Corporation to cooperate with any other department of the Government, or any private agency in dealing with the housing problem, and I think the bill ought to be passed because it has passed the Senate and will speedily, if passed here, become a law, and operations under it where they are of an extreme emergency character can be begun. But I think housing activities ought not to cease with this bill. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. LEHLBACH. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey? [After a pause.] The Chair hears none.

Mr. GREENE of Massachusetts. Mr. Chairman, I yield 11 minutes to the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE of Pennsylvania. Mr. Chairman, it is my present intention to offer an amendment to this bill when the proper time arrives, the effect of which amendment would be to limit the percentage paid to contractors or subcontractors to whom any part of the work may be awarded. The expenditure of $50,000,000 even in war times is no small matter, and great waste can follow the expenditure of so vast a sum. While we make an exception in the matter of limitations on expenditures in war times, we should not, in my judgment, permit contracts to be so made as to encourage profiteering. If there are times when men should be patriotic and work at a reasonable figure for their Government it is when the country is in the throes of war and when it needs the assistance of its patriotic citizens. Some reference has been made to Hog Island during this discussion, and I am rather glad it has been. There is no question but that the site called Hog Island is a good site for a shipyard. It is located conveniently below the city of Philadelphia, very close to Fort Mifflin, and has deep water to the sea on the Delaware River. It is within easy access of the great fuel fields of Pennsylvania and the labor and material markets. It is located where everything conduces to the business of the shipbuilder. The Delaware River with its independent shipyards, prior to the outbreak of the war and since their having been commandeered by the Government, provided the largest shipbuilding activities in the United States. Since the Government has introduced new operations along the Delaware River it has become not only the greatest shipbuilding center in the United States but probably in the world. I question whether the Clyde to-day stands on a par with the Delaware River, so far as future prospects in shipbuilding are concerned. With such a record, no patriotic citizen of Philadelphia or Pennsylvania or of the States of New Jersey or Delaware, bordering on the Delaware River, would hesitate for one moment to put his stamp of disapproval upon waste and extravagance of Government money along the Delaware River in war time, no matter by whose authority that waste and extravagance had occurred. Much has been said before this about the manner in which the men who are supposed to "know how" to speed up shipbuilding operations have performed their work on contracts coming from the Shipping Board or the Emergency Fleet Corporation. There have been grievous complaints about the manner in which the work has been done. What we wanted was ships, but they speeded up in the matter of congestion of men and material, and they seem to have speeded up in the matter of the expenditure of extravagant sums of the Government's money. We want a great shipyard at this point, and my judgment is that, properly conducted under Admiral Bowles or any other efficient, honest manager, it will

be what we predict for it—the greatest shipyard in the United States. I am hopeful that the Shipping Board, no matter what has happened heretofore, is now putting itself in position to bring order out of chaos and establish at this point a yard of which the Government will be proud.

I intend, as I say, to offer an amendment to this bill to limit, if possible, the impediments to speed in construction that seem to have halted our operations thus far. Indeed, I wish such an amendment might be offered to other bills for the construction of cantonments and other great Government works where, with all allowances for the haste we desire, some extravagance has undoubtedly occurred. Men are prone to excuse extravagance and waste, and even graft in war times, for the sake of obtaining speed, but it is not the business of the legislature to atone or apologize for any one of these offenses. The legislator ought to put himself in position to hold up the department and make the department hold up the operator, manager, or contractor under its direction, to do the right and the honest thing. We can not as Members of the great National Legislature afford to stand for dishonesty or graft, even in war. Now, one of the troubles at this particular point was this: That the "men who knew how," and who got their contract from the Shipping Board, which had confidence in them evidently, was that they packed up everything, men and material, at this point, so as to impede their own progress. They helped to disorganize industries throughout the city of Philadelphia by offering unheard-of wages to all sorts of men and mechanics, drawing them from the legitimate industries and embarrassing existing plants that were also working on war orders. The effect upon other shipyards was to delay their operations and postpone construction. Instead of having a stabilizing influence on industries generally, they upset their own calculations and those of other concerns expected to cooperate with them. That is one point. Another point was this: They piled up lumber and material about that yard to such an extent that before the great freeze came there were hundreds, if not thousands, of cars on the tracks waiting to unload that did not unload. I had many complaints as to this. One of them went to the Shipping Board so long ago as November 27 concerning shipments of lumber that could not get through to legitimate purchasers beyond Hog Island, in Philadelphia and elsewhere, because the cars blocked the tracks, or in other instances could not be had to carry that lumber. The result was that when the freeze did come, and the demand arose all over the country for coal and for cars to carry coal, many of them stood upon the tracks at this point laden with lumber. The contractors—these men who "knew how," these men who were supposed to be efficient and drawing large salaries—apparently did not want to unload them.

Why? One of my correspondents tells me that he brought it to the attention of the Shipping Board that the demurrage on these cars standing on the tracks idle for weeks, and some of them for months, was charged up into the general contract price and included in the 10 per cent plus paid. So there was a premium, if that was true, upon the culpability of the contractor. The more he spent the more he wasted; the more extravagent he was, the more the Government paid him for that kind of service. That is the evil of the contract plus system.

I do not stand for crooks, whether they come from my city or your city, from my State or your State. I do not stand enthusiastically for the patriotism of the profiteer who takes advantage of the stress of his Government. I do not believe that you do, or that the Shipping Board does, or that any department in Washington wants to do so. But it seems to me proper to call attention to some of these things and to say that we can locate a little of the trouble for the coal shortage at the homes where the people have been freezing through two or three months past. We can locate a little of this responsibility for this extravagance, and perhaps we can trace some of it back to the law that Congress itself passed when it gave a vast sum of money in a lump to the Shipping Board and through it to the Emergency Fleet Corporation, and through it to certain building corporations, who eventually could pay exactly what they pleased to material men, to landowners, to workmen, to managers, and to advertising agents, and others, in such a way that the largest amount of money might be spent to obtain the largest possible commission. We ought to regulate that now if we can.

Gentlemen, this unlimited-expenditure method is a thing that Congress ought not to stand for. Neither the Senate nor the House should permit a bill to go through that will admit of conditions like those described. If departments be blind, due to an excess of patriotism and ardor in time of war, Congress at least should be careful.

The amendment I shall offer at the proper time will seek to limit the commissions paid to contractors and subcontractors to, say, 5 per cent on the direct cost of the work they shall do. I am not wedded to any particular figure, however. Let them bid in any way the department sees fit to have them bid, but let them fix a price for their work and let their commission be fixed upon that price. Let us have something better and fairer than the present system which holds up cars, increases congestion, involves demurrage, checks speed, and disorganizes other factories. Let those who go into this housing proposition understand that they will be fairly treated but that the Government is amply protected. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. ALEXANDER. Mr. Chairman, I yield 10 minutes to the gentleman from Maryland [Mr. LINTHICUM].

Mr. LINTHICUM. Mr. Chairman, it would have done the hearts of the Members of this House good to have seen, in Baltimore, Saturday last, thousands of shipbuilders from one of our shipyards parading through the streets of our city. They were a splendid lot of men, thoroughly trained and efficient in their work. Many of them have been trained for this work only since the war began, and are among the best shipbuilders which we now have.

Baltimore is doing everything within its power to meet this great emergency. Shipyards have sprung up in various sections, and at Sparrows Point the Bethlehem Steel Co. is spending millions of dollars in order to meet the demands of the Government. The housing question has been extremely severe in my city. We must realize that in addition to the great shipyards long ago established there has sprung up many others. Then there is the great Camp Meade, within 17 miles of the city, which occasions many people coming to our town to enter into business, and to do business with the camp.

Then there is the great Ordnance Department which has been established in that section known as Curtis Creek. Some 900 acres of land have been secured there, and on this tract immense buildings of concrete are being erected, which will require a large amount of labor.

Then there is Aberdeen, the great proving ground, on the Susquehanna and Chesapeake Bay. On certain mornings I have seen as many as 2,000 men leaving the city of Baltimore to go to that camp at Aberdeen. Then in addition to that there are the great repair shops at Canton, on Colgate Creek, just outside of the city limits. They are expending large sums of money to construct those repair shops, which are to employ two or three thousand men, where automobiles are to be assembled and shipped abroad and where repairs to machines are to be made.

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Maryland yield to the gentleman from Missouri?

Mr. LINTHICUM. Oh, let me finish these matters, and then I will be glad to answer questions. Then we have a depot for the Quartermaster General, where we gather the things to ship abroad to supply our troops. In addition to that we have Fort McHenry; and I want to say to this committee in reference to Fort McHenry, that that plant has been rapidly developed into a great hospital, and the identical buildings which this Congress was so good as to appropriate for are now completed, constituting a magnificent set of immigration buildings, and they are completed at the very time when we absolutely need them. They are now being converted into hospitals, and will accommodate some thousand beds when they are completed. They constitute a group of splendid buildings ready for occupancy at the very moment they are most needed. It seems almost as though we were looking into the future when we appropriated for those buildings.

Now, Mr. Chairman, I do not want to take up too much time on this subject, but——

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Maryland yield to the gentleman from Missouri?

Mr. LINTHICUM. I yield to the gentleman.

Mr. BORLAND. I am glad the gentleman has completed the enumeration of the activities centered at Baltimore. I want to ask him whether he does not think entirely too many of these activities have been centered in these eastern cities, causing this congestion of freight and labor and this shortage?

Mr. LINTHICUM. It is absolutely necessary to concentrate a large part of these things about the ports of the country. I have repeatedly tried to call attention to that and to the fact that the Atlantic ports furnish the gateways to the world.

Mr. BORLAND. Only about half of them are necessary at the seaboard.

Mr. LINTHICUM. That may be the gentleman's opinion. What we want is to get these things as near to the shipping point as possible, and the ports along the Atlantic seaboard are absolutely necessary for that purpose.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. LINTHICUM. Certainly.

Mr. MADDEN. I was going to suggest to the gentleman that if the location of these factories had been distributed throughout the country the congestion would not have taken place and the assembled products could have been shipped to the ports for transportation to Europe just as easily as before.

Mr. LINTHICUM. I think that question has been abundantly answered by the experience of great business concerns of this country, that it is easier to ship parts, and that you can ship them more cheaply and better and more of them than by sending them to the point where you want them and there assembling the parts. The Ford industry is establishing assembling plants throughout this country. Does the gentleman think they would do that if they could do it cheaper otherwise?

Mr. MADDEN. They are not all assembled in Baltimore?

Mr. LINTHICUM. No; I assume they have established one for Chicago.

Mr. MADDEN. We would not then have to provide for housing. If they are distributed all over the country the cities could provide for the housing of the necessary workmen themselves.

Mr. LINTHICUM. You could not distribute the employees of the Bethlehem Steel Co.; that is the place where they need this housing. We could easily give work for 7,000 employees at those works alone. We are taking care of men there, but in order to do the work it is necessary to have the homes to bring these people to. I think we ought to provide at Sparrows Point just as substantial homes as practicable, homes that will last, because Sparrows Point is constantly growing, and has been growing for years. I have no doubt if the Government will put up the proper homes, economical and useful homes, at that point it can dispose of them, if need be, without the loss of much money, or with the loss of only very little money.

The reason why private building enterprise of consequence has not been going on in Baltimore is the fact that private builders can not get workmen and material. Private building has dropped off almost entirely on that account. The Government commandeers materials. It is on that account that private individuals did not build the necessary homes to house these workmen. Some people have attempted to build homes, and it has really almost worn them out to get the labor and material. When you go to the man who has contracted to furnish it he will say, "Yes; I had the lumber, but the Government came along and commandeered it, and you will have to wait." That is the case all along the line. Private builders can not get the workmen or the material, and the only thing that can be done is for the Government itself to take it up and do it.

Now, there is another point I want to take up. I notice that the press speaks of the fact that only 50 or 60 per cent of time is being secured from the workmen as a whole. That is partly because the laborers have not homes to live in. They are moved about from one point to another instead of being located at some particular plant. Some of it, I presume, is because some men are not working full time. Some men perhaps realize that they can live on three or four days' salary for a week, and such men do not put in full time. I think there ought to be a movement in this country which would impress upon the men who are not doing full work the folly of such conduct. They should understand that they are depriving the Government just as much by not giving it the proper amount of labor as the man who refuses to pay his portion of taxes for the support of the war; that a man who will not furnish the full amount of labor that he ought to furnish when the Government needs it so badly is injuring his country and injuring his neighbor just as much as the man who refuses to pay the full taxes. I think there are lots of people in this country who are not putting in full time, who are working perhaps only three or four days a week, who do not realize that they are doing wrong. They seem to think it affects only themselves. There ought to be some movement on foot to let every man know that this is a time when every hour of a workingman's day is needed and every full day's work is sorely needed, and that he ought to perform it in the discharge of his duty, not only to himself but to the country.

Many feel that when they have earned sufficient to live upon whether or not they work is a matter of their own concern and does not affect the Government. We should bring to the attention of all our people that the man who does not put forth every effort and give the proper week's work toward the production of this country is doing the same harm as the man who, having money, refuses to pay his taxes for the support of the Government enterprises.

Our people want to do the right thing. They want to give this Government every facility for the winning of this war, and I am sure that if we but bring it to their attention every effort will be put forth not only in the payment of taxes and in the production of food, but in giving full labor time, which are all essential elements to success.

The man who is physically and mentally capable of performing work is laying down on the job when he does not give a full week's work to whatever enterprise he is engaged in. The man who loafs is just as much a slacker as the man who does not perform his duty in the Army when called. He is just as much robbing the Government in this great crisis as the man who neglects or refuses to pay his proper proportion of taxes.

I want to see every man capable of doing good work, rich or poor, perform his part of the task of winning this war. The great artisans and laborers of our country, those who realize the responsibility resting upon them, are performing a full day's work and a full week's work, while some of our people, not realizing this situation and having sufficient upon which to live, are not performing their part. All must work and every man must be shown his duty in this great conflict.

Scripture tells us that "He who is not with us is against us" and "He who gathereth not with me scattereth." The man who is not performing his work when he is able to do it and is consuming the food of the country during his inactivity is not only not with us but he is against us in that he consumes that to which workers are entitled and which our allies so badly need.

Now, Mr. Chairman, in conclusion I want to say I sincerely hope this bill will pass. It ought to pass unanimously. I want to see these activities taken care of. But there are other governmental activities which also ought to be taken care of, and which certainly will have to come before us, because they have not the housing accommodations, and I am very sorry that this bill does not embrace all Government enterprises. I believe it ought to be done, and I am sure it eventually will be done.

Mr. FESS. Will the gentleman yield for one question?

Mr. LINTHICUM. Certainly.

Mr. FESS. Referring to the problem of labor, would it be at all feasible to employ conscription to secure labor in Government munition plants or in shipbuilding plants?

Mr. LINTHICUM. It might be; but I do not believe we ought to be compelled to resort to conscription for this purpose. I believe that when the laboring man is once brought to know that when he does not perform a full week's work he is depriving the Government of something it is entitled to just as much as the man who does not pay his proper taxes, he will perform the labor that he ought to perform. The whole trouble is that many men of this country do not realize it. It is a new doctrine. There are so many new doctrines and responsibilities continually arising that it is difficult to keep abreast with them.

Mr. ALEXANDER. I yield one minute to the gentleman from Washington [Mr. MILLER].

Mr. MILLER of Washington. Mr. Chairman and gentlemen of the House, the housing of men employed in the shipyards is a question that is not only very pressing in the East but it is also pressing in the West. It may be comforting to some of the Members of the House to know that the first ship completed for the Emergency Shipping Corporation was completed in the city of Seattle, in the far Northwest. We have in our city many, many thousands of men working in the shipyards, and we turned out a vessel for the United States Emergency Fleet Corporation in 5 months and 15 days from the time her keel was laid. I understand she is an 8,800-ton ship. I show to the members of the committee a photograph of the first ship turned out for the American Emergency Fleet Corporation, the steamer *City of Seattle*, which sailed on her initial liberty voyage on January 14, 1918. [Applause.]

Mr. ALEXANDER. I yield two minutes to the gentleman from Maine [Mr. WHITE].

Mr. WHITE of Maine. Mr. Chairman, I have a very keen appreciation that the discussion which has preceded has left very little of information to be imparted to the House on this question, and I take the floor chiefly to give further evidence of the unanimity with which this measure is supported by the members of the committee, and very briefly to summarize the considerations which lead me personally to approve of it. It seems to me that the justification, the compelling necessity, for this legislation is based upon two or three propositions. First is the need for ships. The call for tonnage to supply the men now across the water and for increasing tonnage for those who must go is persistent and insistent. Men, munitions, food, and clothes call in imperative tones for the exercise of American ingenuity and of every energy for the production of our ships. The duty is clear, and we must meet it as best we can.

The next proposition is that we must supplement the force of men now employed in our shipyards and increase the efficiency of that working force. There are some aspects of the situation which are disquieting. It appears that at the present time, or as of the 1st of January, we had approximately 180,000 men

employed in our shipyards, with the need for at least 300,000 men. It appears, too, that of the shipyards now at work 10 to 15 per cent are not working at their present capacity, and of more sinister significance is the fact that the present capacity of these yards is less than 50 per cent of their ultimate and contemplated production. We learn, too, that the turnover of labor is appalling, the average in the shipyards engaged in Government work reaching 600 per cent, a condition bespeaking industrial chaos and enormously impaired production, and for which lack of adequate housing and inviting surroundings is in no small degree responsible. It is this need of ships, a recognition of the unsatisfactory conditions in our shipyards, and the hope that this legislation will tend to stabilize, encourage, and inspire labor that lead me to give my cordial support to this measure and to express the hope of its speedy passage by the House.

Mr. ALEXANDER. I yield to the gentleman from Alabama [Mr. BANKHEAD] five minutes.

Mr. BANKHEAD. Mr. Chairman, in the early course of the debate the gentleman from Massachusetts [Mr. GILLETT] submitted an inquiry to the chairman of the committee [Mr. ALEXANDER] as to the necessity for this specific piece of legislation. He seemed to assume that if the amount of money required were appropriated under the provisions of existing law the Shipping Board would have authority of law to carry out the purpose vested by this bill.

The counsel for the Emergency Fleet Corporation, when he was before the committee, stated that one of the reasons why he was anxious to secure the enactment of this bill was to clear up that question of the specific authority. Another object in the passage of the bill is to suspend the existing law with reference to the requirement that in making appropriations of public money it shall not be expended until the written opinion of the Attorney General shall be had in favor of the validity of the title of land acquired. One of the provisions of this act suspends that feature. Another matter desired is to grant authority to requisition lands and houses, which is not conferred by existing law.

But, Mr. Chairman, the main purpose of my asking the courtesy of a few minutes was to read into the RECORD a part of the hearings before the committee, the statement of the counsel for the Shipping Board with reference to the minutiæ of the operations by which this money would actually be expended, because I think probably it will be instructive and illuminating to the committee. He stated:

If I may describe now, gentlemen, the transaction we propose to use. In these cases where we lend the money the shipbuilding company will form a separate small company, the stock of which will be owned entirely by the shipbuilding company, and it will acquire the title, free and clear, to certain land that is suitable. In some cases the shipbuilding companies now own the land. The reason for having a separate company is one of convenience in keeping accounts, and it also has to do with a refusal on the part of the companies to make a corporate mortgage which would obligate the company and all its assets for the repayment of the loan. They take the position that they would not build houses at this time because of the expensive cost, the high price of labor, and the difficulty of getting materials, so that they are insisting upon having these separate companies.

Of course, our first direction to them is that they shall not make any money out of this housing business, and we shall use all of our ingenuities to see that they do not make any money out of this housing business, because this is a war measure, and we are putting money in in an unusual way, and we want to provide houses for these employees and not for the profit of any land-development company. There will be no salaried officers nor directors; there will be no commissions allowed in any way. The shipbuilding company will be allowed to have a 6 per cent return on its actual investment at cost that they can show by an actual audit of their books to us, and that is all.

And then there are very interesting pay-off provisions of the mortgage that we will have. We propose to lend the money to these subsidiary companies at 4 per cent interest for 15 years, and, beginning with the fourth or fifth year, that they shall pay off 3 per cent on the principal. Now, bear in mind that it is a separate little company that is making this arrangement with us. We control the arrangement; we control the sale prices. We hope that all of these houses will be sold to the shipyard employees, and it is our intention to make the documents in such form as to facilitate sales. For instance, we mean to take a blanket mortgage for all of our advance, and that blanket mortgage will have a schedule of release values annexed to it, so as to each particular plot of land and house in that development there will be an ascribed value. We plan to replace that blanket mortgage if an employee comes along and wants to buy and to take a separate mortgage on that particular tract, so that that employee will get the benefit of a 4 per cent mortgage. He can not get it now at 6 or more per cent, and it will aid him to that extent in financing his own home. There will be practically a trivial amount of cash required for a man to acquire a house in any one of these developments, and we intend to see that they are sold off to employees just as fast as possible.

Mr. GREENE of Massachusetts. I yield 10 minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Chairman, in view of the disclosures that have recently appeared with reference to the contracts let by the Shipping Board at the Hog Island yard and some other shipping contracts I am sure that every Member of the House, including the members of the committee reporting this bill, feel reluctant to grant the power contained in this bill appropriating $50,000,000 for the purposes therein specified, practically without any restrictions. And yet we need ships. We need men to build them. We can not secure them unless we provide housing facilities for the men who are to build them. And I agree with the committee that it is not practical, probably, to provide any restrictions in this bill upon the expenditure of the money by the Shipping Board. But I believe, Mr. Chairman, that there ought to be some check not only upon the Shipping Board, but upon every other department of the Government, and I am hopeful that before we go on very much further we may have a general committee on expenditures to inquire into the expenditures that may be made under this bill and under other bills that we pass providing large appropriations.

With reference to the Hog Island yard, I have no hesitation in saying—and no man on either side of the aisle will deny—that if the committee on expenditures proposed last summer had been created millions of dollars would have been saved to the Government in the Hog Island yard. And not only would millions of dollars have been saved, but by this time keels for some ships would have been laid in the Hog Island yard where to-day there is not one.

I understand, as we all do, that the President objected to that committee because he thought it might be a reflection upon him. No one holds the President responsible for these almost criminal, or, if not criminal, reckless extravagances at Hog Island yard. The President of the United States can not be presumed to know all of these details. He is responsible for but one thing, and that is the appointment of the men who make these expenditures, and beyond that his responsibility can not go. It is no reflection upon the President that Congress is called upon to make appropriations to provide some means of investigation of how appropriations are expended by this board or by any other department of the Government.

The corporation having the contract for the Hog Island yard is to receive $6,000,000—for what? For furnishing, as they say, the "know how." In the testimony before the Senate investigating committee, the only "know how" that they have furnished the Government is knowing how to loot the Treasury, and they have been exceedingly successful in that.

Another phase of this matter which I wish to discuss is that housing facilities are necessary for shipyards, and not only for shipyards, but we will be called upon soon for housing facilities for many other plants of different kinds. This comes, in some part at least, by letting contracts—and I am not referring to shipyards, for I realize that they must be on the Atlantic and Pacific coasts and the Great Lakes—it is due to the fact that in letting the contracts no regard has been had in letting them as to the supply of labor in the vicinity of the plant where the contracts are to go. I hold in my hand a very interesting map, which gives the location of 2,381 firms that hold about 50,000 important war contracts. They are all congested in three or four States. [Exhibiting map.]

Is it any wonder, when you look at that map, that we have a congestion of transportation; that we have a congestion of labor and a failure of the coal supply? No contract involved the installation of any new plant, unless it be something in the nature of a shipyard, that must be on the coast, no new contract should be let in the future that would be located anywhere in this congested area. Everything in the way of a war contract that can be provided in the interior from this time on should be provided for in the interior. In that way we will solve in a large degree the question of transportation, we will solve in a large degree the question of labor. We have no shortage of labor in the interior. We have not labor enough in the States where congestion now exists, and the difficulty is going to increase day by day if the present policy is to be continued of centering war contracts in two or three States.

Mr. MADDEN. Will the gentleman yield?

Mr. LENROOT. Yes.

Mr. MADDEN. The map which the gentleman presents is very illuminating. Is it the intention of the gentleman to have the map published in the RECORD?

Mr. LENROOT. I should be glad to have it published if I could. It was prepared by the Department of Statistics for the Council of National Defense on the 17th day of last January.

Mr. MADDEN. Mr. Chairman, in view of the fact that the map tells the story as no speech can, a story that everybody ought to know, I ask unanimous consent that, in connection with the speech of the gentleman from Wisconsin, that the map be published in the RECORD.

Mr. GREEN of Iowa. I suggest that we have some rule in reference to the publication of such matters.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the map produced by the gentleman from Wisconsin may be published in the RECORD in connection with his speech. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object, I did not hear the gentleman as to the area this map covers.

Mr. LENROOT. The whole United States.

Mr. MOORE of Pennsylvania. And it shows the congested area.

Mr. LENROOT. It shows the location of each firm having a war contract.

Mr. MOORE of Pennsylvania. With all due respect to the gentleman from Illinois and the gentleman from Wisconsin, I think it would be absurd to provide for the building of ships in the interior of the country.

Mr. LENROOT. I stated specifically that I did not make any such contention. I excepted shipbuilding.

Mr. MOORE of Pennsylvania. We have the water on the coast. Why should not we give the work to firms who can build the ships where they can get them out?

Mr. STAFFORD. And we have mud flats, too.

Mr. MOORE of Pennsylvania. Yes; and some gentlemen would like to build them on the Rocky Mountains.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois to print this map in the RECORD in connection with the speech of the gentleman from Wisconsin? [After a pause.] The Chair hears none.

Mr. LENROOT. Mr. Chairman, I have only one thing to add, that in my opinion the letting of contracts in the future that involves the location of new plants, with the exception of ships, be placed in the interior, and if that is done it will help solve in part at least not only the question of transportation but the question of supply of labor as well.

Mr. COX. Will the gentleman yield?

Mr. LENROOT. Yes.

Mr. COX. The gentleman has hit the keynote of the whole situation. In central Indiana is the limestone belt of the United States. As the result of the failure to build buildings, the industry has practically gone to pieces. In one county in my district there are something like 7,000 skilled mechanics out of employment.

Machinery worth $20,000,000 is standing idle. The owners of these mills have come here and tried to get war contracts, but failed, although they offered to put in extra machinery. Men have their own houses and homes, there are splendid transportation facilities, but the men can not get a dollar's worth of these contracts.

Mr. LENROOT. The gentleman has correctly stated the situation. I think that in the letting of war contracts, no matter by what department it was let, there has not been given any consideration whatever to the supply of labor in the vicinity where the proposed contracts were to be fulfilled.

Mr. EDMONDS. I would like to ask the gentleman from Indiana, through the gentleman from Wisconsin, whether they have tried the bankers in New York?

Mr. COX. No; I do not know whether they have or not.

Mr. LENROOT. I believe that so far as Hog Island is concerned, the Shipping Board is now taking hold of that situation and are proceeding to clean it up as it ought to be cleaned up. The very fact that such a situation has existed, it seems to me, creates the necessity for the House of Representatives or Congress having some committee that will be able to assist not only the Congress and the public but these departments themselves in ferreting reckless extravagance such as has been practiced. [Applause.]

The map referred to in Mr. LENROOT's remarks follows:

Mr. ALEXANDER. Mr. Chairman, I will occupy only a moment or two in concluding the general debate. I am very glad the gentleman from Wisconsin [Mr. LENROOT] and the gentleman from Illinois [Mr. MADDEN] have emphasized a condition existing at this time that might have been obviated by a wider survey of the resources of the country; but the criticism does not apply to the Emergency Fleet Corporation, because we can not build ships in the inland section of the country. They must be constructed on the seacoast or on the large rivers contiguous to the seacoast. The problem before us we all seem to realize. The turnover in labor at this time is so great that unless it is stopped we can not hope to carry out our shipbuilding program. If we can provide convenient and comfortable homes in which the workingmen may live, we will not only largely stop that turnover in labor, but the tendency will be to stabilize the labor cost of construction in shipyards. Now, one yard is competing with another by promise of increased pay and, in some instances, better housing facilities, and men are traveling from yard to yard, and the result is immense waste in time and cost of production. Then, too, the labor of the country ought to understand the nature of this problem and the importance of every man working six days in a week and being willing to make some sacrifice in order that we may provide ships, because ships are the prime factor in winning the war. Hence, if the contractors and laborers in cooperation will take a more patriotic viewpoint and be willing to make sacrifices, we may hope to have this program speeded up.

I mentioned the Hog Island shipyard as an example of the waste and extravagance at this time, and I felt it was due to the Shipping Board and the Emergency Fleet Corporation to say that in the first instance this contract was framed by Gen. Goethals when he was the manager of the Emergency Fleet Corporation. Later it came under the jurisdiction of and was revised by Rear Admiral Capps. Every effort was made to so frame that contract as to safeguard the interests of the Government, and when this great contract was let to the American International Corporation, composed as that corporation is of some of the most distinguished men in the country, great financiers, represented in every branch of industry, the board had reason to believe that the contract would be carried out in good faith and that there would be a minimum of waste and extravagance. But waste and extravagance have crept in, and it is not too late for Mr. Frank A. Vanderlip and his associates on the American International Corporation to correct the abuses and save to the country many millions of dollars of waste that seems to be inevitable unless the correction be made. Their patriotism and fidelity to a great cause are challenged by the country, and I hope they will look into conditions, and I also hope that Stone & Webster, one of the greatest contracting firms in the United States, now doing work for the Government in this country and in France, will feel it their duty to scrutinize this work at Philadelphia and, in cooperation with Admiral Bowles, undertake to correct the existing evil and restore to the Government the money that has been squandered by the subsidiary corporation under which these activities are being carried on.

Mr. GILLETT. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. Yes.

Mr. GILLETT. The gentleman just spoke of Admiral Bowles. Is it true, as I have seen in the newspapers, that there has been a reorganization of the Shipping Board and that Admiral Bowles has been sent over to Philadelphia in charge of this particular work?

Mr. ALEXANDER. Yes; that is true. He has been placed in charge of that work, and he has taken up this pay roll at the Hog Island shipyard and undertaken to find out what men are necessary to the prosecution of that work and eliminate every unnecessary man.

Mr. EDMONDS. Admiral Bowles's headquarters are in Philadelphia, but he is going to take charge of all three Government yards—the one at Newark, the one at Bristol, and the one at Hog Island.

The CHAIRMAN. General debate is closed and under unanimous-consent agreement the House substitute for the Senate bill will be read by paragraphs for amendment under the five-minute rule as an original text. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the United States Shipping Board Emergency Fleet Corporation is hereby authorized and empowered within the limits of the amounts herein authorized—

Mr. BORLAND. Mr. Chairman, I move to strike out the last word. I was not able to secure a few minutes under the general debate to express an idea that I want to express about this bill. We may as well regard these $50,000,000 as a part of the investment in ships made necessary as a part of the cost of construction, although, of course, it is reasonable to suppose that there will be a large percentage of salvage from the sale of these houses either during the continuance of the war or afterwards. It really represents a construction camp very much as we had at Panama at the time of the building of the canal, when it was necessary to house about 37,000 men on the Zone to construct suitable quarters for them that were comfortable and clean and sanitary. That is practically the condition that we have confronting us here. This bill, of course, has received the unanimous report of the committee and will be passed with probably not a dissenting vote. It is true also that these ships must be constructed at the seaports or on the tidewater rivers, and the places where they are to be constructed are not subject to very much criticism. But if a general bill comes to this House providing for a general system of housing construction we will have a right to inquire why there is any congestion of labor or shortage of housing facilities at particular industrial centers. The whole Delaware River is lined with munition factories—a very good place, undoubtedly, from many standpoints.

But we must recollect when the officers of the Army were consulted as to the proposed location of Government munition plants and Government powder factories, it was their report that no such plant should be located except between the Alleghenies and the Rockies. They farmed off a zone adjacent to the seacoast which they call the danger zone in which they expressly recommended no munition plant should be placed. Now we find that most of the Government work of all kinds is being done east of the Alleghenies. Now, there has been not only a shortage of labor, there has been not only a shortage of housing, there has been a shortage of fuel, there has been a shortage of food, there has been a congestion of transportation. The element of all these shortages is due to the fact that transportation of fuel, raw material, and food must occur across the Allegheny Mountains. These plants must be supplied in many cases with fuel. They are drawing their labor, they are drawing their raw material, they are drawing their food supplies across the Allegheny Mountains. There is no occasion for that. I want to say that while this bill is absolutely necessary, and not only necessary but haste is imperative because we have already been at war nearly a year, we ought not and can not at this time take up the question of a general housing plan. When we take up the question of a general housing plan we ought to know that we are confronted with a condition of the temporary construction of camps. We are not confronted with that condition of congestion of labor in certain centers which could be and should be and can be avoided.

The CHAIRMAN. The time of the gentleman has expired. Without objection, the pro forma amendment is withdrawn.

Mr. SAUNDERS of Virginia. Mr. Chairman, I move to strike out the last word. Mr. Chairman, what the gentleman from Missouri [Mr. BORLAND] has said is in large part true, but the work contemplated to be done under this bill can not be considered as closely analogous to the Panama Canal construction. That construction was entered upon with full knowledge that there would not be much salvage from the enterprise. The main purpose of that enterprise was to build houses for temporary purposes, but this measure contemplates that in large measure the houses constructed will be permanently used by ship workers. These houses are to be built, or purchased with direct reference to the desires and tastes of the men who are to occupy them. Hence the construction contemplated will be permanent, in large measure, and not temporary, or makeshift. The bill makes every provision for the houses to be constructed in a style that will be acceptable to the men who will occupy them.

Mr. ROBBINS. Will the gentleman yield for a question?

Mr. SAUNDERS of Virginia. Certainly.

Mr. ROBBINS. How could these buildings be permanent when this great emergency exists to build ships and find houses for the men? Is not the very thing we have to do is to build houses quickly for the men in order that they may construct ships speedily?

Mr. SAUNDERS of Virginia. It is certainly true that in many instances these buildings will be acquired for the purpose of temporarily housing the workmen, but the expenditure of the fund proposed is not confined to a scheme of hasty construction. That is not the contemplation of the bill at all, and while in some instances it may be necessary to put up buildings of a temporary character, in other instances buildings are contemplated which, as I said a moment ago, will be of substantial and permanent character. I was just on the point of saying that every provision is made in this bill, to enable the Fleet Corporation to secure the Government against loss, whether it sells, or leases buildings to the shipyard employees.

Mr. BORLAND. Will the gentleman yield?

Mr. SAUNDERS of Virginia. Certainly.

Mr. BORLAND. The gentleman will recall I expressly said there would be a large measure of salvage. But is it not perfectly apparent that if there were private dwellings in existence that could be used by the workmen, or if there were demands for them at all, that demand for private dwellings would be met by private capital and there would be no need for this bill?

Mr. SAUNDERS of Virginia. No——

Mr. BORLAND. The very fact of the existence of this bill shows there is no demand at that particular place for permanent buildings.

Mr. SAUNDERS of Virginia. The gentleman loses sight of some of the essential facts of the situation. This bill gives the Government the power to commandeer. The individual workman has, of course, no such power. He is often confronted with a situation in which the extravagant demands of real estate speculators make it impossible for him either to buy or build. But the Government is not hampered by any such limitation. If in the neighborhood of the shipyards, or of the plants related to the shipyards, in the course of ship construction there are any buildings needed by the Government, it can lay its hands upon them. This bill empowers it to do so. In that way the Government can meet this emergency in a fashion beyond the power of the individual worker. This is the essential difference between the Government, and the individual, in the situation that confronts us.

Mr. STAFFORD. Mr Chairman, I move to strike out the last two words.

Mr. Chairman, I take it that what is more necessary than anything else in order to have ships is to corral the men from the various industrial centers of the country where there is labor that can be obtained and bring them to the Atlantic or the Pacific or Lake ports where there are ships to be built. If housing facilities do not exist, then it is necessary to provide houses for them under these pressing conditions, so that they will remain at employment. If this were only a project to provide permanent homes, private capital of its own motion would invest, because there would be families to purchase them, but there is something more desired by this bill to meet the conditions, as I view it, from the testimony and the arguments presented here.

Not only is it proposed to advance money to these large corporations engaged in building ships, like the Bethlehem Steel Co., as I have heard stated it is proposed to advance $5,000,000 for the purpose of building houses tributary to some shipbuilding plant, but it is also necessary, if we are going to house these thousands of workmen, who are only too willing to go to any place in the country, that there should be some kind of quarters arranged similar to those at Panama, which will be sanitary, where they will find accommodations, so that they will not quit their employment after arrival and launching on their work.

Laborers throughout the country are willing to leave their homes, but they are not willing to leave their homes and live in a condition of serfdom. And one of the two purposes of the bill, as I view it, is to enable the Shipping Board, either directly or through subsidiary corporations, to build temporary quarters similar to those at the Canal. Even if those buildings were destroyed after the emergency has passed, it would be a good investment, because we must have ships, and in order to have ships we must have housing accommodations.

Hog Island is only 9 miles from the City Hall of Philadelphia. Why, if the labor in Philadelphia was plentiful and adapted to build ships it would not be necessary to equip buildings tributary to Hog Island. In Detroit, for instance, some employees working at the Ford Motor Co. travel 10 to 12 miles daily to the plant at Highland Park. Dodge Bros. to-day are erecting, 7 miles from the center of Detroit, a $50,000,000 plant to manufacture munitions. Immediately there will arise a community there calling for housing and the like, but notwithstanding that the labor will be drawn from all over the city. The problem is transportation, and that is the problem in Philadelphia, provided adequate labor was there. If we are going to make these yards efficient it is necessary to erect quarters that, in some instances, will be temporary and salvaged after the emergency has passed.

There are two purposes, as I view the bill. One is to advance large sums of money to the private ship-contracting company for the building of houses, just as the War Department is advancing it, as in the case of Dodge Bros. and other people, for the erection of plants. Some has been advanced in my own city on the condition that after the emergency is passed the plant will be appraised and the appraised value will be taken over by the private concern.

The other purpose is that if need be, to erect temporary quarters so that the labor that comes from the interior, where it can be obtained, will remain and do the work necessary to build these ships.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE of Pennsylvania. Mr. Chairman, I rise to oppose the motion of the gentleman from Wisconsin.

It seems to me that gentlemen are quarreling with somebody a little higher up than anyone on this earth. Their quarrel is with the Almighty. It was the good Lord Himself who located the oceans and the rivers just as they are and who fixed the mountains in their proper places. He did not locate the Atlantic Ocean up along the boundary lines of Wisconsin. That is true. He put Wisconsin up against the Great Lakes, just as He put Illinois against the Great Lakes; and He also erected a few barriers between the Great Lakes and the Atlantic Ocean. He left it to human ingenuity and congressional appropriations to cut out a canal or two from the Great Lakes to the Atlantic Ocean, if ships are to be built so far inland as to be gotten out to the ocean to fight the battles of the United States upon the high seas.

Mr. LENROOT. If the gentleman stays here long enough, does he not think that we will get that canal?

Mr. MOORE of Pennsylvania. Yes. If the gentleman stays by me long enough, we will get a canal connecting Chicago with the Atlantic Ocean.

Mr. FOSS. I would like to ask the gentleman if the States were created before the Lakes? He said the Lord put the Great Lakes up against Wisconsin.

Mr. MOORE of Pennsylvania. The Lakes first, of course. If we would be wise, we would cut a waterway from Chicago to the ocean. Then we could build ships at Chicago.

Mr. MADDEN. Well, the only ship that has been built that has gone to sea, except the one referred to by the gentleman from Washington a few moments ago, was built in Chicago.

Mr. MOORE of Pennsylvania. What was the name of that ship?

Mr. MADDEN. She had a name given to her after she went to sea.

Mr. MOORE of Pennsylvania. What was the draft of the ship?

Mr. MADDEN. She was launched in October.

Mr. MOORE of Pennsylvania. I have asked for the name. I have asked for the draft, and I ask for the beam, but the gentleman does not know. I wish he would produce his witness.

Mr. MADDEN. Does the gentleman doubt my veracity? [Laughter.]

Mr. MOORE of Pennsylvania. Not at all. But I doubt if the gentleman is seamanlike enough to tell the length, the beam, and the draft of this ship.

Mr. MADDEN. I do not assume to be in the shipbuilding business. If I were, I would have to confess my ignorance.

Mr. MOORE of Pennsylvania. The gentleman's maritime information is not confined to the Hennepin Canal.

Mr. MADDEN. Or on account of the fog that is on the intercoastal canal.

Mr. LENROOT. I wish to say to the gentleman from Pennsylvania that we have sent three ships to the ocean, and one of them is the *War Chant*, which has a tonnage of 3,500.

Mr. MOORE of Pennsylvania. But you sent them through an English canal?

Mr. LENROOT. Yes.

Mr. MOORE of Pennsylvania. You sent them through the Welland Canal. You had no American canal, because appropriations have not been voted to create an American watercourse from the Great Lakes to the sea. I wish we had an American waterway. I want to get our ships out that way.

Gentlemen worry about the concentration of population in the East. There is the gentleman from Wisconsin [Mr. STAFFORD]. Like every other good thing, he began in the East. He settled there early. Every vestige of the gentleman's ancestry, to say nothing of his posterity, began in the East. He first saw the light of day there and then passed on west, finally locating in Wisconsin. The gentleman was educated in Philadelphia, along the gracefully sloping banks of the River Delaware. Why, then it was pristine territory, years and years and years ago; in fact, the memory of man runneth not to the contrary when the gentleman from Wisconsin was a resident of Philadelphia and studied law above the banks of the winding Schuylkill, which empties into the noble Delaware.

Mr. MADDEN. But he woke up and left. [Laughter.]

Mr. MOORE of Pennsylvania. Yes; he left, but he has been kicking ever since. The influence of the Delaware since then has grown; it has grown by leaps and bounds, due to the energy of the people living along its banks; it has grown until

Congress finally says, "This is our great commercial river; here shall we gather the men and the materials to build our ships, the ships that shall sustain us in war and the ships that shall carry our commerce in times of peace." That is a natural condition; you can not change it now. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

(b) To construct on such land houses and all other necessary or convenient facilities, upon such conditions and at such price as may be determined, and to sell, lease, or exchange such houses, land, and facilities upon such terms and conditions as it may determine.

Mr. LENROOT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin.

The Clerk read as follows:

Amendment offered by Mr. LENROOT: Page 4, line 6, after the word "land," insert the words "for the use of such employees."

Mr. LENROOT. Mr. Chairman, this paragraph that is now pending does not limit the construction of these houses to the use of the employees.

Mr. ALEXANDER. I have no objection to that amendment.

Mr. LENROOT. I was about to state why it is very necessary to make a limit. It is not at all certain, in my judgment, whether we have any right at all to acquire land for the purposes that are named in this bill. In other words, it is a question as to whether it is a public purpose to provide homes for employees of a private shipbuilding company over which the Government has not control, and in connection with which the Government has no relationship except a contractual relationship with the shipbuilding company. We certainly ought to remove any doubt from that question so far as it is possible to do so by making it clear throughout the bill that anything that is authorized in this bill is limited to the use of the employees, and then we shall have to take our chances on its final validity when it gets into the courts, if it ever does.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. FESS. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Ohio moves to strike out the last word.

Mr. FESS. Mr. Chairman, this delectable rivalry that we had awhile ago between the dwellers on the Great Lakes and those upon the seacoast led me to believe that there might be something in the bill that would forbid the construction of houses anywhere except on the Atlantic seacoast. I have not found that limitation here, and I have been wondering whether I overlooked it. I should think that a bill of this sort ought to permit the construction of the houses wherever the Emergency Fleet Corporation would decide the necessity of housing exists in the locality of a shipyard or where it proposes to build a shipyard.

Mr. SAUNDERS of Virginia. Mr. Chairman, will the gentleman yield?

Mr. FESS. I will.

Mr. SAUNDERS of Virginia. Look on page 6 for the definition of the word "shipyard." The gentleman will find something there broad enough for his widest desires in the respect indicated; a definition of the word "shipyard."

Mr. ROBBINS. Page 6, line 6.

Mr. FESS. I do not find any limitation whatever there.

Mr. SAUNDERS of Virginia. On page 6 in the definition of the word "shipyard," you will find nothing there that limits the activities of the shipyard. It is as wide as your widest aspirations.

Mr. FESS. That is what I thought.

But it was not on that point that I wanted to offer an observation. However, I would say that it would seem to me very wise to build these ships wherever they can be built, whether it be on an inland body of water or on a navigable stream with an outlet to the sea, or whether it would be on the chief bodies of water, because I do not understand that the size of the ship is limited to either a maximum or a minimum. We should build as rapidly as possible. In case the size or capacity of the outlet to the sea will not admit of a great vessel, let a smaller one be built if doing so will expedite the tonnage needs.

What I wanted, however, to say to the committee was in reference to the queries asked and answered a little earlier in the debate on the matter of extravagance. I do not think it is wise to allow the question of extravagance to stand in the way of construction if by so doing we defeat our purpose. I do not believe it is wise either to quibble over the amount to be paid for the raw material that goes into the vessel or the labor necessary to insure shipbuilding. Some time ago, in what now has become a historic controversy, we heard a great deal of discussion over the question whether we were not paying too much for this or that material. One figure in the controversy urged his justification of delay on the ground he had saved money. I think the business of first importance is to build the ships and to stop the quibbling in order that we can build them. By that I do not mean that there should not be common sense exercised, and of course there will be; but the one thing that concerns me is whether these numerous instances of such wretched extravagance as some of us have seen, which are said to be inevitable, can not be rectified or remedied? I mention this because it is creating a very bad spirit in the communities where it is carried on. For example, when we were trying to conserve and were urging the planting of every foot of ground to gardening, and especially to raise wheat, acres upon acres of growing wheat that would ripen very soon were destroyed by order of the authorities because it seemed to be in the way of doing a certain amount of Government work. The wheat was cut with a common mower, raked into windrows, and fire set to it in order to get it of the way for this particular work, when it would have been only a little while until it could have been harvested.

Mr. BORLAND. Would the gentleman mind telling us where that was and what was the Government work?

The CHAIRMAN (Mr. CRISP in the chair). The time of the gentleman has expired.

Mr. GILLETT. I ask that the gentleman's time be extended five minutes.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent that the time of the gentleman from Ohio be extended five minutes. Is there objection?

There was no objection.

Mr. FESS. It is not a secret matter and is not a case that stands alone. I refer specifically to the Wilber Wright Aviation Field in my district, 5 miles from my home, where every day for a good deal of the time I had opportunity to observe the work.

Mr. BORLAND. I will say to the gentleman that there are a great many places where aviation fields could be laid out where there is no wheat at all. There is no necessity for taking a wheat field for that purpose.

Mr. FESS. That does not answer the question at all. It does not explain what was done. The Wilbur Wright field is the finest in the country and no one can have any complaint of the field. Some may offer the explanation that it would not do to allow growing wheat to stand in the way of expeditious preparation for this aviation field, because aviation is so very important and time is so imperative that we must not lose a week or a day. We must go on with it even if it entails destruction of crops, and most of us sympathize with that proposition, and would not object if it was really necessary, but other items lead me to believe that sufficient caution against waste was never prudently exercised. I will refer to one item: The man who had charge of the agricultural products that they attempted to save there—and he was the mayor of the leading town near by, a high-minded and responsible man—told me, among many other things, that he had a large amount of straw baled, and he had it taken into the barns in order to keep it from destruction by exposure to the weather. One day he found a force of men at work loading up the straw in one of the barns and removing it to the outside. When he said, "I have given no orders for this," and wanted to know why it was done. He was told by one of the men that he had been ordered by the representative of the Government to do it. When he went to the representative of the Government, about all he could get in explanation was, "Well, we have these teams here and they must not be allowed to remain idle." I will let you draw your own conclusions. If it be necessary to keep the teams from being idle, to undo what before has been done and ought to have been done, there is something radically out of order, and the least one can believe is that it presents a very bad situation. This came from a very responsible man, who came over to me at my home and asked me if I would not lay the matter before the Secretary of War. This was but one item of many others mentioned by him in his evidence of needless wastefulness. Now, mark you, there can not be any politics in this, as is so frequently charged whenever anyone not of the President's party calls attention to these things, because my informant is the Democratic mayor of the town, and he wanted to stop that waste, and asked me, in the interest of the public good, if I would not lay it before the Secretary of War. See, he felt convinced that the Secretary did not know about it. I should, in fairness, say I asked him to make for me a memorandum that I might lay it in detail before the Secretary. That has not been done. What I have related is only one incident of what goes on in the way of extravagance in all the building work of the War Department. One of the evil results to follow is it produces such a very bad feeling among the people who witness it.

They demand to know why the Government permits a thing of this kind at the very moment when conservation against waste is our loudest war cry. On that field were hundreds of teams. Many of them could not be worked constantly and thereby prevent loss of labor. Men had finished a certain part of the aviation field—it was built in units, one group working as a group here and another there—and they were not needed longer. To keep them would be wasteful; to let them go would entail some derangement. The contractor generally would let them go. It was necessary for him to lay off men every day after a specific period, but at times was cautioned against it. He told me that he was told by a man in authority, "When you dismiss men hereafter I want you to consult me about it. I want this work to go on uninterrupted and the men should be kept here, so that when the work is done they can all be dismissed and the work turned over to the Government completed."

This naturally was and is the ambition of all responsible Government construction work. The trouble is apparent. These men want results, they want them quick, and the cost seems no element worth consideration. This is the crying danger of all government. It sees no need of economy. It rather chides him who cautions against extravagance. What does the expenditure of a few dollars amount to, anyway? This practice is general to-day and the exigencies of the war are offered as an excuse for it all.

In the case just cited the Government's representative wanted a completed work and the men should be retained until it was accomplished, notwithstanding, my friend said, that many of these people had done their work and there was nothing more for them to do.

Mr. COX. Was this work being performed on a 10 per cent basis?

Mr. FESS. Yes.

Mr. COX. Then that explains it—the more spent the more money for profit.

Mr. FESS. I ought to say that there was a limit in the contract of some of these Government contracts beyond and above which they could not go in the sum total.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FESS. I ask unanimous consent for one minute more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FESS. My concern is not hypercritical nor to say mischievous things. My concern is to find out whether there will not be some way that we can stop this palpable waste in order to avoid a very serious spirit being developed among our own people as to the wastefulness of Government procedure.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. FESS. Yes.

Mr. GREEN of Iowa. I will state that at the close of the bill I propose to offer an amendment protecting the contractor through advanced cost and at the same time put a premium not on extra expenditure but on saving instead of waste.

Mr. FESS. I am going to say this in conclusion, that while I opposed most seriously the bill creating the ship-purchasing corporation I opposed it on principle. I did not then, nor do I now, believe in Government ownership and operation if it could be done otherwise. I opposed it on principle, and yet this is war time and ships are the one great need. It is an emergency and this bill ought to be passed at once. The Government is the only agency by which it can be effectively done, and I shall support the bill on that basis. However, the Government should not deter the private yards from their utmost to assist in the program. I am not calling attention to these things other than as suggestions. If what I have seen, and what all of us know can be seen, in Government activities are to be the rule of Government ownership and operation, may God save this country from Government ownership and operation. [Applause.]

Mr. SAUNDERS of Virginia. Mr. Chairman, with reference to the remarks of the gentleman from Ohio I wish to say that whenever you give discretion, or confide large powers to any group of men you always take the chances of faulty administration. It is of course possible that in the administration of the great fund contemplated by this bill, that there may be a measure of waste. Both in the general debate, and later under the five-minute rule, suggestions have been made that something ought to be done to guard against the possibility of extravagance in the expenditure of the housing fund. The committee is ready and waiting to receive any suggestion, or consider any plan that will surround the expenditure of the vast sum proposed, with adequate safeguards against extravagance. The committee however realizes and the Members should realize that it is difficult to clothe an agent with large powers of discretion, for the purposes of securing speedy action, without incurring great danger that the powers confided will be abused. Under such circumstances there is always a chance, to use an old and homely phrase, that some one will fall down on the job.

Mr. FESS. Is there any way that these contracts might be let and be effectual other than on the additional per cent basis?

Mr. SAUNDERS of Virginia. I suppose there is.

Mr. FESS. Would not that be the best and the better way?

Mr. SAUNDERS of Virginia. If the gentleman thinks that some other and different way, than the plan proposed, will be a better way, then let him submit it in concrete form, and we can thrash it out. If the gentleman has anything better than what is proposed in the bill, the committee has an open mind.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. SAUNDERS of Virginia. Yes.

Mr. GREEN of Iowa. I will say to the gentleman that I have an amendment for that purpose which I think belongs more properly at the conclusion of the bill, where certain restrictions are placed on the operations of the board. My amendment will be in substance to this effect, that whenever any contract is let on the basis of compensation for the contractor, the cost to him, the compensation shall not exceed 105 per cent of that cost, unless there is also a provision that as the cost increases the percentage of profit shall decrease.

That is not stating it as well as I hope it is in the amendment, but this would permit him to have a higher percentage the lower he kept the cost down, and as he increased the cost beyond a reasonable amount, to be agreed on in the first instance, his percentage would decrease.

Mr. SAUNDERS of Virginia. I will say that under conditions, in order to secure speedy action, it is inevitable that chances of wasteful, even at times, prodigal expenditure, must be taken. Speed of execution, is of the essence in the work at home, as it always is in the theater of active hostilities. Given more time, and greater economies can be effected, but in many instances the work to be done is a hurry order. It is for the committee to determine whether, in the interests of a more economical administration, we will surround the discretion of the board with the safeguards which may indeed secure economy, but secure it by deferring the results sought to be secured. Of course in theory we are all agreed in our desire to see the largest measure of results secured in the most economical fashion, in the shortest span of time. Now what is the plan by which all of these desirable ends may be most efficiently secured?

Mr. STAFFORD. Mr. Chairman, I move to strike out the last three words. I wish to direct an inquiry to the chairman of the committee as to the reason for the committee placing authority in the board to exchange these houses that are to be built in addition to the authority for selling and leasing them?

Mr. ALEXANDER. Mr. Chairman, in framing the bill the committee undertook to do so in a way that would give the Emergency Fleet Corporation the same power that an individual should have in order to successfully conduct any business, and it may be desirable at some of these plants to make these exchanges, either of land or of buildings. For that reason we framed the language broad enough to meet any possible condition that may arise. I have no case in mind, but they may arise.

Mr. STAFFORD. Is it the purpose to vest authority in the board to exchange buildings that are constructed by the board for outside property, flat buildings, or any character of property, improved or unimproved, under that authorization?

Mr. ALEXANDER. I do not know what the board will do, but I imagine they would have power to do that if it is desirable.

Mr. STAFFORD. I am only inquiring as to whether they should have that power.

Mr. ALEXANDER. I think they should.

Mr. STAFFORD. I do not wish to restrict them. I can see the need of delegating authority to sell and lease, but whether they should have the power to exchange is doubtful in my mind.

Mr. ALEXANDER. Here is a situation that occurred to me: Say they have built houses under the provisions of the bill, and they may have power to sell these houses to workmen with families. A workman has bought a house, we will say, and it may be that another house would suit him better. He may have a large family. It may be that the house that he occupies would suit another workman better. If we can fix it so that the exchange may be made and the workman satisfied, the corporation should have that power, I think.

Mr. GILLETT. Mr. Chairman, as to what the gentleman from Ohio [Mr. FESS] and the gentleman from Virginia [Mr. SAUNDERS] said, I wish to add a word. It seems to me that I can put my finger on one source of this extravagance which is complained of. It may be because I am rather a crank on the notion that Congress ought to keep its grip in some way on these expenditures, but my feeling is that one ground, and

one of the principal grounds for these expenses, is that the appropriations have been made in lump sums and not specifically, and so the board has absolute and uncontrolled authority to do as it pleases. In this bill, at the end, in the very last paragraph, there is an appropriation of $50,000,000 which goes to the Shipping Board. That, as I read it, is not an appropriation, but only an authorization, but it is an authorization to expend that money out of what they already have. They already have a lump sum of over a billion dollars, if I recollect rightly, at their absolute disposal; and that system, to my mind, inevitably leads to extravagance. The incident which the gentleman from Ohio cited in the aviation field was spent under the lump-sum appropriation of $640,000,000 which we give for aviation. I appreciate that in war times we can not proceed upon the same lines as we can in time of peace. It may be necessary for us, and I presume it has been in some cases, to give lump-sum appropriations, but we ought always to keep some congressional superintendence over their expenditure; and if we must give lump-sum appropriations, why should we not have a committee of Congress that would have some scrutiny of the expenditure?

Why was not the other side willing to have a committee on expenditure; not a partisan committee, but a committee that would keep some watch over appropriations. To my mind that is one of the fundamental troubles. There is no committee on expenditures that has any power over the Shipping Board. If they did not already have this large lump-sum appropriation I suppose that this authorization which is made here of $50,000,000 would not give them the money, and they would have to come before the Committee on Appropriations, and that committee would demand from them some schedule, some facts, some statement upon which they plan to act. Of course, the theory is that we get speed by giving them an unlimited appropriation, but in this instance five months have elapsed since the contract was made with this shipbuilding company at Hog Island, and now after five months they are just waking up to what ought to have been apparent then as a fundamental and primary essential, namely, a place where the workmen may live. And yet they have gone along for five months and now they are just awakening to the fact that they can have shipyards but they can not get any product from them until they get an additional appropriation. And it seems to me an essential, which might have accelerated work and would, at least, check extravagance, that Congress by some committee should keep some guard and control over the expenditure.

The CHAIRMAN. Without objection, the pro forma amendment will be considered as withdrawn.

Mr. ALEXANDER. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none. The Clerk will read.

The Clerk read as follows:

(c) To purchase, lease, requisition, or acquire by condemnation or otherwise any houses or other buildings, together with the land on which the same are erected, or any interest therein, and all necessary and proper fixtures and furnishings therefor; to manage, repair, sell, lease, or exchange such lands, houses, buildings, fixtures, and furnishings upon such terms and conditions as it may determine to carry out the purposes of this act.

Mr. ROBBINS. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I do this in order to answer the question of the gentleman from Virginia who I see has left the Chamber. He asked whether, Mr. Chairman, there was a better way to do this work than the method that is now adopted by the United States Government. Let me suggest that there are three well-known methods by which the large railroad corporations and large constructing corporations perform labor of the kind that is provided for in this bill; the first way is after due advertisement, giving the specifications of the work required—this method may not be applicable here where there is an emergency, although I think it can be used in most all of these contracts—and then to let the work by competitive bids to the lowest bidder who is equipped and experienced and capable of performing such work, and they pay him as the work proceeds, according to the amount of his bid, retaining 10 or 20 per cent as "retained percentage" until the contract is completed. That method has proven satisfactory in large contracts all over the world. The second method is what is known as the force method or "force account." There the railroad company or party desiring work done will pay to the contractor a certain amount or percentage on the wages of the employees, generally 5 per cent of the pay roll monthly. They will also pay in addition to such sum 10 or 15 per cent on the cost of equipment used in the work, which is the tools, shovels, horses, carts, steam shovels, engines, and whatever tools are used on the job, but the railroad company will keep on the job a timekeeper and checking clerk, or superintendent, and whenever a condition arises such as the gentleman from Ohio pointed out, as existed at the Wright Aviation Field out in the district that he represents, those men who finish their part of the work are immediately dismissed and there is no piling up of the pay roll by keeping idle men on the ground for the sake of increasing the percentage paid to the contractor. This is eliminated, safeguarded, and absolutely prevented. The third way in which great corporations and individuals also carry on their work, of course, is by their own employees under their own direction. Now, why does not the United States Government adopt one of those three methods which have worked so admirably with all the great railroads and all the great construction companies and large individual contractors in the United States? There is no reason why we do not do it, except the carelessness that has crept into our methods here, which has been criticized by the gentleman from Massachusetts, of appropriating lump sums and turning the money over to the contractor to be worked out in his own way and in his own time, without proper supervision upon the part of the United States Government. Let us adopt business methods about these things, and we will economize for the Government and bring about more efficient results. [Applause.]

Mr. LENROOT. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 4, line 12, after the word "buildings," insert "for the use of such employees."

Mr. LENROOT. That is the same amendment as in the previous paragraph, and I take it there is no objection to it.

Mr. ALEXANDER. I call attention to the fact that at the end of the paragraph in lines 17 and 18 we have language to carry out the purpose.

Mr. LENROOT. I understand it.

Mr. ALEXANDER. But I have no objection.

The question was taken and the amendment was agreed to.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word. I wish to ask the gentleman from Missouri if he does not think, in view of the fact that we have had a very strenuous day, and it is now 5 o'clock, and a great many of the Members who have been here all day have a lot of other work to do, it is not about time for the committee to rise.

Mr. ALEXANDER. Could we continue in session for 30 minutes longer?

Mr. MADDEN. Well, I do not think——

Mr. ALEXANDER. I am not sure but we might get through with this bill.

Mr. MADDEN. There is not one chance on earth of getting through it to-day, and I do not think we ought to try to get through.

Mr. ALEXANDER. If we continue in session for 30 minutes longer I will then move to rise.

Mr. MADDEN. There are a number of important amendments proposed to be introduced. The gentleman has the right of way to-morrow, and I wish to offer an amendment to-morrow, which I am not prepared to offer now. I suggest the lack of a quorum.

Mr. ALEXANDER. If there will be no objection to our meeting——

Mr. MADDEN. The gentleman ought to move to rise.

The CHAIRMAN (Mr. CRISP). The Chair will count. The point of no quorum has been made.

Mr. ALEXANDER. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to; and the Speaker having resumed the chair, Mr. SAUNDERS of Virginia, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes, and had come to no resolution thereon.

GARABED PATENT.

Mr. SAUNDERS of Virginia. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Virginia rise?

Mr. SAUNDERS of Virginia. Mr. Speaker, I ask unanimous consent to insert in the RECORD a letter from Mr. Giragossian to the Speaker of the House of Representatives. It is a letter that I think the Members of the House will find of interest. It is short.

Mr. GILLETT. What is the question?

Mr. SAUNDERS of Virginia. I ask unanimous consent to extend my remarks and as a part of the same to put in the RECORD a letter from Mr. Giragossian to the Speaker of the House. It is a short letter. I think the Members will find it of interest.

Mr. STAFFORD. Reserving the right to object——

Mr. WALSH. Reserving the right to object, I would like to ask the gentleman from Virginia [Mr. SAUNDERS] if it has to do with the proposed invention of Mr. Giragossian?

Mr. SAUNDERS of Virginia. It has relation to that.

Mr. STAFFORD. Reserving the right to object, what is the general nature of the letter?

Mr. SAUNDERS of Virginia. Why, it is a sort of résumé of the possibilities under it and Mr. Giragossian's rights in respect to the first original invention. It asks no action on the part of the House.

Mr. CAMPBELL of Kansas. The President has already signed the bill?

Mr. SAUNDERS of Virginia. The President has signed the bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The letter referred to is as follows:

Hon. CHAMP CLARK,
Speaker of the House of Representatives.

MY DEAR SIR: The passage of House joint resolution 174 by the United States Congress was, as it is, for me a most gratifying and obliging achievement. For that noble action, I am under the impression that it is my first and unneglectable duty to express the feeling of appreciation and gratitude which my heart fosters toward our Congress, although it is beyond my power to do so adequately. Happily, I am able to justify entirely the confidence reposed in me, and fulfill amply all expectations concerning my work.

I am impatiently anxious for the formation of the authorized commission of scientists who are to examine my invention; but, prior to that, it is indispensable that the question of the originality of my work must be distinctly defined, as it is prescribed in a clause of section 3, viz. * * * "that he is the first and original discoverer or inventor thereof." * * *

Some Members of the Congress gave me assurance that, after the passage of House joint resolution 174, the originality of my work can be legally settled to my satisfaction; therefore I did not persist in my objection to the amendment in the House which comprised the clause in question. Among other leading Congressmen, Hon. Judge H. C. CLAYPOOL, of Ohio, so advised; and I have followed their advice.

Of course we have to read and understand something beneficially different from the literal expression, as undoubtedly will be the purport of that clause. Otherwise it will be inconsistent with the aim and generous spirit of our Congress and contrary to the laws, practice, and conception of modern time.

It is said that the phonograph existed and was in use in China about 1,000 years ago. The turbine engine was used in Egypt centuries before the Christian era, and some discovered articles indicate plainly that the telephone was used in Egypt in ancient time. The above mentioned and many other things have been patented, and attempts have never been made to revoke any of them on account of some one else being the "first and original" discoverer of them.

In other words, if anyone can rediscover a means to temper copper or to preserve grain seeds for a hundred years or rediscover a process to render iron rustless, as it to-day exists in India, where an iron monument has for centuries remained rustless against the elements, or if anyone can put into practical use any such device, would he be prevented from patenting it, because all these things were known in Egypt or elsewhere?

According to the clause in question, the Government is not bound to protect my interest prior to the establishment of the originality of my work. Therefore it is essential to know how and when the commission has to decide or determine whether or not I am the original discoverer or inventor of the work in question.

Let us assume that after my successful demonstration, another person brought forward and submitted to the same commission an invention entirely identical with mine. How, then, have I to know that this identical invention is not stolen from me in some way, after my disclosure of my secret? It is plain that, in such a case, I would have either to renounce my right and surrender my invention or enter upon a lawsuit. No man can really predict the outcome of that legal contest.

In this connection it is rather significant that no sooner was a unanimously favorable decision reported upon the original resolution, on July 13, 1917, to the House of Representatives by its Committee on Patents than numerous persons came forward claiming that they have some invention which is the same or can do the same thing as I do claim that my work is capable of doing; and I have even been charged by some of them with stealing their inventions, etc.

Undoubtedly some of these claimants are sincere, but they are confused as to the issue, and others are "perpetual-motion" enthusiasts, who, by delusion, consider themselves on the brink of a great success. Therefore they struggle to gain time for the possible realization of their hopes.

And there exist also more numerous insincere claimants who are fond of publicity, and they claim or speak just in the manner of professional fortune tellers. They endeavor to connect to their claims or inventions anything known, as well as any possible fanciful idea, theory, or hypothesis. In doing so they strive to create a legal pretext or at least an opportunity to brag of their prior conception in the matter in the eventuality of my success.

In the face of such confusing circumstances it is well to reiterate once more, as I did before the House Committee on Patents, that I have made a discovery or invention by which unlimited energy can be produced without toil or without expense except for the usual wear and tear of machinery.

Or, in other words, one of my engines, placed on a railroad truck can drive the heaviest train that ever was moved by the most powerful double locomotives.

And my work can propel the most gigantic ship that ever floated on the sea faster than the same was ever driven by a series of powerful steam engines, while my work will operate without any fuel or expense for motive power.

It is hardly necessary to mention that my work can supply freely abundant motive power, heat, and light for every industry, farm, home, etc.

If there are any original discoverers or inventors whose works can produce energy, without equivalent labor or expense, as I do claim, let them come forward. If any man, or one of these claimants, really possesses such a thing, then, I should like to be the first to congratulate him. I would wish him to obtain every possible protection for his work. During the past 25 years my heartrending hardships and miseries for the achievement of my work have altogether destroyed my instinct of jealousy or envy against true inventors or discoverers. Therefore I will not only have no quarrel with them but even I can not stoop, for my own personal interests, to compete against any genuine inventor who has been or is in the service of suffering humanity.

Only my aim and struggle are to obtain a reliable safeguard against professional patent stealers, skilled and legal despoilers of inventors.

In addition to those professional despoilers of inventors, there is a vast and most powerful multitude of diverse composition and elements who are professed and relentless enemies of my work. The naturally merciless and unscrupulous characteristics of these intoxicated victims of envy and avarice make them prone to revenge themselves upon the author of any notable work by frustrating his consequent remuneration and depriving him of any moral credit.

To my deepest regret I am impelled to conclude that there are certain influential concerns or people who would exert every possible effort and despicable means for the prolongation of the war. Therefore they will resent any new factor that may substantially shorten the war, as my work can undoubtedly do. And it is admittedly certain also that many other special interests, as well as egotistic professors and scientists, will resent my work just the same in peace time.

While I am striving to get protection for my interests, the same clause, without necessary modification, surrenders me to the revengeful wrath and fury of those formidable enemies, and it gives a powerful weapon in the hands of their lawyers which they can twist in any manner that may suit their vicious objects.

As regards originality of inventions, it is generally well known and accepted that a person will be legally recognized as the first and original discoverer or inventor of a work if it may be patentable, viz, if the same is not already patented, or if it is not practically in public use.

If the patentee can not exercise his right by putting his work into actual utilization, then by the lapse of time another person may exploit it as his own work.

Thus any fruitless claim for an invention or discovery could not and should not have any legal merit, according to the precedents established in that respect. For example, wireless telegraphy was discovered by Dr. Loomis in this country, and, although it was patented, yet not being in public operation, Marconi had the right and privilege to put it, by some modification, into actual public use in his name and in behalf of his interest. This means that Mr. Marconi has been recognized legally as the first and original discoverer of wireless telegraphy.

On the contrary, there is no record in the past of any device which accomplished anything worth mentioning in the direction of my claim. From the highest scientists to the ordinary schoolboy, the occurrence of anything of this kind has never been known, and by a certain class of scientists also it is considered that the costless-energy problem will never be solved.

Before the House Committee on Appropriations, on January 25, 1918, in answer to a question concerning my work, Dr. S. W. Stratton said: "Yes; we have had great numbers of those things, but you can never get one to show the apparatus. The moment he does you can show him right away where he is violating some physical law. All we want to do is to see the apparatus, and I venture to say that any $1,400 laboratory assistant or any physicist in the Bureau of Standards can riddle that thing in a minute; that is, if he could only see it. There is simply nothing to it."

Some other members of the Bureau of Standards also tried hard to induce some Members of the Congress not to support the House joint resolution concerning my work. They pretended, or sincerely intended, to save them from unavoidable ridicule and disgrace which would follow from the inevitable failure of my work. They argued that any hope cherished for the success of producing energy without expense is positively foredoomed to disappointment, for the reason that they assume to know definitely that my claim is contrary to the law of nature.

Prof. W. F. Durand, too expressed more than once that he has the same conviction about my work. If my claim be realized, then he would say "nature reversed herself."

These well-known gentlemen, having occupied great positions in the service of the Government, would not, under any circumstances, express such an opinion of my work if there ever existed such a thing hitherto. Gentlemen in such positions and standing are well conversant and qualified to know of such a thing being in operation. Then, when I demonstrate practically my work and verify my claim beyond any possible cavil, I believe it will be the judgment of Congress, as well as of every intelligent man, that I am entitled to be at least legally recognized as the first and original discoverer or inventor thereof.

Furthermore, ever since last June the papers of the country have given wide publicity to this matter, yet not one of them came forward and reported the operation of such a thing. On the contrary, almost all of them behaved themselves very cautiously, and some of them openly ridiculed my claim, considering it a matter of impossibility.

At the same time I believe there is nothing in the records of the Patent Office of any patent issued to anyone which is practically performing the task that I claim my work is inherently destined to do. Therefore it is inconceivable that our Congress or Government will not in advance recognize my work as the only first and original discovery or invention, if it can fulfill the promised accomplishment.

Then, in the absence of real inventors in question, or if no man can fulfill the desire of our Government and the demand of the country, as well as of all the civilized world, for costless motive power, it is reasonable that I should be recognized in advance as the original inventor of my work, if I can successfully demonstrate it as authorized.

When any inventor applies for a patent, always and invariably the proper official of the Government in that line will search, as his duty, for evidence and decide whether that device is patentable or not. If the invention is patentable that means that the same kind of device is not already patented and is not in public operation or practical use. Then a patentee will be automatically and legally recognized as the first and original discoverer or inventor of the work in question. I sincerely expect that the same practice or rule will be applied to my work also in some different measure.

I wish that the Government and the public as well should be the judicial tribunal to conclude as to the originality of my work prior to the verification of my claim as designed. Thus I expect that the scientific commission's finding will include the originality of the work under the instructions of the Government given beforehand. Then nobody can, at least morally, challenge and charge the commission with partiality, favoritism, etc., in rendering their certificate and thus obscure my achievement.

I can not believe that the spirit of our Congress will tolerate or forgive that I should divulge the secret of my work to any person or commission so long as there exists a legal opportunity by which infringers can drag me into court in order to contest the originality of my work, or so long as there may be the faintest possibility that my work may be the prey of patent sharks, or that infringers may have a legal loophole to pounce upon me and to snatch the fruit of my lifelong struggle.

I am at the disposal of our Government at any time. If I may be commanded to select the authorized commission I am willing to do so when I am notified and given legal, unequivocal, and tangible assurance that I will be recognized as the original discoverer of my work as prescribed above. It is inconceivable that our Congress will tolerate the delay of the advent of this work on account of the fantastic claims or pathistic phraseology of willful obstructors and impostors.

Nor would I myself procrastinate for a single hour, because I realize and admit that the postponement or withholding of this matter from the public, or at least from our Government, is the most heinous offense against our most sacred interests. I realize also that it is unforgivable to delay the advent of this matter and sacrifice it to formality, particularity, etc. Because it is qualified to be a decisive factor to shorten this war, it is undoubtedly a hideous crime against distressed warring nations to quibble on this matter and to become almost hysterically particular about the arrangement for its advent.

Undoubtedly the United States Congress and any personalities interested more or less in this matter will expect to hear at the earliest moment possible about the formation of the authorized commission, its procedure, and verdict. If any delay may happen in this respect it must not be attributed to the lack of my desire to act, but to my failure to receive the requisite assurance from the proper authorities of our Government.

I am going to write instantly in this respect to the Secretary of the Interior. It is my positive belief beyond any shadow of doubt that the Secretary of the Interior will do, as soon as practicable, all in his power for the fulfillment of the requisite legal assurance in question.

I beg, respectfully, that you would kindly submit this memorandum to the attention of our national Representatives, with the conveyance of my hearty appreciation and grateful thanks for their generous attitude concerning my work. I have the honor to remain,

Yours, very respectfully,

GARABED T. K. GIRAGOSSIAN.

FEBRUARY 11, 1918.

RELIEF OF MAIL CONTRACTOR.

Mr. BORLAND. Mr. Speaker, I rise to ask if the Chair will recognize me in the absence of the gentleman from Tennessee [Mr. MOON] to ask unanimous consent to take from the Speaker's table the bill S. 3689, and ask for the passage of the same.

The SPEAKER. The gentleman from Missouri [Mr. BORLAND] asks unanimous consent to take from the Speaker's table——

Mr. GREENE of Massachusetts. Reserving the right to object, I would like to know what the bill is.

Mr. BORLAND. It is a bill, Mr. Speaker, that was passed by the Senate to relieve a mail contractor who has been carrying the screen-wagon service at a loss on account of the fact of having taken the contract some time before the war. And this bill gives the Postmaster General the right to readjust the contract with him so that they can go ahead with the service.

Mr. MADDEN. Reserving the right to object, I wish to say there is a bill under consideration in the committee in which there is a provision authorizing the Postmaster General to inquire into cases similar to the one mentioned in this bill, and to adjust the differences that may appeal to him as worthy of adjustment. And since that bill is pending the result of the consideration by the committee, I object.

Mr. BORLAND. I ask that the gentleman withhold his objection a minute. This bill has passed the Senate, and the passage of it at this time will stop the trouble that will go on from day to day.

The SPEAKER. Does the gentleman from Illinois [Mr. MADDEN] withdraw his objection?

Mr. MADDEN. No, sir.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 5 minutes p. m.) the House adjourned until to-morrow, Tuesday, February 12, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Navy, transmitting a draft of a proposed bill to authorize temporary increased rank and pay for certain officers of the United States Coast Guard while operating as a part of the Navy during the period of the present war (H. Doc. No. 928); to the Committee on Naval Affairs and ordered to be printed.

2. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Acting Secretary of Commerce, submitting a supplemental estimate of appropriation required by the Bureau of Standards for standardizing and designing sugar-testing apparatus, fiscal year 1918 (H. Doc. No. 929); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. MCKENZIE, from the Committee on Military Affairs, to which was referred the resolution (H. J. Res. 228) to provide notification of illness of soldier, reported the same with amendment, accompanied by a report (No. 300), which said resolution and report were referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. PADGETT: A bill (H. R. 9747) to provide temporary increased rank for officers of the United States Coast Guard while operating as a part of the Navy during the period of the present war, and for other purpose; to the Committee on Naval Affairs.

By Mr. DARROW (by request): A bill (H. R. 9748) to regulate the mode of bringing the record and proceedings before the Supreme Court or other reviewing court of the United States in proceedings for obtaining the review of the orders, decrees, and judgments of Federal and State courts; to the Committee on the Judiciary.

By Mr. VAN DYKE: A bill (H. R. 9749) for the purpose of preserving life at sea, and for other purposes; to the Committee on Military Affairs.

By Mr. DYER: A bill (H. R. 9750) to amend sections 10 and 37 of the act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916; to the Committee on Military Affairs.

By Mr. FERRIS: A bill (H. R. 9751) validating certain applications for and entries of public lands, and for other purposes; to the Committee on the Public Lands.

By Mr. DILLON: A bill (H. R. 9752) to provide for rediscounting of certain county bonds by Federal reserve banks; to the Committee on Banking and Currency.

By Mr. FLOOD: A bill (H. R. 9753) to provide for the maintenance of the United States section of the International High Commission; to the Committee on Foreign Affairs.

By Mr. SULZER: A bill (H. R. 9754) to authorize the incorporated town of Seward, Alaska, to issue bonds in any sum not exceeding $25,000 for the purpose of constructing dikes, flumes, and other protection to confine the waters of Lowell Creek within said town; to the Committee on the Territories.

Also, a bill (H. R. 9755) to grant title to the town of Petersburg, Alaska, of lands occupied for school purposes, and for other purposes; to the Committee on the Public Lands.

By Mr. PORTER: Resolution (H. Res. 247) for the investigation of the failure of the War Department to have identification tags on soldiers lost on the *Tuscania;* to the Committee on Military Affairs.

By Mr. DILLON: Joint resolution (H. J. Res. 241) to provide means for making certain Indians more competent in the administration of their affairs; to the Committee on Indian Affairs.

By Mr. KITCHIN: Concurrent resolution (H. Con. Res. 36) to print 500,000 copies of the war excess-profits tax regulations, No. 41; to the Committee on Printing.

Also, concurrent resolution (H. Con. Res. 37) to print 500,000 copies of the income-tax regulations, No. 33; to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CHANDLER of Oklahoma: A bill (H. R. 9756) granting an increase of pension to William M. Simms; to the Committee on Pensions.

Also, a bill (H. R. 9757) granting an increase of pension to Van Stuart; to the Committee on Invalid Pensions.

By Mr. CLASSON: A bill (H. R. 9758) for the placing of certain names upon the roll of the Menominee Tribe of Indians, and for other purposes; to the Committee on Indian Affairs.

By Mr. CONNELLY of Kansas: A bill (H. R. 9759) granting an increase of pension to Simeon D. Chelf; to the Committee on Invalid Pensions.

By Mr. FURRIS: A bill (H. R. 9760) granting a pension to William Leisling; to the Committee on Pensions.

By Mr. McCLINTIC: A bill (H. R. 9761) granting an increase of pension to William T. Leach; to the Committee on Invalid Pensions.

By Mr. McFADDEN: A bill (H. R. 9762) granting an increase of pension to Leon P. Chesley; to the Committee on Invalid Pensions.

By Mr. McKEOWN: A bill (H. R. 9763) granting an increase of pension to John Megehee; to the Committee on Invalid Pensions.

By Mr. McKINLEY: A bill (H. R. 9764) granting a pension to Eliza Fought; to the Committee on Pensions.

By Mr. MUDD: A bill (H. R. 9765) granting a pension to Fred Hutsler; to the Committee on Pensions.

By Mr. POLK: A bill (H. R. 9766) granting a pension to Mary Vogel; to the Committee on Invalid Pensions.

By Mr. POWERS: A bill (H. R. 9767) granting an increase of pension to Pollard Appleby; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9768) granting an increase of pension to Joseph A. Parrett; to the Committee on Invalid Pensions.

By Mr. PURNELL: A bill (H. R. 9769) granting a pension to Harriet J. Lawrence; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9770) granting a pension to Ruth R. Herrman; to the Committee on Pensions.

Also, a bill (H. R. 9771) granting an increase of pension to George Dempsey; to the Committee on Invalid Pensions.

By Mr. RUSSELL: A bill (H. R. 9772) granting an increase of pension to William E. Sartin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9773) granting an increase of pension to William D. Bunch; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9774) granting a pension to Mary J. McGuire; to the Committee on Invalid Pensions.

By Mr. SELLS: A bill (H. R. 9775) for the relief of the estate of John Stewart, deceased; to the Committee on Claims.

By Mr. SEARS: A bill (H. R. 9776) granting a pension to Ephriam P. Golden; to the Committee on Invalid Pensions.

By Mr. WELTY: A bill (H. R. 9777) granting a pension to Minnie L. Cahill; to the Committee on Pensions.

Also, a bill (H. R. 9778) granting a pension to Ambrose C. Waldsmith; to the Committee on Pensions.

Also, a bill (H. R. 9779) granting an increase of pension to Joseph Wagoner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9780) granting an increase of pension to William F. Howard; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9781) granting an increase of pension to William H. Thoms; to the Committee on Invalid Pensions.

By Mr. WHEELER: A bill (H. R. 9782) granting an increase of pension to William H. Mullen; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. CLARK of Pennsylvania: Petition of Edward Heuer; M. E. Groat; Hon. M. Liebel, jr.; L. Ray Sedelmeyer; August Wittman; F. E. Pelow; and Bernard Cochran, praying for the passage of House bill 7995, for the preservation of the *Niagara*, Commodore Perry's flagship in the Battle of Lake Erie; to the Committee on Naval Affairs.

By Mr. DALE of New York: Resolution of the Chamber of Commerce of the State of New York, favoring Senator Calder's amendment to House bill 7237; to the Committee on the Post Office and Post Roads.

By Mr. ESCH: Resolutions of the Association of Lithuanian Patriots, asserting the confidence in the administration and asking that the independence of Lithuania be recognized; to the Committee on Foreign Affairs.

Also, petition of Frank S. Becker, Philadelphia, Pa., urging the passage of the Keating bill, House bill 7356, and favoring the creation of a civil-service court of appeals; to the Committee on Appropriations.

Also, memorial of the Baraboo Commercial Association, Baraboo, Wis., favoring House bill 9414, increasing salaries of postal employees; to the Committee on the Post Office and Post Roads.

By Mr. GALLIVAN: Petition of Emmanual Barnes and 42 other citizens of Massachusetts, urging the passage of the daylight-saving law; to the Committee on Interstate and Foreign Commerce.

By Mr. HILLIARD: Papers in support of House bill 8657, for the relief of Richard A. Schwab; to the Committee on Claims.

Also, papers in support of House bill 8318, granting an increase of pension to James Gallagher; to the Committee on Invalid Pensions.

Also, resolutions adopted by Chamber of Commerce of Grand Junction, Colo., urging that the Colorado Midland and Denver & Rio Grande Railroads be made subject to Government control; to the Committee on Interstate and Foreign Commerce.

Also, resolutions adopted by the Longmont (Colo.) Farmers' Institute, urging that legislation be enacted that will enable the Food Administration to regulate the price paid to growers for sugar beets; to the Committee on Agriculture.

Also, resolutions adopted by the Colorado Springs (Colo.) Chamber of Commerce, indorsing the Walsh-Pittman leasing bill; to the Committee on the Public Lands.

Also, resolutions adopted by Silver State Lodge, No. 30, urging the Congress to refrain from action on legislation designed to place men engaged in transportation service under Federal workmen's compensation; to the Committee on Labor.

Also, letter from F. N. Crocker, of Denver, Colo., urging the passage of House bill 9414; to the Committee on the Post Office and Post Roads.

Also, resolutions adopted by the Pueblo Commerce Club, of Pueblo, Colo., urging the passage of House bills 1654 and 7356; to the Committee on the Post Office and Post Roads.

Also, letter from Leslie E. Hubbard, attorney general of the State of Colorado, indorsing Senate bill 18, providing for a department of education; to the Committee on Educaion.

Also, resolutions adopted by the Entre Nous Club, of Longmont, Colo., urging the repeal of that section of the war-revenue act providing for increased postage rates on periodicals; to the Committee on Ways and Means.

Also, petition of C. H. Arbenz, of Denver, Colo., urging the admittance of osteopathic physicians to the medical corps of the Army; to the Committee on Military Affairs.

Also, petition of Daughters of Veterans, Department of Colorado and Wyoming, urging that Government aid be extended to blind Veterans of the Civil War; to the Committee on Invalid Pensions.

By Mr. MOORE of Pennsylvania: Resolution of the Jacksonville (Fla.) Chamber of Commerce, urging Government improvement of the Florida Coast Line Canal; to the Committee on Rivers and Harbors.

By Mr. RAKER: Memorial of Mrs. E. A. Fotheringham, secretary, urging the repeal of the zone system; to the Committee on Ways and Means.

Also, resolution of the Mineola Tribe, No. 244, Improved Order of Red Men, urging the elimination of banquets and suppers by fraternal societies of the United States as a means of food conservation; to the Committee on Agriculture.

By Mr. ROGERS: Resolutions of the United Irish Catholic Societies, of Lowell, Mass., pledging loyalty to the President, asking that Ireland may be made politically independent, and thanking Miss Rankin for her efforts in behalf of the Irish; to the Committee on Foreign Affairs.

SENATE.

TUESDAY, *February 12, 1918.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we know that our greatest issues are before Thy Court, and that nothing that we can settle in this world will be settled right or settled at all until they are brought into harmony with Thy will, until they express Thy purpose in human government and in human life. So we ask Thee to guide us in the discharge of our most sacred and terrible duties as we face the issues of this day and of the days that are to come. For Christ's sake. Amen.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. JAMES and by unanimous consent, the further reading was dispensed with and the Journal was approved.

Mr. ASHURST. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Cummins	Gronna	Jones, N. Mex.
Bankhead	Curtis	Hardwick	Jones, Wash.
Beckham	Dillingham	Henderson	Kellogg
Borah	Fernald	James	Kenyon
Colt	France	Johnson, Cal.	King
Culberson	Gerry	Johnson, S. Dak.	Kirby

Lewis	Overman	Sherman	Thomas
McCumber	Page	Smith, Ariz.	Thompson
McKellar	Pittman	Smith, Md.	Tillman
McLean	Poindexter	Smith, Mich.	Trammell
McNary	Pomerene	Smith, S. C.	Underwood
Martin	Ransdell	Smoot	Watson
Nelson	Robinson	Sterling	Weeks
New	Saulsbury	Stone	Wolcott
Norris	Shafroth	Sutherland	
Nugent	Sheppard	Swanson	

Mr. CURTIS. I was requested to announce the absence of the senior Senator from Wisconsin [Mr. LA FOLLETTE] on account of illness in his family. I will let this announcement stand for the day.

Mr. SUTHERLAND. I desire to announce the absence from the Chamber of the senior Senator from Oregon [Mr. CHAMBERLAIN] on account of official business in the Committee on Military Affairs.

I desire also to announce the absence of my colleague [Mr. GOFF] on account of illness.

The PRESIDENT pro tempore. Sixty-two Senators have answered to their names. There is a quorum present.

AMERICA AND HER NATIONAL DEFENSE.

Mr. JAMES. Mr. President, I desire to give notice that on Thursday next, after the conclusion of the usual routine morning business, I hope to have the privilege of addressing the Senate upon America and her national defense.

WAR CABINET AND DIRECTOR OF MUNITIONS.

Mr. WEEKS. Mr. President, I should like to give notice that on Friday next, after the completion of the morning business, if other business does not prevent, I shall hope to address the Senate on the subject of the legislation proposed by the Committee on Military Affairs known as the war cabinet and the director of munitions bills.

LIST OF CLAIMS.

The PRESIDENT pro tempore laid before the Senate a communication from the chief clerk of the Court of Claims, transmitting a list of causes referred to the Court of Claims by the United States Senate and dismissed by the court December, 1917, on motion of defendants for nonprosecution, which was referred to the Committee on Claims.

PETITIONS AND MEMORIALS.

Mr. TILLMAN. I send to the desk a petition which I ask may be inserted in the RECORD without reading.

There being no objection, the petition was ordered to be printed in the RECORD, as follows:

CHARLESTON, S. C., *February 7, 1918.*

Hon. B. R. TILLMAN,
United States Senate, Washington, D. C.

DEAR SIR: The following resolutions were adopted at meeting held under the auspices of the First Congressional District Branch of the South Carolina Branch of the National Woman's Party.

Resolved, That this meeting call upon President Wilson and the Democratic administration to give effective support to the national suffrage amendment by making it an administration measure and securing its passage in this session of Congress; Be it also

Resolved, That this meeting call upon the Senate of the United States to pass at once the Federal amendment; Be it also

Resolved, That this resolution be sent to the President; Vice President; Senator THOMAS MARTIN, Democratic leader of the Senate; Senator JACOB H. GALLINGER, Republican leader of the Senate, and to our Senators.

Respectfully,
First Congressional District Branch of the South Carolina Branch National Woman's Party, Susan P. Frost, chairman; Rachel Whaley Hanckel, corresponding secretary.

Mr. POINDEXTER. I present a memorial from the Legislative Federation of King County, Wash., and ask that it be printed in the RECORD.

There being no objection, the memorial was ordered to be printed in the RECORD, as follows:

THE LEGISLATIVE FEDERATION OF KING COUNTY,
Seattle, Wash., February 5, 1918.

To the President and Congress of the United States:

The inclosed resolution was unanimously passed by the Legislative Federation of King County, at a regular meeting held February 4, 1918:

Resolved by the Legislative Federation of King County (representing some 15,000 women), In view of the existing war conditions, and as a matter of right and justice to all women, urges the unanimous passage of the Susan B. Anthony amendment, now before the Senate of the United States; be it further

Resolved, That copies of this resolution be sent to the President of the United States, to the Vice President, to the chairman of the Senate Suffrage Committee, and to the Senators from the Sate of Washington, who are requested to have the same read into the CONGRESSIONAL RECORD.

Signed, by order of Legislative Federation.

EMILY M. PETERS,
Chairman Federal Bills Committee.
ANNE B. STEWART.
L. ELLEN DAY.
ETTA BENSON.

Mr. PHELAN presented a petition of the State Rural Letter Carriers' Association, of Chula Vista, Cal., praying for an increase in the salaries of rural letter carriers, which was referred to the Committee on Post Offices and Post Roads.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JOHNSON of South Dakota:

A bill (S. 3821) for the relief of Thomas E. Philips (with accompanying papers); to the Committee on Military Affairs.

A bill (S. 3822) granting an increase of pension to William Mulloy (with accompanying papers); to the Committee on Pensions.

By Mr. TILLMAN:

A bill (S. 3823) to provide temporary increased rank for officers of the United States Coast Guard while operating as a part of the Navy during the present war, and for other purposes; to the Committee on Naval Affairs.

By Mr. STERLING:

A bill (S. 3824) granting an increase of pension to Frederick Zimmerman (with accompanying papers); to the Committee on Pensions.

A joint resolution (S. J. Res. 131) authorizing the Secretary of the Interior to extend the time for the payment of annual installments on the purchase price for land in the Cheyenne River and Standing Rock Indian Reservations; to the Committee on Public Lands.

AMENDMENT TO INDIAN APPROPRIATION BILL.

Mr. McCUMBER submitted an amendment proposing to appropriate $676 to reimburse Benson County, N. Dak., for care of three insane Indians in the North Dakota State Insane Asylum, intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

REGISTRATION FOR MILITARY SERVICE.

Mr. NEW submitted an amendment intended to be proposed by him to the joint resolution (S. J. Res. 124) providing for the registration for military service of all male persons citizens of the United States or residing in the United States who have, since the 5th day of June, 1917, and on or before the day set for the registration by proclamation by the President, attained the age of 21 years, in accordance with such rules and regulations as the President may prescribe under the terms of the act approved May 18, 1917, entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States," which was referred to the Committee on Military Affairs and ordered to be printed.

AGRICULTURE IN TIME OF WAR.

Mr. GORE. Mr. President, I ask unanimous consent to have printed in the RECORD a series of resolutions adopted at a meeting in this city of representatives of 17 national farmers' organizations.

The PRESIDENT pro tempore. Is there objection?

Mr. SMITH of Arizona. I did not hear the request of the Senator from Oklahoma.

Mr. GORE. It is a request to print in the RECORD a series of resolutions adopted here in Washington last week by representatives of 17 national farmers' organizations.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

[Resolutions concerning a national policy for agriculture in time of war, adopted and presented to President Woodrow Wilson by the conference of farm organizations called for consideration of the farmers' relation to the national program for winning the war by the Federal Board of Farm Organizations and held in Washington, D. C., Feb. 6, 7, 8, and 9, 1918.]

WASHINGTON, D. C., *February 8, 1918.*

THE PRESIDENT:

Desiring earnestly to support and assist the Government of the United States in winning the war, we, representatives of the Federal Board of Farm Organizations and other farmers' organization, whose names will be found appended, including in all more than 3,000,000 organized farmers, have assembled in Washington to discuss ways and means for increasing the production of food at the coming harvest.

As set forth in the memorial of the Federal Board of Farm Organizations, submitted to you on January 22, 1918, a reduction in the amount of the coming crop is certain and unavoidable unless certain causes, all of them beyond the control of the farmers, are recognized and removed. We speak with all respect, but definitely, because we know the facts of our own knowledge, and because the time during which effective action can still be taken to increase the coming crop is short.

The chief obstacles which must be removed before the farmers of America can equal or surpass this year the crop of 1917 are:

1. Shortage of farm labor.
2. Shortage of seed, feed, fertilizers, farm implements, and other agricultural supplies.

3. Lack of reasonable credit.
4. Prices often below the cost of production.
5. The justified belief of the farmer that he is not regarded as a partner in the great enterprise of winning the war.

Farmers by themselves are powerless to remove these obstacles. Unless the Government grasps the vital seriousness of the situation and forthwith takes steps to help, a crop shortage is certain in spite of any and all things farmers can do to prevent it.

The Government, we understand, will spend some $4,000,000,000 to assist commercial enterprises to produce munitions of war. We approve of this action, recognizing that it is necessary. Assistance for food production in this crisis does not involve any such vast expenditure. But without such assistance, vigorously and promptly given, it will remain impossible for farmers to grow the crops required. The Government should not hesitate to assist in the production of one sort of supplies essential to win the war when it has already spent vast sums to assist in the production of others.

We deem it our duty to advise the Nation of these facts in order that the threatened danger may be minimized if not entirely prevented, and we respectfully suggest the following remedies:

1. As to labor, the parole of trained farm workers back to the farm, to remain there so long as their services are considered by the Government to be more useful in productive agriculture than in the Army. The last classification of registrants under the present selective draft, we are informed, is not being uniformly enforced, and in particular we understand that skilled farm workers, farm foremen, and bona fide farmers are being placed in class 1. We ask for such an interpretation of the rule as will make such cases impossible. We welcome the assistance of all organizations that are helping to furnish labor in the production of food, and we believe that their services should be employed as fully as possible.

We ask for such interpretation of the selective draft as will secure to the Nation the services of all of its citizenship where those services are of most value to the Nation, and for binding instructions to be issued to all boards to that effect. Especially do we ask that the definition of a skilled farm laborer be a man who is actually engaged in productive agriculture, and is supporting himself in it, without regard to college or university training.

2. As to farm supplies, provision should be made for furnishing to producing farmers who need them such seeds, feeds, fertilizers, and farm machinery at cost as may be actually necessary to maintain their production or to increase it within practicable limits. We urge the transportation of farm products and supplies by the most economic routes and the prompt movement of perishable crops in their season.

We urge that in carrying out the measures to win the war farmers' cooperative societies be given the same consideration that is given to other commercial organizations.

3. As to credit, steps should be taken by the Government to promote aggressively and in all practicable ways short-time loans to farmers for the purpose of financing the production of crops.

4. As to prices, should the policy of price control prevail, then we ask that it shall be applied as much to what the farmer buys as to what he sells, to the end that consumer and producer be protected from exploitation.

5. As to representation, we recommend the immediate appointment of a farm commission, to consist preferably of nine farmers actually engaged in the business, to be selected by the President from men representative of and satisfactory to the great farm organizations of America, and to report directly to him on all questions that affect the increase of agricultural production and distribution. Such a commission should be authorized to secure information from all Government sources, and all departments of the Government should be instructed to cooperate with it. It should be in uninterrupted session at the city of Washington, and provision should be made for necessary quarters and expenses by Federal action. The commission should be required, as its first task, to report at once upon all matters necessary in the immediate execution of recommendations Nos. 1 to 4 above.

Such a commission is needed first of all to give to the farmers of America a sense of partnership in the conduct of the war to which they have a right. The occasional consultation with farmers called to Washington or the occasional appointment of a farmer to a subordinate place does not amount to fitting participation in the conduct of the war on the part of one-third of the population of the United States, and all the more when that third produces the one form of supplies which is the most essential.

This plan would be in harmony with the procedure already adopted by the Government in other essential industries. The creation of such a commission would convince all farmers that their viewpoint was fully represented in Washington and always accessible to the President, and would inspire and encourage them as nothing else could.

Immediate and vigorous action is imperative.

FARMERS' ORGANIZATIONS WHICH PARTICIPATED IN CONFERENCE HELD IN WASHINGTON, D. C., FEBRUARY 6, 7, 8, 9, 1918.

Dr. H. Q. Alexander, Matthews, N. C., State president North Carolina Farmers' Union.
J. T. Anthony, Chestertown, Md., chairman executive committee, Maryland State Grange.
S. C. Armstrong, 517 Arctic Building, Seattle, Wash., Washington Farmers' Union.
T. C. Atkinson, Buffalo, W. Va., secretary legislative committee, National Grange.
C. S. Barrett, Lake Como, Fla., Farmers' Union.
Elwood Bolduston, Colora, Md., secretary Cecil Farmers' Club.
C. W. Booth, route 1, Nezperce, Idaho, Tri-State Terminal Co.
R. F. Bower, Campbell, Va., director Farmers' Union.
George H. Bowles, Lynchburg, Va., secretary Farmers' Union.
Fred Brenckman, Weatherly, Pa., legislative agent Pennsylvania State Grange.
E. A. Calvin, Houston, Tex., Cotton Growing States Official Marketing Board.
W. A. Cochel, Manhattan, Kans., Kansas State Agricultural College, Kansas State Live Stock Association, Kansas Improved Live Stock Breeders' Association.
Edwin T. Coman, 1827 West Ninth Avenue, Spokane, Wash., Grange and Farmers' Union.
R. D. Cooper, 110 West Fortieth Street, New York City, vice president National Milk Producers' Federation, president Dairymen's League.
E. R. Danielson, Lincoln, Nebr., State Board of Agriculture.
R. E. Darling, Bridgeport, Wash., Farmers' Union.
Gabriel Davidson, 174 Second Avenue, New York City, manager Jewish Agricultural and Industrial Aid Society.
A. C. Davis, Gravette, Ark., national secretary Farmers' Union.
William B. Davis, Cecilton, Md., Cecilton Community Club.
R. M. Day, Washington, Pa., legislative committee, Pennsylvania State Grange.
C. H. Dildine, Orangeville, Pa., executive committee, Pennsylvania State Grange.
O. E. Dornblaser, Cleburne, Tex., National Board of Directors of Farmers' Union.
A. A. Elmore, Cœur Value Hotel, Spokane, Wash., president Farmers' Union.
Oscar Erf, dairy department Ohio State University, Columbus, Ohio; Ohio State Dairyman's Association; Ohio Jersey Cattle Club; Ohio Holstein Association; Ohio Guernsey Club; Ayrshire Cattle Association.
C. H. Everett, Racine, Wis., Wisconsin Agriculturist.
Andrew L. Felker, State House, Concord, N. H., State Department of Agriculture.
M. C. Gaulke, Thompson, N. Dak., secretary Farmers' Grain Dealers' Association.
Charles Graff, Bancroft, Nebr., president Nebraska Improved Live Stock Breeders' Association.
George P. Grout, Duluth, Minn., president Minnesota State Dairymen's Association, member Minnesota State Guernsey Association, Minnesota Live Stock Breeders' Association, National Guernsey Association.
Dwight B. Heard, Phoenix, Ariz., member market committee, American National Live Stock Association; chairman Arizona State Council of Defense.
Charles W. Holman, Madison, Wis., National Conference on Marketing and Farm Credits.
C. H. Hyde, Alva, Okla., chairman farm labor and agricultural committee, Oklahoma State Council of Defense.
H. W. Ingersoll, Elyria, Ohio, president Ohio Dairymen's Association, president Ohio Milk Producers' Association.
Robert Irwin, Telstad, Mont., State Executive Board Farmers' Union.
E. Nelson James, Rising Sun, Md., president Rising Sun Milk Producers' Protective Association, director Interstate Milk Producers' Association.
E. F. Kelly, El Reno, Okla., Oklahoma State Board of Agriculture, Farmers' Union.
J. H. Kimble, Port Deposit, Md., president Farmers' National Congress.
A. L. King, Omro, Wis., president Wisconsin State Grange.
J. S. Klemgard, Pullman, Wash., Washington and Idaho State Grange.
C. Larsen, State College, Brookings, S. Dak., South Dakota State Dairymen's Association.
Ed. C. Lasater, Falfurias, Tex., Falfurias Dairymen's Association.
George C. Leach, Aberdeen, N. C., North Carolina Farmers' Union, managing editor Farmers' Union Bulletin.
Charles A. Lyman, 340 Washington Building, Madison, Wis., general organizer N. A. O. S.; Wisconsin State Union, American Society of Equity.
Maurice McAuliffe, Salina, Kans., president Kansas Farmers' Union.
George McKelvey, Columbus Junction, Iowa, State organizer Iowa Farmers' Union.
Allan E. McLean, Bridgeport, Wash., county vice president Farmers' Union.
Ed. W. McNamara, Winfield, N. Y., Farm Bureau and Dairymen's League.
John A. McSparran, Furniss, Pa., master Pennsylvania State Grange.
Allan D. Miller, Susquehanna, Pa., legislative committee, Pennsylvania State Grange.
John D. Miller, Susquehanna, Pa., director Dairymen's League; executive committee, National Milk Producers' Federation.
J. H. Mineh, Chalmers, Ind., president Indiana Farmers' Grain Dealers' Association.
C. H. Morris, North East, Md., Cecil County Farmers' Club.
W. J. Mozley, Dickinson, N. Dak., Farmers' Union; member State Council of Defense.
M. D. Munn, St. Paul, Minn., president American Jersey Cattle Club, Twin City Milk Producers' Association.
C. W. Nelson, Arctic Building, Seattle, Wash., Tri-State Terminal Co.
J. F. Niccolls, Winfield, Iowa, chairman State Executive Board, Iowa Farmers' Union.
J. J. Owen, State Department of Agriculture, Richmond, Va., Farmers' Union.
Gifford Pinchot, Milford, Pa., president Pennsylvania Rural Progress Association.
Joseph W. Pincus, 174 Second Avenue, New York City, secretary Federation of Jewish Farmers of America.
C. C. Price, Warwick, Md., Cecilton Community Club.
John R. H. Price, Warwick, Md., Cecilton Community Club.
Max Reiberg, Cullman, Ala.
Harris A. Reynolds, 4 Joy Street, Boston, Mass., secretary Massachusetts Forestry Association.
C. D. Richardson, West Brookfield, Mass., executive committee State Grange.
S. W. Ricords, Farmer, S. Dak., president South Dakota Farmers' Union.
Fred A. Rogers, Meriden, N. H., master State Grange.
J. G. Sanders, State Capitol, Harrisburg, Pa., secretary National Horticultural Inspectors' Association.
R. J. Schaefer, Appleton, Wis., Grange No. 225 of Wisconsin, board of directors Wisconsin State Holstein Association.
G. C. Sevey, Springfield, Mass., Massachusetts Food Production Commission, editor New England Homestead.
J. L. Shepard, Greensboro, Fla., president Florida Farmers' Union.
Mabel Shepard, Greensboro, Fla., secretary-treasurer Florida Farmers' Union.
J. W. Shorthill, York, Nebr., secretary National Council of Farmers' Cooperative Associations.
John A. Simpson, Weatherford, Okla., president Oklahoma Farmers' Union, president State Presidents' Association of Farmers' Union.
Leslie R. Smith, Hadley, Mass., master Massachusetts State Grange.
A. M. Spotts, Rising Sun, Md., Cecil County Farmers' Club.
R. J. Stephens, 1011 Rankin Building, Spokane, Wash., Farmers' Union and Grange of Washington, Oregon, and Idaho.
S. L. Stewart, Newburg, N. Y., executive committee Certified Milk Producers' Association of America.
H. E. Stockbridge, Atlanta, Ga., Farmers' National Congress.
E. M. Sweitzer, Shippenville, Pa., Farmers' Society of Equity.
A. V. Swift, Baker, Oreg., national vice president Farmers' Union.
L. J. Taber, Barnesville, Ohio, master Ohio State Grange.
J. M. Templeton, Cary, N. C., vice president North Carolina Farmers' Union.
T. W. Tomlinson, 515 Cooper Building, Denver, Colo., secretary American Live Stock Association.
E. J. Tuttle, Wellsboro, Pa., legislative committee, Pennsylvania State Grange.

Harvey Walker, Wilmington, Del., executive committee, Delaware State Grange.
James D. Weaver, Dawson, Ga., vice president Georgia Farmers' Union.
M. H. Welling, Tremonton, Utah, Farmers' Cash Union, Farmers' Society of Equity.
Wilfrid Wheeler, 136 State House, Boston, Mass., secretary State Board of Agriculture.
Frank B. White, 76 West Monroe Street, Chicago, Ill., Agricultural Publishers' Association.
Charles McCarthy, Madison, Wis., director National Agricultural Organization Society.

CABLEGRAMS BETWEEN MEXICO CITY AND BERLIN.

Mr. SHERMAN. Mr. President, I have prepared a statement which I ask may be printed in the RECORD, together with a copy of certain cablegrams between Carranza and the Kaiser.

Mr. SMITH of Michigan. I should like to have it read.

Mr. SHERMAN. I have no objection. I ask unanimous consent, then, that it be read by the Secretary.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Secretary will read.

The Secretary read as follows:

"Señor Carranza, by grace of the United States Government titular head of a more or less de facto Government of Mexico, by press reports recently congratulated the Kaiser on his birthday. The President of Mexico expressed his best wishes for the personal happiness of the Kaiser, whose savagery on land and sea have made his name and nation as execrated as the Turk. Emperor William by cable acknowledged the gracious message from our neighbor and took occasion again to refer to his direct and personal responsibility to the Deity, including submarines and practices in Belgium. He referred feelingly to the intimate relationship between Señor Carranza and his own helmeted self. Just how intimate this relationship may be arouses more than idle curiosity if we remember that the allies bought 60,000,000 barrels of oil from Mexico last year, part of which came to the United States.

"More than mere languid comment is provoked by reading the newspapers of Mexico City the morning of the publication of Carranza's message. They give on the front page in display-type headings the auspicious event with a picture of H. von Eckhardt conspicuously near the exchange of congratulations between the Kaiser and Carranza. The proximity of the picture and Carranza's message is unfortunate, because President Carranza expresses his best wishes for the prosperity of the Kaiser's great friendly nation. How his prosperity may be promoted by our winning the war is a pertinent inquiry, especially when the Kaiser fervently asks that the intimate relationship between them shall be so deepened and strengthened that it may result in a victorious peace. Such a peace is full of sinister menace for this country. I am moved to wish to do more than practice watchful waiting in view of the felicitations so recently exchanged between those two distinguished worthies. I subjoin the messages and ask that they be printed in full:"

"WARM BIRTHDAY MESSAGE REVEALS FEELINGS OF MEXICO'S CHIEF.

"LONDON, *Feburary 6.*

"Venustiano Carranza, President of Mexico, sent a fulsome birthday message to Emperor William of Germany recently, according to Reuter's (Ltd.). President Carranza in this message said:

"'To your majesty, who celebrates his anniversary to-day with just cause for rejoicing, I have the honor to send my most cordial congratulations, and am pleased to express to you my best wishes for your personal happiness and that of your august family, as well as for the prosperity of your great friendly nation.'

"GREETINGS FROM PRUSSIAN DIET.

"AMSTERDAM, *February 6.*

"Replying to the birthday greetings sent him by the President of the upper house of the Prussian Diet, Emperor William sent the following by telegraph:

"'The intimate union of the Crown and the people, which I received as a sacred heritage from my fathers, dates from the hard times by which Prussia was trained for its world historic mission.

"'May these hard years of strenuousness, which I feel more deeply in consequence of the responsibility placed upon me by God, strengthen and deepen this intimate relationship, so that it may stand the test in the battles which still lie before us and in the great tasks which, after a victorious peace, we shall have to fulfill in an altered world.'"

Mr. BORAH. Mr. President, I do not understand just the object of having it read to the Senate.

Mr. SHERMAN. The object is to show that the policy of watchful waiting on the titular head of Mexico probably might not be applicable now. There were 60,000,000 barrels of oil taken out of Mexico by our allies last year, and, with these friendly congratulations on the birthday of the head of the German Government, I was disposed to think that the attention of the Senate as well as of the public ought to be called to these congratulatory messages.

Mr. SMITH of Michigan. It discloses a friendly feeling on the part of the Mexican Government toward the United States in our international difficulties! It shows the true feeling of Carranza in the present crisis and warns us to beware of his disposition to aid the archenemy of mankind in its effort to subjugate free people to its autocratic rule.

Mr. BORAH. I am not going to object; it has already been read. I only want to say that what these gentlemen say to one another is of no concern whatever to the Senate at this time.

Mr. SHERMAN. I think it is.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had, on February 11, 1918, approved and signed the following acts:

S. 3081. An act to extend the time for the completion of the municipal bridge approaches, and extensions or additions thereto, by the city of St. Louis, within the States of Illinois and Missouri; and

S. 3006. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Dominican Republic, and for other purposes.

The PRESIDENT pro tempore. If there be no further routine business, the morning business is closed.

ANNIVERSARY OF BIRTHDAY OF ABRAHAM LINCOLN—OBSERVATIONS ON THE DEMOCRACY OF ABRAHAM LINCOLN AND THE EXTENSION OF IT BY WOODROW WILSON TO THE WORLD—AMERICA'S INFLUENCE ON THE GOVERNMENTS OF EARTH—THE DEFINING OF THE PARTICULAR FORM OF DEMOCRACY AMERICA IS FIGHTING TO ESTABLISH.

Mr. LEWIS. Mr. President, pursuant to a notice I gave yesterday, I find it agreeable to avail myself of the day, under the arrangement of the Senate, to present something that might be termed a treatise upon the course of democracy and its advance in the world as influenced by America. I do this, sir, under ægis of the birthday of Abraham Lincoln, an occasion which we dwell upon with delight and memorialize with pride. Mr. President, I am just informed that I will be followed this morning by the eminent senior Senator from Minnesota [Mr. NELSON], who, I understand, expects to address himself to the personal life of the distinguished dead patriot. I will omit much of the subject of biography, knowing it will be dealt with in all the delicacy and finish that such phase of the subject could demand. For myself, Mr. President, I take the liberty, I may say, to impose somewhat upon the generosity of this body to present some thoughts that partake rather of the philosophy of government than obituary of the hero.

Mr. President, but for the circumstances surrounding us at this time I would not impose upon the hour to the extent I feel the present occasion justifies.

With the Senate's consent I submit on the natal day of Abraham Lincoln some views on the things for which he stood and for which America with Woodrow Wilson fights.

The faithful Judean on the festal day of his prophets turns his face to Jerusalem and dreams upon Jehovah.

The oriental, salaaming to the sun, cries out through the muezzin his Allah be praised.

America, worshiping the God of her fathers, turns upon each national memorial day to the memory of God's noblest offerings to man—America's blessed patriots.

Among the calendar days set aside for reverence by America's children is this, the 12th of February—the birthday of Abraham Lincoln—Illinois's greatest gift to civilization. Here in this Senate we offer up our tribute of memory and worship of virtue in commemorating Abraham Lincoln, the apostle of the liberty of man and the standard bearer of democracy to the world.

Sir, here for a moment we pause to reflect on the meaning of the word democracy as the world now knows it. Bacon, in Novum Organum, refers to the confusion made by not giving accurate import to words and to their understood meaning. Says the philosopher—

Men imagine that reason governs words, when in fact words react on the understanding. * * *

The solemn disputes of learned men about words and meaning have rendered philosophy inactive. It were better, says Bacon—

to proceed advisedly in the first instances and bring such disputes to a regular issue by a definition wholly expressed and clearly understandable.

The democracy implanted by Lincoln and advanced by Wilson is but the defining of nature's purpose to endow her mankind with equality of opportunity in all objects of life, to assure freedom of man in all pursuits of human existence, and to make sure full liberty to govern one's self by one's own will and to establish through the voice or vote of the people of any locality any form of government fitting to the needs of such people. This is the democracy heralded by Jefferson, established by Lincoln, and now forwarded by Wilson.

Mr. President, from the day when Thomas Jefferson inscribed in America's declaration of freedom that "All men are created equal" to the hour when Wilson cried out "Make the world safe for democracy," Liberty, the daughter of Democracy, has moved over the earth as an angel, lighting the housetops, shaking open the mountains, separating the hills, that all men may come forth from oppressed places to the valley of restoration and to the land of promise. Democracy is to-day justified of her children and Liberty is now vindicated by the progress of her sons.

It is in the United States of America that democracy has its hope for all future and republican government exhibits its success to inspire mankind. George Washington commanded his followers to the fight for freedom of man and liberty of nations. It was not opposition to England as a country or to kings as rulers that was the inspiration of the sacrifices of our Revolutionary heroes. It was against the system of persecution of man and oppression of country under the rule of kings that these sacred fathers pledged their lives, their property, and their sacred honor. In that contest America was triumphant and in her station as victor in the right and destroyer of the wrong she has become to be the envy of nations and the marvel of civilization. These United States stood sworn in presence of Heaven to keep this Republic the ideal of free governments and the model of triumphant democracy. Its object was to assure liberty to man, to provide justice to nations, and establish a refuge to oppressed mankind. This Nation has lived to fulfill the mission to which she was dedicated by her founders and to which she is pledged to her children. She is the first and to be the greatest free Republic of the earth. Full high against Heaven's outposts she tosses her banner as she trumpets her tribute to—

Flag of the free heart's hope and home
By angel hands to valor given,
Thy stars have lit the welkin dome,
And all thy hues were born in Heaven.

Forever float that standard sheet
Where stands the foe but falls before us,
With liberty's soil beneath our feet,
And freedom's banner waving o'er us.

Senators, no democracy was ever founded in any government of earth that did not have to fight to continue its existence or maintain its ideals. Hear Goethe proclaim to Prussia, "Those who have liberty must fight to keep it." The test of every free land that tries out its worthiness or unworthiness to exist as a government of freedom has been its willingness or refusal to fight and die for its faith. No government that has not exhibited a capacity to sacrifice all it has for the theory for which it was founded, and to prove its ability to protect and perpetuate the institutions it has created, has ever yet existed for a length of time sufficient to be recorded in history as having fostered liberty or transmitted democracy to men. No government has yet been accorded by civilization a place among the nations of the earth until it had first demonstrated its worthiness to administer justice by doing justice to itself, and then to prove its power in conflict to overcome its natural enemies, whether from within or without. Says Hegel:

> The history of the world is not the theater of happiness—it is the arena of conflict as against a part of itself or to prove the worth of the whole of itself.

The first assault that is made on the establishment of liberty is from within. It comes from the conflict of ideals of government or from rivalry of aspiration of leaders for personal honors. With this storm weathered—this tide of internal sea beaten back or wooed by diplomacy and gentleness to silence—the next assault is of foes arising from without. This is the attack of those who from envy of success and achievement, or from fear of competition, seek to destroy the rising power to avoid the influence of its example, or to prevent the dethronement of autocracy through the privileges of liberty.

The Judean governments broke in sections upon form and ceremony of religious sacrifice, and turned to rend each other. Thus they were left as the prey to the assault from without. It came from Egypt, and the Jewish people wandered 40 years in bondage. Then, though restored, repeated their folly and were overcome by Rome, and Judea is a Province obeying Tiberius—

Greece for a season met her internal wars and repelled every uprising within and against ambition of leaders or conflict of ideals preserved her government as the Greece of Phidias and Pericles and the home of art and beauty sublime. But, enervated with ease, beguiled by riches, and decadent in morals, Greece became too selfish of her comforts to oppose the advance of the Macedonian Philip in his assault from without. The cry of Demosthenes, "On against Philip," the warnings of statesmen and patriots awakened no response. Greece, in the confidence which prosperity too often infuses, forgot patriotism and yielded to personal aggrandizement and fell before the advance of the foreign enemy and became a victim to world conquest.

In modern nations we need behold but two instances presenting examples opposing each other, but which serve as our lesson. There was England. She bore and survived the revolution from within of Cromwell against the king, then in later days met the attack of Napoleon's legions from without. These she hurled back in defeat at Waterloo, and returned to her islands to enjoy what she hoped would be a peaceful growth of prosperity and democracy.

France gathered herself from the shattered places and defiled temples that had shuddered and fallen in the revolution against the Louis. But glorious as was the survival over herself, this France, confiding again to the allurement of royalty, became languid in her security and corrupted through internal conspiracies, and was no longer the France that rose above her revolutions. France, refusing to be awakened to her dangers, declined to be alert to the vigilance necessary to the preservation of liberty; France was assailed from without by those who were watching the hour when the indifference of France or her decadence could invite the conflict. The assault came from Imperial Prussia, and France endured the humiliation of crowning a German King in Versailles, the palace of French sovereigns. From this defeat France, though rising to a sublime height and restored once again to liberty, equality, and fraternity, is now embattered with every weapon of assault that brutality of war can devise, and this from without, and this again from the once successful Imperial Prussia—encouraged by one victory and its profits Prussia tries for another and its glory.

The United States—our land of promise to man—after overcoming every attack which tribulation could visit upon struggling freedom, sat herself down in peace and in happiness to enjoy the house of her fathers—when lo, she, too, must march the course of nations and endure the trials decreed upon liberty. She was beset from within, and from the conflict of ideas upon State's rights and national sovereignty, she was torn between the ambition of leaders, and was brought to the sacrifice by the spirit of secession—by the misguided zealots of one side and a disloyal selfishness of the other—would have prospered upon the Nation's divisions. Against these the faithful Union sons and the loyal southern patriots fought and endured, and despite every suffering and opposed by every secret conspiracy put afoot against her patriot President, who was tortured by every criticism, the sons of the Union persevered, and through the fidelity and sacrifice of her children—under the guidance of Heaven—the Union was preserved and this land transmitted to its people as the Republic of United States, invincible and immortal.

Yet she, too, our United States, must pass under the rod! For it is written in the sacred warning to nations, spoken through the Book of Luke, "For the days shall come upon thee that thine enemies shall cast a trench about thee and compass thee around and would keep thee in on every side." From without was destined the shock against us—from envy of our situation, from jealousy of our prowess, hatred was aroused in the heart of others and vengeance sworn upon an altar of swords. America's institutions of freedom, inspiring mankind to her example, and awakening oppressed lands to follow her course if they would know liberty, inflamed the souls of the royal rulers of Prussia with fear and fired them to war of destruction upon all that America stood for and was living for. This to Prussia was necessary that it might avoid American influence upon the hearts of the liberty-loving German people. It was to intercept this country in her march of progress and to defeat her purpose to overthrow governments of sword and scepter and establish in their stead as a rule of government the will of man, imperial Prussia struck us from without with a blow that has killed our children, murdered our sons, and imperiled this Nation.

This assault from without now puts us to the test before the world that every nation that has aspired to freedom has had to meet from despots who live by the belief of a divine right of kings, and which have ever assailed liberty since the light of freedom broke upon nations. The drowning of our commerce, the shattering of our ships, the killing of our women and children, and the murdering of our sons were but the stroke of the destined sword held in the hand of fate for America. It was the coming sure event ordered to test us that we may be proven if we are true, that we shall be tried if we are worthy to be free. It was to hold up to the world whether the heart of selfishness or the soul of patriotism controlled our course and directed our destiny. The question is put before the world, to be answered only by our conduct, asking if we are a people who to avoid personal inconvenience and commercial loss would deliver our sons to death under the blow of kings and surrender our land to the oppression of tyranny. All civilization watches from its towers. All humanity hangs in suspense upon our resolve. Freedom herself is to live or

die by the hour which America chooses. Time itself is asking of Creation: Shall America's resolve be democracy or death, or surrender and shame?—

Hark, freemen, what say ye to tyrant's taunt?

Well, here in this place we reply. We hear the blood-bespattered war lords of Prussia call to America to yield; to give her money, her property, and her honor to the demand of Germany for indemnities. We hear the Prussian military masters call upon America to fall to her knees in submission and surrender her holy birthright of liberty to the tyrant's demand and lie in dishonor at the foot of the conqueror. In response, in reply, in answer, we remind the blood-maddened Kaiser that even while yet young and weak, as against the attack of another kingly German—George of England—this people, then poor in possession yet rich in righteousness, defied this King and brought him to his surrender at Yorktown and established young America, free from kings and victorious against the assault of oppressors. In that hour America reaped the glory of immortality.

We will tell him of the days when with but a Navy of birch bark we met the force of imperious Napoleon, the war colossus of his time, and beat back the assault upon the freedom of our seas and established for our mankind the right to traverse and enjoy the oceans of God for all time. More, here and now we will remind the Kaiser and his legions of helmeted princes that when in sectional delirium our children turned upon their own families and would have consumed each other in internecine strife, leaving the Republic a severed skeleton of its once glorious self—Heaven, true to its guardianship of our people, after the point where valor and sacrifice had been wholly proven, stepped between and with celestial decree commanded the children to stack their arms of war and clasp each other in the arms of love. Yea, even as against our own will, this God of nations saved us for ourselves, that the judgment of time should be fulfilled—one united America, loyal to itself, faithful to God, to be the hope of oppressed nations and the salvation of a war-shattered world. It is these, where North, South, East, and West, in one phalanx, present arms to its Commander in Chief, the President of the United States salutes the flag of its Nation, and beholding the return of all its sons to their father's house, exclaims after the order of Philip to King John:

Now that her princes are come home again, come the three corners of the earth in arms, and we shall shock them. * * * For this America never did and never will lie at the proud foot of a conqueror.

We will tell the Kaiser—yea, and to all the despots of earth proclaim, that this united and blessed land is America—the one land of all earth, that in all its time, under the custody of God never knew defeat. It is this land that is yet to be saluted by kings and emperors as the invincible and triumphant United States of America!

Mr. President, here in our land our people stand horrified at the perfidy of the German war rulers, in their deceit and betrayal of mankind through the pretense of cry for peace. Our Nation beholds that Germany while advancing to the United States with the speech of a truce—and in effect bearing a flag of peace—and while the propositions of peace advanced by the President of the United States are suspended in the balance by the reply terms and counter offers of Germany, and while both are being weighed in the hearts of our people, and confidence in German professions of peace and good will to man is being extended by America, Germany, with the stealth of a hidden assassin, and with brutality of a savage, steals upon the ships carrying the boys of American mothers to a French port and shoots them to death, drowning them in the frozen seas, and leaving them helpless to perish in their agonies as they sank in the ocean reddened with their blood. And this while the assassin was appealing to the world for consideration and crying to America for a friendship that should suspend attack while terms of peace were under deliberation. Let the world now know that this treachery of assassins, this murder under the cover of Christian advance, this stroke in the dark that killed the sons of this Republic while the people were yielding to the prayer of Germany for consideration, for all time ended any confidence that may have been given any Prussian promises or Prussian pretenses of peace and honor. Whatever prospect there was held out for peace in the German offer is now shown to have been a deception and ruse to murder, and ends forever the hope of a peace until Germany is beaten to where she obeys the instincts of humanity through fear and yields peace and gives justice through being crushed to where she is powerless for treachery and forced by helplessness to seek the mercy of mankind. If there is an American who now can do else than sacrifice every possession and every life to vindicate his Nation, and give victory her cause, may his tongue that would speak against her cleave to the roof of his mouth and his hand that would be lifted for his country's enemies wither at his side.

The hour calls to America, "Forward, Americans, avenge the cowardly murder of your sons!"

Thus we will demonstrate that we can live through the second stage that is inevitable to all nations in its struggle for freedom and the fight for justice. That we can meet the assault from without and overcome it as we have that from within, and come forth stronger and nobler, tried and truer, sublime in fidelity and victory—the pride of civilization and the wonder of the world. We will show to the earth where the name of commonwealth is past and gone over three fractions of the groaning globe, that

Still one great clime—of freedom
Which their fathers fought for and
Bequeathed—a heritage of heart and hand
And proud distinction from each other land—
Still *one great clime*—in full and free defense
Yet rears her crest, unconquered and sublime.

Senators, let us review for the joy the contemplation affords those nations of the earth which from darkness were awakened to the light of hope by the star of our Republic. Let us refresh ourselves in the joyous memory of those people who have come to enjoy liberty by the guidance of the United States and who now know justice for humanity from the inspiration and the aid of this first, true Republic of all time:

There is South America. Each and all of her lands and divisions this day free from oppression and her people, once bowed under the yoke of kings and emperors, now free to govern themselves by their own voice, their own will, and fulfilling the destiny that America had decreed for the peoples of the world through her example and her assistance—liberty of man and justice of nations. The islands of the sea, from Cuba to the Philippines, rescued from the hands of the despot, where they once bled in agony and drenched their doorways with the streaming tears of their wailing people. They to-day shout the pæans of liberty, their people walk with heads erect, no longer slaves but free men, while prosperity and liberty blesses them with its every endowment, and they stand before the earth equal to all men in all the present and equal to those who shall be hereafter the heirs of all the future.

Yea, China, after her soggy sleep of centuries, floundering in slavish submission, at last heard the call of America, and educated by the endowment of the United States in her gratuity and gift to China, as she returned the indemnity levied upon that confused country, that the money should go to the enlightenment of her people through public education, China, as a reward to America for this magnanimity, modeled her existence after the order of this young western mother, and in the form of a republic and in the spirit of a free government China struggles to obtain the stature of a free land with free men after the example and form of her inspiring friend, the Republic of the United States.

Russia, long in bondage of emperors and mortgaged to ignorance, her people yoked to serfdom through centuries of suffering and ages of oppression, turned and looked upon us and from the bosom of our magnanimity drew hope that it might live in freedom with justice. Russia, as one touched by the Divinity, broke its cerements of civil death, threw off its shackling coil, and as the children of Jove, sprung full-born in the arena of republics and reared itself to the height of American ideals, and Russia moved out to the command of liberty shouting "Death to tyrants." Surely all America will behold all these offsprings of her birthright throughout the world and say in this generation, "It was good to be here."

Mr. President, whatever riches America has amassed from her industry, whatever wealth gathered from her commerce, what harvests garnered from her fields—are all as but the least of offering compared to that which she brings to civilization in the growth of liberty, the perfection of justice, and the expansion of freedom which she has been able by her example and her power, through her religion and her generosities, to endow mankind. Other nations have risen in triumph of power and lived for a while in the glory of arms, but by the selfish achievement—conquest of country through the slash of swords—they have fallen. As these wrenched victory by strength and success by power, they but showed the way to the rival wherein to multiply and by these same standards prevail. That which was victor yesterday was the conquered of to-day, and thus one after the other the powerful nations of the world, resting only upon the achievement of riches, the multiplication of wealth, and the power of the sword, have broken and melted away, leaving nothing enduring to which mankind appeals as example to follow or the children of men turn to as gods to be worshiped or praised.

Hear Ruskin echoing this truth:

Riches of Tyre, Thebes, and Carthage; yea, I say also the once Rome and great Persia are left for our beholding in the periods of their decline. They are ghosts upon the sands of the sea. Theirs was power, riches, grandeur; much for a country—nothing for man. They rose; they shined, yea glowed, laughed, persecuted, and oppressed, and

then they died, and man asks not, where are they? nor cares that they live not among nations. As among men, there is to nations a justice of God and the vengeance of time.

Mr. President, refined civilization as it increases in its purpose of equality among men and justice to all peoples scorns the suggestion of accepting these dead nations of the past as models of national education or guides of personal conduct. The people of the modern world shun them and hold as their boast before earth how they disdain to pattern after them, and turning the face of all those that are new and hopeful to the one standard, approach the United States of America, and bowing in admiration, ask but to follow her past growth, hold her guiding hand, and walk beside her in the light of approving heaven.

Then who are they who misrepresent the purpose of democracy under Wilson that they may defeat all democracy to all men? These charge that America, under Wilson, would continue war to force Governments and people of foreign lands to take our form of government. Let the world know that as George Washington fought for democracy as a right to America and Thomas Jefferson proclaimed it as a necessity to mankind, while Lincoln made it his creed of emancipation for all color and all clime—so, too, Wilson fights for democracy as a right of the whole world. The promise of Wilson to "make the world safe for democracy" is no threat to make the world take democracy. It is but the assurance of the effort to give to the world its chance to take democracy. This war of America is the announcement that we, by our entrance into the conflict, will prevent any despot depriving any people from exercising their free will in rejecting despotism and choosing democracy. The United States does not fight to force any Government to adopt the theory of our Government, nor does the United States fight to force any foreign people to take our form of government against any form of government they may choose for themselves. But America does fight to prevent any foreign Government thwarting any land from enjoying democracy if it so wills by the voice of its own people. And this United States fights now and will ever fight to the expenditure of its last dollar and the sacrifice of every son, rather than submit to any monarch wresting our democracy from us, to the death of our liberty, and the end of our Republic.

How old, how sacred in years and teaching, is this noble creed.

Hear Cicero proclaiming to Rome to go out and aid the peoples foreign to her dominion to enjoy democracy and happiness, saying:

> It is more consonant to nature to undertake the greatest labors and to undergo the severest trouble for the preservation and advantage of all nations, if such a thing could be accomplished, than to live in solitary repose surrounded with the allurements of pleasure and wealth. There are those who admit that regard for justice and liberty to the citizen for the benefit of his commonwealth, but deny that this regard ought to be extended in favor of foreigners. Such persons would destroy the society of the human race.

It was this theme which Edmund Burke took as the hope and succor of Britain when in her great hour of tribulation—when emperors of combined Europe threatened her hope of democracy—he, addressing the Lords and Commons, said:

> My Lords, it has pleased Providence to place us in such a state that we appear every moment to be on the verge of some great mutation. There is one thing and one thing only that defies mutation—that which existed before the world itself—I mean justice—that justice which emanating from divinity has a place in the breast of every one of us—given us for our guide with regard for ourselves, and with regard to others and will stand after this globe is burned to ashes—our advocate or our accuser before the Great Judge, when He comes to call upon us for the tenor of a well-spent life.

Mr. President, surely this young Nation has proven worthy of the faith of her fathers and as being justified of her children. For this, in this hour of the Nation's peril, she presents herself as entitled to the union of support of all her citizens and to be given the love and comfort of every daughter, the sacrifice and life of every son. Let us believe that, as the Heavenly Father, viewing His celestial Son approaching the sacred water with which He was to be baptized, that he might present His example of cleanly righteousness to all earth, proclaimed: "This is My beloved Son, in whom I am well pleased." He, too, views our land, seeing it in all that it has lived through, beholding it for all that it stands for, and knowing its sacrifices and achievements that man may live in liberty, trumpets to earth His praise, exclaiming: "This is My beloved daughter, in whom I am well pleased."

Senators, as the worshipers make their pilgrimage to the sacred shrine of their gods for the revival of their faith and the refreshment of their souls, so here we assemble to pledge our devotion to free government and free men; to swear anew our allegiance to America and vow our eternal sacrifice of life, property, and sacred honor that liberty shall live and democracy survive. And so, rising over our foes, we rejoice to behold ourselves as the world acknowledges us, a just people, freed from every impulse of selfish gain, a Nation clean of every ignoble design, and a Republic offering all in sacrifice for justice to man and liberty to nations. Here we stand, as stand we shall, as the fulfilled promise of time and the realized hope of earth—America justified in the praise of men and glorified in the blessings of God.

Mr. President, at a later hour I shall make the appropriate motion for an adjournment. At this time I pause and yield to those who will follow me, expressing my very grateful thanks for the appreciation of the Senate. [Applause by Senators.]

LIFE AND CHARACTER OF ABRAHAM LINCOLN.

Mr. NELSON. Mr. President, inasmuch as this is the birthday of Abraham Lincoln, I will ask the indulgence of the Senate to make a few remarks in reference to his life and character.

The institution of slavery had made a cleavage among the white people of the South and given them a peasant class such as was not found among the people of the North. This peasantry, though poor, uncultured, and unlettered, was nevertheless in the essential make-up far superior in vigor and spirit to its counterpart in the Old World. It was patient, courageous, intensely democratic, and in many instances charged with a suppressed intellectual vigor that on great occasions, even under adverse circumstances, would assert itself and be in the ascendant. From the very loins of this class and as a crystallization of all the virile force and vigor that was in it came Abraham Lincoln—born the American peasant, died the American king. His parentage, home, and surroundings were of the humblest kind—scarce was there ever a humbler. His moral and intellectual environment was of the most primitive order—as primitive as the undeveloped region in which his early lot was cast. But the embryo of a great soul and a brave heart was in him; and so under inspiration from on high he grew untrammeled in the midst of the barrenness whence he sprang, as the straight and lofty pine grows in the stony cleft of the hoary and craggy mountain—slowly, surely, irresistibly, and heavenward.

His development from childhood to manhood, from a backwoodsman to a statesman, was a saga, simple in its unity, sad and somber in its texture, but inspiring and heroic in its outcome and results. From Nolin Creek to the banks of the Sangamon the path was winding and rough. A mother's love was given and found in a stepmother—the guiding star on a long and dreary journey. And that love, with which a man loves but once in his life, was buried in the grave of Anne Rutledge. From that moment love claimed and was given less and duty more, and from that moment he seemed dedicated and in training for the great task and mission that was to be his. Feeble minds assuage grief such as was his in the frivolous vanities of the world; but strong minds and heroic souls, though tried and chastened, seek relief and find rest in the surging, real, and relentless battle of life where the turmoil is the fiercest and the strife rages the hottest.

Lincoln was the true exponent and the living embodiment of this class, and at that time there was no moral or intellectual battle ground so interesting, grand, and inviting as the field of political controversy and evolution in the far West. Gifted and highly equipped by nature, trained and tempered in the scant school and the rude ways of the frontiersman, and chastened by the shadows and sorrows that had come upon him, he entered the arena a trained gladiator, qualified to do battle with giants, and there was no lack of real and aggressive giants to contend with in those days. But for want of a vital issue the struggle was for a time a mere skirmish at the outposts, a mere reconnoissance, the remote prelude to the great tragedy of the century. From the gloomy shadows and dark clouds, whence sprang our hero, came also in battle array the great anti-Christ slavery, defiant and eager for battle and conquest. Slavery, in her zeal and quest for vantage, protruded her advance guard into Kansas, and on its virgin soil was fought a veritable "Inkerman"—a battle of fierce, stubborn, and isolated skirmishes. And soon along the entire line from Kansas to the Ohio, and thence to the Potomac, there was a marshaling of forces, a skirmish fire, and a reconnoissance in force, that betokened a momentous and prolonged struggle. In these preliminary conflicts there were many able leaders; and Lincoln, though one of them, was not at first regarded as the foremost. But on the eve of the great battle none disputed his chieftainship of the mighty hosts of the North. He was the heart and soul of all our people, imbued with faith in them, in himself, in the cause, and in God.

Sad and serious were those day to all of us, but most of all to him, and it made him more serious and sad than ever. But from that great task and duty, entailed upon him by man and God, he shrank not; no, not one iota nor tittle; not even in

those darkest of all days, when bolder and more aggressive men than he doubted and quailed. He was more hopeful and more confident than the most of us, because his faith was loftier and more boundless. And he ennobled the struggle and hallowed the cause of the Union by severing the last shackles of the bondsmen. He looms up to us over the vista of the passing years as the great spirit of that mighty whirlwind. God gave him to us to work out a great problem in the moral world. His task was Godlike. His life, his mission, and his death were those of a martyr. And he sanctified the Union to us and to our posterity for all time to come.

When can his glory fade?
Oh, the brave charge he made—
All the world wondered.

Mr. LEWIS. Mr. President, unless there are some other Senators who desire to address the Chair on this day, I move, in commemoration of the day and as a mark of tribute to the memory of Abraham Lincoln, that the Senate do now adjourn.

The motion was unanimously agreed to; and (at 1 o'clock and 15 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, February 13, 1918, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

TUESDAY, *February 12, 1918.*

The House met at 12 o'clock noon.

Rev. William Couden, of Washington, D. C., offered the following prayer:

Almighty God, Ruler of the universe, Father of all souls, we give thanks for this broad, fair land that contains our homes, our country, conceived in liberty and dedicated to the proposition that all men are created equal. We are grateful for every gain that has been made tending toward a fuller realization of human freedom, equality, and fraternity; for the line of men and women who from immemorial times have led onward, step by step, noble souls of high degree, irrespective of their origin, whether of the favored classes or of the common ranks, devoted to the good, the beautiful, the true, living or dying that the world might have life and have it more abundantly.

To-day we remember our Abraham Lincoln with praise in our minds and with surging thrills in our hearts. For his purity and simplicity, his ruggedness and gentleness, his firmness and kindness, his intellectual vigor and consecrated energy, his sorrowing winsomeness and lofty nationalism, his trust in God, and his love for humanity, we humbly thank Thee. May we be worthy of his life, his death, his memory. And because of his spirit, we thank Thee also, that to-day all sectional lines are fading—busy North and valiant South, the golden West and the storied East stand in the storm and pressure of world conflict as one, at the world's service, for the eternal right, Thy America. Make us all faithful to the best in our history and to the duties and sacrifices of the hour. Bless the living men who have followed Lincoln in the presidential office. We need the judicial mind of Taft. Deliver, we pray Thee, from his illness to further service Theodore Roosevelt. And God save our President Woodrow Wilson, statesman, spokesman, Chief in our own share of the huge world-task before us.

For our Nation as a whole, in memory of our saint and martyr Lincoln and in the spirit of Christians, we offer the prayer of the Hindu, Tagore, for his land:

"Let the earth and the water, the air and the fruits of my country be sweet, my God.

"Let the homes and marts, the forests and fields of my country be full, my God.

"Let the promises and hopes, the deeds and words of my country be true, my God.

"Let the lives and the hearts of the sons and daughters of my country be one, my God."

Thus "with malice toward none; with charity for all; with firmness in the right as God gives us to see the right," may we continue in domestic and inner peace and obtain blessedness from Thee. In the name of Jesus Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Young, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 3299. An act authorizing the President to reappoint Maj. Chalmers G. Hall, retired, to the active list of the Army.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had, on February 11, 1918, approved and signed bills of the following titles:

H. R. 3135. An act to amend section 4 of the act entitled "An act to provide for an auxiliary reclamation project in connection with the Yuma project, Arizona";

S. 3081. An act to extend the time for the completion of the municipal bridge approaches, and extensions or additions thereto, by the city of St. Louis, within the States of Illinois and Missouri; and

S. 3006. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Dominican Republic, and for other purposes.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 3648. An act for the retirement of public-school teachers in the District of Columbia; to the Committee on the District of Columbia.

S. 3689. An act authorizing the Postmaster General to cancel or readjust the screen-wagon contract of H. H. Hogan, at Kansas City, Mo.; to the Committee on the Post Office and Post Roads.

S. 3083. An act granting to the Lincoln Highway Association, incorporated under the laws of the State of Michigan, a right of way through certain public lands of the United States; to the Committee on the Public Lands.

S. 3299. An act authorizing the President to reappoint Maj. Chalmers G. Hall, retired, to the active list of the Army; to the Committee on Military Affairs.

THE TUSCANIA.

Mr. HICKS rose.

The SPEAKER. For what purpose does the gentleman from New York rise?

Mr. HICKS. I ask unanimous consent, Mr. Speaker, for two minutes to read a Canadian comment on the sinking of the *Tuscania*.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for two minutes. Is there objection?

There was no objection.

Mr. HICKS. I read:

[From the Toronto Globe.]

THE TORPEDOED TUSCANIA.

Canada grips the hand of her big neighbor ally in profound sympathy and understanding. The United States, even before its gallant Army had opportunity to win distinction and honor on the field of battle, has been called upon to pay a serious war toll in brave lives. The torpedoeing of the transport *Tuscania*—the first success of undersea German barbarism against trans-Atlantic troopships—brings home to the great American Republic the grim realities of the struggle upon which its people have righteously and resolutely embarked. It is part of the price to be paid by nations noble enough to consecrate their best to the cause of civilization, counting not the cost.

This Dominion drinks deep of the draught of sacrifice in the same struggle. It extends the sympathy of understanding. It shares the sorrow that comes to stricken homes. It feels the same profound pride in the heroism of its sons. Canadians respond to the spirit of their stalwart cousin. They glory that in his grief his eye is clear, his mouth firm, and his jaw set. They know that Teuton terrorism has once more gone wrong in its cruel choice of would-be victims. They realize that this "fresh challenge to civilization" will tighten the determination of a strong and resolute people to carry on until the Thing is crushed and conquered.

[Applause.]

ORDER OF BUSINESS.

Mr. SIMS rose.

The SPEAKER. For what purpose does the gentleman from Tennessee rise?

Mr. SIMS. Mr. Speaker, I rise for the purpose of seeing if we can make a unanimous-consent agreement as to taking up the railroad-control bill, and I submit the following request: That the bill be taken up on Thursday, that general debate be limited to the subject matter of the bill and not to extend beyond Friday, and that upon the expiration of the general debate the bill be taken up under the five-minute rule and concluded if possible by Saturday night.

The SPEAKER. The gentleman had better leave off that last end of it.

Mr. JOHNSON of Kentucky. I shall be compelled, Mr. Speaker, to object to that, for the reason that already I have secured unanimous consent for the consideration of the anti-profiteering rent bill on the day next following the conclusion of the bill now under consideration, Calendar Wednesday excepted, and that brings us up to Thursday.

The SPEAKER. The Chair would like to ask the gentleman from Kentucky how long it will probably take on that bill?

Mr. JOHNSON of Kentucky. The detailed consideration of the bill can not be had until the general debate is over, and unless the general debate is limited I do not know how long it will take. I would be very glad to see general debate on it limited to two or three hours.

The SPEAKER. The gentleman from Tennessee had better make his request in the light of what the gentleman from Kentucky has just said.

Mr. SIMS. I will modify my request to that extent, Mr. Speaker, and that the House meet at 11 o'clock on Thursday.

Mr. GILLETT. I shall have to object to that.

The SPEAKER. The gentleman from Massachusetts objects.

Mr. GILLETT. I am willing that we shall meet at any time for general debate, but not for the regular business of the House.

Mr. SIMS. I suppose if the bill that the gentleman from Kentucky refers to is completed on Thursday he would not object.

Mr. JOHNSON of Kentucky. We can not go to the anti-profiteering rent bill to-day except by unanimous consent.

Mr. GILLETT. I think the housing bill will take not less than to-day. I do not think you can calculate on less than to-day for that.

Mr. JOHNSON of Kentucky. I am willing that we should use a part of to-day and part of Thursday.

Mr. GILLETT. First, there come to-day the Lincoln speeches, and then other business. That will finish to-day.

Mr. JOHNSON of Kentucky. I think we could have general debate begin when the Lincoln speeches are finished.

Mr. KITCHIN. The Committee on the Merchant Marine and Fisheries will resume the consideration of the housing bill after the Lincoln speeches to-day.

Mr. GILLETT. Mr. Speaker, I am perfectly willing to facilitate business, but I do not see any hope of taking up any legislation before Friday, except what is already provided for.

The SPEAKER. Why not have this railroad bill follow the bill of the gentleman from Kentucky, if the Chair may submit a suggestion?

Mr. SIMS. I am perfectly willing to do that.

Mr. KITCHIN. The gentleman from Kentucky may have something to say on that.

Mr. SIMS. I ask unanimous consent, Mr. Speaker, that the railroad-control bill be taken up for consideration immediately following the bill for which the gentleman from Kentucky already has unanimous consent, and that the House continue consideration of said railroad-control bill until it is finished.

Mr. SHERLEY. Mr. Speaker, reserving the right to object, I want to be accommodating, but the Committee on Appropriations is ready, whenever the House is ready to receive it, to present a deficiency bill, amounting to nearly a billion of dollars. It involves items that affect every department of this Government. There is no bill that can be more important, and therefore no order ought to be made that will seriously interfere with its consideration. If I can have assurance that on Monday, no matter what happens, this deficiency bill shall be taken up and continued until completed, I shall not object to any of these other arrangements; but I think we make very grave mistakes in tying up the House by special orders without proper vision touching what is coming afterwards, and from this time on I hope we will have very few special orders.

Mr. GILLETT. Mr. Speaker, I object to the request.

Mr. KITCHIN. One minute. We all want to facilitate the business of the House. Could we make this arrangement, to let consideration of the railroad bill begin on Thursday?

Mr. GILLETT. The District bill comes on Thursday.

Mr. KITCHIN. I mean on Friday, and on Friday, Saturday, and Monday, and then let the deficiency bill follow on Tuesday morning?

Mr. GILLETT. Why not take up the deficiency bill on Friday and finish that first?

Mr. KITCHIN. I will ask the gentleman from Kentucky [Mr. SHERLEY], the chairman of the Committee on Appropriations, how long he thinks it will take to pass the deficiency bill?

Mr. SHERLEY. I hope to put it through in two days. The bill will contain about 60 or 70 pages, and, as I say, it is a bill that carries about a billion dollars.

Mr. KITCHIN. It is one of those deficiencies the necessity of which we all recognize, of course, but it will not take any long debate.

Mr. GILLETT. The debate on it will be a good deal shorter than that on the railroad bill.

Mr. NORTON. Reserving the right to object, I wish to ask the chairman of the Committee on Appropriations relative to an item in the urgent deficiency bill for the support of Indian schools. There are a number of Indian schools which will be closed unless that bill is passed within a very few days. I expected the bill would be taken up and passed before this time. The Commissioner of Indian Affairs spoke to me about it several days ago. I hope it can be taken up and passed at the earliest possible time.

Mr. SHERLEY. I trust so, too; but if we could get some information from the Indian Department, it would expedite the consideration of these items more than anything I know of.

Mr. STAFFORD. Mr. Speaker, do I understand that the gentleman from Kentucky, chairman of the Committee on Appropriations, will have the urgent deficiency bill ready to take up in the House on Friday?

Mr. SHERLEY. The urgent deficiency bill has gone to the printer now. It can be presented to the full committee to-morrow, and can be put on the floor by Friday.

Mr. STAFFORD. May I make this suggestion to the leader of the majority, that unanimous consent be asked by the gentleman from Tennessee [Mr. SIMS] to take up the railroad bill immediately following the consideration of the urgent deficiency bill?

Mr. MADDEN. No; let us not make any agreement on that.

Mr. KITCHIN. Why not?

Mr. MADDEN. There may be something else in the way.

Mr. KITCHIN. What else of more importance could be taken up?

Mr. SIMS. The railroad-control bill itself carries an appropriation of $500,000,000, and it provides for the most important legislation that has been before this House since I have been a Member of it. After the committee has put in five weeks of hard work to get that bill ready, it does seem to me it should not be set aside by every bill that may come up, even though important. Of course, the deficiency bill is an important bill, but it is not as important as this one. Now, I submit a request for unanimous consent that we begin the consideration of the railroad-control bill on Monday next and continue it until finished.

Mr. GILLETT. The gentleman means, of course, after the completion of the urgent deficiency bill, does he not?

Mr. SIMS. Then I will submit the request amended in that way, that the railroad-control bill be taken up for consideration upon the completion of the urgent deficiency appropriation bill, whether that be Saturday or Monday, or any other day.

Mr. GILLETT. I have no objection to that.

The SPEAKER. The Chair calls the attention of all parties to the fact that next Monday is suspension day and Unanimous Consent Calendar day.

Mr. KITCHIN. This unanimous consent would displace them if entered into.

Mr. GILLETT. The gentleman does not mean to dispense Calendar Wednesday, of course?

Mr. KITCHIN. No.

Mr. SIMS. Do you mean to-morrow?

Mr. GILLETT. No; next week.

The SPEAKER. The gentleman from Tennessee [Mr. SIMS] asks unanimous consent that his railroad bill shall follow immediately after the conclusion of the deficiency bill, of course not to interfere with conference reports or privileged matters or anything of that sort.

Mr. SIMS. Or Calendar Wednesday.

Mr. MADDEN. Or any other calendar day, unless set aside.

The SPEAKER. Or the Monday calendar.

Mr. SIMS. I hope that will not be insisted upon.

Mr. MADDEN. Well, it will be.

Mr. SIMS. On unanimous-consent day you can dispose of every bill by objecting. Now, which is the more important, a few unanimous-consent bills or action on this great railroad-control bill? We can agree to substitute some other day for unanimous consent.

Mr. MADDEN. Get your unanimous consent to consider the bill first.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. MAPES. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MAPES. Under the rule, of course, the House was entitled to Monday for District day. Under the unanimous-consent request of the gentleman from Kentucky [Mr. JOHNSON] the House agreed to give the District Committee the day following the completion of this pending bill. If that bill is completed during the middle of the afternoon, and the District bill is taken up, will that constitute the day for the District Committee?

The SPEAKER. Oh, the Chair thinks not. The order says the day following. Now, if Judge ALEXANDER gets through with his grist to-day, why, then the gentleman from Kentucky [Mr. SHERLEY] comes in with his appropriation bill the day after to-morrow.

Mr. MAPES. The bill will not then be taken up to-day.

Mr. KITCHIN. It can not be taken up to-day.

The SPEAKER. By unanimous consent the House can take up the Johnson bill immediately after this bill, but under the order it has made it could not take it up to-day, and to-morrow does not count, being Calendar Wednesday.

RELIEF OF MAIL CONTRACTOR.

Mr. MOON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate bill 3689, authorizing the Postmaster General to cancel or readjust the screen-wagon contract of H. H. Hogan, at Kansas City, Mo., and consider the same in the House.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to take from the Speaker's table Senate bill 3689 and consider it in the House. Is there objection?

Mr. STAFFORD. Reserving the right to object, Mr. Speaker, I think the bill should first be reported.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That should the Postmaster General find as a fact that the screen-wagon contract of H. H. Hogan, of Kansas City, Mo., was entered into prior to the entrance of the United States into the war with Germany, and that the prices agreed to be paid in said contract are at the present time inequitable and unjust by reason of the increase in the cost of materials and labor employed in the performance of such contract, the Postmaster General is authorized, in his discretion, with the consent of the said H. H. Hogan and his bondsmen, to cancel the same or to readjust the terms of said contract in such manner as to relieve the contractor from the hardships being by him suffered on account of such increased costs and expenses.

The SPEAKER. Is there objection?

Mr. STAFFORD. Reserving the right to object, I would like to ask the gentleman whether the House Committee on the Post Office and Post Roads has given any consideration to a bill of similar purport.

Mr. MOON. The House committee has reported to the House a bill which contains a section that would cover this very question, but this particular contractor, by reason of the low rate at which he contracted for the service, is in very great distress and is losing a large amount of money every day. I am advised that before we can get the bill, to which the gentleman refers, passed he will have lost all he has unless some adjustment can be made.

Mr. STAFFORD. Has the Postmaster General reported to the committee on this bill?

Mr. MOON. This bill was reported to the Senate, and the Senate passed the bill unanimously.

Mr. STAFFORD. That does not answer my question as to whether the Postmaster General has reported upon it.

Mr. MOON. The Postmaster General made no report; we have made no inquiry of the Postmaster General about it. This bill provides that the Postmaster General may, in his discretion, adjust the contract if the facts are such that, in his judgment, it is proper to adjust it.

Mr. STAFFORD. Another question: Whether the Postmaster General recommended the provision that is incorporated in section 4 in the omnibus Post Office bill authorizing him to readjust contracts on the star routes and for screen-wagon service.

Mr. MOON. Yes; the Postmaster General has all along suggested that for the relief of people that are in trouble. As a matter of fact, there is a law now in existence which gives him limited power to make adjustments of star routes.

Mr. STAFFORD. On yesterday a letter from the Postmaster General was submitted to me, in connection with this private bill, in which he states that this bill is not subject to as much criticism, as I recall the letter, as is the section that has been incorporated in the Post Office omnibus bill. I assumed from that letter that was written to Senator REED that he was opposed to this provision in the omnibus Post Office bill.

Mr. MOON. I did not know that the Postmaster General had ever been consulted—he has not by me—in regard to the provision in the omnibus bill. But I know as a matter of fact that the Postmaster General has favored all along the giving of discretion to the department to adjust the equities of parties in distress on account of conditions that could not be foreseen.

Mr. STAFFORD. It occurred to me that in giving special consideration to a private bill which has never been passed upon by the House committee that if we allow this bill to be considered under these circumstances we will be plagued by any number of similar bills that will be presented to us from day to day.

Mr. MOON. I do not think the apprehensions of the gentleman from Wisconsin are well founded, because there are not a great many instances where distress exists as in this case. This is a sort of an emergency proposition. We do not want to break the man.

Mr. STAFFORD. If I could have the assurance of the chairman of the committee that he will not present any further private bills of similar tenor until the general legislation is enacted, I would withdraw the reservation of the point of order.

Mr. MOORE of Pennsylvania. Mr. Speaker, is this a request for unanimous consent?

The SPEAKER. It is.

Mr. MOORE of Pennsylvania. Then I object.

Mr. MOON. Will the gentleman from Pennsylvania withhold his point for a moment?

Mr. MOORE of Pennsylvania. I will.

Mr. MOON. This contractor lives in the district of the gentleman from Missouri [Mr. BORLAND], and he knows the facts, and I would like for him to present them to the House.

Mr. MONDELL. Will the gentleman from Tennessee yield for an inquiry?

Mr. MOON. Yes.

Mr. MONDELL. I presume that this contractor is entitled to readjustment of his contract; but the gentleman from Tennessee is aware of the fact that there are hundreds of contracts which were entered into prior to the beginning of the war where the contractor is suffering great loss and hardship owing to the increased cost of everything. What is there in this particular case that so differentiates it from all other cases that it is necessary to take it up now and give relief in this one particular case?

Mr. MOON. I fully agree with the gentleman from Wyoming that if there are a number of these cases they ought to be adjusted. The Government of the United States, under the peculiar conditions that have arisen since the war began, I take it, does not want to press too hardly upon any of these people. We want to relieve your folks and anybody else. It is the desire of the committee to do that; and in answer to the gentleman from Wisconsin [Mr. STAFFORD], I do not think there will be any other legislation that is special; at least, I shall not favor any, because I want to press through the general measure at once. I understand from the gentleman from Missouri [Mr. BORLAND], in whose district this man lives, that there are peculiar equities in his behalf, and I feel that it is a matter of justice that this measure, which has passed the Senate, should be considered now. If this man is losing money by delay, we do not want the delay to occur. I will yield to the gentleman from Missouri [Mr. BORLAND].

Mr. BORLAND. Mr. Speaker, we want this man to go ahead with his contract while he is still solvent. If this lasts much longer the man will become insolvent, and while he is still solvent the fair thing to do is to readjust the contract and let him go on with it. It is an important thing to Kansas City.

Mr. MOORE of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. BORLAND. Yes.

Mr. MOORE of Pennsylvania. Is it not a fact that the pneumatic-tube service which was introduced for the relief of post offices like this in Kansas City was put out of business by the screen-wagon service because it was supposed to be cheaper than the pneumatic-tube service?

Mr. BORLAND. I could not say about that. We have never had the pneumatic-tube service in Kansas City.

Mr. MOORE of Pennsylvania. Is it not a fact that the screen-wagon contractors have now got the pneumatic-tube service people down and that their property is practically confiscated; and if so, does it not come with bad grace to ask for relief from contracts which they can not perform?

Mr. BORLAND. I think there is no conflict there. We never have had the pneumatic-tube service in Kansas City.

Mr. MOORE of Pennsylvania. The screen-wagon man has put the pneumatic-tube man out, and now, finding he can not keep his contract, asks relief.

Mr. BORLAND. This man never put anybody out.

Mr. LITTLE. Mr. Speaker, reserving the right to object, I shall have to object unless the chairman of the committee can assure me that this whole business is confined to Kansas City, Mo., and does not enter Kansas City, Kans. Does this contract reach into Kansas City, Kans., or is it confined to Missouri?

Mr. MOON. It is confined to the contractor there, who is suffering under peculiar conditions.

Mr. LITTLE. The gentleman does not get me. The gentleman from Missouri [Mr. BORLAND] is from Kansas City, Mo., and he is not able to give me the positive information. There are two towns side by side there—Kansas City, Kans., and Kansas City, Mo. If this contract is only for Kansas City, Mo., it is not my purpose to object. I may not object, anyway, but I want to know more about it if it concerns Kansas City, Kans.

Mr. MOON. My information is that that is so, but I could not be positive.

Mr. LITTLE. I should have to object until I know whether it applies to the city that I represent or I learn more about it.

Mr. BORLAND. If it affects the gentleman's district, it would affect it favorably.

The SPEAKER. The Chair would like to make a parliamentary inquiry. [Laughter.] How did the gentleman from Missouri get the floor?

Mr. LITTLE. I am asking a question.

The SPEAKER. Or anyone else? [Laughter.]

Mr. BORLAND. I would be glad to yield, but I do not want to prolong the discussion.

Mr. GOOD. Mr. Speaker, will the gentleman from Missouri yield for a question?

Mr. BORLAND. Yes.

Mr. GOOD. The Government, through the Post Office Department, every four years enters into a contract for the supply of envelopes. About two years ago, when envelopes were comparatively cheap, it entered into a contract, running into hundreds of thousands of dollars, for all the envelopes of the United States. I am told that these envelopes sold to the Government to-day under that contract cost the contractor over $100,000 a year of actual loss. Does the gentleman intend to bring in bills to relieve people from actual loss in cases like that?

Mr. MOON. We hope to be able to do so, and I think the bill now pending, while it does not cover that exact question, can and ought to be amended so as to cover it.

Mr. GOOD. Does not the gentleman think we ought to bring in a general bill to include all of these items? If he is going to release one concern from a contract he ought to release all.

Mr. BROWNING. Mr. Speaker, I demand the regular order.

The SPEAKER. The regular order is demanded. Is there objection?

Mr. MOORE of Pennsylvania. Mr. Speaker, I object.

The SPEAKER. The gentleman from Pennsylvania objects.

Mr. MOON. Then, Mr. Speaker, I request that this bill be sent to the Committee on the Post Office and Post Roads.

COLVILLE INDIAN RESERVATION.

Mr. DILL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate joint resolution 92, to defer first payments upon homestead entries for lands in the Colville Indian Reservation, Wash., and consider the same.

The SPEAKER. The gentleman from Washington asks unanimous consent to take from the Speaker's table and consider Senate joint resolution 92, which the Clerk will report.

The Clerk read as follows:

Senate joint resolution 92.

Resolved, etc., That all first payments upon homestead entries heretofore made for lands within the boundaries of the south half of the Colville Indian Reservation in the State of Washington be, and they are hereby, deferred for the period of one year from the date upon which such payments become due.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, I ask the gentleman to kindly withdraw that for the present.

Mr. DILL. Very well, I will withdraw it for the present.

PRESENTATION OF SERVICE FLAG TO THE SPEAKER.

Mr. EMERSON rose.

The SPEAKER. For what purpose does the gentleman from Ohio rise?

Mr. EMERSON. Mr. Speaker, I ask unanimous consent to address the House for one minute.

The SPEAKER. The gentleman from Ohio asks unanimous consent to address the House for one minute. Is there objection?

There was no objection.

Mr. EMERSON. Mr. Speaker and gentlemen of the House, this beautiful silk service flag which I hold in my hand was sent to me by some admirers of the Speaker of this House, in Cleveland, Ohio, with the request that I present it to him. His only son is in the service of the United States, and I assure you that it affords me very great pleasure to present this flag to the Speaker of this House. [Prolonged applause.]

The SPEAKER. Gentlemen of the House, I am deeply grateful to the gentleman from Ohio and the people of his city for presenting me with this flag. It is dear to the hearts of all of us, and the prayer of 110,000,000 free people is that it will never be lowered or trailed in the dust. [Applause.]

A large part of this day is set aside for memorializing Abraham Lincoln. He was born in the district of the Hon. BEN JOHNSON, of Kentucky, who so ably represents that old district, and the Chair will ask him to preside during these ceremonies. [Applause.]

Mr. ESCH. Mr. Speaker, I ask unanimous consent that I may have until Friday to present the minority views on the railroad bill.

The SPEAKER. The gentleman from Wisconsin [Mr. ESCH] asks unanimous consent that he shall have three days in which to present the minority views of the committee on the railroad bill. Is there objection? [After a pause.] The Chair hears none.

Mr. FULLER of Illinois. Mr. Speaker, on this birthday of Abraham Lincoln I think we ought to have a full attendance of the House, and I make the point of order there is no quorum present.

The SPEAKER. The gentleman from Illinois makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and fifty-five Members are present, not a quorum.

Mr. KITCHIN. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The roll was called, and the following Members failed to answer to their names:

Almon	Godwin, N. C.	Kiess, Pa.	Sanders, N. Y.
Austin	Goodall	LaGuardia	Scott, Pa.
Beakes	Gould	Lea, Cal.	Scully
Britten	Graham, Pa.	Lesher	Sherley
Caldwell	Gray, Ala.	McClintic	Sisson
Capstick	Gray, N. J.	McCormick	Sloan
Carter, Mass.	Gregg	McFadden	Smith, T. F.
Cary	Griest	Magee	Snyder
Chandler, N. Y.	Hamill	Maher	Sterling, Ill.
Chandler, Okla.	Hamilton, N. Y.	Mann	Sterling, Pa.
Crago	Haskell	Mason	Strong
Crosser	Hastings	Meeker	Sullivan
Curry, Cal.	Heaton	Miller, Minn.	Swift
Davidson	Heintz	Montague	Templeton
Dewalt	Helvering	Moores, Ind.	Tilson
Dooling	Hollingsworth	Nicholls, S. C.	Tinkham
Doremus	Hood	Nichols, Mich.	Treadway
Drukker	Humphreys	Olney	Vare
Dyer	Husted	Platt	Ward
Eagle	Hutchinson	Polk	Watson, Pa.
Estopinal	James	Powers	Weaver
Fairchild, B. L.	Johnson, S. Dak.	Ragsdale	Webb
Fairchild, G. W.	Jones, Tex.	Riordan	White, Ohio
Flynn	Kahn	Rodenberg	Wilson, La.
Focht	Kelley, Mich.	Rose	Young, N. Dak.
Gallagher	Kennedy, R. I.	Rowland	
Glass	Key, Ohio	Sanders, La.	

The SPEAKER. On this roll call 322 Members, a quorum, answered to their names.

Mr. KITCHIN. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will unlock the doors.

LEAVE OF ABSENCE.

By unanimous consent, Mr. ASHBROOK was granted leave of absence for three days, on account of attendance of Assay Commission at Philadelphia.

RESIGNATION FROM A COMMITTEE.

The Clerk read as follows:

FEBRUARY 12, 1918.

Hon. CHAMP CLARK,
Speaker House of Representatives,
Washington, D. C.

DEAR MR. SPEAKER: I hereby tender my resignation as a member of the Committee on War Claims.

Very respectfully, W. B. WALTON.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

LINCOLN'S GETTYSBURG ADDRESS.

The SPEAKER. The gentleman from Missouri [Mr. RUSSELL] is recognized to read Lincoln's Gettysburg address. [Applause.]

Mr. RUSSELL (reading)—

Fourscore and seven years ago our fathers brought forth on this continent a new Nation, conceived in liberty and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that Nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battle field of that war. We have come to dedicate

a portion of that field as a final resting place for those who here gave their lives that that Nation might live. It is altogether fitting and proper that we should do this.

But, in a larger sense, we can not dedicate, we can not consecrate, we can not hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our poor power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion; that we here highly resolve that these dead shall not have died in vain; that this Nation under God shall have a new birth of freedom; and that government of the people, by the people, for the people shall not perish from the earth.

[Applause.]

The SPEAKER pro tempore (Mr. JOHNSON of Kentucky). The Chair recognizes the gentleman from Illinois [Mr. GRAHAM]. [Applause.]

ABRAHAM LINCOLN.

Mr. GRAHAM of Illinois. Mr. Speaker and Members of the House, 109 years ago to-day one of the world's greatest characters was born. A little shanty in the backwoods of Kentucky was his birthplace. Want was his godmother. Obscurity was his by inheritance. No pride and ceremony attended his humble birth. The lonely voices of the wilderness sang his only lullaby. The little family and the great outdoors and the mystic heart of nature, and that was all—and so was born Abraham Lincoln. Back toward antiquity stretches the path that mankind has followed. Here and there along the course stand mileposts to mark the way. Such an one was Abraham Lincoln. No other man of our race has so left his impress upon the world as he. No other man of our people has been so much of an inspiration to fairness and justice and national morality. Universal reverence attends his memory, an affectionate reverence shared, I may say, by many who remember with heartfelt pride and affection their fathers who fought against him in the conflict. [Applause.] He came of a stalwart race. He was descended from one of those stiff-necked English breeds that fled to the American wilds because they would not submit to an odious and hateful Government. The blood that was in him was the blood of the pioneer and the freethinker. His humble surroundings, the poverty and meagerness of his childhood days, his struggles with adversity, were the contributing causes that led to a firm and resolute character. The mighty forests, as yet unaltered by the woodman's ax, the untracked wilderness of the prairies, the sweeping currents of mighty rivers as they flowed through the virgin country to the sea, bred constancy and devotion and humanity and good common sense.

The times were ripe for a character of heroic mold. For 40 years this people had been trying to avoid the issue. Compromise and artifice and subterfuge had delayed the coming of the decision. Every statesman of the period had exercised his talent and wisdom to contrive some way the trial by fire might not be necessary. Washington and Jefferson dimly saw the crisis ahead of them. Jackson sensed it. Henry Clay saw its ominous shadow and by his talents avoided it for the time. Daniel Webster foresaw it. Stephen A. Douglas attempted again to postpone it. But it was coming, as every moral issue will come to a people in its time. A postponement, a palliation, simply brings in the end a greater weight of misery and catastrophe. Abraham Lincoln grew up in this atmosphere. The blood that was in him, the training of his early life, had inclined him to follow not the beaten paths of thought, but, with logic and directness, to press forward directly to the object to be attained. Thus out of the welter and maze of political thought and the shifting scenes of the times suddenly he stepped out as the champion of a strong, indissoluble Federal union, a nationalist, and became at once, as has been so aptly said of him by Henry Watterson, "the incarnation of the brain and soul of the Union." In a driving storm of political controversies, with the columns of the temple already toppling about him, he was chosen by the people as their Chief Magistrate.

The labors that confronted Abraham Lincoln were Herculean. The problems that had to be solved were problems that had never before been propounded nor had solution. He must create an army and navy out of nothing; he must rehabilitate the credit of the country and finance a war while the Treasury was empty and the people divided.

We of the present generation are engaged in the greatest war in history. Back through the dusty chronicles of the human race we read of the death and desolation of a thousand wars. Painfully and slowly, through blood and treasure and tears, has our race ascended from savagery. But in all the annals of man, there never before has been a contest when all the world was whelmed in the conflict. We have taken our stand in this struggle. We stand for right and justice and human liberty. As one man we take up our weapons and bare our breasts for the struggle that we would forbear, if we could, and yet, in the sight of God, and for the rights of free peoples, we dare not. We speak as one man. We have no divided counsels among us. The giant is girding on his armor; at the ruddy forge he shapes his sword. Woe to tyrants when he strikes! [Applause.]

But how different was the position of Abraham Lincoln. Solitary and alone he stood; the confederation of our fathers, the Union of States, was about to dissolve into its constituent elements. There was a great sentiment in the country favorable to his ideas, but he must consolidate and crystallize it and make of it a concrete force. He was denounced and upbraided in the House of Representatives. He was besieged by hordes of office-seekers, caring not so much for the preservation of the Union as for political perquisites. He was made the butt of every cartoonist. He was maligned and slandered by a thousand papers, not alone in the South but in the North as well. Horace Greeley, in the New York Tribune, thundered, "On to Richmond! On to Richmond!" and forced the catastrophe of Bull Run. "Let the erring sisters depart in peace," cried Greeley in every home in the North. "Save our boys; let us have peace, peace at any price," came from all sides. A storm of criticism descended upon him at every failure, at every check, and at every new sacrifice. Viewing the matter from the perspective of over half a century, we know how unjust such criticism is. Criticism should never be offered in time of war, unless it be constructive criticism, and such as may aid in the contest with the common enemy. By all this, the great, gentle spirit of Lincoln was troubled, but not shaken. He had but one goal ahead of him, and that the preservation of the Union. With unremitting zeal and serene confidence he went forward with his eyes upon this goal.

There were many who assailed his acts as unconstitutional. The calls for volunteers, the suspension of the writ of habeas corpus, the draft, and almost every other Executive act were denounced as violations of the fundamental law of the land. A profound believer in the maintenance of constitutional forms, he yet had ever before his eyes a higher object—the maintenance of the Union. If the Union were in danger, the constitutional forms must yield to the higher necessity. And so it should ever be. Constitutions are but the machinery men create to preserve established government, and if by human error the Constitution will not provide safety for a free people in extremity, then surely the safety of the people must be first provided for, and the people may be trusted to correct the constitutional error when the storm is passed and the State secure. Abraham Lincoln no doubt thought, when this storm of criticism broke about him—and I commend this thought to those critics to-day who continually decry the unconstitutionality of the measures we are taking for the Nation's safety—that it is better to have a country without a Constitution than to have a Constitution without a country. [Applause.]

When Abraham Lincoln took his seat he was confronted by chaos. The Treasury was bankrupt. On four occasions between Lincoln's election and his inauguration President Buchanan negotiated loans to pay the running expenses of the Government. The Regular Army consisted only of about 18,000 men, poorly equipped, scattered over the country. There were few munitions and supplies for an army in the country. The Southern States were in arms, led by resolute and talented leaders. A considerable element in the North was openly hostile to him. France and England were unfriendly. Of temporal power he had none. There was but one thing he could do, and he did it. With simple confidence in the cause he espoused, with serene faith and unfaltering trust he cried out to his people, "Come and help me, the Union must be preserved." [Applause.] And then they came, from the farm, from the forge, from the pulpit, and from the plow, the mighty Volunteer Army of 1860 to 1865. And just across the line the martial drum was calling, calling to the men of the Southland. And out of the North and up from the South came the flower of youth and chivalry and strength. There were the waving of bright flags, and the show of brave men, and the pomp and panoply of war; and then four cruel, bloody, desolate years; back and forth across the continent struggled the lines of blue and the lines of gray. Four sad and bitter years. But at the end there came a day when the roll of drums was dead and the clash of arms and tumult died as a storm that fades in the far-off sky. Then a breeze came from the sea, and it shook out the folds of one flag and it waved over all the land, a symbol of the Union of a mighty people, which, please God, shall endure. [Applause.]

This contest called for the best blood of our land. Each State gave the best it had. I know I may be pardoned if I allude, with

just pride, to the illustrious sons of my beloved Illinois—Palmer, and Logan, and Ulysses S. Grant. And some States gave to both. Virginia, the mother of Presidents, gave to the lost cause Robert E. Lee, the plumed knight of the Confederacy, and Jackson, he that stood like a stone wall; and to the Union she gave Scott and Samuel Phillips Lee, he who led the line with his ship, when Farragut roared from the rigging, "Never mind the torpedoes, go ahead," and Thomas, the Rock of Chickamauga. To-day, as with high emprise we strike for democracy and the right to live and be free, God grant that among our men under the Nation's flag, over there across the seas, there is another Grant, another Lee, another Thomas, another Stonewall Jackson. [Applause.] In this day of days, O Ruler of the destinies of nations, give us great leaders, for our cause is just, and must prevail! [Applause.]

In these latter days we are apt to forget our experiences and our necessities caused by the Civil War. President Lincoln freely asked and freely received great powers from Congress. He was authorized to use the Army and Navy as he thought fit; ample sums were voted to him to expend at his pleasure. He was authorized to take possession of and operate all the railroad and telegraph lines of the country, to impress their employees into the military service, to fix the compensation of the owners through a commission appointed by himself, and retain them as long as necessary. Under this act he did take possession of and operate 2,105 miles of railroad, located in 11 States, and built 641 miles of new road. He was authorized to call from the States all men between the ages of 18 and 45 as militia when he chose and to suspend the writ of habeas corpus whenever and wherever he desired. A draft act was passed giving broader powers than our present selective-draft act does. Thirteen loans were authorized by Congress at his suggestion, totaling approximately $2,500,000,000.

To me the most remarkable phase of Abraham Lincoln's life was the constructive side. He was a builder. Even in times of greatest stress, when the continuance of our institutions was being tried before the supreme court of the people, he was building for the future. In the very beginning of his administration he called to his side the strongest men and best counselors he might obtain in the land, irrespective of political complexion. To illustrate this, Edwin M. Stanton was in Washington criticizing the conduct of the war with fury and scorn and condemning the President as an "imbecile" when he was called to the Cabinet as Secretary of War. This was the same man who stood with bowed head and tear-wet face as the great spirit went out, and said in his anguish, "Now he is with the ages." The great war President called these men around him for constructive purposes, that, while destructive forces for the time held sway, they might not be permitted to disturb the foundations of national prosperity, greatness, and strength after that struggle was concluded. War is a degenerating process, and that nation is doubly wise that looks ahead to the period when the war shall end and shields and protects and defends its economic strength for that day. Abraham Lincoln did this thing. He had vision. He could see, through rifts in the clouds of war, the sun of prosperity shining and an era of economical and moral greatness dawning for the reunited Nation. A casual inspection of the legislation enacted during the Civil War illustrates this. A system of high and protective import tariffs was devised, a system that produced great revenues and developed the industrial resources of the country; the building of railroads across the country was induced by favorable land grants; the great homestead laws were enacted that developed the West and made an empire west of the Mississippi; national banks and banking were inaugurated. These and many other constructive measures were enacted and put into operation. While the war had been an immense drain upon the resources of the country, the constructive statesmanship of Abraham Lincoln and his Cabinet had so conducted the affairs of the Nation that at the close of the struggle this Nation stood on the firmest and most secure economic and financial foundation that it had occupied since the formation of the Government.

A war that teaches a people efficiency and economy and nationalism may not be an unmixed evil, but a war that destroys industry and tears down the foundations of economic greatness is a disaster. If anything is to be concluded from the history of the legislation I have briefly detailed, it is that while it is axiomatic that in times of peace we should prepare for war, it is doubly true that in times of war we should prepare for peace. [Applause.]

The war of the States passed, like an ugly dream. Then the Nation turned to bind up its wounds and prepare for the hopeful future. To those who pressed him for vengeance and punishment Abraham Lincoln turned smilingly and said in his homely phrase: "Let them come home." Had he lived, there would have been no reconstruction days, no Ku-Klux Klans. [Applause.] When the hand of a crazed and misguided fanatic struck him down, there died at once the savior of the Union and one of the best friends the South ever had. [Applause.]

A sorrowing people bore him home and buried him in the great prairies of his own Illinois, to rest there until the trump shall sound and time shall end. And his very ashes, so lying there, are a constant inspiration to every son of Illinois, aye, to every son of America, as the years go by, to stand for truth and justice and humanity. A thousand years may come and go; the snows of a thousand winters may fall upon his lowly resting place; the summer sun may awaken into smiling gladness the flowers that spring by his grave as the centuries pass; the stately granite above him may crumble and decay, but while men live and go their way Abraham Lincoln lives; his great, kindly, sympathetic heart finds answering throbs in the breasts of his beloved people. [Applause.]

The SPEAKER pro tempore. The gentleman from Kentucky [Mr. BARKLEY] is recognized.

Mr. BARKLEY. Mr. Speaker, the nineteenth century is widely and properly known as the wonderful century. In all the sweep of human experience within the entire compass of the world's achievement no other century witnessed so great an advance in the diffusion of knowledge, the accumulation of wealth, the multiplication of mechanical inventions and scientific discoveries, the refinements of literature, or the expansion and acceptance of the principles of human liberty among the political governments of the world.

In that century of marvelous things and marvelous men no single year gave birth to so distinguished a list of men of genius and renown as did the year 1809. It may well be doubted whether any single year in history can record so impressive a group. In that year were born Chopin, the delicate, subtle, perfect artist, and Mendelssohn, whose melodies have soothed and inspired the hearts of men and women for three-quarters of a century.

Among this notable galaxy is Edgar Allan Poe, the unfortunate, gloomy poet whose verse is so free from the touch of commercialism and the vulgar worship of material success; and Oliver Wendell Holmes, whose refreshing wit and kindly philosophy never drained life of its faith in itself. In this year Lord Tennyson was born, destined to be freely acknowledged as the true Victorian poet of English literature.

In this celebrated company belongs also the name of Charles Darwin, the fearless and undaunted seeker after truth, whose intellectual searchlight, whatever our opinions of what it claimed to reveal, penetrated far into the hitherto unexplored recesses of scientific research.

In the realm of public life in the nineteenth century two great names stand out before the English-speaking world as stars of the first magnitude, both of whom were born in this same year 1809. One was William E. Gladstone, of England; the other, Abraham Lincoln, of America. Rich as it was in statesmanship, England produced no personality of greater gift or purity than Gladstone; and in America no man appeared above the political horizon more masterful in knowledge of his countrymen or more sagacious in the direction of great movements of the people than Mr. Lincoln.

It would be difficult to imagine a greater contrast in circumstance or human environment than that which gave form and vigor to the careers of these two marvelous men. Gladstone was born in the most fortunate and advantageous circumstances, in an old and cultivated society, with ample means of personal enrichment, and amid avenues of culture and refinement to which he had easy access. He was a student at Oxford at a time when great teachers deeply moved its staid conservatism. He entered public life on the eve of great national expansion. He was called again and again to the leadership of profound movements for the liberation of humanity. Bitterly assailed, fiercely opposed and denounced, he was nevertheless recognized as a great and unique personality, eager, enthusiastic, impetuous, and ardent alike in the pursuit of knowledge and the advancement of the welfare of his fellow man.

The life and work of Lincoln are commemorated in all parts of this continent with such sincere emotions of admiration and sympathy that I need not do more than recall by contrast the bleak surroundings of his childhood, the cramped and narrow circumstances of his youth, the absence of educational advantages or other conditions making success easy, his almost marvelous self-education, and the mysterious transformation of the self-taught circuit rider of the old frontier into one of the heroes of humanity.

On January 27, 1837, when only 28 years of age, Lincoln delivered an address upon the subject of "Ambition," in the course of which he used the following passage:

Towering genius disdains a beaten path. It seeks regions hitherto unexplored. It sees no distinction in adding story to story upon the monuments of fame erected to the memory of others. It denies that it is glory enough to serve under any chief. It scorns to tread in the footsteps of any predecessor, however illustrious.

Among the able and distinguished group of men whom I have named, none came so close to the fulfillment of this description of the force and power of genius as did Mr. Lincoln himself.

No man, Mr. Speaker, can trace the pedigree of genius. It will not submit to analysis. It is as mysterious and illusive as the hidden forces of nature. Its light seems now and then to fade and disappear, only to reappear again after the lapse of generations, to illuminate the visions of groping and bewildered men. It was thus with Lincoln. No man need stop to explain the alchemy which transformed this backwoods, frontier boy into a cherished historical figure. It belongs to the phenomena of human experience.

And yet, much as has been said and written concerning his lowly origin, we must not therefore conclude that in his veins there was no heritage of heroic blood. We must not forget that through him and Daniel Boone, the frontier hero of the Kentucky wilderness, the same blood coursed from equally stout and dauntless hearts, for they were cousins. Lincoln was born of the stuff of which are made men of fiber and originality. For generations in his family there had been close contact with the soil as well as with the privations and dangers of pioneer life in Virginia, Kentucky, Indiana, and Illinois. His own life was spent upon the skirmish line of advancing civilization. He dwelt amidst the rustic philosophy of a new land and a new day, and from its inexhaustible storehouse he gathered around himself a homely wisdom which served alike to guide his neighbors and his country.

It is not strange that around his career there clusters so much of romance. It is not strange that young men and old, rich and poor, wise and ignorant, have sought to recover the broken threads of tradition out of which to weave the story of his life. It is not strange that books without number have attempted to trace and fathom the depth and meaning of his eventful life and the source of its inspiration. It is not strange that with increasing years we still hang upon the recital of each new story and the repetition of those that are old.

We know that he was an orator. We know that he moved hearts, and intellects he persuaded by the force of his own integrity. But where did he obtain his clear, facile speech? Where did he acquire that power of orderly and logical expression which made his speeches models of pure diction? Surely not from an extensive reading of many books. Not in the intellectual atmosphere of colleges or universities. We are told that he had rarely attended school, and that his early reading consisted mainly of the Bible, Æsop's Fables, Robinson Crusoe, Pilgrim's Progress, and Parson Weems's Life of Washington, which, however, had made a lasting impression upon his youthful mind. We are informed by one of his biographers that in his home he had practically no library, except a few books placed upon the center table, perhaps by Mrs. Lincoln herself, for ornamental purposes. But his passion for knowledge had driven him to invade every library within his reach, and with the accumulation of knowledge gathered from every book he mastered he combined also the power of expression. His speech was wonderfully clear, simple, and forceful, abounding in epigram, maxims, figures of speech, and telling illustration. To his earlier reading he added an intimate knowledge of Burns and Shakespeare, many of whose passage he knew from memory.

While he was himself an orator, he appreciated oratory in others and was frequently touched by the tenderness and pathos of other speeches. On February 2, 1848, Alexander H. Stephens, of Georgia, delivered a speech in the House of Representatives on the War with Mexico. After listening to this speech, Mr. Lincoln, who was likewise a Member of the House, wrote as follows to his partner, William H. Herndon:

Mr. Stephens, of Georgia, a little, slim, pale-faced, consumptive man, with a voice like Logan's, has just concluded the very best speech of an hour's length I ever heard. My old, withered, dry eyes are full of tears yet. If he writes it out anything like he delivered it, our people shall see a good many copies of it.

He likewise read the great speeches made by others and the thoughts they expressed were frequently so caught up by the force of his genius that he redressed them in his own simpler language, and the people heard more readily and understood.

From what source also did he derive his great sympathy for and his unfailing knowledge of the people? Not from books. Not from an assumed superiority, though he was not unaware of his own great gifts. Not from the seclusive company of the intellectual aristocrats of his day. Not from all of these, but rather from his closeness to the heart of the world. He could not persuade himself to forget nor appear to overlook the humble and honest pioneers who were the companions of his youth. This noble spirit stands out in clear relief in his loyalty and sympathy in the defense of "Duff" Armstrong, whose father had been Lincoln's wrestling companion in the old days at New Salem. He was a distinguished exception to that sometimes erroneous maxim that "familiarity breeds contempt." He believed in the people, and from them he drew strength and courage because, with them, he kept his feet upon the earth.

So, Mr. Speaker, scanning the record of the majestic sweep of this prodigy of the wilderness from Nolins Creek to the Presidency of the greatest of the world's Republics, we pay tribute to the honesty, the courage, and the vision of Abraham Lincoln. We pay tribute to him in his childhood, so full of sadness and hard privation; in his youth, so buoyant and cheerful, so expressive of the ambitions and seemingly unattainable longings of a boy's heart; in his manhood, which grew out of the experience of circumstances so grim and unpromising. We pay tribute to his loyal friendship and to his public and private magnanimity of heart.

Men may differ, now as heretofore, over the degree of his greatness as a lawyer, but few there are who can not acknowledge his devotion to his matured conceptions of justice, for even sometimes in his pursuit of the jealous mistress of the law he "disdained the beaten path and sought regions hitherto unexplored" in his intensity of effort to bring into play the fundamentals of justice in the affairs of men.

It is easy to accommodate those who have flattered us and inflated our opinions of ourselves. It is expected that we shall repay in some measure the compliments and generosities of our friends; but it is hard for men in their weakness, jealousy, and egotism to forgive or favor those who deliberately injure or insult them through a presumption of superior social or intellectual attainments. To possess the quality of magnanimity is one of the sublime attributes of mind and heart.

The pages of history are filled largely with the records of selfishness, prejudice, ambition, cruelty, bigotry, intolerance, hatred, despotism, and tyranny which too often have marred the activities of men of great ability and responsibility. But we may search in vain the written page to find a sublimer example of magnanimity than that which characterized many of Lincoln's dealings with friend and foe. Some of these manifestations of broadness and lack of the spirit of revenge are so unusual as to have set him apart from among the commonplaces of his generation.

There is a story which has been told many times, but which will bear repetition here, which typifies his true spirit of magnanimity. It occurred in connection with his activities as a lawyer. There had been a famous lawsuit brought in the United States circuit court at Chicago, being the famous case of McCormick against Manny, for the infringement of a patent right. The case had been transferred for trial at Cincinnati as being more convenient for the judge who was expected to preside. The plaintiff, McCormick, was represented by the famous Baltimore lawyer, Reverdy Johnson, and E. N. Dickerson. The defendant had employed as his counsel George Harding, of Philadelphia, Edwin M. Stanton, and Abraham Lincoln. While Lincoln had acquired a State-wide reputation in Illinois as a lawyer, he had never seen either Harding or Stanton. He had undergone great preparation for the trial of this case, because not only the importance of the case, but distinguished counsel on both sides he regarded as worthy of his best efforts. Stanton and Harding were both in Cincinnati when Lincoln arrived and had taken rooms at the Burnett House, then a leading hotel in that city. When Lincoln arrived at the hotel Stanton and Harding were out and Lincoln awaited their return. He stationed himself at the entrance of the hotel where Stanton and Harding soon approached, greeted Lincoln with indifference, and passed on to their room. Upon reaching the room Stanton insisted that it would never do to let a man of Lincoln's type make an argument in the case. Mr. Harding described Lincoln as awkward and ungainly in appearance, his clothing entirely devoid of the tailor's art and in no particular suitable to his long, angular frame. He wore heavy boots and his appearance was very much like that of the average western farmer of that period.

Having determined that Lincoln should not be allowed to make a speech in the case, Stanton and Harding sought a method to break the news to Mr. Lincoln. Lincoln was finally sent for and informed that as there were only two lawyers on the other side of the case, they had determined that there could only be two speeches on their side, and that those two would be made by

Harding and Stanton. Mr. Lincoln replied, "Very well, gentlemen; I have here some suggestions which I had intended to use in my argument, which you are at liberty to use if you see fit," taking, as he spoke, a manuscript from his pocket and handing it to Harding. Mr. Lincoln soon left the room, and as soon as he was out Harding threw the manuscript into the waste basket unopened. Stanton referred to him as "A long, lank creature from Illinois, wearing a dirty linen ulster for a coat, on the back of which the perspiration had splotched wide stains that resembled a map of the continent." It is beyond doubt that this contemptuous treatment stung Lincoln. But he made no complaint, and notwithstanding he could not have forgotten it, he had the unparalleled magnanimity, soon after he became President, to make this man his Secretary of War. If any man can find a parallel to this in the history of any other great man in this or any other country, he will have made a discovery that is beyond my knowledge. It should be said to his credit that Stanton became the true, loyal, and devoted friend of Lincoln, was at his side when he crossed the river which separated him from the Great Beyond and gave utterance to the historic sentence, "Now he belongs to the ages."

These, Mr. Speaker, are the qualities which make his memory sacred to the Nation. These are the qualities which receive full praise from friend and foe alike. These are the qualities which illuminate his pathway through the stirring times in which he dwelt, and these are the qualities which, if he had lived, would have aided him in binding up the Nation's wounds and saved it from the orgy of corruption and outrage which it suffered at the hands of less skillful and less scrupulous men.

In reading the history of that period I have been many times unable to conceive the possibility of such patience as Lincoln exhibited in the face of clamor, jealousy, contempt, scorn, ridicule, and venality which were thrown into his face by those who were disconsolate over any management but their own. Vituperation, slander, vulgar invective, and the ingenuity of corrupt politics all connived at his downfall and sought to destroy the confidence of the people in his sincerity of purpose and in his ability to execute his purposes. He was referred to by widely known public men as "The baboon in the White House," and "The idiot at the other end of the Avenue." He was accused of treason and disloyalty, of incompetence, and lack of vision. With some he was too weak, with others too strong. He was even accused of having "ceased to function." The politicians became impatient and flaunted their distemper to seek a cheap notoriety. Senator Grimes wrote to Fessenden, "We are going to destruction as fast as imbecility, corruption, and the wheels of time can carry us." Even Stanton had written of "The painful imbecility of Lincoln." Then, as now, there were too many ununiformed majors and field marshals in Congress. Then, as now, there were too many self-seeking, ambitious men disgruntled because they were not in charge of the Government. Then, as now, there were too many smokeless military heroes who bemoaned, in characteristic fashion, the desolate fate of a Nation so benighted as not to recognize them as divinely anointed deliverers. Then, as will happen now, these marplots were confounded and the firm hand and patient spirit into whose keeping God had placed the destiny of a Nation stepped out into the full illumination of a world figure. [Applause.]

Three and fifty years have passed since the assassin's bullet prevented him from doing more than look, like Moses, into the peaceful realms of the "Promised Land." I have often tried to speculate upon the course of our history if this unhappy event had never happened. But speculation is as dangerous as prophecy, and I shall venture neither, except to voice the belief that the same patience and lofty conceptions of justice which guided his course in relation to other great problems would have determined his course in the process of binding up the Nation's wounds, of which he spoke in the second inaugural address.

Twice since the close of the Civil War our Nation has unfurled its flag and unsheathed its sword in behalf of human liberty. Twice a reunited Nation, rebaptized in the spirit of the fathers, has advanced in the pathway of the hordes of oppression, and as we look to-day upon our own fair land and other fair lands, threatened by spoliation, outrage, and slavery, we realize that our problems differ only in degree from those which confronted the founders and preservers of our national life and institutions. They kindled the light of liberty. It was theirs to fan and strengthen its flickering blaze until it could burn of its own force. Ours is the duty to prevent its being blown out entirely by the storms of organized rapacity and military despotism now seeking to overwhelm it. Not only is it our duty to see that what our forefathers fought and died to establish and preserve shall not be swallowed up in the gloom of eternal night on the shores of America, but as a part of the social and political fabric of the world, recognizing and ready to perform our share of the service and sacrifice, we must offer a ready and effective arm to those who are fighting for the things which we hold dear, some of whom helped us establish the liberty for which we now propose to fight.

It is fortunate that since the healing of the wounds and the elimination of the misunderstandings of the Civil War, one of whose central figures we recall to-day, we have been able to accumulate the forces necessary for the conflict. It is fortunate that in wealth we have outstripped other nations; that in morality and religion we have been leaders of modern thought and activity; that in education we have recognized the duty of the citizen and the State in their mutual relations; that we have coined our brain into the instruments of peace; and, since the conflict has come, that we have the ingenuity which will coin that brain into the agencies by which organized militarism and brutal autocracy shall be unhorsed and the great institutions of the world set again upon their feet.

It is therefore under circumstances like these that we pause for a while to-day, not in jollification, not in light-hearted festivity, but rather in a spirit of solemn consecration for the duties that press upon us and for the successful accomplishment of the things to which we all have set our hands. We had hoped that we might be permitted to run our course unhindered and unthreatened by the ambitions of European monarchs. We had hoped that we would not be compelled to draw the sword in defense of principles dear to the heart of all free people. But it could not be. Seeing our institutions and the inalienable rights of humanity threatened with annihilation, seeing the political structure which our forefathers had through bloodshed and hardship erected for us threatened with violation, we entered the conflict upon the only side where we could have felt at home, namely, the side of democracy and the rights of mankind; upon the side where Washington and Franklin and Jefferson and Jackson, Lafayette and Kosciusko would be; where Lincoln and Davis would be found if they were here to guide and counsel us. Yea, if I might recount the heroes and martyrs to human freedom throughout all the past, I would not fear to assert that our alignment in behalf of the preservation of human rights against the unscrupulous edicts and methods of a barbarism worthy of the Middle Ages would receive their approval and benediction.

It is in such a cause that we are to become the servants of humanity, the soldiers of liberty. As such we stand by Washington's side, partake of the glories of Old Hickory Jackson, and our faces shall brighten with the spirit of Lincoln, Grant, Davis, and Lee. As such may we resolve that the banner which Dewey left at Manila shall bring peace and hope to the bleeding hearts of humanity everywhere, and God grant that this banner may return to our shores as the unstained and unconquered emblem of a free and happy people.

But, Mr. Speaker, let us who are charged in these solemn days with the performance of high public duty remember that patriotism is something more than mere admiration for the beauties of the flag. Patriotism sinks into the soul and stirs it with a celestial emotion. It looks beyond the folds and colors and sees the hardship and heroic sacrifices which gave them birth and meaning. Patriotism is patient with the cries of the oppressed, but intolerant of the oppressor. Patriotism does not end where the lips begin, but yields up freely the devotions of the heart. For it countless millions have offered themselves upon the altar of their country, and it would not call in vain for the manhood of our times nor die for lack of true response.

If it be true that the spirits of the departed take note of the movements and emotions of living men, may we not believe that the great souls of Lincoln and Davis rejoice together in Paradise because the children of those who followed them now stand arm in arm and shoulder to shoulder under the sacred banner of a single allegiance, forgetting the misconceptions of past years, rejoicing alike in a common ancestry and in a common determination to make sure that the land which their children shall inherit shall be as courageous and as free as that which from their fathers came to them; and as we recall with swelling hearts their imperishable glory upon the battle ground of freedom, so shall those who follow us recount by the fireside's cheerful glow the unselfish devotion of the men of this day who keep burning and fan into brighter blaze the fires of human liberty.

Then let us put aside our littleness, our prejudice, our selfish ambitions, our lack of faith in the ultimate triumph of God's righteous purposes, remembering that impartial history will deal justly with those who serve and those who hinder. Let us upon whom has been bestowed the faith and confidence of

the people expand our souls and absorb the spirit of Abraham Lincoln when, in his second inaugural address, he said:

With malice toward none; with charity for all; with firmness in the right, as God gives us to see the right, let us strive on to finish the work we are in; to bind up the Nation's wounds; to care for him who shall have borne the battle, and for his widow and his orphan—to do all which may achieve and cherish a just and lasting peace among ourselves and with all nations.

In conclusion, may I paraphrase and apply to him the eulogy which he so beautifully and so fittingly accorded to Washington:

To add brightness to the sun or glory to the name of Lincoln is alike impossible. Let none attempt it. In solemn awe pronounce the name, and in its naked, deathless splendor leave it shining on.

[Applause.]

The SPEAKER pro tempore. The gentleman from New York [Mr. LONDON] is recognized.

Mr. LONDON. Mr. Speaker, I intend to speak on Lincoln as a world force.

This Republic is very little understood by other countries, notwithstanding the fact that the most scholarly and the most authoritative works on American political institutions have been written by foreigners, such as De Tocqueville's Democracy in America; Goldwin Smith's The United States, an Outline of Political History; Bryce's American Commonwealth; Von Holst's Constitutional History of the United States; Ostrogorski's Democracy and the Party System in the United States, and similar works.

In European works on America emphasis is always laid on its great industrial development, on its factories, skyscrapers, and railroads. Statistical tables are presented, as if the greatness of America consisted in its bigness only. They fail to speak of the grandeur of America's soul, of America's inextinguishable love of liberty. They fail to speak of the great men to whom American life has given birth. They fail to see the America of the ideal, America the glorious, America the inspiring, America that has given martyrs and heroes to the world. And because the American people have always been in a fight against some wrong, and are in a fight to-day against the powers of evil outside of the country and inside of the country, men who do not know assume that the forces of evil have undisputed sway over the land.

I intend to present to you a short document which has been overlooked by many biographers of Lincoln, an address sent to Abraham Lincoln by the International Workingmen's Association. This was an association organized in England in 1863. It was the first serious effort to unite the working class of the various countries of the world. The moving spirit of the association was Karl Marx. As we read this declaration of the newly born international body we see that the American struggle for the emancipation of the slave found a response among all the liberty-loving elements of Europe. The address reads as follows. It must have been translated from some other language, because the English bears the evidence of translation. It is dated November 29, 1864:

TO ABRAHAM LINCOLN,
President of the United States of America.

SIR: We congratulate the American people upon your reelection by a large majority. If resistance to the slave power was the watchword of your first election, the triumphal war cry of your reelection is death to slavery.

From the commencement of the titanic American strife the workingmen of Europe felt instinctively that the Star-Spangled Banner carried the destiny of their class. The contest for the Territories which opened the dire epopee, was it not to decide whether the virgin soil of immense tracts should be wedded to the labor of the immigrant or be prostituted by the tramp of the slave driver?

When an oligarchy of 300,000 slaveholders dared to inscribe for the first time in the annals of the world "Slavery" on the banner of armed revolt, when on the very spots where hardly a century ago the idea of one great democratic Republic had first sprung up, whence the first declaration of the rights of man was issued and the first impulse given to the European revolution of the eighteenth century, when on those very spots counter-revolution, with systematic thoroughness, gloried in rescinding the "ideas entertained at the time of the formation of the old Constitution" and maintained "slavery to be a beneficial institution," indeed, the only solution of the great problem of the "relation of capital to labor," and cynically proclaimed property in man "the cornerstone of the new edifice," then the working classes of Europe understood at once, even before the fanatic partisanship of the upper classes, for the Confederate gentry had given its dismal warning that the slaveholders' rebellion was to sound the tocsin for a general holy war of property against labor, and that for the men of labor, with their hopes for the future, even their past conquests were at stake in that tremendous conflict on the other side of the Atlantic. Everywhere they bore therefore patiently the hardships imposed upon them by the cotton crisis, opposed enthusiastically the proslavery intervention—importunities of their letters—and from most parts of Europe contributed their quota of blood to the good of the cause.

While the workingmen, the true political power of the North, allowed slavery to defile their own Republic, while before the negro, mastered and sold without his concurrence, they boasted it the highest prerogative of the white-skinned laborer to sell himself and choose his own master, they were unable to attain the true freedom of labor or to support their European brethren in their struggle for emancipation; but this barrier to progress has been swept off by the red sea of civil war.

The workingmen of Europe felt sure that, as the American war for independence initiated a new era of ascendancy for the middle class, so the American antislavery war will do for the working classes. They consider it an earnest sign of the epoch to come that it fell to the lot of Abraham Lincoln, the single-minded son of the working class, to lead his country through the matchless struggle for the rescue of the enchained race and the reconstruction of a social world.

Signed on behalf of the International Workingmen's Association, the Central Council:

Longmaid, Worley, Whitlock, Blackmore, Hartwell, Pidgeon, Lucraft, Weston, Dell, Nicars, Shaw, Lake, Buckley, Osborne, Howell, Carter, Wheeler, Starnsby, Morgan, Grossmith, Dick, Denoual, Jourdain, Morissot, Lerou, Bordage, Bosquet, Talandier, Dupont, L. Wolf, Aldrovandi, Lama, Solustri, Nuspert, Eccarius, Wolf, Lessner, Pfander, Lochner, Taub, Ballifer, Rypcrynski, Hansen, Schanzenbeck, Smales, Cornelius, Peterson, Otto, Bagnagatti, Setoeri; George Odgers, president of the council; P. V. Lubez, corresponding secretary for France; Karl Marx, corresponding secretary for Germany; C. P. Fontana, corresponding secretary for Italy; J. E. Holtrop, corresponding secretary for Poland; H. F. Jung, corresponding secretary for Switzerland; William Cremer, honorable general secretary, 18 Greek Street, Soho, London W.

In this message the representatives of the working class of the various European countries congratulate Lincoln upon his reelection, declare him to be the true representative of the working class, and express their confidence that with the abolition of chattel slavery there would be no hindrance to the genuine progress of labor.

They denounce the slaveholders, rejoice in the saving of the Republic, and point with pride to the fact that they had cheerfully accepted all the hardships caused by the cotton crisis, while some of the ruling interests of their own countries were suggesting intervention in favor of the slaveholders. They express the hope that with the elimination of chattel slavery the working class would be able to attain "the true freedom of labor."

I am not a hero worshiper. The heroes that history records represent an accumulation. They represent the efforts of the thousands and tens of thousands who preceded them. Lincoln would have been impossible without a Wendell Phillips, without a William Lloyd Garrison, without a Henry Ward Beecher, without a John Brown. In estimating the past it is hard to judge how much credit for the progress of mankind belongs to the fanatic, to the man with a single idea, and how much shall be apportioned to the credit of the statesman moderator, and how much of progress is due to the reactionary who by rejecting the very law of growth and by refusing to listen to a fresh voice stimulates the forward-looking man to renewed effort. It is impossible to determine, to separate, to conceive the parts that men play in the making of the world and in shaping its destiny. And when I present to my own mind the name and the form of Lincoln it is not so much because of the individual, because of the man who showed himself to be so tender, so loving, so free from prejudice. It is Lincoln, the embodiment of the ideals of a people, that means so much to me. And what a brilliant orator he was. His speeches are free from those long, interminable periods. He never used a polysyllable where a monosyllable will do. Genuine oratory is the telling of the truth in the simplest possible words, so that there shall be no veil of phrases between the speaker and the listener; and that was the oratory of Lincoln.

The oppressive conditions under which he grew up made it impossible for him to unfold into a great literary genius. The part he played in the history of the world will never be forgotten as long as men love liberty. Every people has the heroes it deserves. By idealizing our great men we but give expression to what we would like to be.

If one wants to understand the soul of the American people, let him study the heroes of America. And it is because of this that I join in paying tribute to one whose name will be associated forever with the struggle for liberty, with the struggle for the preservation of the Republic. Just imagine the state of affairs if we had two republics and two flags. Divided by a geographical line, each side with its own patriotism, each with its own prejudices against the other, each claiming that it was the better and it was the best, each fearing the other and arming against the other.

It was the saving of the Union, the emancipation of the chattel slave, that stirred all liberty-loving minds throughout the world into new action for liberty, and that struggle will go on forever. Mankind will never reach an ideal state, but shall ever strive for it. There is no finality in human effort, except perhaps in the grave. That is the only place where there is finality, and many believe that even there new life begins. To strive is to live. To live is to strive. Let us hold dear the name of Lincoln, for he represents the ideal of a great people. [Applause.]

Mr. Speaker, I ask leave to extend and revise my remarks.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

EXTENSION OF REMARKS—POSTAL CLERKS IN FRANCE.

Mr. COX. Mr. Speaker, I ask unanimous consent to insert in the RECORD a letter from the Second Assistant Postmaster General correcting a statement I made the other day on the floor of the House as to the number of postal clerks we have in France.

The SPEAKER. The gentleman from Indiana asks unanimous consent to insert in the RECORD a letter to correct his own speech. [Laughter.] Is there objection?

There was no objection.

HOUSING FOR EMPLOYEES OF SHIPYARDS.

The SPEAKER. The House automatically resolves itself into Committee of the Whole House on the state of the Union for the further consideration of the Alexander bill, and the gentleman from Virginia [Mr. SAUNDERS] will take the Chair.

Thereupon the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes, with Mr. SAUNDERS of Virginia in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3389. The Clerk will read.

The Clerk read as follows:

(d) To make loans to persons, firms, or corporations in such manner and upon such terms as it may determine from time to time to provide houses for the employees of such shipyards.

Mr. ROWE. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from New York moves to strike out the last word.

Mr. ROWE. Mr. Chairman, in the discussion which we had yesterday the bill which is before the House was very thoroughly explained. But there are just a few thoughts which I want to present to the committee in connection with shipping.

In the first place, at the beginning of the war in Europe in 1914 the world had in all kinds of shipping about 49,000,000 tons. In 1917, according to the last report we had from Lloyds, made in June, 1917, the world had about 45,000,000 tons of all kinds of shipping. In other words, in the two and one-half years the world had lost 4,000,000 tons, or about 8 per cent, of its shipping.

Now, prior to the starting of the war in Europe, in 1914, the world had been increasing its tonnage at the rate of about 5 per cent per annum, covering a period of 10 or 15 years. If that rate had continued, we would have 8,000,000 more tons of shipping added to what we had at the beginning of the war, so that there would have been about 57,000,000 tons of shipping in the world. That 8,000,000 tons, added to the 4,000,000 tons of actual loss, means a loss to the world at the present time of over 12,000,000 tons.

Now, prior to this war, to carry a given amount of freight between Europe and America, where the load was almost equally balanced, a certain amount of tonnage was required. In other words, the ship that left the United States or South America loaded for Europe returned from Europe to this country or to some South American port with an equal load. It required but a certain amount of tonnage to do that work.

Now, gentlemen, we have another situation. The freight is going but one way now. In other words, the ships leave the United States and South America loaded; they come back empty or almost empty. It takes twice as much tonnage to do the work with a one-way load.

Last year the shipping under the United States flag was about 6,000,000 tons and under the flag of England about 21,000,000 tons. In other words, our two nations had about two-thirds of the tonnage of the world.

The Shipping Board has let some contracts. Under the Denman administration contracts for about 252 wooden ships were let, and for 58 composite ships—partly wood and partly steel—and 70 ships of steel; and since Mr. Hurley became chairman of the Shipping Board they have let contracts for about 155 steel vessels. This total tonnage of ships in course of construction under the Shipping Board is about 3,123,000. It may possibly be 100,000 more at this present moment. The ships are in course of construction. Some will be finished this year, some will be finished next year.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from New York yield to the gentleman from Illinois?

Mr. ROWE. Certainly.

Mr. MADDEN. Does the gentleman wish to convey to the House the information that the 3,000,000 tons of ships for which contracts have been let will be only partially finished this year and that part of them will have to go over until next year without being finished?

Mr. ROWE. I do.

Mr. MADDEN. So that instead of building 6,000,000 tons of ships, as the Shipping Board has announced to the American people, we will build, as I assume from the gentleman's statement, only about 1,500,000 tons this year?

Mr. ROWE. I think it will be something more than that.

Mr. MADDEN. How much more than that?

Mr. ROWE. I should say we are going to build three or four million tons of ships.

Mr. MADDEN. When?

Mr. ROWE. This coming year.

Mr. MADDEN. You mean this year?

Mr. ROWE. Yes.

Mr. MADDEN. I understood the gentleman to say a moment ago that part of the 3,000,000 tons of ships which are under contract would not be completed until 1919.

Mr. ROWE. That is correct. That is true, because many of these contracts are let 20 or more to one company, and only half or a third of that number is now in course of construction. We are apt to think, when we hear that a contract is let, that the construction of the ships is going on. It does not necessarily mean that.

Mr. MADDEN. Yes; I know that. I was rather surprised to hear the gentleman make two statements as to what we are going to do; one to the effect that we have let contracts for 3,000,000 tons, part of which will not be completed until 1919, and another statement that we would be able to build close on to 4,000,000 tons in 1918. I wish the gentleman would explain that.

Mr. ROWE. Not all the ships now contracted for will be completed during 1918, but others I hope will be contracted for that will be completed during 1918.

Mr. WINGO. Does the gentleman intend to cover the probable amount of shipping that will be built by England?

Mr. ROWE. No; I do not.

Mr. WINGO. Does the gentleman have any data on the amount of shipbuilding being done in England?

Mr. ROWE. The English people have speeded up very much in the construction of merchant vessels. When the war broke out between England and Germany in 1914 they turned nearly all their attention to naval vessels, and kept that up for a time, but during the past year they have made a desperate effort toward the construction of a merchant marine.

Mr. WINGO. Has the gentleman information showing the amount of new shipping constructed by England this year and that which is in process of construction that will be finished this year?

Mr. ROWE. No; I have no data here. It will be under 3,000,000 tons, and will probably not much more than take care of the losses which they will incur during the coming year.

Mr. WINGO. Does the gentleman believe they will make good their losses?

Mr. ROWE. I hope they will make good their losses.

Mr. LONGWORTH. When the gentleman says "build a ship," does he mean actual completion?

Mr. ROWE. I mean the completion, ready for service.

Mr. FESS. Will the gentleman yield for one further question?

Mr. ROWE. Certainly.

Mr. FESS. In reference to the amount of tonnage lost, I understood the gentleman to say about 4,000,000 tons.

Mr. ROWE. Yes; the net loss between 1914 and June, 1917, was about 4,000,000 tons. The actual loss was much greater than that. There were destroyed something like 6,000,000 or 7,000,000 tons, but there was constructed tonnage enough so that the actual shortage was about 4,000,000 tons.

Mr. FESS. Do the gentleman's figures give the amount of loss since the ruthless submarine campaign started about a year ago?

Mr. ROWE. No; I have not the figures here.

Mr. FESS. I wish to get at just what progress Germany's submarine campaign is making. They claimed they would sink a million tons a month, which would be 12,000,000 tons in a year. They have fallen away below that, and this loss of 4,000,000 tons, as I understand, takes in all since the war began.

Mr. ROWE. That is about what the net loss has been.

Mr. FESS. In the opinion of the gentleman, is the submarine still a serious danger that we are confronting?

Mr. ROWE. The submarine will not stop commerce, but submarine warfare is a serious danger. The submarines will probably destroy as much tonnage as England can construct in the coming year.

I would like to go just a little further with what I was saying about the tonnage that is in course of construction and that has been taken over by our own country. We have requisitioned in the neighborhood of 458 vessels. Practically all of these were in course of construction for England. They amounted in tonnage to 2,871,000 tons. This does not add one ton to the shipping of the world. Had England remained the owner of these vessels, they would have gone into the commerce of the world as much as they will in the possession of the United States. We have commandeered about 400 vessels, about half of which were in the course of construction, and that tonnage amounts to 2,500,000 tons. We have taken possession of 117 German and Austrian vessels, amounting to about 700,000 tons. So that we have now taken possession of completed vessels or have vessels in the course of construction amounting to about 9,000,000 tons of shipping.

Mr. MADDEN. Will the gentleman yield there for a question?

Mr. ROWE. Certainly.

Mr. MADDEN. What proportion of the 9,000,000 tons is in actual service and what proportion is in course of construction? That has some bearing on the question involved in this bill, I should think. At any rate it has some bearing on the attitude of the American people.

Mr. ALEXANDER. Will the gentleman yield?

Mr. ROWE. Let me answer this question first. I can not answer it absolutely, but it is in the neighborhood of about 3,000,000 tons.

Mr. ALEXANDER. We have now under the American flag in the over-seas trade between 3,750,000 and 4,000,000 tons of shipping.

Mr. ROWE. But that is not all under the Shipping Board.

Mr. ALEXANDER. It is under the American flag, doing service for ourselves and our allies.

Mr. ROWE. We have about three and one-half million tons all told in the over-seas trade.

Mr. MADDEN. So that of the 9,000,000 tons to which the gentleman refers there are 5,000,000 tons to be accounted for?

Mr. ROWE. Yes.

Mr. MADDEN. That are not able to go to sea yet?

Mr. ROWE. Yes. The Shipping Board recently said they hoped to produce 6,000,000 tons this year. According to Admiral Bowles, we have or did have 180,000 men on the 1st of January working upon shipping. Possibly we may have now 190,000 or 200,000 men. No one can tell how much shipping 200,000 men will produce. In the old time they frequently spoke of a man producing a ton a month of shipping. Conditions have very much changed, especially in steel construction, and now it would be much higher than that if the men were capable men.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HICKS. I ask unanimous consent that my colleague may have five minutes additional time.

The CHAIRMAN. The gentleman from New York asks unanimous consent that his colleague's time be extended five minutes. Is there objection?

There was no objection.

Mr. MADDEN. I have information from expert shipbuilders which leads me to the conclusion that to build 6,000,000 tons of ships in a year would require 480,000 men.

Mr. ROWE. That is about the proportion.

Mr. MADDEN. So if we have only 180,000 men, it can be readily seen that we are not going to come anywhere near 6,000,000 tons.

Mr. HICKS. Will my colleague yield?

Mr. ROWE. Certainly.

Mr. HICKS. Is the gentleman prepared to state how many seamen are in training to man the ships launched in 1918?

Mr. ROWE. I am not prepared to state. I know we have schools in some parts of the country, but not near enough, I think, to provide the proper number of seamen.

Mr. HICKS. Does the gentleman care to say whether the crews should be naval crews or civilian crews?

Mr. ROWE. No; I am not quite prepared to take that position yet.

Mr. FARR. Will the gentleman yield?

Mr. ROWE. I will.

Mr. FARR. They are mobilizing an army of 250,000 men now in addition to those already in employment.

Mr. ROWE. That brings me to the thought that it is very easy to sit here in the House and talk about mobilizing shipbuilders. There are only a limited number of men that you can call shipbuilders. It is not like England and Scotland, where every man working on a ship is born and bred to the business; his father, grandfather, and great grandfather were shipbuilders, and there are an army of men in Great Britain who have served five years learning the trade and are ready to go to the work at any moment.

Mr. FESS. Will the gentleman yield?

Mr. ROWE. I will.

Mr. FESS. I want to ask the gentleman whether he wants to go into this particular phase of the matter. Recently we had a statement in one of the papers at Washington, purporting to be a comment by an officer in charge over in foreign waters, that so many of our sailors were of German extraction and German sympathy, and made some startling statements about how the appearance of a submarine was greeted, and so on. Does the gentleman have any desire to go into that thing? I would like to ask the question of somebody who is willing to make a statement.

Mr. ROWE. I should very much prefer not to go into that now, as it would take up all of my time. I should say that the chairman of this committee, the gentleman from Missouri [Mr. ALEXANDER], could answer that question.

Now, as I said, 180,000 men, or suppose there are now 200,000 men at this time, can not possibly produce more than 2,400,000 tons of ships. If we want more, if the men of this House and people of the Nation want more, we must go out and get these men. There are people in this country who say that they can not be had, but you must remember that shipping conditions have changed in this country. We have a body of men that are just fitted to build fabricated steel vessels. They are the structural steel workers of this country. They are the bridge builders of our Nation, and in that line, gentlemen, we have the men. I have seen a statement, on good authority, that the United States had a body of steel and iron structural workers equal to all of the rest of the structural iron workers of the world.

Mr. HARDY. Will the gentleman yield?

Mr. ROWE. I will.

Mr. HARDY. Is it not a fact that the shipbuilding, under this idea of fabricated vessels—that is, parts being assembled elsewhere—is rapidly undergoing a revolution, and that with the use of structural steel builders and this new method of building ships the production of ships may be greatly expedited?

Mr. ROWE. I hope the gentleman is correct. Not only have we the men who can do this work if we call them to it but we should stop building elevated railroads, subways, and bridges where not absolutely necessary to carry on the war.

Mr. FARR. What does the gentleman think of concrete ships and their possibilities?

Mr. ROWE. That has not been tried to any great extent, and do not let us make any change. We have made a change in the machine guns in this country with a great loss in time. We know what we can do with steel vessels; we know that we can construct them, and we have the mechanics to do the work. It is no time for experimenting.

Mr. FARR. I meant concrete ships in addition to steel.

Mr. ROWE. Well, we must construct all we can. I want to call attention to the fact that while it is possible that we can get the men it will take time to get proper men.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. MADDEN. I ask unanimous consent, Mr. Chairman, that the gentleman have five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROWE. Admiral Bowles when asked the question said:

I should say we ought to get along with in the neighborhood of 300,000 men, but, of course, a good deal depends on the individual efficiency of the men, and if that continues the way it is going now—if that continues the way it is going along now—I do not know how many we will need.

The fact is, gentlemen, we have attempted to build ships rapidly, and we have rushed men to the yards. Some of them are good men, many of them are very inferior, and some of no use. They must be sorted. We want only the best men. If in a yard where we have a thousand men four or five hundred of those men are inefficient you will not get the work you could get out of half the number of thoroughly competent men.

Mr. MADDEN. In other words, the standard of efficiency will be based on the efficiency of the man of least ability?

Mr. ROWE. That is true. Now, I am in favor of the bill that is before the House. I am a conservative. I never dreamed, prior to going into this war, that I could favor a measure of this kind, purely paternal, but we need the homes for the men and we should build them at once.

Mr. KREIDER. Mr. Chairman, will the gentleman yield?

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. ROWE. I yield first to the gentleman from Pennsylvania.

Mr. KREIDER. Mr. Chairman, I assume the gentleman is more or less familiar with the actual facts as they relate to shipbuilding, and I desire to preface the question that I wish to ask by saying this: Some time ago, in the course of conversation, a shipbuilder stated to me that in his opinion quite a number of vessels were delayed because, first, the Government contracted for ships at a set price and later contracted for ships on a cost-plus basis, with the result that a number of ships that were contracted for on a set or fixed-price basis are partially completed but can not be fully completed because the contractors are unable to secure the materials to complete them, due to the fact that the cost-plus contractor has come in and is paying as much as $20 and $30 a ton more for the steel, and from $20 to $30 a thousand more for the lumber, and from $1 to $5 a day more for the labor. The result is that the contractor on a fixed-price basis is practically helpless, because the man having the lumber is going to ship it to the one who pays from $20 to $30 per thousand more for it, and the man having the steel will ship it to him also because he gets from $20 to $40 per ton more. The result is a number of partially completed ships, a tying up of shipbuilding facilities. Does the gentleman know whether this is a fact?

Mr. ALEXANDER. Will the gentleman verify his own statement, and put it up to the Shipping Board? That would be the common sense way to get at it.

Mr. KREIDER. I think I can, but I wanted to know whether the gentleman from New York knows anything about it.

Mr. ROWE. I am not familiar enough with conditions to answer that question.

Mr. PARKER of New Jersey. Mr. Chairman, this question of housing and the question of labor go along together. We want 500,000 skilled laborers, and, with skilled laborers and machinists required in every kind of work, it is going to be very hard to get them—harder, even, to train them. I desire to relate to the House some personal experience that I have just had in that regard when I visited the shipbuilding yards on the Clyde, near Glasgow, where I found that at least half of the workers were women. They were so short of machinery in this skilled iron trade that very many of the machines came from my own home town—from Gould & Eberhardt and other machine toolmakers—and many from other parts of the United States; but in those yards, where they are making iron ships, they have trained women to manage the lathe, to manage the plane, to manage the punch, to manage the big cranes that move the material from one end of the yard to the other, and women were doing all except the actual heavy man work of putting material together after it was made.

Mr. SANFORD. Were they doing it well?

Mr. PARKER of New Jersey. They were doing it well; and I will say, for the benefit of those who talk about unskilled labor bringing down the amount done, that the work in those yards was all done by piecework. The old rule had been day labor, but in the stress of war the laborers of Scotland had patriotically agreed that they would do the fighting and that the older men would do the work, and that the old rules of the union should give way to the introduction of women into the work. It is a nation at war, and this is only one of the signs of its existence. They tell me that there are 2,000,000 more women in profitable employment in England now than there were before the war. I have not verified those figures. I have seen the cordite works at another place, 12 miles long, with three different factories, manufacturing that high explosive in its various stages, beginning with the manufacture of sulphuric and nitric acid as well as guncotton, from the raw materials, from cotton from Chilian niter and from sulphur that is burned in the furnaces—I shall not go into the details—bringing out at the other end cordite in little strings that look like brown vermicelli. This was by day labor. The work is too dangerous to allow haste. Thirteen thousand of the 20,000 people employed were women. That brings us to the problem in this bill. If we are going to put the Nation into the war in that way, whole families in certain cases will have to be housed in family apartments.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. PARKER of New Jersey. In a moment. Thousands and thousands of young girls have to be taken care of. It was a treat to find that that factory had been organized not by the old-fashioned military and naval authorities, but by mining engineers who had experience in America, in Chile, in Hindustan, in Australia, and South Africa, who had come there and seen the problem before them, as mining engineers do, who devised new means, and that, with respect to the girls, was this: There was established in front on the street a house of one story——

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

Mr. BUTLER. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. PARKER of New Jersey. In the front was the matron's room. The next room was the kitchen and the next room behind was the meeting and dining room. Back of that house and reached by short, covered walks extended three one-story dormitories, we will say, about 25 by 100 feet. I do not know the exact size, but they were large enough to give room on each side for 16 small cubicles or half shut-off rooms, 6 by 8, or so, where the girl had her bed and what little furniture she needed, and had decorated it as her own. There under this matron those 96 girls were taken care of. They were under strict discipline, though it was a smiling discipline, because they could not stay unless they obeyed orders. There was in that town a theater, a moving-picture place, and a hall and all that. There was a central kitchen that furnished 20,000 full meals a day, and 5,000 others, and supplied raw food to the whole host of those that did their own cooking, and the food was sent them on a small narrow-gauge railroad. This plant was a perfect *Great Eastern* in itself, except that it cared for 20,000, all under one control. If we get to this sort of work where we have to employ the unskilled and train them in that way in our shipyard towns and factories, or wherever it may be, we will have to employ the same talent to get the same results and have the same special sort of houses. Therefore I am in favor of this bill. I now yield to the gentleman from Indiana.

Mr. COX. I want to ask the gentleman this question. In reading the hearings on this bill from Admiral Bowles, it seems he opposes the idea of working treble shifts, at least he is opposed to the idea of working at night. What were they doing over in England when the gentleman was there? Were they working in several shifts or working after night in the shipyards?

Mr. PARKER of New Jersey. I am not quite able to answer that question, for I was not there after nightfall, but I am inclined to think that in some parts they were, but I am not sure. I am only saying that is the mass of workers that they were getting, and if you have enough room there you can employ all during the daytime and do not need work but one shift. However, I do not know.

Mr. COX. I want to ask the gentleman—it strikes me that we should do something with this labor problem. I see by this morning's press dispatches that they are on strike in the city of New York again, demanding an increase from $5 to, I think, a day to something like $6 a day. Does not the gentleman think something ought to be done somewhere at some place along the line of stabilizing the price of this labor?

Mr. PARKER of New Jersey. I am only telling what I have seen. I have no opinion to give, except to say that I know from the newspapers only what was published, that there are strikes in some parts of England. But I know also that in those places which had the organizations I have seen there was not only no strike, but the workmen, men and women, were willing to do their work by the piece. Gentlemen, I thank you.

Mr. FESS. Will the gentleman yield for one question?

Mr. PARKER of New Jersey. Certainly.

Mr. FESS. Are we to understand from the facts the gentleman has given that we would espouse the plan of working the women of the country in these shipyards?

Mr. PARKER of New Jersey. I have no desire that any such thing should be done at all. I am only speaking of the hard necessities of war. When your men have gone to war and you need workmen for your trades you must take them from the patriotism of this country wherever you can find it. I hope that necessity will not fall upon us; if it does, I hope and know that America will respond. [Applause.]

Mr. ALEXANDER. Mr. Chairman, I understand there are to be some amendments offered to these paragraphs, and I ask the Clerk to read the next paragraph, so we can get on.

Mr. ROBBINS. Mr. Chairman, I have an amendment to this paragraph pending.

Mr. SHACKLEFORD. Let us vote on it.

Mr. ALEXANDER. Let it be read. I would like to make some progress with the bill.

Mr. ROBBINS. I asked for recognition before, but could not get it.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 4, line 21, after the word "houses," insert the words "or furnish or aid in furnishing transportation facilities."

Mr. SABATH. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman from Illinois reserves a point of order.

Mr. ROBBINS. Mr. Chairman, this bill in the first subdivision (a) proposes to authorize the purchase or lease or acquisition of land improved and unimproved. In (b) it proposes to authorize the construction of houses on the land, and in paragraph (c) it proposes to authorize the acquisition or lease of houses or buildings, and in this paragraph it proposes to make loans to firms or corporations wishing to construct these houses. Now, last summer I made a journey from Philadelphia to Essington, where the Navy has established a hydroplane station; that is some 10 miles down the Delaware River, and I saw that the whole of the land along the river is taken up with buildings or factories of one sort and another. There are three lines of communication between this section and the city of Philadelphia—the Pennsylvania Railroad, the Baltimore & Ohio Railroad, and the street car line, and there is another, the Delaware River. I found these workmen employed in these manufactories journeying up and down to this point by these means——

Mr. EDMONDS. I would like to say the Reading Railroad, also.

Mr. ROBBINS. The Philadelphia & Reading Railroad had a branch; I did not know it carried passengers. Now, here is a proposition contained in this bill which is to erect houses to accommodate these workmen who are to be employed at Government shipbuilding plants and at the private plants located at Chester, Bristol, and Hog Island, which are owned by private companies. Now, it is going to cost the Government a lot of money to build these houses, and it is known all over the world that the city of Philadelphia is a city of homes, where the mechanics, working people, trades people, and people engaged in the great industries own their own homes. The laws of Pennsylvania have fostered and encouraged the building and loan associations so that it has been made possible for those people to acquire their homes upon monthly payments. Now, they live in the city of Philadelphia. They are attached to their schools, their churches, and neighborhoods, and what I propose by this amendment is to authorize this emergency corporation, to whom we are giving these large powers, to have one additional power—that is, to help the street railroads and the railroads and the river navigation, if necessary, by double-tracking those roads and increasing their facilities of the transportation of people down there to work in these industries, in which case I see no necessity for building these houses, because most of these men now own their own homes.

Mr. MADDEN. Will the gentleman yield?

Mr. ROBBINS. In just a moment. Because if we build these houses, it is going to take all summer, and we have learned in this debate that if there is any scarcity greater than another it is the scarcity of building material. Therefore the proposition I propose in this amendment is not to spend money on houses and incur the great delay incident thereto, but to improve the existing transportation facilities and take the men from the houses they already have in Philadelphia, from that great reservoir of skilled labor, the greatest in the world, and carry them down to these shipyards.

Mr. MADDEN. The gentleman, in a sense, proposes to commandeer the transportation facilities, does he not?

Mr. ROBBINS. No; I do not propose to commandeer them. I propose to allow the Government to double track that little street railway that I went down on, that gave service every 20 minutes on that hot July afternoon, and put on there a service every minute in the morning and evening, with trailers, so the workmen can go down there to work. Take the railroads that are running a few trains per day now and aid and improve their tracks to carry part of these men down there by railroad, and the Government would have not only security for every dollar it invests by liens on this railroad but would not waste money on houses of a temporary character.

Mr. MADDEN. Does the gentleman make any provision in his amendment for the return of the money advanced for the improvement of transportation facilities?

Mr. ROBBINS. No; I do not; because that is a business proposition. The money is to be a loan to these companies only. This Emergency Fleet Corporation has power in this bill to sell houses, to exchange, lease, and condemn, and it certainly would have the right to improve the tracks of these railroads or to put a boat on the river.

Mr. MADDEN. Would it still have the right to sell the tracks after it built them?

Mr. ROBBINS. It has the right to sell the real estate.

Mr. MADDEN. I do not think so.

Mr. ROBBINS. Yes. In the paragraph last above it has the right to purchase, exchange, sell, and lease land, fixtures, buildings, or furnishings. What broader power can any company have than that?

Mr. LENROOT. That refers to houses only.

Mr. ROBBINS. That is true.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. Mr. Chairman, I ask unanimous consent that the gentleman have five minutes more.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the gentleman from Pennsylvania have five minutes more. Is there objection?

There was no objection.

Mr. LEHLBACH. Will the gentleman yield?

Mr. ROBBINS. Yes.

Mr. LEHLBACH. Your amendment authorizes the shipbuilding corporation to lend money to trolley companies or other transportation companies?

Mr. ROBBINS. Aid them in furnishing transportation, yes.

Mr. LEHLBACH. Now, the Emergency Fleet Corporation, as a matter of fact, is negotiating in various parts where they have yards for improved transportation facilities. Now, I ask the gentleman this question: What prospect would the Emergency Fleet Corporation have to induce a transportation corporation to improve is facilities if the corporation knows that the Shipping Board is authorized to lend it the money to do it? Would there be any development on the part of the corporation itself, or would they sit still and say, "You give us the money"?

Mr. ROBBINS. No. I am speaking about a situation with which I am personally familiar. I am told there are 22 new corporations along the Delaware River below Philadelphia that have gone into various activities largely devoted to material for this war. There is the great Westinghouse plant, right near Essington, and there are these three shipyards, the Baldwin plant, and many others.

Now, in answer to the question of the gentleman from New Jersey [Mr. LEHLBACH], with that great population gathered there, while it is true it is devoted to war now, these people will always live there, and the Government investing money in these transportation systems will be investing money in aid of enterprises every dollar of which it is sure to get back into the Treasury of the United States. And in the debate all through this bill and in the report of the committee on this bill, I appeal to you as a business proposition, it is asserted and stated that the money that will be put in these temporary houses will be wasted, because after the war is over there will not be any value to them, or they will be of such a temporary nature that in a few years they will be gone, inasmuch as they may be built of stucco or of lumber, like these cantonments. The proposition here is to aid the Shipbuilding Board in the very thing it wants to do, namely, putting the workmen down at these shipbuilding plants quickly and accomplish the construction of the ships.

Mr. LINTHICUM. If the gentleman will permit, I think that the great difficulty would be in getting the cars to put on these railways. You may establish a schedule, but you will have to have the cars to carry the people. The Washington, Baltimore & Annapolis Railroad, on which they established Camp Meade, is willing to pay any price for cars, but they can not purchase them.

Mr. ROBBINS. If you can not get a few railroad cars, how can you build houses?

Mr. LINTHICUM. You can get a house quicker than you can get a railway car—a whole heap quicker.

Mr. STAFFORD. Has the gentleman from Pennsylvania made any inquiry as to whether the present interurban railway, operating to the south of Philadelphia along the Delaware River, has any difficulty in acquiring additional funds to increase its rolling stock and trackage?

Mr. ROBBINS. I have made no inquiry about that. I traveled over the road, and can say this, that the facilities were exceedingly meager.

Mr. STAFFORD. Has the gentleman further advice in regard to the territory south of Philadelphia, as to whether the interurban company at different points is at present making permanent improvements with the purpose of widening the roadway

so as to give better accommodations to that rapidly growing section?

Mr. ROBBINS. At the time I was there the service was both irregular and at long intervals.

Mr. STAFFORD. I will say to the gentleman that I have traveled on occasions between Philadelphia and Washington, and I have noticed the improvements going on in the way of concrete bridges and the like between Wilmington and Philadelphia, for the purpose of widening the trackage and giving, I assume, additional conveniences in interurban communication.

Mr. BUTLER. Where did the gentleman see this? From the car windows?

Mr. STAFFORD. I did.

Mr. BUTLER. I can measure the ground for you. That is where I live.

Mr. ROBBINS. I got on this car in the subway at the Broad Street Station and traveled down to Essington. I did not notice any such improvements.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ALEXANDER. Mr. Chairman, a point of order has been reserved on this amendment, and I think unquestionably the point of order is good. If the gentleman from Wisconsin intends to insist upon it——

Mr. STAFFORD. I do so intend.

Mr. LINTHICUM. Mr. Chairman, I would like to have five minutes on it.

Mr. ALEXANDER. I will say this to the gentleman from Maryland, that the Committee on the Merchant Marine and Fisheries had this whole question under consideration, and we concluded that if it is desirable to give the board the power to purchase cars or otherwise to improve the transportation facilities it ought to be done in the proper and comprehensive way; and after considering the question the committee concluded it ought to be considered in a separate bill. For that reason the provision was not incorporated here.

Mr. BUTLER. Is it being treated separately?

Mr. ALEXANDER. I will say to the gentleman that there is a bill pending on the Senate Calendar now on that very question, and it may come to us at any day.

Mr. BUTLER. It is coming to the gentleman's committee?

Mr. ALEXANDER. I do not know.

Mr. BUTLER. I know it will have careful attention if it comes to the gentleman's committee.

Mr. ALEXANDER. If it comes to the Committee on the Merchant Marine and Fisheries it will receive proper care and attention.

Mr. BUTLER. Mr. Chairman, will the gentleman from Wisconsin withhold for a moment?

Mr. STAFFORD. Yes; I will withhold the point of order for a moment.

Mr. ALEXANDER. I may add that Admiral Bowles, in a telegram to me on Saturday, emphasized the necessity for legislation giving the Emergency Fleet Corporation power to commandeer these transportation facilities where they could not secure proper arrangements with the lines, and also to supply additional transportation facilities. When I received that telegram I took the matter up with Senator FLETCHER, chairman of the Committee on Commerce in the Senate, and urged him to have that bill passed through the Senate as speedily as possible. Since then I have received advices from Admiral Bowles stating that he had also wired Senator FLETCHER, urging the passage of the bill.

Mr. BUTLER. Mr. Chairman, of course, I know this country quite well; it is where I live. And, if my word is worth anything at all, I state it here that some better accommodations will have to be furnished to workmen in this vicinity. I do hope the measure will come before the committee of which the gentleman from Missouri [Mr. ALEXANDER] is the chairman. Unless some help will come from some source as big and strong as the Government, we will not be able to move our people there or away from there. Soon there will be no shelter for them. It is impossible now, with the small facilities we have, to move the workmen back and forth.

Mr. COX. What will be required, in the gentleman's opinion?

Mr. BUTLER. More railroads—more steam roads, more electric roads.

Mr. COX. Which would be the better?

Mr. BUTLER. I can not tell you that. But it is impossible to move the people without better facilities.

Mr. COX. How far is it?

Mr. BUTLER. Why, gentlemen, it is one continuous plant from Philadelphia 12 or 15 miles down the river. The steam railroads can not furnish the necessary facilities. I believe that most of the accommodations will have to come from electric roads. Assistance will have to come from some direction, and that very soon.

Mr. ALEXANDER. I hold in my hand a provision which, if enacted into law, would give the desired relief.

Mr. COX. If they had better transportation facilities, such as the gentleman from Pennsylvania has outlined here—better railroads—would that obviate the necessity of building these homes?

Mr. BUTLER. No. We should have them both. You can hardly conceive of the transformation, you might say, on the face of that part of the country. Some one spoke of the enormous factories that have been established there recently. There are 14,000 men employed in one concern alone, and that is the Remington Arms Co.; and alongside of it the Baldwin Locomotive Works is employing 20,000 men. I recall five years ago, when there was no place provided where workmen could live. I think of this busy community working in a factory nearly 20 miles in length fighting to reach their work and struggling to reach their homes in the evening.

Mr. COX. Where do they live now?

Mr. BUTLER. In my direction—up and down the river. There is the Westinghouse plant, about to employ 15,000 or 20,000 men. We do not know where the workmen are to live and how they are to reach the place or even bring with them the commodities of life. But I must not ask the time of this committee to describe the development of this part of our country. We all know of it. Nowhere on the earth's surface has there gathered so many industrial giants. The force and activities of a hundred thousand men will soon be employed here.

The chairman of the Committee on the Merchant Marine and Fisheries has made his promise, and I believe that promise will be made good and that the facilities will be supplied, and that this section of our country will have the attention of the Government.

Mr. STAFFORD. Mr. Chairman, we all recognize the need of transportation facilities everywhere, and particularly in that great industrial belt to the south of Philadelphia, down as far as Wilmington. I am not acquainted with what is being done by the Pennsylvania Railroad to relieve those conditions, but we know that the Pennsylvania Railroad has equipped electrically some of its lines leading out to the suburbs west and northwest of Philadelphia, but whether it has made provision for such interurban traffic to the south I am not advised. I am not particularly advised as to whether river accommodations by means of the Wilson Boat Line, plying between Philadelphia and Wilmington, with their 22-knot steamers, will meet the difficulty in the solution of this question, but I am convinced that this is too important a subject to be thrown into this bill without the deliberate consideration of the committee, and therefore I make a point of order against the amendment.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman reserve his point of order for a moment?

Mr. STAFFORD. Yes; I will reserve it for a moment.

Mr. MOORE of Pennsylvania. In support of what the gentleman from Wisconsin has said, and this is also supporting the gentleman from Missouri [Mr. ALEXANDER] as well, I desire to say that the Emergency Fleet Corporation does have plans covering the question of transportation. I have a letter from Mr. Piez, the general manager, on that point. He says:

> It is our intention to materially improve the transportation facilities.

One reason why he does not go into the plans is that legislation is necessary to enable them to fully announce their plans. They do not care to give out, in advance of legislation and congressional authority, these particular details. But the gentleman from Pennsylvania [Mr. EDMONDS], my colleague, in his statement yesterday, said what is the fact that the city of Philadelphia is cooperating in this matter and large amounts of money will be given in behalf of the city to develop these improvements. They will include water supply, sewerage, and municipal improvements of other kinds.

Mr. STAFFORD. Mr. Chairman, I make the point of order that the amendment is not germane to the purpose of this bill.

Mr. LINTHICUM. I ask the gentleman to withhold his point of order.

The CHAIRMAN. Does the gentleman from Pennsylvania [Mr. ROBBINS] desire to discuss the point of order?

Mr. ROBBINS. Mr. Chairman, I think it is quite germane to the purposes of this bill. That is the point the gentleman raises; that it is not germane to the purposes of this bill?

Mr. STAFFORD. That is the only point that can be raised.

Mr. BUTLER. Read the title of the bill.

Mr. ROBBINS. That would be all right in Pennsylvania, but the title of the bill is no criterion to what a bill here in Congress contains.

The amendment that is offered is to enable this Emergency Fleet Corporation to assist in furnishing transportation for these workmen. In the bill it is provided that this corporation is authorized and empowered to do as follows:

(a) To purchase, lease, requisition, or acquire, by condemnation or otherwise, any improved or unimproved land or any interest therein suitable for the construction thereon of houses for the use of employees of shipyards in which ships are being constructed for the United States.

(b) To construct on such land houses and all other necessary or convenient facilities, upon such conditions and at such price as may be determined, and to sell, lease, or exchange such houses, land, and facilities upon such terms and conditions as it may determine.

(c) To purchase, lease, requisition, or acquire, by condemnation or otherwise, any houses or other buildings, together with the land on which the same are erected, or any interest therein, and all necessary and proper fixtures and furnishings therefor; to manage, repair, sell, lease, or exchange such lands, houses, buildings, fixtures, and furnishings upon such terms and conditions as it may determine to carry out the purposes of this act.

(d) To make loans to persons, firms, or corporations in such manner and upon such terms as it may determine, from time to time, to provide persons for the employees of such shipyards.

Now, it is true that these various provisions seem to refer to houses and lands and the acquisition of houses and lands; but the purpose of this bill is to aid in the acquisition of these houses and lands by purchase, requisition, or condemnation, as we have heard all through this debate; that is, for the purpose of furnishing housing for the men who work in the shipyards. That is the ultimate purpose of the bill. We must take a broad view of it and look at what it is to accomplish. It is not a criminal statute that must be construed strictly. We are to construe it within the meaning and spirit of the law and the evil that is to be remedied, viz, lack of workmen. Now, one of the things we want, and the purpose is, to get men for these shipyards. If the transporting of these men will get them there as well as the housing of the men at the plants, then any means of taking them there would be as pertinent to the purpose of this bill as the building of a house at the plant. That is the purpose of this amendment; it is to authorize this Shipping Board either to house the men there or to bring them there by the aid of transportation lines.

The CHAIRMAN (Mr. SAUNDERS of Virginia). This bill is a housing bill. First: It authorizes the Emergency Fleet Corporation to acquire land by purchase, condemnation or otherwise. It contemplates the acquisition of land and the erection of structures on the land so acquired, whether by purchase, or condemnation: Second: It authorizes the disposition by the Fleet Corporation to lease, or sell on agreed terms to the shipwrights, or workers in the yards, the property that this act authorizes the corporation to acquire. It seems to me it must be manifest that an amendment which contemplates aid to, or the possible construction of railroads, is not germane to the manifest purposes of this bill, which are confined to affording certain definite housing facilities to the men who are to work in the shipyards. The Chair thinks the amendment is clearly out of order, and the point of order is sustained.

Mr. LENROOT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LENROOT: Page 4, line 19, after the word "loan," insert "upon adequate security."

Mr. ALEXANDER. I have no objection to that amendment, Mr. Chairman.

Mr. LENROOT. I do not care to debate it if it can be accepted.

The CHAIRMAN. The question is on the adoption of the amendment offered by the gentleman from Wisconsin [Mr. LENROOT].

The amendment was agreed to.

Mr. MADDEN. Mr. Chairman, I can realize very well how in order to be able to construct ships which we need for the work we have to do we must construct the vessels where it is possible to move them to the sea; but I can conceive of a condition that might easily be worked out by those in administrative authority, so far as the letting of contracts for other purposes is concerned, so that all the congestion that we hear about might be avoided and no additional transportation facilities become necessary and no additional housing facilities be needed. It seems to me if the men who sit up the Avenue and have the power to determine to whom contracts shall be let would make a survey of the country, and as a result of that survey obtain information which would lead them to let contracts throughout the country, instead of two or three States of this country, all the difficulty that we are called upon to overcome would be met and vast sums of money would be saved to the Treasury. In addition to that we would have an efficiency 50 per cent greater than we have to-day. Our output could be largely increased in all lines. Contracts could be let for less money. The employment of men would be distributed all over the United States. Factories would not be depleted of the men they have now employed because of the necessity of bringing them to a central point somewhere. The industrial activities of the country would be conserved. Men would be enabled to work where they have been accustomed to work in all the great industrial centers of the country. As it is to-day contracts are let to only a few men in a few places. I do not suppose anything I say will have any weight with those who are charged with the responsibility of letting contracts. I wish I might be able to do something that would have weight with them. I think they ought to use their brains in the study of the question, rather than use their influence to favor friends, more of which I fear is being done than ought to be done for the good of the country. We are supposed to be fighting a war in which every American is engaged, but it is only a few of those Americans to whom favors are being granted. There ought not to be any favors granted to anybody. The burden ought to rest upon all alike, and the Treasury of the United States should be given some consideration by these men who are sitting in executive places with power to let contracts. We have a number of States in which it is possible to manufacture everything that is needed for the war. Many of these States have not been given any contracts at all, yet they are all called upon to pay the taxes. While the contracts are being let to a few people in a small area the people in other sections of the country are looking for employment. It is not right; it is not just to the war; it is not just to America; it is not just to the men who have volunteered to fight at the battle front. There ought not to be any discrimination anywhere. The attitude of the administration, or of those who speak for the administration in every activity, ought to be such as to be beyond criticism.

Mr. WHITE of Maine. Mr. Chairman, a newspaper article has just come to my hand that is so pertinent to the subject matter under discussion that I want to read into the RECORD a few paragraphs from it. It is from the pen of L. C. Bateman, one of the veteran newspaper men of Maine. It appeared in the Lewiston Evening Journal of my home city and deals with the shipbuilding conditions in the city of Bath. Here are located the yards of Kelly & Spear, Percy & Small, the Texas Steamship Co., the Bath Iron Works, and other plants, all working to their present capacity, all capable of greatly increased productivity, all needing men and further housing facilities. I read as follows:

If "ships, more ships" is the cry from England and France it is reechoed in this little city by the sea.

And to this is added the cry of "homes, more homes."

What to do with the people now working in her yards has become a burning issue in Bath. And more and more men are wanted, but where, O where, can they be housed? Already every house in the city for rent is taken and the cry is for more. The Texas Co. has already built nearly 60 houses for their workmen and will soon build many more. These are taken as quick as they can be finished, but apparently the demand is not lessened. It is an evergrowing problem for which, as yet, there is no complete solution.

Nobly the citizens of Bath are rising to the occasion. Homes of the rich are being opened to the common laborer and in this way the owners are doing their bit for the country.

Bath itself is the center of an area rich in ship lore and tradition. Only a few miles from this city was launched the first vessel built in an American yard to cross the Atlantic. A few miles eastward is the village of Damariscotta, the home of the *Flying Scud*, a sailing vessel maintaining for 24 hours a speed of more than 19 knots an hour, holding to-day, and in my judgment for all time, the blue ribbon of the sea. In Bath in 1762 was built the *Earl of Bute*, the first vessel of her class launched in the United States. Here in this same city there took the water the first American vessel sent to her grave by the wanton hand of Germany. For a century and a half the skill of her builders, the courage and the resourcefulness of her sailors and her skippers have carried the name and the fame of this little city by the sea to the four corners of the earth.

Her past, and her busy present, make a call to me for the enactment of this legislation, which I could not fail to hear even if I would. [Applause.]

Mr. GOOD. Mr. Chairman, a few days ago there appeared in the papers of Washington an interview with one of the officials of the Shipping Board criticizing the labor situation. I will not read all the criticism, but ask to insert it in the RECORD:

SHIPBUILDING SUCCESS DEPENDS ON UNITED STATES WORKERS, PIEZ ASSERTS IN APPEAL.

Responsibility for the success or failure of the Government's shipbuilding program was put on labor to-day by Charles Piez, vice president and general manager of the Emergency Fleet Corporation, in an appeal for shipyard workers.

"The Shipping Board has the necessary yards, the materials, and the money," he said. "All that is lacking is a spirit in the Nation that will send a quarter of a million American mechanics into the yards to give the best and most efficient work."

The fact that shipyards are working only one shift six days a week was characterized by Mr. Piez as "monstrous."

"If we are to keep ahead of the submarine campaign," said he, "we must run three shifts a day 52 weeks in the year." Mr. Piez's statement follows:

"Within 60 days huge Government yards will be completed, and soon thereafter more than 60,000 workmen will be required to furnish for them the three eight-hour shifts necessary if these yards are to turn out their ships according to schedule.

HAS 716 SHIPWAYS.

"The Shipping Board now has 716 shipways, 302 are for wooden ships and 414 are for steel construction.

"The yards in which they are established are working only one eight hour shift per day, six days a week. This is monstrous. If we are to keep ahead of the submarine, we must run three shifts per day 52 weeks in the year.

"Our program calls for the construction in 1918 of eight times the tonnage delivered in 1916, at a cost of more than a billion dollars. The Shipping Board has the necessary yards, the materials, and the money. All that is lacking is a spirit in the Nation that will send a quarter of a million American mechanics into the yards to give their best and most efficient work.

"I am sorry to say at the present time the native-born American workman is not the mainstay of the shipyard, for he is there only to the extent of 35 per cent of the men employed, and to the extent of 65 per cent we are forced to depend on foreign-born labor.

"We all honor the men in uniform and the same honor must be given to the men who go to work in the yards. Just as the Navy is the first line of the British Empire, and just as Germany depends upon her submarines, so must America depend for victory upon the shipbuilders in the American yards. To the women of America I say: 'Send your men to the shipyard, for they will be doing there no less a service than in the Army or the Navy, and they will be returned to you safe and well paid, after having performed a duty that is a primal necessity of this war.'"

The interview, it will be observed, concludes with a statement that cast a reflection on the patriotism of the workingmen of America. Mr. Piez has only recently become a member of the board. I do not believe he knew the facts, for if he did he would not have made that statement. He is too big and too fair for that. Last summer when the building of some of the cantonments was completed, and one to which I have reference at Camp Dodge in Des Moines was finished, there were a great many carpenters thrown out of employment. I received, as did other Members of the House from my State, a great many requests from such laborers for work in shipyards, because newspapers had carried notices that the Shipping Board required a great many ship carpenters. On making inquiry I was referred to the Bureau of Labor, and the Bureau of Labor referred me to its office at St. Louis. I wrote the director there, and I have a letter written by the acting director at St. Louis, written to a man for whom I made some inquiry, in which he says, "You are informed that Mr. A. Pelsang, Miami, Fla., wants two ship carpenters at 50 cents an hour; the Miami Yacht & Machine Works, same place, wants six ship carpenters at 62½ cents per hour; George J. Pilkington, same place, wants six ship carpenters at 62½ cents an hour. You should first correspond with these gentlemen before proceeding to the work."

Now, it is monstrous that this board has but one shift per day in February, when on the 20th day of November from the bureau of the Government intrusted to find these men it only knew of 14 places in the United States where ship carpenters were wanted.

That is not all; I tried to follow the thing up a little further and secure work for these carpenters, and I wrote to Mr. King, who is in charge of the Department of Labor Employment Bureau. He wrote under the date of November 20. His letter is very illuminating and a part is as follows:

ST. LOUIS, MO., *November 20, 1917.*

Hon. JAMES W. GOOD, M. C.,
Cedar Rapids, Iowa.

SIR: I have the honor to acknowledge the receipt of your letter of the 14th instant, in which, speaking of the matter of employment in the Government shipyards for ship carpenters, you state:

"Carpenters in this part of the country will be glad to accept employment if some reliable information can be furnished. I must confess that the information that has come from your office is not of the character that would warrant a laboring man to accept employment through your agency."

I must say that I, too, am not at all satisfied with the very meager information I have been able to obtain with regard to employment for ship carpenters. Almost daily I see notices or items in the newspapers to the effect that the building of ships is being greatly hampered by the scarcity of labor of one kind or another, and this office is using its best endeavor to get some definite information in the premises. To that end several weeks ago I addressed the following circular letter to the officers in charge of the United States Employment Service at every point in the United States where I understood shipbuilding to be in progress or is supposed to be in progress:

"From time to time the newspapers contain items to the effect that the building of wooden ships is being badly hampered by reason of the shortage of ship and other carpenters. Now, this office has a list of 52 ship carpenters and another of more than 1,400 house and general carpenters. If such are needed in your zone, and you will give me information as to the cities where needed, the approximate number of men required, the persons or firms to whom application for employment should be made, wages offered, price of board and lodging, whether or not transportation will be refunded, probable length of the job, and any other information that you think may be of interest to prospective applicants, I will undertake to pass the information to these carpenters. Information of a general character that is not specific, and especially that which does not indicate the wages to be paid, will be of but little value, as men can not afford to leave jobs that pay fairly well without knowing that they will get something that will justify the change."

In response to the above, we are just now getting a little information which is of a more definite character, as noted below:

Our office at Jacksonville, Fla., reports that for various reasons only a few ship carpenters can be used in that district at this time, specifying the builders to whom applications may be made, the number each can use, with pay per hour.

The office at Mobile, Ala., reports that it is awaiting information from the various shipyards in the district as to just what labor they will need, and as soon as the information is obtained, which will be within the next 10 days or 2 weeks, the matter will be taken up again and we will be advised just how far we can assist in furnishing the help required.

The office at Baltimore, Md., reports that only a very small number of ship carpenters can be placed at this time in Baltimore and vicinity, that transportation will not be advanced, and that it would not recommend any men coming to that point now, but adds there are two concerns which will need a large number of men in the course of the next 90 days, just as soon as their yards are completed, at which time the St. Louis office will be advised.

The Philadelphia office reports having all the ship or other carpenters needed in that district at the present time.

The Galveston office reports that a number of men of various trades are coming into that district from the different cantonments which have been completed, and that, while there is some demand for ship carpenters, carpenters, calkers, riggers, etc., labor troubles are anticipated, so that it will not be well to direct men to that district for a while.

The San Francisco office reports opportunities for less than 100 ship carpenters and some 200 boat builders, but say it is difficult to secure accommodations in the shipbuilding district, especially for men with families; also that advance authority should be secured before men proceed to that point for work.

The reports we have from other offices are of a similar character, all tending to show that there is not just at this time nearly so great a scarcity of labor as is indicated by the newspaper items. It is the experience of this office that in every case where reasonably good wages are offered, conditions being normal, there is no trouble whatever in getting a sufficient number of men to fill the plants.

Mr. King concludes from his investigation that the Shipping Board does not need any ship carpenters. The trouble is there was no teamwork between the Shipping Board, that wanted men, and the Department of Labor, that was intrusted to secure these men.

And now to show that there was no coordination at all between the Department of Labor and the United States Shipping Board I have but to read from the letter of Chairman Hurley, addressed to me under the date of November 20, in which he says:

There is now being developed a special shipyard employment service in connection with the Department of Labor and the Shipping Board. * * * There is a very great need for skilled mechanics—

and I am referred to another governmental agency by the chairman of the Shipping Board.

Why, think of it. Here is an officer of this organization now claiming that they have only enough men for one shift of eight hours a day and need enough for three shifts, and that it is monstrous because they can not get the labor. During all this time the Shipping Board had intrusted to the Department of Labor, for which we make large appropriations, the matter of securing labor for them. The Labor Department as late as the 20th day of November last had not received from the Shipping Board any request for ship carpenters at all. The situation is this: The Shipping Board greatly needs a large number of ship carpenters. The Department of Labor is given the task of getting the men. The Department of Labor says there is no demand for ship carpenters. The Shipping Board says ship carpenters are greatly needed and that it is monstrous that they do not respond.

Now, I have no sympathy at all for these men who are organizing to strike at this time under prices paid in these yards. Neither have I any sympathy for that department of the Government, or for an organization in the Government that seems to have been asleep for eight months and that has not attempted to secure its employees through the agency that it selected—has not attempted to secure the men which it claims to need, and now comes in after eight months and lays all the blame of its own dereliction upon the carpenters of the United States. I say it is unfair, and it ill becomes the Shipping Board to make these charges in the public press when the real dereliction is found in the Shipping Board itself.

Mr. ALEXANDER. Mr. Chairman, I think the gentleman from Iowa has gone far afield to criticize the Shipping Board. As I read that interview the other day the only fact in it that impressed me was the claim on the part of the person interviewed that we did not have enough men in the shipyards to work three shifts a day. Admiral Bowles, when he appeared before the committee, said it is not practicable to work three shifts a day in building ships. You can work three shifts in a factory where the engines are built and you may work three shifts where fabricated parts are made, but in the construction of the ship itself—the riveting of the plates, and so forth—he

says that the work is too hazardous to be done in the nighttime, no matter how good the artificial light may be. He gave it as his opinion that it would not be practicable to work men three shifts a day in that department of ship construction. This criticism has been made as applied to labor: On account of a large increase in the price paid for labor, the increase in the wage, there is a disinclination on the part of the men to work six days in the week, and there is a disposition not to work as hard as they might during the hours of labor. In other words, there is a disposition to get more men on the job and do less work, and they—contractors or builders—are not able to develop that high degree of efficiency that is desirable if we are going to speed up our shipbuilding program and turn out as many ships as we might if every man on the job does his best. How far that is true, I would not undertake to say; but the attitude of labor in this country, speaking of labor as a whole, has been patriotic, and I think as time goes on the workmen in these different plants, whether shipbuilding or munitions or other plants, will realize the necessity for intense individual efforts to speed up and to develop the highest degree of efficiency, and they can not express their patriotism in a more wholesome or practical way than by every man doing everything in his power during the hours of labor, for the wage he is getting, to give the Government the best possible service and do his part to turn out as many tons of ships as is possible. Now, answering the criticism of the gentleman from Iowa [Mr. GOOD], I may say comparatively few carpenters are used in constructing steel ships. The labor situation on the Pacific coast and in the South, where large numbers of wooden ships are being constructed, is not so acute as in the steel-ship industry, if I understand the facts right. I am glad to know it, if it is a fact, that there are enough carpenters for all purposes in the building of steel ships and the building of wooden ships, but I do not see where we are going to get by this carping criticism of every activity of the Government.

That certainly will not help us along. I do not think the Shipping Board is subject to this criticism. I am sure that Chairman Hurley is doing everything in his power possible to speed up this shipbuilding program, and Members of Congress can do much to help him if they will go to Mr. Hurley and state to him the facts within their knowledge, and if there are abuses, if there are defects in administration, if there is waste, I think you will find him ready in every possible way to correct the abuses, remedy the faults in administration, and to correct the waste. [Applause.]

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. Yes.

Mr. TOWNER. I would like to ask the gentleman if he would state to the committee what particular plans have been formulated for securing the labor of the fabricated steel workers in the United States? That is the branch of the labor most needed, and I would like to have the gentleman state, if he can give us the information, what steps are being taken to secure that labor.

Mr. ALEXANDER. If the gentleman has read the papers in the last few days, I think he will have noticed that in different centers employment agencies are at work engaging volunteers for this work. But we have not the facilities yet, the housing facilities, and we can not care for the labor. The Emergency Fleet Corporation is trying to locate it. The men can not be called into the governmental employ now, but the labor is being located with a view to calling it into the service of the Government just as soon as we can take care of the men by providing adequate housing. The house-building industry throughout the country is not active now, especially steel construction.

Mr. TOWNER. Yes; and therefore it ought to be comparatively easy to secure these men if we can locate them.

Mr. ALEXANDER. That is true.

Mr. TOWNER. Has there been some sort of investigation carried on by the Emergency Corporation for the purpose of locating these structural steel workers?

Mr. ALEXANDER. Yes; and they are being enrolled all over the country, according to my information.

Mr. TOWNER. Is that being systematically done by the corporation?

Mr. ALEXANDER. I hope so.

Mr. TOWNER. It seems to me that that is absolutely essential.

Mr. GOOD. Mr. Chairman, I would state to my colleague that the letter of Chairman Hurley addressed to me under date of November 20 last states:

> There is now being developed a special shipyard employment service in connection with the Department of Labor.

Mr. DEMPSEY. Mr. Chairman, it is conceded throughout this debate that there is a shortage of labor in the United States. It is equally plain that we are not going to obtain until 1919 the shipping which we figured on having in 1918. There is to be a labor shortage here much greater and much more disastrous than any to which the preceding speakers have referred. The spring is just opening. The commencement of farming is at hand. When I was home a few days ago and saw the men coming in from the farms, every man said to me that, in the county of Niagara, in the State of New York, one of the richest counties in the United States, where land is high priced, where the products are numerous and valuable, where the farmers have great incomes, there will be farm after farm in the richest towns which will go unplanted, and with this shortage of ships we will have the farmers looking into the camps and seeing about 1,200,000 men carried from 1918 to 1919, or, rather, from 1917 to 1919, in an unnecessarily prolonged period of training, with the farms unplanted, and later as the crops come on we will see them uncultivated, and later and most disastrous of all, when the rich fruitage of the farms which are planted comes in the fall we will see the harvest go to waste for want of men to gather it. Is there no remedy? Can anything be done to better this situation? It seems to me that there can be.

We are not going to be able to transport these 1,200,000 men across the sea this year and maintain them there with ammunition and guns, with supplies of all the various kinds which they would need. What can we do? The time of planting comes at various times in the United States. We can give these men short furloughs, beginning now for the extreme South and running along from time to time, as the season opens in the sections farther north, and we can send them for the planting times throughout the United States. We do not need to denude the camps at any time. There will always be one-half or one-third of the men there, enough to employ the officers who are in command, and then as the planting time ceases throughout the United States the camps will resume their full activities, and continue full and active until the harvest season comes.

And then again from the South and the North we can grant short furloughs to send these men in the full vigor of life, when one man can do the work of two, back to the harvest to help garner these rich crops to feed us and our allies.

Mr. BANKHEAD. Will the gentleman yield for a question?

Mr. DEMPSEY. I will yield.

Mr. BANKHEAD. I want to ask the gentleman if he thinks, although I am very much in sympathy with his idea, that the soldier on furlough, occupying the new status that he does, with the halo of romance around him, would go back home and volunteer to make a profitable laborer on the farm for a short vacation?

Mr. DEMPSEY. I believe the soldier on furlough would be of twice the value of the ordinary man. I went to a military boarding school when I was 11 years of age. I went back to the farm in the summer for the seven years I was in the school. I was always ready, during the vacation, to do my part upon the farm. I believe that a man who returns from a camp will return revivified and strengthened by his military training, it will be like a vacation to him, and he will be ready, it seems to me, to do not only the work that he used to do but a great deal more work than he was doing before he left for military service.

Mr. BLACK. Will the gentleman yield for a question?

Mr. DEMPSEY. I will.

Mr. BLACK. Does not the gentleman think the important thing to do is for the men who are in civil life to go and put every bit of energy they have got into that endeavor and not expect us to call back our Army to do the work that ought to be done at home?

Mr. DEMPSEY. I do not believe the labor shortage will be settled for a year yet. I believe there will be a shortage in all branches. I believe in a year we will call in enough help from the women of the land, enough from the younger people of the land, so that we will do as they have done abroad not alone what we did before the war began, but I believe we will do it more efficiently, we will do more and we will do it better in every way. That is the experience in England and that is the experience in France. Labor there to-day is more efficient, happier, and more contented than it has ever been in the history of those countries, and we are going to find that here. I am suggesting simply that during the period when we are unable to send these soldiers abroad, when they remain in camp for a longer period than is necessary for their complete efficiency and training, when they can be spared for a few weeks during the planting season, and again for another few weeks during the harvest season, that they be permitted to be furloughed to return to this natural and useful avocation, which will be, next to fighting at the front, the most that any man can do to win this great world's war in which we are now engaged. [Applause.]

Mr. FESS. Will the gentleman yield?

Mr. DEMPSEY. I do.

Mr. FESS. I think there has been a general sentiment throughout the country that that may be done, that the furlough system will be used, and I have many letters on the subject, that they are expecting their own sons to be furloughed to be brought back to the farm. In case we can do that it would be especially effective on the farm, but that probably can not be done.

Mr. DEMPSEY. That could be done in cases where men have been sent, as it seems to me in all cases they should have been sent, to the camp which is the natural camp to which to send them, that which is relatively nearer the home as compared with other camps.

Mr. FESS. However, if the soldier had gone on to France he could not be furloughed?

Mr. DEMPSEY. No; we can not furlough a man abroad, and we do not want to furlough him.

Mr. FESS. This is likely to produce dissatisfaction on the part of the farmer who thinks his own son is coming back.

Mr. DEMPSEY. You will have some dissatisfaction with any course of conduct.

Mr. FESS. I agree that the gentleman's position is good.

Mr. DEMPSEY. But we have to do the best that can be done to obtain the greatest percentage of good and the smallest percentage of evil.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COX. Mr. Chairman, I move to strike out the last word.

Mr. SAUNDERS of Virginia. Mr. Chairman, I ask that the gentleman having the floor may have five additional minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. SAUNDERS of Virginia. The views that the gentleman has just expressed, while they do not seem to be particularly relative to the bill under consideration, meet my very hearty approbation. I have done a good deal of thinking along that line myself, but has the gentleman ever tried to get the military authorities to agree on such a proposition?

Mr. FESS. I have.

Mr. SAUNDERS of Virginia. Did he generally meet with great success?

Mr. FESS. No; I had a letter to-day refusing.

Mr. SAUNDERS of Virginia. Perhaps the gentleman from New York has worked out these ideas he has expressed in relation to furloughing these men.

Mr. DEMPSEY. I will tell the gentleman what occurred to me, if the gentleman will pardon me, as I have thought about this subject, as I have seen the Shipping Board lose a great deal of valuable time—and I am not saying that in a spirit of criticism, because I do not want to criticize—but I have seen, at any rate, that the expectation of the country that we would have enough shipping to send this one and a half million men across the water was going to be disappointed, and as I looked forward to the future and saw men at these camps serving a totally unnecessary time in preparation there——

Mr. SAUNDERS of Virginia. That is what I think.

Mr. DEMPSEY. Then I said there will grow throughout the country a sentiment which will demand that which I now advocate, and all I say now is that we accelerate that sentiment and bring it to bear upon those who have authority to grant the furloughs.

Mr. SAUNDERS of Virginia. Now I want to get at that. How does the gentleman propose to accelerate that sentiment? I have tried to accelerate a little of that sentiment with the military people and had a very small success along that line.

Mr. DEMPSEY. I should suppose, for instance, that gentlemen of this Congress would be able to influence the public press of their vicinity to advocate this idea in such a way that it would create a public sentiment in advance of the planting season, which would be so strong and so overwhelming that those who are in supreme command will feel constrained to order the furloughs to be granted.

Mr. SAUNDERS of Virginia. The very moment you start anything of that sort you will be met with the charge that you are interfering with a military system that you know nothing about or that you are disloyal. The military people would not do anything of that kind. I have in mind a young man from my district who is a shipwright and was in the service. How are you going to get him to be utilized for the purpose of shipbuilding? You apply to the military authority to get him out and see what will happen to him.

Mr. BUTLER. If the Shipping Board will ask for him, the Army will release him, for I have had that experience.

Mr. SAUNDERS of Virginia. Then I will come and confer with the gentleman.

Mr. DEMPSEY. In the first place, I do not believe we should indulge in undue criticism. I believe that we should take an optimistic view of conditions; that we should hope, not criticize. I do not believe the time has come in this country when free speech, when free expression of opinion, when it is meant to be constructive, when it is meant to be helpful, should not be indulged in. I do not believe that time has come, and I do not believe it will ever come.

Mr. SAUNDERS of Virginia. I have this case—and every Member has hundreds of them who has an agricultural district—of a farmer that has three sons. He owns a little farm. The farmer has an old wife, and they are 65 or 70 years old. All three of those sons are in one camp, and the farmer wants one of them to come home. But you make application to the department with an excuse of that sort and see what will happen. I want to know what the gentleman would do.

Mr. DEMPSEY. The individual case is a very different case from the collective one. The individual example is a totally different thing from trying to release soldiers for a specific duty which the whole country can see is necessary not alone for ourselves but for our allies. I believe that all that is necessary is the creation of a proper public sentiment. That will secure the result we all wish for from the generals who command our armies.

Mr. SAUNDERS of Virginia. I wish you would do that. I would like to take advantage of it.

Mr. DEMPSEY. I have found them very considerate and willing to do all they properly could do.

Mr. SAUNDERS of Virginia. They are very agreeable, but they never do anything.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COX. Mr. Chairman——

Mr. ALEXANDER. Mr. Chairman, it is now 4 o'clock and we ought to finish the consideration of this bill to-day. We all agree it is an emergency measure of the greatest importance, and while it is very instructive to discuss these other questions that are entirely foreign, yet I must insist that hereafter the discussion be confined to the subject matter of the bill.

Mr. STAFFORD. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

Mr. ALEXANDER. There are several other amendments to be considered. After we get through considering the bill and the amendments that may be offered, I have no objection to discussing everything under the sun. I suggest that we proceed to the discussion of this bill and amendments now.

Mr. STAFFORD. Mr. Chairman, I offer an amendment, which I have sent to the Clerk's desk.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Page 4, line 19, after the word "corporation" insert: "But for no longer term than five years."

Mr. STAFFORD. Mr. Chairman, this paragraph vests this great authority in the Shipping Board to loan all or part of this $50,000,000 to any person, firm, or corporation without any limit whatsoever as to the length of term in which it is to be repaid. The framers of the bill admit that this is a very absolute power to be vested at any time, even in war time. I am in full sympathy with the policy of the committee that this money may be loaned to subsidiary corporations, but I am placing myself in the attitude of a director of one of these subsidiary corporations which is in need of money for the building of houses and can not get that money from private banks and wishes to have these buildings erected. They should be willing, as I view it, to accept the money for this purpose on the understanding that it should be repaid within five years. The argument may be made that they would wish to loan this money for a longer term so as to permit the workmen to pay it out during longer periods; but any corporation that really wishes to improve the facilities of its plant by having these houses erected, knowing that they can obtain this loan for five years, can arrange at the end of five years to obtain loans from private sources whereby the money can be returned to the Treasury.

There is this danger in all this legislation, that in these war times we will load down the Government with burdens that will haunt us for years and years to come. There should be some good ground advanced why the terms should be lengthened away beyond the period when the war is at an end. We should endeavor in every way possible to bring these paternalistic schemes to a close at a certain time after the conclusion of the war. The amendment does not limit it too drastically by making it a short period. I merely say five years, and certainly any corporation or any partnership which obtains the money for a five-year term can look forward to the time when that period comes to an end and make other arrangements to take up that loan—

that is all it is, in substance—rather than allowing the Shipping Board full freedom to make a loan for 15 or 20 or any other number of years. Some limit should be placed on this power in the Shipping Board to make these loans.

Mr. ALEXANDER. Mr. Chairman, I call attention to the testimony of Mr. Cuthell at the hearings outlining the plan the Emergency Fleet Corporation has under consideration. It is not simply the question of loaning money to a corporation. The Emergency Fleet Corporation may lend to a corporation or a firm or an individual. But at the same time we want to get that money back. We want to loan it in such form as will save the Government possible loss.

Mr. Cuthell said:

Of course our first direction to them is that they shall not make any money out of this housing business, and we shall use all of our ingenuities to see that they do not make any money out of this housing business, because this is a war measure, and we are putting money in in an unusual way, and we want to provide houses for these employees and not for the profit of any land development company. There will be no salaried officers nor directors; there will be no commissions allowed in any way. The shipbuilding company will be allowed to have a 6 per cent return on its actual investment at cost that they can show by an actual audit of their books to us, and that is all.

And then there are very interesting pay-off provisions of the mortgage that we will have.

I wish to call your attention to this further statement of Mr. Cuthell's:

We propose to lend the money to these subsidiary companies at 4 per cent interest for 15 years, and beginning with the fourth or fifth year that they shall pay off 3 per cent on the principal. Now, bear in mind that it is a separate little company that is making this arrangement with us. We control the arrangement; we control the sale prices. We hope that all of these houses will be sold to the shipyard employees, and it is our intention to make the documents in such form as to facilitate sales. For instance, we mean to take a blanket mortgage for all our advance, and that blanket mortgage will have a schedule of release values annexed to it, so as to each particular plat of land and house in that development there will be an ascribed value. We plan to replace that blanket mortgage if an employee comes along and wants to buy and to take a separate mortgage on that particular tract, so that the employee will get the benefit of a 4 per cent mortgage. He can not get it now at 6 or more per cent, and it will aid him to that extent in financing his own home. There will be practically a trivial amount of cash required for a man to acquire a house in any one of these developments, and we intend to see that they are sold off to employees just as fast as possible.

Now, speaking further about it, Mr. Cuthell figures that to build at this time will cost from 30 to 40 or 45 per cent more than it would cost in peace times, and hence to require an employee to buy, or to expect him to buy, a house on the present basis of cost, and not give him the time in which to pay his debt at the lowest rate of interest, would not only be unjust to the employee but would defeat the very purpose, which is to sell these houses to the employees on long time, on some amortization plan, in the hope that ultimately they will pay for them and provide themselves homes.

Hence the suggestion is made by Mr. Cuthell that this money should be loaned for 15 years. To loan it for five years would defeat its purpose and would make it impracticable, in the view of the attorney, Mr. Cuthell, and Mr. Flannery, the director of housing, to dispose of these houses to the employees at the different shipping plants.

Mr. HAYES. Mr. Chairman, will the gentleman yield there for a question?

Mr. ALEXANDER. Yes.

Mr. HAYES. I want to ask the gentleman if he does not expect that these houses that are proposed to be built will be only for temporary use? It is not to be supposed that all this shipbuilding activity is to continue after the war. That is not the intention.

Mr. ALEXANDER. It is not intended to build houses only of temporary kind. That would depend on the locality. In some of the communities it is not the intention to build houses of a temporary character.

Mr. HAYES. To what use are the houses to be put after the war?

Mr. ALEXANDER. Take, for instance, the yard at Hog Island, there are many other industries in the neighborhood, and the demand for these houses will continue after the war.

Mr. BUTLER. Yes; of course.

Mr. ALEXANDER. In a community like that it would not be wise for the Emergency Fleet Corporation to build temporary structures, because in that event they would be a total loss.

Mr. HAYES. Are all these places situated similarly to Hog Island?

Mr. ALEXANDER. They are not. In some instances they must be of a temporary kind, and after the war is over they may not have any value.

Mr. HAYES. That is what I supposed.

Mr. ALEXANDER. Hence, the reason for not placing any limitation upon the Emergency Fleet Corporation or the director of housing, so that they can meet the conditions in the several communities in a reasonable way, with a view not only to providing for housing but to protect the Government and to ultimately save as much as possible from loss we give them great latitude.

Mr. HAYES. But does not the gentleman think that after the Government has carried it for five years and it has been sold—one house to one workingman—there are plenty of building associations and other organizations where such a workman can get in and have his investment taken care of, without involving the United States for 15 years? Does not the gentleman think so?

Mr. ALEXANDER. Well, the Government has its money in the property.

Mr. HAYES. Surely.

Mr. ALEXANDER. The point is how to get the money out, and if that condition exists at the end of five years, I presume the Government will be glad to get its money out as quickly as it can. But for us to place a limitation in the law such as proposed may defeat the very purpose we have in view, and the result will be a large loss if the Government is forced to call in the loans at the end of five years.

Mr. BUTLER. Mr. Chairman, will the gentleman yield for a question?

Mr. ALEXANDER. Yes.

Mr. BUTLER. Does the gentleman care to give the committee his idea whether the Government will entirely abandon that great big shipping plant there after the termination of this war?

Mr. ALEXANDER. I sincerely hope not. I hope we will build up a great American merchant marine.

Mr. BUTLER. I am afraid by the gentleman's answer to the question of the gentleman from California he might be misunderstood.

Mr. ALEXANDER. I hope the industry will continue.

Mr. HAYES. I would like to see an American merchant marine built up as much as anybody. I live on the Pacific coast. We are busy there now. But it is hardly to be expected that we will continue to manufacture ships after the war as rapidly as now. We can not do it. Therefore many of these houses must be of a temporary character.

Mr. ALEXANDER. That is true; but there are communities where the shipbuilding plants will be permanent in character, and the activities will go on after the war. Take the case of Hog Island. The shipbuilding industry is not the only industry in that immediate locality, and hence the Fleet Corporation may well consider that fact and provide for improvements permanent in their nature.

Mr. STAFFORD. What would prevent the individual owner from going to private sources and getting money at the end of five years? Those are subsidiary corporations, capitalized to-day for millions of dollars, and you are proposing to load down the Government for 15 years, not to be paid at any time before that.

Mr. ALEXANDER. I do not think so.

Mr. STAFFORD. There is no limit on the authority.

Mr. ALEXANDER. No; the gentleman's amendment is an unwise one, in my judgment.

Mr. STAFFORD. Business men on this side think it is eminently fair. My limit is five years.

Mr. ALEXANDER. I think if we want to save the Government money, and in view of the plan outlined by Mr. Flannery, the director of buildings, and Mr. Cuthell it will be unwise for us to place any limitation in the law. The Committee on the Merchant Marine, just like the committee here, were anxious to know just what the plans are, how they proposed to carry them out, and how they were going to undertake to protect the interests of the Government with the view to making the losses as small as possible, and we did not think it wise to hamper them too much. We all realize that there will be losses.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. Yes.

Mr. STAFFORD. The gentleman, I believe, from his statement, realizes the need of some limitation. Would he have any objection to an amendment, say, fixing the time at 10 years? I believe 5 years is ample for the purposes of all who wish to borrow this money; but say 10 years.

Mr. ALEXANDER. Make it 15.

Mr. MADDEN. I think 10 years is more than it ought to be, but it certainly ought not to be over 10 years.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to modify my amendment and make it 10 years. I ask for a vote.

The CHAIRMAN (Mr. PRICE). The Clerk will read the modified amendment.

The Clerk read as follows:

Modified amendment offered by Mr. STAFFORD: Page 4, line 19, after the word "corporation," insert "but for no longer a term than 10 years."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by the Chairman) there were—ayes 24, noes 22.

So the amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Whenever said United States Shipping Board Emergency Fleet Corporation shall acquire by requisition or condemnation such property, or any interest therein, it shall determine and make just compensation therefor, and if the amount so determined is unsatisfactory to the person entitled to receive the same, such person shall be paid 75 per cent of the amount so determined, and shall be entitled to sue the United States to recover such further sum as added to such 75 per cent will make such an amount as will be just compensation for the property so taken, in the manner provided by section 24, paragraph 20, and section 145 of the Judicial Code.

Mr. STAFFORD. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Page 5, line 7, after the word "property," insert "or interest therein."

Mr. ALEXANDER. We accept that amendment.

Mr. STAFFORD. That is merely to make it a little clearer.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The amendment was agreed to.

Mr. ROBBINS. Mr. Chairman, I move to strike out the last word. I do not understand the provisions of this section of the bill. I want the chairman of the committee to explain why it is drawn in this way. It provides in the body of it here that when this property is taken 75 per cent of the compensation, as determined by the Emergency Fleet Corporation, shall be paid to the owner of the property and the remainder shall be recovered by a suit brought under section 24, paragraph 20, of the Judicial Code.

By referring to section 24 of paragraph 20 of the Judicial Code, as I find it on page 19 of the code, it provides this—and if the chairman of the committee is interested in this I would like to have him listen to this, because I think it is very important to get the bill right. I am in entire good faith, for I am in favor of this bill.

Mr. ALEXANDER. If the gentleman is addressing his attention to me, I will say that this provision has been enacted by this Congress in several bills relating to the condemnation of property for public use.

Mr. ROBBINS. I think probably you could improve this section. Section 24 of paragraph 20 of the Judicial Code provides that the Court of Claims shall have concurrent jurisdiction in all claims not exceeding $10,000. There may be many claims that will exceed $10,000, and in such cases this act will not apply. It says, and I read:

founded upon the Constitution of the United States or any law of Congress, or upon any regulation of an executive department, or upon any contract, express or implied, with the Government of the United States, or for damages, liquidated or unliquidated; in cases not sounding in tort, in respect to which claims the party would be entitled to redress against the United States, either in a court of law, equity, or admiralty.

Evidently that law is dealing with the Court of Claims. Then, here follows this provision, that, I think, makes this section absolutely unconstitutional. It does in Pennsylvania, and we have three shipyards that I hope will enjoy the benefits of this act, if it is passed, so I want it to be in such shape that it will work in Pennsylvania. This act provides at the close—

All suits brought and tried under the provisions of this paragraph shall be tried by the court without a jury.

Now, you are setting up a new method of adjudicating questions of damages. You are depriving the litigant of the right of trial by jury. You can not do that in the Commonwealth of Pennsylvania, and you can not do it generally in the other States of the Union.

Now, let us turn to the other provision. Why it should refer to two provisions of the Judicial Code, if one is good enough, I do not understand. But after referring to section 24, paragraph 20, it says, "and section 145 of the Judicial Code." We find that section on page 86 of the code, and that starts out as follows:

The Court of Claims shall have jurisdiction to hear and determine the following matters:

First. All claims (except for pensions) founded upon the Constitution of the United States or any law of Congress, upon any regulation of an executive department, upon any contract, expressed or implied, with the Government of the United States, or for damages, liquidated or unliquidated, in cases not sounding in tort, in respect of which claims the party would be entitled to redress against the United States either in a court of law, equity, or admiralty if the United States were suable.

How are you going to apply that statute in this case? This relates to the Court of Claims, and as a practical proposition, as the jurisdiction is given in this section of the judicial code, you have got to come to Washington to try the cases in the Court of Claims, and this means to drag men out of their home jurisdiction, in Pennsylvania, or Virginia at the Norfolk Navy Yard, or at the navy yard up in Boston, Mass., or wherever these houses are to be built. The owners of the property will have to come here to Washington to try their cases in the Court of Claims. Now, that is contrary to all legal procedure, and burdensome and expensive, and there is no necessity for it.

Mr. GOOD. Will the gentleman yield?

Mr. ROBBINS. Yes.

Mr. GOOD. Is it not true that without this provision the claimant would have no place where he could bring a suit against the Government of the United States?

Mr. ROBBINS. I say the whole theory of this method of obtaining damages is wrong.

Mr. GOOD. It may be wrong, but what I want to direct the attention of the gentleman to is that it would not be unconstitutional, because at the present time the litigant would have no right to go into any court.

Mr. ROBBINS. He would have a right to go into the United States district court in the place where he lived. If he was a Hog Island man he could go to the district court in the city of Philadelphia, or if he was a Norfolk man he could go to the district court at Norfolk, Va., and try his case, and have a jury, and have the question of damages determined as it ought to be determined. That is the only way it can be determined.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. BUTLER. I ask unanimous consent that my colleague may have five minutes more.

The CHAIRMAN. The gentleman from Pennsylvania asks that his colleague have five minutes additional. Is there objection?

There was no objection.

Mr. ROBBINS. I think this is a good objection to this bill.

Mr. BUTLER. Will the gentleman allow me?

Mr. ROBBINS. Certainly.

Mr. BUTLER. In the last Congress we dealt very largely with this question, occupying nearly one-half day of this House, and they finally determined that this was the method by which damages should be recovered when property was taken from an individual without his consent. In the case of the armor-plate factory it was discussed.

Mr. ROBBINS. If you want to try a case relating to Hog Island or Bristol, why should you not be allowed to do so in the United States district court at Philadelphia, near by.

Mr. BUTLER. I contended then, as the gentleman does here, that the method we should adopt was the one that we have in Pennsylvania; but this House, by a large majority, decided otherwise and adopted this provision.

Mr. ROBBINS. Just let me finish this. There is a general act of Congress providing for the condemnation of real estate, the act of February 9, 1887. Therein it is provided—

that in every case in which the Secretary of the Treasury or any other officer of the Government has been, or hereafter shall be, authorized to procure real estate for the erection of a public building or for other public uses, he shall be, and is hereby, authorized to acquire the same for the United States by condemnation under judicial process whenever in his opinion it is necessary or advantageous to the Government to do so, and the United States circuit or district court of the district wherein such real estate is located shall have jurisdiction of proceedings for condemnation.

There is clearly a defined general statute providing for cases of this kind, and why go back and put it under two sections referring to the Court of Claims, one of which deprives the litigant of the right of trial by jury?

I want to call attention of the gentleman from Pennsylvania on this committee to this matter. You say you are going to provide housing facilities for the workmen employed at the navy yards located at Bristol, Chester, and Hog Island, all in Pennsylvania. If there is an owner of land located on the territory you are going to acquire by condemnation, you can not do it, because the constitution of Pennsylvania protects the right of such landowner. This is the constitution of my State:

SEC. 8. Municipal and other corporations and individuals invested with the privilege of taking private property for public use shall make just compensation for property taken, injured, or destroyed by the construction or enlargement of their work, highways, or improvements, which compensation shall be paid or secured before such taking, injury, or destruction. The general assembly is hereby prohibited from depriving any person of an appeal from any preliminary assessment of

damages against any such corporation or individual made by brewers or otherwise. And the amount of such damages in all cases of appeal shall, on the demand of either party, be determined by jury according to the courts of the common law.

Now, if it is your purpose to prevent the three shipyards in Pennsylvania from getting any improvement under this act, you have handsomely provided for it in this bill, because the only clause in the bill under which you can proceed in a local court is one which says that you must determine it without the aid of a jury. The constitution of Pennsylvania steps in and says that you can not deprive a man of his property without the intervention of a jury.

Mr. SAUNDERS of Virginia. Will the gentleman yield?

Mr. ROBBINS. Yes.

Mr. SAUNDERS of Virginia. Does the gentleman maintain that under the Constitution of the United States it is necessary to have a jury in respect to the ascertainment of damages in land condemnation?

Mr. ROBBINS. Yes; I do. I say you can not take land away from a man without a jury trial if he demands it.

Mr. SAUNDERS of Virginia. Will the gentleman refer us to the section that supports that contention?

Mr. ROBBINS. In the Constitution of the United States is the general provision—article 5 of the amendments adopted when the Constitution was adopted:

No person shall be held to answer for a capital or otherwise infamous crime unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces or in the militia when in actual service in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life and limb; nor shall be compelled in any criminal case to be a witness against himself; nor be deprived of life, liberty, or property without due process of law; nor shall private property be taken for public use without just compensation.

Mr. SAUNDERS of Virginia. We are all agreed on that.

Mr. ROBBINS. And under that there must be a trial by jury.

Mr. SAUNDERS of Virginia. Can you cite me to the law providing that an ascertainment of land damages by the court in proceedings in condemnation is not due process of law?

Mr. ROBBINS. That is the adjudication in the cases under this section of the Constitution.

Mr. SAUNDERS of Virginia. My friend can not maintain that proposition.

Mr. HAYES. Will the gentleman yield? Does the gentleman from Virginia maintain that due process of law would not include a trial by jury?

Mr. SAUNDERS of Virginia. Not at all. But there may be due process of law without trial by jury.

Mr. HAYES. Not where there is a demand for a jury trial.

Mr. SAUNDERS of Virginia. Oh, yes; in every case where the Constitution or statute or common law does not give the right to a jury.

Mr. HAYES. I would like to know where.

Mr. SAUNDERS of Virginia. In Virginia, for instance, and in many other States.

Mr. ROBBINS. Mr. Chairman, I would like permission to revise and extend my remarks.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. ROBBINS. I would like to ask the chairman of the committee why he did not adopt language that would put these condemnation proceedings under the act of the 9th of February, 1887, instead of this one in the bill?

Mr. ALEXANDER. The provisions cited here do not relate to condemnation proceedings alone. The provisions of section 24, paragraph 20, and section 145 of the Judicial Code, refer to the court or courts in which the suit may be brought for damages. Section 24, paragraph 20, provides that the United States district courts and the Court of Claims may have concurrent jurisdiction of claims of $10,000 or less. If the amount is in excess of $10,000 the suit must be brought in the Court of Claims. That is all that is involved in the statute referred to. First, the owner of the land and the agents of the Government undertake to agree on the value of the land. If they agree the total amount of the purchase price or the damage is paid direct. If they do not agree, then it is made the duty of the Government to pay to the owner 75 per cent of the sum and remit him to the courts to sue for the excess. The argument made by the gentleman from Pennsylvania [Mr. ROBBINS] it seems to me has no force or relevancy to the situation we are undertaking to deal with in this bill. We are not proceeding under the laws of the State of Pennsylvania; we are proceeding or will proceed under an act of Congress, if this bill becomes a law, and that too with due respect to the provisions of the Constitution of the United States that private property may not be taken for a public use without just compensation. This act provides a method by which that compensation may be ascertained, first, if possible, by agreement, and failing on agreement, then the Government may tender to the owner 75 per cent of the amount regarded by the agent of the Government as just compensation. The party then is remitted to his remedy in the district court of the United States if the amount be $10,000 or less, and if it be in excess of $10,000 he is remitted to his remedy in the Court of Claims. It will not do to say that his property has been taken without due process of law. Every step is provided for. His rights are safeguarded. The ascertainment of the damages, the method by which they may be ascertained may be different in the Federal court under this statute from the method in the State courts, but it will nevertheless be due process of law. A similar provision was written into the naval appropriation bill of 1915, under which the Government was authorized to commandeer great steel plants or munition plants and other great industries in this country in the event the Navy Department or the officers of these different industries were not able to agree upon what would be a reasonable price for their output, and I am told by the gentleman from Pennsylvania [Mr. BUTLER], who is a member of the Committee on Naval Affairs, that the provision in the naval appropriation bill was framed by the Department of Justice, presumably by the Attorney General.

Mr. BUTLER. Yes; by the Attorney General.

The Clerk read as follows:

That whenever the said United States Shipping Board Emergency Fleet Corporation shall requisition any property or rights, or upon the filing of a petition for condemnation hereunder, immediate possession may be taken by it of such land, houses, or other property, rights, and facilities, to the extent of the interests to be acquired therein, and the same may be immediately occupied and used, and the provisions of section 355 of the Revised Statutes, providing that no public money shall be expended upon such land until the written opinion of the Attorney General shall be had in favor of the validity of the title nor until the consent of the legislature of the State in which the land is located has been given, shall be, and the same are hereby, suspended as to all land acquired hereunder.

Mr. ROBBINS. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 5, line 16, after the word "used," insert the following:
"*Provided*, That said corporation shall have authority to institute and conduct proceedings under the power of eminent domain in any State to acquire title to real estate located in such State, whenever necessary."

Mr. ALEXANDER. Mr. Chairman, on that I reserve a point of order. It is certainly not germane to this section.

Mr. ROBBINS. Mr. Chairman, the purpose of this bill is to acquire, by condemnation, lands that are located near shipyards, among others, which yards are not owned by the National Government, and the clause of the Constitution of the United States that confers the right of eminent domain seems to me to limit it to public buildings, works, and forts over which the United States has jurisdiction. This right to condemn that is vested by this act seems to extend it to other propery not owned by the National Government, and I think that in such case, in order to give this act strength, we should make it optional with the corporation to proceed in Pennsylvania—if the land involved be in Pennsylvania—or Virginia or Maryland in connection with the improvement that is to be erected. I do not think the Government under this bill as it is here worded has the right of eminent domain to condemn property that is not located in connection with shipyards owned by the National Government. It is a well-known principle that this right of eminent domain is one that rests upon statute. For instance, this is the fundamental principle which underlies that right:

One of the most firmly established principles of the law of eminent domain is that the burden is on the party seeking to exercise such power to show an express warrant from the legislature. The power of eminent domain will never pass by implication, and even when the power has been expressly granted the grant will be construed strictly against the grantee, and he will not be allowed to take the lands of another unless he acts clearly and unmistakably within the limits of his authority.

I cite this from Nichols on Eminent Domain. Where is there any authority in the Constitution of the United States to condemn, as is proposed in this act, lands for housing dissociated and disconnected with any other improvement that the National Government owns? I concede, and I believe the National Government would have, the right to condemn houses in connection with a shipyard that it owns, to extend and take ground to provide for that shipyard, but that is not this proposition.

That is not the kind of taking we are dealing with. We are dealing with a statute to which is applied the strictest construction known to the law, on the civil side of the court at least.

Mr. HARDY. The gentleman conceives that the Government of the United States would have no right to exercise the power of eminent domain to condemn property and build houses for cantonments for the temporary use or permanent use of its soldiers, having no other property in the neighborhood?

Mr. ROBBINS. That would be a complete unit, a unit in itself, for the military power, and that would be under the case of ex parte Milligan an exercise of the war power.

Mr. HARDY. Is it not simply condemning property for the use of the Government?

Mr. ROBBINS. Oh, no. There is the property as a whole that the United States would take under the war-making power which would be to complete a part of the armament and equipment for the national defense. Such are its cantonments. We propose here to do a different thing. You propose here to build houses alongside privately owned shipyards. Where is the power to do it? You have got to put your finger upon the statute, and you have not got the power. There is no implication of the right to condemn here.

Mr. ALEXANDER. When we enact this law——

Mr. SAUNDERS of Virginia. Does the gentleman think that the necessary power has not already been given to the Emergency Fleet Corporation?

Mr. ROBBINS. Well, you must show in the Constitution the right upon which you can found this act of Congress, because we are acting under delegated powers conferred on us by the States. We derive our power entirely from the Constitution.

Mr. SAUNDERS of Virginia. All that the gentleman's amendment will do will be to give this corporation authority to institute condemnation proceedings, is it not?

Mr. ROBBINS. In the State courts where the land is located. There is no question about it.

Mr. SAUNDERS of Virginia. Why should the corporation not proceed in the Federal courts? That is the appropriate and customery tribunal for proceedings by or against the Government.

Mr. ROBBINS. Because we have not got the right to do it, as I am trying to explain. It is a power which is outside and beyond the limit of the Federal Constitution.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HARDY. Mr. Chairman, I ask that the gentleman's time be extended to answer a question.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HARDY. Under this amendment which the gentleman proposes, whereby the corporation would have to proceed in the State courts with methodical and long-drawn-out litigation for the condemnation of this property, it seems to me the gentleman brings about this situation: First, that we could not take immediate possession at all——

Mr. ROBBINS. Let me correct the gentleman right there.

Mr. HARDY. And therefore the immediate purposes of the act would be defeated. Second, the Constitution does not allow the condemnation unless it is to be used in connection with some property already owned by the Government, and therefore we could not condemn. So the State of Pennsylvania, according to the gentleman's contention, would have to do without any of these improvements.

Mr. ROBBINS. I beg the gentleman's pardon. Under condemnation proceedings in the State courts, as soon as notice is given to the owner of the land within five days thereafter the petitioner can file a bond which when approved by the court passes the title at once and vests it in the corporation taking the property, and possession is taken at once. The litigation afterwards relates entirely to damages to be recovered on the bond. Therefore the quick and speedy way to acquire this title is to institute condemnation proceedings in the State court by the corporation or petitioner desiring to acquire the title to the land.

Mr. SAUNDERS of Virginia. If the gentleman will permit, I would like to ask him this question, because we want to make an issue, and this we can not do unless we find out what we respectively stand for. Does the gentleman contend that in spite of this statute should it become a law, and in spite of our powers under the war power, that in the State of Pennsylvania the Fleet Corporation will not have the right to proceed by way of condemnation in the district courts of Pennsylvania to acquire the property desired? Is that the gentleman's contention?

Mr. ROBBINS. Yes. They are up against private property owned by the people. It is not a complete unit. You are condemning houses there to be used by private corporations. The right of eminent domain does not give any such power as that.

Mr. SAUNDERS of Virginia. What does the gentleman refer to as a private corporation, the Fleet Corporation?

Mr. ROBBINS. No; to the shipyards. The shipyards at Bristol, Hog Island, Chester, are owned by private parties.

Mr. SAUNDERS of Virginia. We are not giving a private corporation the right of condemnation. The right of condemnation is afforded only to the Fleet Corporation.

Mr. ROBBINS. The gentleman misunderstands me. But there are private shipyards alongside of which you propose to condemn ground and erect houses by the General Government.

Mr. SAUNDERS of Virginia. Yes.

Mr. ROBBINS. Well, that is what I say.

Mr. SAUNDERS of Virginia. You understand, do you not, that it is proposed by this bill, to give the Fleet Corporation the power to condemn for war purposes, property related to the buildings that you have in mind?

Mr. ROBBINS. Yes.

Mr. SAUNDERS of Virginia. But your contention is we can not do it unless we authorize them to proceed in the courts of your State?

Mr. ROBBINS. Yes; proceed in the courts of the State. And there they would have a right to do it.

Mr. SAUNDERS of Virginia. How can we give any greater right by authorizing the Fleet Corporation to proceed in the courts of your State, afford a greater right than we can give it the right to proceed in the Federal courts that are created by virtue of the Constitution and are part of the Federal system? Is it your idea that we will derive our powers from the State constitution?

Mr. ROBBINS. No.

Mr. SAUNDERS of Virginia. That seems to be your contention.

Mr. ROBBINS. I suggest that the State court is the proper place in which to carry on the condemnation proceedings.

Mr. ALEXANDER. Mr. Chairman, I am opposed to the amendment offered by the gentleman from Pennsylvania [Mr. ROBBINS].

Mr. MONDELL. I am opposed to the amendment offered by the gentleman, but I do not intend to discuss it.

Mr. ALEXANDER. But I do, and I think it is my duty to discuss it.

Mr. MONDELL. I shall want to follow.

Mr. ALEXANDER. I would like to discuss it now, so that the two arguments may be together.

Mr. MONDELL. That is fairly satisfactory to me.

Mr. ALEXANDER. Now, the gentleman from Pennsylvania [Mr. ROBBINS] labors under the impression that there is no other way to condemn property for a public use except as provided by the laws of Pennsylvania. The constitution of every State in the Union prescribes that property may not be taken for a public use without just compensation, and the method by which property may be condemned for a public use is different in practically every State in the Union. We are undertaking to condemn property for the use of the Federal Government and as a war measure. It is just as important, in providing for the national defense, to provide ships and the facilities to build them as to provide armies and equip them. The Constitution of the United States says that property may not be taken for Federal use except upon just compensation. We have undertaken, having respect to that provision of the Constitution, to provide a method by which that property may be condemned, a Federal statute under which the property may be condemned for Federal use. Now, it would be unfortunate, indeed, if in every instance where it is necessary to condemn property for a Federal use we would be remitted to the remedy or process provided in the State. But this paragraph of the bill that the gentleman seeks to amend refers to the section of the Federal statute the provisions or requirements of which we seek to suspend in order to facilitate the work by taking immediate possession of the property, whether purchased or condemned, and not wait for the opinion of the Attorney General as to the title.

Now, section 355, to which reference is made in the paragraph, and the provisions of which it is sought to suspend, is as follows:

> No public money shall be expended upon any site or land purchased by the United States for the purposes of erecting thereon any armory, arsenal, fort, fortification, navy yard, customhouse, lighthouse, or other public building of any kind whatever until the written opinion of the Attorney General shall be had in favor of the validity of the title, nor until the consent of the legislature of the State in which the land or site may be to such purchase has been given. The district attorneys of the United States, upon the application of the Attorney General, shall furnish any assistance or information in their power in relation to the titles of the public property lying within their respective districts. And the Secretaries of the departments, upon the application of the Attorney General, shall procure any additional evidence of title which he may deem necessary, and which may not be in possession of

the officers of the Government, and the expense of procuring it shall be paid out of the appropriations made for the contingencies of the departments, respectively.

Mr. STAFFORD. I know the gentleman has given a great study to this question. Can he state to the House the provisions of the statute which provides authorization to the National Government to condemn private property for the purposes of the Government?

Mr. ALEXANDER. We have never had a general statute—I state that simply on information—under which the Government may condemn private property for public use. The Congress at all times has undertaken to reserve that power and confer it only when it was to be exercised with reference to a specific case, as we are undertaking to do here. I think you will find——

Mr. STAFFORD. Then under what procedure will the Government go ahead and take this private property for public purposes?

Mr. ALEXANDER. Under the provisions of this bill when enacted, which authorizes the condemnation of property and provides how it may be done in the event the parties can not agree on the price——

Mr. STAFFORD. Oh, yes; but where is the procedure? It does not say in what court they shall proceed. The bill provides that in case the individual declines to take the award you offer, then the procedure follows; but there is no procedure fixed in the statute or any procedure authorized in this bill to go ahead under condemnation proceedings.

Mr. ALEXANDER. The gentleman is mistaken. The bill does authorize and fix the procedure. If the amount involved is less than $10,000, the United States district court and the Court of Claims have concurrent jurisdiction.

Mr. STAFFORD. As to claims?

Mr. ALEXANDER. As to damages. If the gentleman ever tried a condemnation suit in his life he would know that the issue is one of damages.

Mr. STAFFORD. I grant that.

Mr. ALEXANDER. Of course, if a railroad undertakes to condemn property for railroad purposes, they take the property first, and afterwards the amount of damages is ascertained.

Mr. STAFFORD. But there is a certain procedure laid down in that case. There is no procedure laid down here in the bill or under our statutes.

Mr. ALEXANDER. It is just the same. I refer you to the paragraph following paragraph 5.

Mr. ROBBINS. Mr. Chairman, may I ask the gentleman from Missouri a question?

Mr. ALEXANDER. All right.

Mr. ROBBINS. Is it not provided frequently in the statutes that the damages under condemnation proceedings shall be ascertained according to the laws of the State in which the condemnation proceedings were had? The gentleman from Virginia [Mr. SAUNDERS] says that would be an anomaly. But I want to cite the case of United States against Jones, One hundred and ninth United States Reports.

Mr. SAUNDERS of Virginia. If the gentleman from Pennsylvania will pardon me in that connection, that is not precisely what I said. I said it would be an anomaly for the Government to proceed in condemnation proceedings in a State court. The procedure in the Federal courts sitting in a State follows, as a rule, the procedure in that State, but the procedure of the State courts would not be paramount over procedure prescribed by Federal authority for the Federal courts.

Mr. ROBBINS. This case, the case of United States against Jones, arose in regard to taking a post-office site in the State of Alabama. That is in line with the amendment I suggested as being the provision which should be put into this bill. I quote from the opinion of the Supreme Court, on page 520:

> Whenever it became necessary to take private property, "the price to be paid shall be determined, and the title and jurisdiction procured, in the manner prescribed by the laws of the State of Alabama."

Mr. SAUNDERS of Virginia. You do not understand that that would require the Federal Government to proceed in the courts of Alabama?

Mr. ROBBINS. It makes it optional, and for this purpose. I have this decision before me. In the report of the committee which has been filed here, on pages 23 and 24, it is stated, when the chairman was asked whether he would use this power, that it is only to be resorted to as a power to prevent undue prices being put up by land speculators against the Government.

I want to make this bill clear as to their right to resort to condemnation proceedings in the State where the land is situated, or in the Federal court, so that this work will not be delayed, and it is in line with this decision of the Supreme Court of the United States that I have just cited.

Mr. SAUNDERS of Virginia. Mr. Chairman, I wish to say just a word or two with respect to the legal questions that have been raised, and to restate a little more precisely the position that I hold, and which I think is held by the committee.

Speaking for myself, I am not acquainted with any case in which the Federal Government proceeded to condemn property for its own purposes in the courts of the State where the property sought to be condemned was located. So far as I am acquainted with such matters, the proceedings are taken in a Federal court.

With respect to our power to do what is proposed to be done under this bill, I wish to say that the Congress is certainly clothed with the power to enact legislation for the common defense. Congress has the right to declare war, to provide a Navy, to provide for the common defense, and to make all the laws necessary and proper to carry these powers into execution, and all other powers vested in it by the Constitution. This is a measure for the common defense. We propose to do certain things immediately relating to agencies that are being operated in the interests of national defense, and it seems to me that the position can not be successfully maintained that, when we are so legislating and proceeding under the general war power at a time when we are actually in war, we lack the power to prescribe precisely, not only for the condemnation of property by the United States to make effectual the common defense, but the procedure as well by which that property is to be acquired. The rights of all parties concerned are provided for in this bill.

It is not proposed to strip anybody of any substantial rights, or to take something for nothing. We propose to pay for every square foot of property acquired by the procedure contemplated. In order to expedite action—and certainly this is a time when expedited action is of the essence—it is provided that when proceedings in condemnation are once instituted, possession may be taken at once of the property desired in order that there may be no delay which would hinder the successful prosecution of the war aims of the Government. But we have not taken from any man the right to recover the fair value of his property. We give him the right to sue the Government in a court of compensation for whatever balance he claims may be due him in excess of the 75 per cent which has been appropriately ascertained. We pay over to him 75 per cent, and give him the right to sue for any balance that he may claim. Not only have we given the right to the landowner to do this, but we have amply provided for the protection of the rights of every citizen of the United States who may be affected by this legislation.

Mr. ALEXANDER. I will withdraw the point of order and let the committee decide it.

The CHAIRMAN. The question is on the amendment.

The amendment was rejected.

The Clerk read as follows:

> That for the purpose of carrying out the provisions of this act the expenditure of $50,000,000 is hereby authorized, and in executing the authority granted by this act the said United States Shipping Board Emergency Fleet Corporation shall not expend or obligate the United States to expend more than the said sum.

Mr. GREEN of Iowa. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

> Mr. GREEN of Iowa offers the following amendment:
> Page 6, line 17, after the word "sum," strike out the period, insert a comma, and add the following: "nor shall any part of said sum be paid upon any contract for construction which provides that the compensation of the contractor shall be the cost of construction plus a percentage thereof for profit, unless such contract shall also fix the reasonable cost of such construction as determined by the United States Shipping Board Emergency Fleet Corporation and provide that upon any increase in cost above the reasonable cost so fixed by such board the percentage of profit shall decrease as the cost increases, in accordance with a rate to be fixed by said board and expressed in the contract: *Provided, however*, That nothing herein contained shall be construed to prevent said board from contracting for the payment of premiums or bonuses for the speedy completion of the work contracted for."

Mr. GREEN of Iowa. Mr. Chairman, I had hoped that this bill would contain some limitation upon the powers of this board with reference to contracts. Our experience has been so unfortunate, to say the least, when we have granted indefinite powers to boards and commissions to pay any sum that they wanted to pay, and to make any kind of contracts that they desired, that it is time some limitation was put upon their powers in this respect. I am unable to agree entirely with the gentleman from Massachusetts [Mr. GILLETT], who said yesterday that the evils from which we were suffering grew out of the fact that we had appropriated lump sums. I believe that under circumstances like those we have now in hand it is necessary to make lump-sum appropriations, but I believe that if the boards and commissions themselves will not put some restrictions upon these contracts which will in some way limit the

profits that may be derived under them it is time that this Congress did so. I agree entirely with the gentleman from Wisconsin [Mr. LENROOT] who said yesterday that if we had a committee upon expenditures, as was proposed in the last session—and I might say in this connection proposed by myself—a number of these contracts of which so much complaint has been made never would have been thought of; but we have not got such a committee, and it is time that something was done to restrict these profiteers. Gentlemen yesterday related the waste and extravagance that had occurred in building our cantonments, and waste and extravagance have simply run riot in connection with the Hog Island project. The ground of that shipyard cost two or three times what it ought to have cost, two or three times what it could have been purchased for a short time before the contract for purchase was made. Men have been employed in connection with this Hog Island project at salaries two, three, four, and sometimes five times what they were receiving before. Publicity agents were employed at a total something like $20,000, as I remember, to exploit the great virtues of the splendid management under which these ships were to be built at this project. I am glad to say that my understanding is that Mr. Hurley has since dispensed with some of these publicity agents, with relation to whom I might say also at this time that some of them had no opportunity whatever to attend to publicity or anything else except their own business in which they were already fully employed.

Mr. COX. Will the gentleman yield?

Mr. GREEN of Iowa. I will.

Mr. COX. Has the gentleman read this evening's Star?

Mr. GREEN of Iowa. No; I have not got that far. I suppose there is an addition to this story.

Mr. COX. There is, and it is very interesting. A colonel by the name of Black, a former graduate of West Point at the public expense, I presume, its seems, got hold of 500 acres of land where one of these shipyards is located and only got $2,000 an acre for it. It was land that had only been appraised and assessed at $100 an acre. Other land in that vicinity had been sold for $500 an acre, and yet this patriotic Col. Black, of New York, somehow got $2,000 an acre for 500 acres of land, amounting to $1,000,000. That is patriotism.

Mr. GREEN of Iowa. There are a large number of patriots mixed up in this Hog Island project. The great object seems to have been to hog everything in sight.

Mr. COX. This colonel has hogged his share of it. [Laughter.]

Mr. MOORE of Pennsylvania. We have reached the point where we favor a change of name.

Mr. GREEN of Iowa. I do not think the name ought to be changed. It is altogether appropriate. I will say this, that so many of these cost-plus contracts have been let that it simply put a premium on graft and waste and encouraged extravagance.

Mr. BLACK. Will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. BLACK. Would it not be wise in the amendment to empower the Emergency Fleet Corporation to fix the limit of cost and not allow the contractor any compensation when the figures go beyond that limit of cost?

Mr. GREEN of Iowa. The difficulty with that, as I understand the board, is that the cost is daily advancing, so that at the time of the contract it would be impossible to fix a price as the work proceeded.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. GREEN of Iowa. I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GREEN of Iowa. Now, Mr. Chairman, this amendment which I have offered, instead of providing an inducement for graft, for waste, and for extravagance, offers an inducement to perform these contracts as cheaply as possible. It provides, in the first instance, that a reasonable cost be fixed and determined at the time of the contract by the Shipping Board.

Mr. MADDEN. Will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. MADDEN. As I read the amendment, I am inclined to think that under the language the Shipping Board would be obliged to let the work in competitive bidding.

Mr. GREEN of Iowa. Under my amendment? No.

Mr. MADDEN. That is the way it reads to me.

Mr. GREEN of Iowa. The amendment provides that in any contract if let on a basis of compensation plus cost——

Mr. MADDEN. How does the gentleman construe this language?—

> Nor shall any part of said sum be paid upon any contract for construction which provides that the compensation of the contractor shall be the cost of construction plus a percentage thereof for profit.

That language would seem to prevent the Shipping Board from doing this work on a basis of cost plus.

Mr. GREEN of Iowa. "Unless," as the provision goes on to say——

Mr. MADDEN. Unless such contract shall fix a reasonable cost of such construction as determined by the United States Shipping Board Fleet Corporation.

Now, if the board could fix a reasonable cost in advance, they could only do that by stabilizing the cost of material and stabilizing the price of labor, and of course if they could do those two things then they could let the contract by competitive bids, but if they can not do either or both of the things it would be absolutely impossible to fix the price in advance. I am trying to get before the gentleman my view of the thing, so that he may explain it for the understanding of Members here.

Mr. GREEN of Iowa. The fixing of a reasonable price is in the option or in the discretion of the board. They can fix it at any sum, and it would be assumed that they would fix it at a reasonable price at the time the contract was made. It does not mean that they are to control prices, and would not have that meaning as a matter of law.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. MOORE of Pennsylvania. Since the gentleman has obtained recognition and offered his amendment, I will not offer the 5 per cent amendment I had in mind. I would like to ask the gentleman whether the effect of his amendment would be to limit the discretion which seems to have existed heretofore to pay bonuses and increases of cost after work was commenced?

Mr. GREEN of Iowa. The amendment that I have offered would not eliminate that, but it would decrease the percentage of profit as the cost was raised, so there would be no inducement to increase the cost, but rather an inducement to decrease it, and it provides for fixing the reasonable cost at the time the contract is entered into.

Upon that a certain percentage could be paid under the provisions of my amendment. That is, that would be an absolute sum that the contractor would get in any event. If he exceeded that, his percentage would decrease in proportion to the increase of the cost.

Mr. MOORE of Pennsylvania. The amendment cuts out the cost-plus percentage, as we now understand it, does it not?

Mr. GREEN of Iowa. It does not absolutely forbid such contracts; but my amendment is drawn upon the theory that such contracts may be found to be necessary at times, and it proposes to so modify them that instead of offering a temptation to waste and extravagance which is offered in the ordinary form of these cost-plus contracts, there will be an inducement to economy.

Mr. MOORE of Pennsylvania. In other words, the amendment proposes to pay a premium to those who reduce the cost?

Mr. GREEN of Iowa. Yes. It limits the profit; and under it a contract could be so drawn that if extravagance and waste were permitted it would be at the expense of the contractor. For example, the contract could provide that if the estimated price was exceeded by 5 per cent the contractor would receive 5 per cent on that extra cost; if it was exceeded 10 per cent, 3 per cent of the excess; if exceeded 15 per cent, one-half per cent, and so on. The higher the cost mounted the less the contractor would get; but it would not stop the making of contracts, because the contractor would get his per cent on the estimated reasonable cost in any event.

Mr. MONDELL. Mr. Chairman, I rise to support the amendment offered by the gentleman from Iowa [Mr. GREEN]. I had in mind offering an amendment which absolutely forbid cost-plus contracts. I believe that such an amendment, if adopted, would not unduly hamper the Shipping Board in this construction, and I am of opinion that cost-plus contracts, if justified at any time, under any circumstances, are not necessary in connection with this work. But there seems to be some difference of opinion in regard to that, so I shall not at this time offer the amendment, but will support the amendment offered by the gentleman from Iowa. The amendment of the gentleman from Iowa provides that the Shipping Board shall make an estimate of cost as they do now in all these cases. Under that amendment they could enter into a cost-plus contract, but when the expenditure reached the estimated cost the percentage of profit would begin to decrease in such manner as might be provided for in the contract, taking away at least some of the temptations to increase the cost in order to secure added profits. I believe it would be a great improvement upon present methods.

We have had a very sad and unhappy experience under these cost-plus contracts. I think the first time they were suggested in the House in connection with an appropriation bill I expressed the opinion that we would have very great scandal under that kind of contract. I argued that it encouraged waste and extravagance and would lead to graft, and that it was very unwise to pursue such a policy. The outcome in the building of cantonments and particularly at the Hog Island shipbuilding plant, has certainly justified the fears I expressed when the matter was first considered in the House. Hog Island! What a prophetic soul was he who named it! Hog Island—a shipbuilding plant that was to cost $21,000,000 has cost $29,000,000 up to date and will cost $45,000,000, and not a keel laid, not a ship under way! Hog Island—where, according to the record so far, no one person has been able to get on the pay roll more than seven times or draw more than seven salaries! How many patriots have drawn more than seven salaries we do not know. We know that at least one man there has been so patriotic in his support of his Government that he has drawn seven salaries for his patriotic endeavors. Whether he did any work the record does not disclose—probably not, as it must have taken all his time to draw his seven salaries.

Mr. COX. What was the aggregate of the seven salaries?

Mr. MONDELL. I do not know, but as even a water boy who drew less than $5 or $6 a day seems to have been considered a piker, it must have been a fairly good sum. Hog Island! When all the land lay under a fearful condition of freight congestion, and from all parts of the country there was a cry for empties, for cars to carry coal, when in this city 5,000 homes, according to official statements, were cold and cheerless, without fuel in zero weather, when all over the land there were countless families, women and children, suffering for want of coal, then, and under these conditions, Hog Island had an average of 1,300 loaded cars standing on sidetracks, on each of which your Uncle Samuel paid $5 per day demurrage—$6,500 per day paid at Hog Island out of the Federal Treasury for demurrage on cars that could have been unloaded any day! And as the patriotic, high-minded corporation that had the contract was, I understand, getting 10 per cent on all costs, it was on that basis drawing into its pocket from the National Treasury every day $650 as its rake-off on the $6,500 per day that the Government was paying on demurrage. It was testified at the hearing that at one time there were over 3,500 loaded cars, all paying demurrage, I presume, and adding to the graft. According to the sworn testimony before the Senate committee, while these cars were lying on sidetracks with their loads, a third of the men under pay were not working because the material was not unloaded. Hog Island! Where one piece of work, estimated to cost $50,000, cost $600,000. Hog Island! Where every device criminal ingenuity could invent was practiced to increase costs to the Government and profits to grafters. Hog Island! What a libel the Saturnalia of graft that flourishes there is on honest swine. Men have been shot for less traitorous doings in times of war. Is it any wonder that we seek to prevent such unbridled graft in the future?

Mr. ALEXANDER. Mr. Chairman, yesterday under leave to extend my remarks in the RECORD I inserted a statement from Moody's Manual, edition of 1917, giving the names of the officers and directors of the American International Corporation, the agency selected by the United States Shipping Board Emergency Fleet Corporation to construct the shipbuilding plant at Hog Island and to build ships therein. They are men of national reputation in the financial world, and we might reasonably have expected under the present emergency, inspired by patriotism, they would have faithfully discharged their trust and protected the interests of the Government. I want to be just and say that I do not believe that Mr. Frank A. Vanderlip, who is president of the board of officers of the American International Corporation, had personal knowledge of these conditions, and I am optimistic enough to believe that as soon as he and the other high officers of the corporation have their attention called to conditions at Hog Island they will cooperate with Admiral Bowles in cleaning out the Augean stables and giving the Government a square deal.

Mr. COOPER of Wisconsin. Will the gentleman permit a question?

Mr. ALEXANDER. Yes.

Mr. COOPER of Wisconsin. What is the reason that the president of that corporation, who lives in New York City, only 90 miles away from the shipyards, could not have been acquainted with conditions there and could not have gotten there in three hours?

Mr. ALEXANDER. As the gentleman knows, he is president of the National City Bank also.

Mr. COOPER of Wisconsin. He has been traveling all over the country in a private car. Why could not he have taken three hours to travel to that shipyard?

Mr. ALEXANDER. Well, he certainly has notice of the conditions at Hog Island now, and the duty devolves upon him and the other officers of the corporation to look into conditions and remedy them, and restore to the Government at least a part of this money which has been wastefully expended, and stop the graft that has become a scandal and a stench in the nostrils of honest men.

Now, I am in entire sympathy with the purpose of the gentleman from Iowa [Mr. GREEN], who offered the pending amendment. I would be reluctant to do anything or oppose any amendment the purpose of which would be to protect the Treasury against such waste as has been going on at Hog Island and the waste that has gone on in connection with building of cantonments.

Mr. BLACK. Will the gentleman yield for a question on that point?

Mr. ALEXANDER. I will.

Mr. BLACK. Does the gentleman think any man ought to accept as responsible a position as the president of a great concern like that and not devote some personal attention to the management of the corporation and have some personal knowledge of what is going on?

Mr. ALEXANDER. Mr. Vanderlip, I imagine, is connected with so many corporations in a responsible capacity that it would be impossible for him to give his personal attention to the details of all of them, and I assume he thought the responsible agents of the corporation would give the Government a square deal.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. ALEXANDER. Yes.

Mr. COOPER of Wisconsin. I am not acquainted with the president, and, of course, do not wish to attack him any more than the gentleman from Missouri, but does the gentleman from Missouri think it is part of his duty as chairman of this great committee to excuse in advance the officers of a corporation like that, who live within a few miles of it, practically all of them, and lay the blame upon their subordinates?

Mr. ALEXANDER. I do not want to excuse them.

Mr. COOPER of Wisconsin. The gentleman did excuse them.

Mr. ALEXANDER. Well, I did not intend to.

Mr. COOPER of Wisconsin. There has been in this country, if the gentleman will permit the suggestion, back for a generation or more, to my certain knowledge, too much of these excuses of men who are big and prominent, at the head of great corporations, and putting the blame on their subordinates. It is time the men who are in charge of corporations—the officers—should be held responsible for such outrageous doings as are going on at Hog Island.

Mr. ALEXANDER. I can understand why Mr. Vanderlip did not have knowledge of conditions up to this time, but I can not understand why he may not have knowledge of conditions now, and I am not disposed to excuse him unless he does his utmost to remedy them. And I do not say Mr. Vanderlip alone, but every officer and director of the American International Corporation as well.

Mr. MOORE of Pennsylvania. Mr. Chairman, in order to get the facts straight, is it not true that Mr. Vanderlip, who was president of the National City Bank, a very powerful New York corporation, recently resigned the presidency of that institution to enter the service of the Government at a dollar a year to sell war-savings stamps on behalf of the Secretary of the Treasury?

Mr. ALEXANDER. I did not understand he had resigned as president of the bank, but I do understand he has given a large part of his time, if not all of his time, to the purpose mentioned by the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE of Pennsylvania. I recall having read recently that Mr. Vanderlip did resign as president of the National City Bank, and that he did so, stating that he had put all financial interests behind him; that he proposed to dedicate his services to the Government of the United States; that he felt that the sale of the war-savings stamps was a patriotic duty and that he desired to "do his bit" in that way. His services were accepted, as I understand it, by the Secretary of the Treasury, with whom he has been cooperating from that time to this.

Mr. ALEXANDER. Now, with reference to this amendment, it provides:

Nor shall any part of said sum be paid upon any contract for construction which provides that the compensation of the contractor shall be the cost of construction plus a percentage thereof for profit, unless such contract shall also fix a reasonable cost of such construction as determined by the United States Shipping Board Emergency Fleet Corporation.

Now, as pointed out by the gentleman from Illinois [Mr. MADDEN], who is unquestionably one of the best business men in this House, how is the board to ascertain the cost of construction? The great difficulty is to ascertain such cost. I do not suppose there is a man in any department of the Government that does not realize the vice in the cost-plus plan, but can you determine what the cost of the material will be? Can you determine the cost of labor when the labor cost is shifting and increasing from day to day? How are you going to ascertain what it will cost to build a house? Will any reasonable contractor, having regard to his own welfare, agree to build a house for $2,500 without reference to the probable increased cost of material or the increase in the cost of labor, without undertaking to protect himself against those contingencies? I wish it were so. I wish these costs were stabilized. It might be done in peace times, but under existing conditions when costs are increasing from day to day that is the problem confronting the Government.

Mr. MONDELL. The gentleman knows, of course, the Emergency Fleet Corporation now and the War Board now make an estimate of the cost of all of these contracts. They do that, and that estimate, if it is not a part of the contract, is presented with the contract. It is supposed to be a guide. Twenty-one million dollars was the esimated cost of Hog Island. Now, why is it not entirely feasible to enter into a contract with the provision that when that estimated cost is reached the profit shall decrease as the cost increases further? Does not that give the very leverage that is needed to discourage increasing the cost?

Mr. ALEXANDER. Now, let me call the gentleman's attention to this fact: Suppose the Emergency Fleet Corporation does estimate the cost. They must get a contractor. He may say, "That is not a reasonable cost; you can not figure on what will be a reasonable cost to-morrow; you can not figure on the cost of material to-morrow; you can not figure on the cost of labor to-morrow. Hence, I am not going to take that contract with the provision in it that my profit shall be 5 per cent in excess of your estimate, because the increased cost of labor and material to-morrow may entirely wipe out that 5 per cent, and there will be no inducement for me to take the contract. I can not afford to take the chances." Of course, the Emergency Fleet Corporation may say, "We will pay you 25 per cent and make the margin wide enough." He may say, "I will take it on a cost-plus basis, based on your estimate, but I want the per cent large enough to cover any possible increase in the cost." And under this amendment they make it 5 per cent, 10 per cent, 15 per cent, 20 per cent, or 25 per cent, to meet that condition. Hence, while the purpose of this amendment, it does not solve the difficulty.

Mr. COOPER of Wisconsin. Will the gentleman permit an interruption?

Mr. ALEXANDER. Then the remedy would fail. Yes; I yield to the gentleman from Wisconsin.

Mr. COOPER of Wisconsin. So far as the steel is concerned, used in that Hog Island yard, the Government of the United States fixed the price absolutely and arbitrarily at $65 a ton. I heard a witness testify to that not more than half an hour ago, and he was one of the contractors.

Mr. MADDEN. There will not be any steel used in these houses.

Mr. ALEXANDER. There will be some hardware in the houses, of course, but the houses will not be of steel construction.

I am in entire sympathy with the purpose of this amendment, but I do not believe that if written in the bill it would militate against carrying out the housing scheme, if it unduly hampers the Emergency Fleet Corporation.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COX. Mr. Chairman, I ask unanimous consent that he may have one minute more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. COX. The gentleman seems to think he is in sympathy with this amendment; at least, that it will work out. Does not the gentleman believe that it ought to go to conference, of which he will be a member, and be worked out there?

Mr. ALEXANDER. I am in sympathy with the principle of the amendment, but I do not believe this amendment is drawn along the proper lines to meet the conditions.

Mr. COX. That may be; but we have all the confidence in the world in the gentleman, because he will be a member of that conference committee, and we think it ought to go there and let it be worked out. We will not be deceived in you at all.

Mr. HARDY rose.

The CHAIRMAN. Does the gentleman from Texas desire recognition?

Mr. HARDY. Yes. I wish to make just a few observations.

The CHAIRMAN. The gentleman can move to strike out the last word.

Mr. HARDY. I do that. I believe that if any provision of this kind should be adopted, it should simply be a straight, unequivocal provision that there should be no cost-plus contracts. If that were done the corporations expected to be organized by the shipyards to carry out, at least in part, the purposes of this act would simply have to employ good superintendents who would go out into the market and hire labor and buy materials to construct these houses. The superintendent acting for the corporation which got the money from the Government would be paid a reasonable salary, and the only profit to anyone would be the salary of that superintendent. That, I think, would be the way I would build a house for myself at this time, since no contractor would perhaps make a bid to build for me without a wide and safe and more than safe margin to cover any fluctuation in prices of labor or material. Now, if any amendment is going to be adopted, I believe one ought to be adopted that would prohibit the cost-plus contracts.

Mr. HELM. Mr. Chairman, will the gentleman yield?

Mr. HARDY. Yes.

Mr. HELM. We notice here in Washington blocks of houses that seem to be standardized to a type. Would it be possible for the persons connected with this board to agree upon a certain type of house?

Mr. HARDY. Unquestionably that is contemplated. They will have one type for this location and another for that location, suitable for the climatic conditions and the other conditions.

Mr. HELM. Then they could let a contract for a certain number of houses of a certain distinct type?

Mr. HARDY. Yes; that is true. Mr. Chairman, I agree with what the chairman of the committee said a moment ago. No contractor will feel himself safe to contract for 50 houses, or whatever number it may be, at any given price per house, because he does not know what the rate of wages will be to-morrow, and he does not know what the price of lumber will be to-morrow, or the price of any other material. The fluctuation in the prices of everything that enters into the cost of construction is so great that you are either bound to rely on the honesty of your manager to give you fair measure for all you spend in construction or else you have got to pay a fixed sum for the completed job you want done, far in excess in all probability of its actual cost. If you had a good superintendent who could go out into the labor market and into the material market and honestly secure labor and materials as cheaply as he can get them, you would have to pay him a good salary, but that would result in the cheapest construction you could get. The cost-plus policy has demonstrated itself to be full of scandal and rottenness. [Applause and cries of "Vote!" "Vote!"]

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Pennsylvania moves to strike out the last two words.

Mr. MOORE of Pennsylvania. Mr. Chairman, all of us desire, of course, that some system shall be devised by which we can stop the waste and extravagance that have been referred to. Those coming from the vicinity of Hog Island, I think, feel that way; but so much has been said about that place and its proximity to the city of Philadelphia, particularly by the gentleman from Wyoming [Mr. MONDELL], that I feel a word or two should be said concerning the desire of the people there to have this work properly done.

We want ships. The people of Philadelphia and of Pennsylvania are intensely patriotic. They are shipbuilders. They have built ships systematically for more than a hundred years. They know how to build ships. The difficulty here was that people came in who had the reputation of "knowing how," but who up to the present time have succeeded largely in spending money. They have not built the ships. Now, we want the ships built.

That is the general feeling around about that vicinity. There is no disposition to keep up this continual scandal, due to waste and extravagance. There is every disposition to have that chapter closed, even if the Government has lost money through its contracts, whether made foolishly or otherwise. We want results that will be creditable to the Government as well as to the locality.

Of course there has been difficulty in getting labor to the point called Hog Island. It takes some time for a mechanic to go from Philadelphia 8 miles down to Hog Island or 8 miles up from Chester. It takes time for him to get over from Billingsport or Camden and get down to Hog Island and then get back home. That causes great loss of time and en-

ergy. To a certain extent it accounts for some of the confusion in the labor problem there. But the Shipping Board has taken notice of the complaints of citizens and of the critics of the present system, and it has taken the bit in its teeth recently. The exposures being made on the other side of the Capitol and the things said in this House may be doing good, but the Shipping Board has taken the bit in its teeth, as I have said, and promises better things. It has sent a competent, up-to-date shipbuilder to Hog Island to see that this wretched business is straightened out.

I am happy to say that Admiral Bowles is upon the ground now, and that one of the first things he has done—and he is proceeding up to date, without any flourish of trumpets—has been to dispense with the services of $10,000 a year advertising men who have aided, probably, in keeping facts from the public. I do not believe in press agencies that suppress the facts. The public ought to know what is going on, and Admiral Bowles has indicated that it shall know. He is dispensing with the services of those who have tended to muddy the waters. [Applause.] Now he talks about getting down to business. He says he is going to produce ships. Mr. Hurley, of the Shipping Board, and Mr. Vice President Piez, of the Emergency Fleet Corporation, say they mean business now and propose to stand by Admiral Bowles. That is the situation at this moment, and because of it we will hope for better things.

In order that some of the details may be better understood I desire to have printed in the RECORD a letter from the vice president of the Emergency Fleet Corporation, sent to me the other day in answer to some inquiries; one with respect to the change of name, one with respect to the matter of local improvements for the convenience of the workmen who are to locate in this vicinity, and another with respect to the various forms of amusement, entertainment, educational facilities, and so forth, that ought to be provided for so large a community. I ask unanimous consent to print this letter as a part of my remarks.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to extend his remarks as indicated. Is there objection?

There was no objection.

The letter is as follows:

UNITED STATES SHIPPING BOARD,
EMERGENCY FLEET CORPORATION,
Washington, February 7, 1918.

Hon. J. HAMPTON MOORE,
House of Representatives, Washington, D. C.

DEAR MR. MOORE: Replying to your letter of January 27 to Mr. Hurley, which has been referred to me for reply, permit me to say that Admiral F. T. Bowles has recently been put in charge of the Government plants, with headquarters at Philadelphia. I am certain that he joins me in favoring a change in the name of the yard, "Hog Island" hardly being a proper appellation for the largest shipyard in existence. I am certain that if your constituents in Philadelphia desire the change, the officers of the Fleet Corporation will be very willing to lend their aid. Please bear in mind that the name now refers to the location of the yard and that it is the province of either the State or Federal authorities to make the change. Owing to its brevity "Hog Island" is likely to stick, particularly as the name of our agents, the American International Corporation, is too long to serve as a proper alternative.

Replying to your second paragraph, we are still awaiting the passage of the act authorizing an expenditure for housing and transportation of workers, and may be unable to finally close contracts until that act is passed. We have, however, definitely settled on a location in Philadelphia, the city having agreed to provide the necessary street, water, and sewerage improvements.

In regard to the third paragraph of your letter, it is our own feeling, and that of several of the members of the Senate committee now investigating the Emergency Fleet Corporation's affairs, that in all cases where the communities are large enough school facilities should be provided by the community and that amusement and social features should be left to private initiative.

The reports of housing plans at Hog Island have been rather exaggerated, because it is our intention to materially improve the transportation facilities and to reduce the number of houses to about two thousand. We have been rather chary of making this information public because, owing to lack of legislative authority, we were unable to promptly complete our plans and were unwilling on that account to make a general announcement of them. We hope, in the course of a few days, to have proper congressional authorization, and we shall be glad thereupon to furnish you any additional information that may be of use and value to your community.

Very truly, yours,
CHARLES PIEZ,
Vice President and General Manager.

Mr. GREEN of Iowa. Mr. Chairman, I ask unanimous consent to proceed for one minute.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. GREEN of Iowa. I would not ask even for this additional minute if this were not such an important matter; but I wish to call the attention of the committee to the fact that my amendment does not unduly restrict the Shipping Board. There is no difference in their powers to make the necessary contracts. If there is any fault whatever with this amendment, it is that it does not restrict the Shipping Board sufficiently. It follows what I have understood to be the general plan that has been used in some instances by Mr. Secretary Daniels in making contracts for the Navy. It is a process which results in a decrease of the profits, cutting down the unreasonable profits and preventing this outrageous profiteering which has been going on in cases like that at Hog Island.

The CHAIRMAN. The question is on the amendment of the gentleman from Iowa [Mr. GREEN].

The question being taken, on a division (demanded by Mr. GREEN of Iowa), there were—ayes 21, noes 26.

Mr. GREEN of Iowa. Tellers, Mr. Chairman.

The CHAIRMAN. The gentleman from Iowa demands tellers. All in favor of ordering tellers will rise and stand until they are counted. [After counting.] Sixteen Members, not a sufficient number.

Mr. GREEN of Iowa. The other side, Mr. Chairman.

Mr. BUTLER. The rule requires 20.

The CHAIRMAN. The Chair has not requested the other side to rise. One-fifth of a quorum of the Committee of the Whole is required. The amendment is lost.

Mr. ALEXANDER. I move that the committee do now rise and report the bill with the amendments, with the recommendation that the amendments be agreed to——

Mr. MOORE of Pennsylvania. I desire to offer an amendment. I hope the gentleman will withhold his motion.

Mr. ALEXANDER. I will withhold the motion.

Mr. MOORE of Pennsylvania. I offer the amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. MOORE of Pennsylvania: Page 6, line 17, after the word "sum," strike out the period, insert a semicolon, and add the following:

"*Provided*, That the United States Emergency Fleet Corporation shall report to Congress on the 1st days of July and January of each year the names of all persons or corporations with whom it has made contracts, and of such subcontractors as may be employed in furtherance of this act, including a statement of the purposes and amounts thereof, together with a detailed statement of all expenditures by contract or otherwise, for land, buildings, materials, labor, salaries, commissions, demurrage, or other charges in excess of $10,000."

Mr. MOORE of Pennsylvania. Mr. Chairman, this amendment speaks for itself. It has been added to certain other bills when lump-sum appropriations were made, and in view of the criticism of this board it seems to me it ought to welcome a provision of law like this. It can readily make its return, stating to whom these contracts have been awarded, giving the names of the subcontractors, stating the purpose of the contract, the amount thereof, and giving in detail such expenditures as have been made in the way of commissions, salaries, and so forth, in excess of the sum of $10,000. It seems to me an amendment like this ought to be welcome to clarify the situation.

Mr. ALEXANDER. I have no objection to the amendment, unless it is covered by the existing law. The shipping act, section 12, in the last paragraph, provides——

Mr. MOORE of Pennsylvania. That pertains to the Shipping Board, and my amendment pertains to the Emergency Fleet Corporation.

Mr. ALEXANDER. I will not oppose the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania.

The amendment was agreed to.

Mr. MONDELL. Mr. Chairman, I offer the following amendment at the end of the paragraph.

The Clerk read as follows:

Insert at the end of the paragraph, line 17, page 6, the following: "That no portion of this sum shall be expended to make payment on so-called cost-plus contracts.

The CHAIRMAN. The question is on the amendment.

The question was taken; and on a division (demanded by Mr. ALEXANDER) there were—ayes 18, noes 24.

So the amendment was rejected.

Mr. ALEXANDER. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. SAUNDERS of Virginia, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (S. 3389) to authorize and empower the United States

Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes, and had directed him to report the same back with the recommendation that the amendments be agreed to and the bill as amended do pass.

Mr. ALEXANDER. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

There was no demand for a separate vote.

The amendments were agreed to.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was read a third time.

Mr. GREEN of Iowa. Mr. Speaker, I offer the following motion to recommit.

The Clerk read as follows:

Mr. GREEN of Iowa moves to recommit the bill with instructions to forthwith report it back with the following amendment:

Page 6, line 17 after the word "sum," strike out the period, insert a comma, and add the following: "nor shall any part of said sum be paid upon any contract for construction which provides that the compensation of the contractor shall be the cost of construction plus a percentage thereof for profit, unless such contract shall also fix the reasonable cost of such construction as determined by the United States Shipping Board Emergency Fleet Corporation and provide that upon any increase in cost above the reasonable cost so fixed by such board, the percentage of profit shall decrease as the cost increases in accordance with a rate to be fixed by said board and expressed in the contract: *Provided, however*, That nothing herein contained shall be construed to prevent said board from contracting for the payment of premiums or bonuses for the speedy completion of the work contracted for."

The SPEAKER. The question is on the motion to recommit.

The question was taken; and on a division (demanded by Mr. GREEN of Iowa) there were 25 ayes and 25 noes.

The SPEAKER. The Chair votes in the negative.

So the motion to recommit was lost.

Mr. GREEN of Iowa. Mr. Speaker, I make the point of no quorum.

Mr. ALEXANDER. Mr. Speaker, if the gentleman is going to issist on his point, the result of which would be to throw the passage of this bill over until Thursday, I prefer to accept the amendment. We can not with good grace criticize the Shipping Board for not speeding up its program.

The SPEAKER. The motion to recommit is rejected by the vote of the Speaker.

Mr. ALEXANDER. I ask unanimous consent to vacate the proceedings on the motion to recommit and take a new vote upon it.

The SPEAKER. The gentleman from Missouri asks unanimous consent to vacate the proceedings on the vote on the motion to recommit. Is there objection?

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The question was taken, and the motion to recommit was agreed to.

Mr. ALEXANDER. Mr. Speaker, by direction of the committee I report back the bill with the amendment, with the recommendation that it be agreed to.

The SPEAKER. The question is on agreeing to the Green amendment.

The amendment was agreed to.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

The title was amended to read as follows: "As act to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire, and to sell or otherwise dispose of improved or unimproved land, houses, buildings, and for other purposes."

On motion by Mr. ALEXANDER, a motion to reconsider the vote by which the bill was passed was laid on the table.

ADJOURNMENT.

Mr. SAUNDERS of Virginia. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 55 minutes p. m.) the House adjourned until to-morrow, Wednesday, February 13, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting supplemental estimates of appropriation required by the Engineer Department for the fiscal year 1918 (H. Doc. No. 930); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. ESCH, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 7998) granting the consent of Congress to the village of East Dundee and the village of West Dundee to construct a bridge across the Fox River, reported the same without amendment, accompanied by a report (No. 301), which said bill and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SMITH of Michigan: A bill (H. R. 9783) to prevent and punish the desecration, defamation, mutilation, or improper use of the flag of the United States of America; to the Committee on the Judiciary.

By Mr. WHEELER: A bill (H. R. 9784) incorporating the patrol drivers into the Metropolitan police department of the District of Columbia; to the Committee on the District of Columbia.

By Mr. HOWARD: A bill (H. R. 9785) to amend section 3173 of the Revised Statutes of the United States; to the Committee on Ways and Means.

By Mr. DARROW: A bill (H. R. 9786) allowing reduced rate of transportation for men in the military and naval service of the United States; to the Committee on Military Affairs.

By Mr. HARDY: A bill (H. R. 9787) to provide further for the national security and defense by making provision for the purchase of iron ore, coking coal, limestone, and other material, essential for the manufacture of iron and steel, and constructing, equipping, maintaining, and operating blast furnaces and steel plants and mills by the Government of the United States, and for other purposes; to the Committee on Military Affairs.

By Mr. MADDEN: Resolution (H. Res. 248) providing for the consideration of House bill 9414, entitled "A bill granting increased compensation to certain officials, employees, and laborers in the Post Office Department and Postal Service, and for other purposes"; to the Committee on Rules.

By Mr. BACHARACH: Resolution (H. Res. 249) directing the Committee on Military Affairs to make an investigation of the leasing of the hotel Cape May for hospital purposes; to the Committee on Rules.

By Mr. LUNN: Joint resolution (H. J. Res. 243) calling the attention of the American public to the patriotic opportunity of using thrift stamps for valentines on Valentine Day, Thursday, February 14, 1918; to the Committee on Ways and Means.

By Mr. SIMS: Joint resolution (H. J. Res. 244) authorizing the granting of insurance under the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917, on application by a person other than the person to be insured; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER: A bill (H. R. 9788) granting an increase of pension to Nelson Watkins; to the Committee on Invalid Pensions.

By Mr. ASHBROOK: A bill (H. R. 9789) granting a pension to Phedora J. Black; to the Committee on Invalid Pensions.

By Mr. BLAND: A bill (H. R. 9790) granting an increase of pension to John H. Ellett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9791) granting a pension to Thomas B. Perkins; to the Committee on Invalid Pensions.

By Mr. CAMPBELL of Kansas: A bill (H. R. 9792) granting a pension to Henry N. Wilks; to the Committee on Pensions.

By Mr. CRAMTON: A bill (H. R. 9793) granting an increase of pension to John G. Clark; to the Committee on Invalid Pensions.

By Mr. DOOLITTLE: A bill (H. R. 9794) granting an increase of pension to William F. Thornberry; to the Committee on Invalid Pensions.

By Mr. ELLIOTT: A bill (H. R. 9795) granting a pension to John F. Joyce; to the Committee on Pensions.

By Mr. ELSTON: A bill (H. R. 9796) granting an increase of pension to Henry Clay Henry; to the Committee on Invalid Pensions.

By Mr. EMERSON: A bill (H. R. 9797) granting an increase of pension to Oscar P. Quiggle; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9798) granting an increase of pension to Seth N. Byers; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9799) granting a pension to Mathew N. Brown; to the Committee on Invalid Pensions.

By Mr. JONES of Texas: A bill (H. R. 9800) granting an increase of pension to John Benson; to the Committee on Invalid Pensions.

By Mr. KIESS of Pennsylvania: A bill (H. R. 9801) for the relief of Mrs. Susie A. Van Kirk; to the Committee on Naval Affairs.

By Mr. MOORES of Indiana: A bill (H. R. 9802) granting a pension to Cinderella Jackson; to the Committee on Inavlid Pensions.

By Mr. NEELY: A bill (H. R. 9803) granting a pension to Stanley W. Lemley; to the Committee on Pensions.

By Mr. O'SHAUNESSY: A bill (H. R. 9804) granting a pension to David A. Gage; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9805) granting a pension to Emma Chase; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9806) granting an increase of pension to Frederick Althaus; to the Committee on Invalid Pensions.

By Mr. PURNELL: A bill (H. R. 9807) granting an increase of pension to Byron R. Russell; to the Committee on Invalid Pensions.

By Mr. SANDERS of Indiana: A bill (H. R. 9808) granting a pension to Emri Sites; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9809) granting a pension to Seth J. Huron, jr.; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9810) granting a pension to Louisa F. Lucas; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9811) granting a pension to David Phillips, alias Charles Gray,; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9812) granting a pension to Joseph W. Camp; to the Committee on Invalid Pensions.

By Mr. SCHALL: A bill (H. R. 9813) granting an increase of pension to George W. Downing; to the Committee on Invalid Pensions.

By Mr. SHOUSE: A bill (H. R. 9814) granting an increase of pension to Francis M. Truax; to the Committee on Invalid Pensions.

By Mr. SLOAN: A bill (H. R. 9815) granting a pension to Ann E. Davis; to the Committee on Invalid Pensions.

By Mr. SMITH of Idaho: A bill (H. R. 9816) granting an increase of pension to John C. Mitts; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9817) granting a pension to George Starrh; to the Committee on Pensions.

By Mr. SMITH of Michigan: A bill (H. R. 9818) granting a pension to Eliza C. Spears; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9819) granting a pension to Isaac Holley, alias Hawley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9820) making appropriation for payment of balances due by readjustment of salaries of postmasters under existing law; to the Committee on the Post Office and Post Roads.

By Mr. STEENERSON: A bill (H. R. 9821) granting an increase of pension to Darius N. Shaw; to the Committee on Invalid Pensions.

By Mr. TINKHAM: A bill (H. R. 9822) granting an increase of pension to Mattie L. Wade; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9823) granting a pension to Louis T. Lutzio; to the Committee on Pensions.

By Mr. WELTY: A bill (H. R. 9824) for the relief of George R. Gary; to the Committee on Military Affairs.

By Mr. WILLIAMS: A bill (H. R. 9825) granting an increase of pension to Joseph Wilson King; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9826) granting a pension to William A. Phillips; to the Committee on Pensions.

By Mr. WOODYARD: A bill (H. R. 9827) granting an increase of pension to Martha Wilson; to the Committee on Invalid Pensions.

By Mr. WOOD of Indiana: A bill (H. R. 9828) granting an increase of pension to Lawson Ellsworth; to the Committee on Pensions.

By Mr. EMERSON: Joint resolution (H. J. Res. 242) to pay to Silas McElroy, of Cleveland, Ohio, the sum of $10,000 for injuries received while in the service of the Government; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of Union No. 121, Long Island City, Brotherhood of Painters, Decorators and Paperhangers of America, asking that the United States bring about an armistice to bring about peace on basis suggested by revolutionary Russian Government; to the Committee on Foreign Affairs.

Also (by request), a resolution of the United Irish Catholic Societies of Lowell, Mass., asking that the political independence of Ireland be assured; to the Committee on Foreign Affairs.

Also (by request), resolution of the National Security League, urging that all espionage activities be placed in charge of one person appointed by and responsible to the President; to the Committee on the Judiciary.

Also (by request), resolution of the Noonday Luncheon Club of Joplin, Mo., against repeal of periodical postage rates amendment to war revenue act; to the Committee on Ways and Means.

Also (by request), memorial of the National Federation of Federal Employees, protesting against the Borland amendment; to the Committee on Agriculture.

Also (by request), petition of D. Clyde Snyder, Hagerstown, Md., urging increased salaries to post-office printers; to the Committee on the Post Office and Post Roads.

By Mr. BLAND: Evidence to accompany a bill granting a pension to James B. Perkins; also, evidence to accompany a bill granting a pension to John H. Ellett; to the Committee on Invalid Pensions.

By Mr. CARY: Resolution of the Merchants, Manufacturers, and Employers' Association, protesting against the periodical amendment to the war revenue act; to the Committee on Ways and Means.

Also, resolution of the National Security League, urging that all espionage activities be placed under one person, who shall be appointed by and responsible to the President; to the Committee on the Judiciary.

By Mr. DALE of New York: Resolutions of the Maryland State Federation of Women's Clubs, the Fortnightly Club, Sharon, Mass., the Entre Nous Club, Longmont, Colo., and the Community Association of Crawfordsville, Ind., protesting against the zonal system for periodical postage; to the Committee on Ways and Means.

Also, memorial of the Boston & Maine Minority Stockholders' Protective Association, submitting an amendment to S. 3385; to the Committee on Interstate and Foreign Commerce.

By Mr. FULLER of Illinois: Petition of Edwin B. Frost, director of the Yerkes Observatory, for the daylight-saving bill; to the Committee on Interstate and Foreign Commerce.

Also, memorial of the Waukegan (Ill.) Chamber of Commerce for requiring second-class mail to pay the full cost of the service; to the Committee on the Post Office and Post Roads.

Also, petition of the Women's Club of Lake Placid, N. Y., for repeal of the increased rates of postage on periodicals; to the Committee on Ways and Means.

Also, petition of the Riverside Woman's Club, Riverside, Ill., against allowing grazing in the national parks and shooting in the national bird reservations; to the Committee on the Public Lands.

Also, memorial of the Illinois Commercial Association for the Chamberlain bill for universal military training; also, a memorial of the Merchants' Association of New York, for a board of war control and a director of munitions; to the Committee on Military Affairs.

By Mr. HAMLIN: Papers to accompany H. R. 9537, a bill to pension Sarah Haggard; to the Committee on Invalid Pensions.

By Mr. HILLIARD: Letter from Amanda N. Hamilton, of Greeley, Colo., urging the admittance of osteopathic physicians to the Medical Corps of the Army; to the Committee on Military Affairs.

Also, petition of Mile High Lodge, No. 680, Brotherhood of Railroad Trainmen, urging the Congress to refrain from action on legislation designed to place men engaged in transportation service under Federal workmen's compensation; to the Committee on Labor.

Also, petition of O. E. Johnston, of Leadville, Colo., urging the passage of H. R. 1654, providing for increase of pay for post-office clerks and letter carriers; to the Committee on the Post Office and Post Roads.

By Mr. NOLAN: Petition of United Brotherhood of Carpenters and Joiners of America, Local Union No. 22, of San Francisco, Cal., and 12 citizens of San Francisco, Cal., favoring the Madden bill, H. R. 1654; to the Committee on the Post Office and Post Roads.

Also, petition of John Nyglicek, secretary Pacific coast division Bohemian National Alliance, San Francisco, Cal., favoring independence of small nations; to the Committee on Foreign Affairs.

By Mr. SMITH of Idaho: Papers to accompany H. R. 9740, to pension Nels Christensen; to the Committee on Pensions.

By Mr. SULZER: Petition of Igloo No. 16, Pioneers of Alaska, Ketchikan, Alaska, relating to suspension of eight-hour law in connection with fisheries industry; to the Committee on the Territories.

By Mr. TAGUE: Petition of the Woman's Club, Beaver Dam, Wis., on increased postal rates; to the Committee on the Post Office and Post Roads.

Also, petition of the Fortnightly Club, Sharon, Mass., on increase in postal rates; to the Committee on the Post Office and Post Roads.

Also, petition of Joint Committee on National Representation for the District of Columbia on H. J. Res. 73 and S. J. Res. 64; to the Committee on the District of Columbia.

SENATE.

WEDNESDAY, *February 13, 1918.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, in Thy divine providence we have been called in this place of the Nation's highest council, in the midst of times that are tense, that are tragic; times where words are carried by the winds to the uttermost parts of the earth, where records are written in blood. O do Thou give to us divine inspiration and wisdom for the duties that day by day present themselves to us, that we may perform our duties with an eye single to Thy glory, knowing that the welfare, happiness, and peace of the world must come at last into conformity to the will of God and as an expression of Thy purpose among men. Hear us in this our prayer, and lead us in the discharge of every duty. For Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

NOBEL PEACE PRIZE.

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of State, transmitting, at the request of the secretary of the Nobel Committee of the Norwegian Parliament, a copy of the circular issued by the Nobel Committee, furnishing information as to the distribution of the Nobel peace prize for the year 1918, which, with the accompanying papers, was referred to the Committee on the Library.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by G. F. Turner, one of its clerks, announced that the House had passed the bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes, with amendments, in which it requested the concurrence of the Senate.

The message also transmitted to the Senate resolutions on the life and public services of the Hon. ELLSWORTH R. BATHRICK, late a Representative from the State of Ohio.

PETITIONS AND MEMORIALS.

Mr. McLEAN. I present brief resolutions adopted at a meeting of Hartford citizens held under the auspices of the Connecticut Woman Suffrage Association. I ask that they be printed in the RECORD without reading.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

To Senator GEORGE P. MCLEAN:

Resolutions adopted at a meeting of Hartford citizens, held under the auspices of the Connecticut Woman Suffrage Association on Friday, February 8, 1918.

Resolved, That this meeting call upon the Senate of the United States to pass the Federal woman suffrage amendment, thus insuring to our own country that democracy for which our men are fighting abroad. Be it also

Resolved, That this resolution be sent to Senator GEORGE P. MCLEAN, and that he be requested to see that it is read into the CONGRESSIONAL RECORD.

Mr. McLEAN presented petitions of Local Branch No. 65, First Slovak Catholic Union, of Bridgeport; of Local Branch No. 508, First Slovak Catholic Union, of Bridgeport; of Local Assembly No. 9, Slovak Workers' Society, of Torrington; of Local Branch No. 452, National Slovak Society, of Torrington; of the Catholic Gymnastic Union Slovak Sokal, of Bridgeport; and of Local Branch No. 131, Slovak League, of Danbury, all in the State of Connecticut, praying for the liberation and unification of the Czecho-Slovaks of Austria-Hungary into one independent Czecho-Slovak State, which were referred to the Committee on Foreign Relations.

He also presented a petition of the Connecticut Division of the woman's committee of the Council of National Defense, praying for the enactment of legislation to insure the planting of the tobacco lands of the country in foodstuffs as fast as may be done without injustice to the producer or disaster to a business heretofore recognized as legitimate, which was referred to the Committee on Agriculture and Forestry.

He also presented petitions of sundry citizens of Mansfield Center; of the Equal Franchise League of West Haven; and of the Trades Council of New Haven, all in the State of Connecticut, praying for the submission of a Federal suffrage amendment to the legislatures of the several States, which was ordered to lie on the table.

Mr. PHELAN presented a petition of the Calaveras and Alpine Stock Association, of San Andreas, Cal., praying that a portion of the Yosemite National Park be thrown open for the use and relief of the stockmen of California, which was referred to the Committee on Public Lands.

Mr. THOMAS presented a memorial of sundry citizens of Miltonvale, Kans., remonstrating against the enactment of legislation to make it unlawful to deposit in the mails of the United States advertisements of alleged exposures of the secret work of fraternal orders, etc., which was referred to the Committee on Post Offices and Post Roads.

Mr. SMITH of South Carolina presented resolutions adopted by the First Congressional District Branch of the South Carolina Branch of the National Woman's Party, favoring the submission of a Federal suffrage amendment to the legislatures of the several States, which were ordered to lie on the table.

Mr. TOWNSEND presented a resolution adopted by the New Century Club, of Detroit, Mich., favoring the submission of a Federal suffrage amendment to the legislatures of the several States, which was ordered to lie on the table.

He also presented a petition of sundry employees of the John Deere Plow Co., of Lansing, Mich., praying for the adoption of certain amendments to the espionage act, which was referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Detroit, Mich., remonstrating against the enactment of legislation authorizing the President to coordinate or consolidate executive bureaus, agencies, and offices, and for other purposes, in the interest of economy and the more efficient concentration of the Government, which was ordered to lie on the table.

REGISTRATION FOR MILITARY SERVICE.

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which was referred the joint resolution (S. J. Res. 124) providing for the registration for military service of all male persons citizens of the United States or residing in the United States who have, since the 5th day of June, 1917, and on or before the day set for the registration by proclamation by the President, attained the age of 21 years, in accordance with such rules and regulations as the President may prescribe under the terms of the act approved May 18, 1917, entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States," reported it with an amendment and submitted a report (No. 269) thereon.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McCUMBER:

A bill (S. 3825) to amend an act entitled "An act to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel," approved August 10, 1917; to the Committee on Agriculture and Forestry.

By Mr. NEW:

A bill (S. 3826) for the restoration of the rate of pension formerly paid to Joseph O. Swigert (with accompanying papers); and

A bill (S. 3827) granting a pension to Clarence A. Murphy; to the Committee on Pensions.

By Mr. LODGE:

A bill (S. 3828) to authorize credits for enlistment in the naval service of the United States in the operation of an act entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States," approved May 18, 1917; to the Committee on Military Affairs.

By Mr. PHELAN:

A bill (S. 3829) granting an increase of pension to Isaiah Hutchison (with accompanying papers); to the Committee on Pensions.

By Mr. THOMPSON:

A bill (S. 3830) granting an increase of pension to John L. Davies (with accompanying papers); to the Committee on Pensions.

By Mr. KENYON:

A bill (S. 3831) granting an increase of pension to George A. Gardner (with accompanying papers); to the Committee on Pensions.

By Mr. TOWNSEND:

A bill (S. 3832) granting a pension to John M. Honeywell (with accompanying papers); to the Committee on Pensions.

By Mr. STONE:

A bill (S. 3833) to authorize Cole and Osage Counties, Mo., to construct a bridge across the Osage River; to the Committee on Commerce.

Mr. STONE. I introduce a bill to amend the act to provide revenue to defray war expenses approved October 3, 1917. It concerns particularly a part of the clause which deals with mines, oil, and gas wells. I am aware that bills raising revenue originate in the House of Representatives, but I desire, nevertheless, to introduce this bill and have it referred to the Committee on Finance, with a view of having it sent to the Treasury Department for the opinion of that department as to the merits of the bill.

The bill (S. 3834) to amend an act entitled "An act to provide revenue to defray war expenses, and for other purposes," approved October 3, 1917, was read twice by its title and referred to the Committee on Finance.

By Mr. SMITH of Maryland:

A bill (S. 3835) to amend an act entitled "An act to vest in the Commissioners of the District of Columbia control of street parking in said District"; to the Committee on the District of Columbia.

By Mr. STONE:

A bill (S. 3836) granting an increase of pension to Joseph Vincent (with accompanying papers); and

A bill (S. 3837) granting an increase of pension to James H. King (with accompanying papers); to the Committee on Pensions.

By Mr. GORE:

A joint resolution (S. J. Res. 132) to amend section 14 of the food-control act by increasing the guaranteed minimum price of wheat for the crop of 1918 from $2 to $2.50 per bushel; to the Committee on Agriculture and Forestry.

PURCHASE OF OFFICERS' UNIFORMS.

Mr. JONES of Washington. Mr. President, day before yesterday there was reported from the Committee on Military Affairs the bill (S. 3433) requiring the Government to furnish uniforms to officers of the Army, and for other purposes. I wanted to call up the bill yesterday, but did not have an opportunity. It is a very short measure, and I do not think it will lead to any discussion. I ask unanimous consent for its present consideration.

Mr. SMOOT. Let the bill be read first, Mr. President.

The PRESIDENT pro tempore. The Secretary will read the bill.

The Secretary read the bill, as follows:

Be it enacted, etc., That all uniforms, accouterments, and equipment required for any officer of the military forces of the United States shall be furnished and issued to such officers by the Government at cost price, under regulations to be prescribed by the Secretary of War, and the same shall be similar in quality and price for all officers of the same rank.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole.

Mr. CHAMBERLAIN. There are one or two amendments that I desire to offer to the bill. They are indicated on the copy I send to the desk, and I ask that the Secretary may read them. The only purpose is to make it apply to the Navy as well as to the Army.

The PRESIDENT pro tempore. The amendments will be stated.

The SECRETARY. In line 4, after the word "military" and before the word "forces," insert the words "or naval," so as to read "any officer of the military or naval forces of the United States."

The amendment was agreed to.

The SECRETARY. After the words "Secretary of War," in line 7, insert the words "and the Secretary of the Navy."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill requiring the Government to furnish uniforms to officers of the Army or Navy, and for other purposes."

WATERS OF THE COLUMBIA RIVER.

Mr. CHAMBERLAIN. Mr. President, I desire to ask unanimous consent to make a motion to reconsider the vote whereby, on September 11, 1917, at the first session of this Congress, the Senate indefinitely postponed the bill (S. 1484) ratifying the compact and agreement between the States of Oregon and Washington regarding concurrent jurisdiction over the waters of the Columbia River and its tributaries in connection with regulating, protecting, and preserving fish, and that the bill may be restored to its former place on the calendar.

I asked the other day for unanimous consent to have the bill reinstated to the calendar, but I am sure that my position was wrong. I now ask unanimous consent for permission to file a motion to reconsider the vote indefinitely postponing the bill.

Mr. SMOOT. I think the proper course for the Senator to pursue would be to ask unanimous consent that the vote by which the bill was indefinitely postponed be reconsidered. I think under the rule of the Senate that is the way to proceed.

Mr. CHAMBERLAIN. I thought, in view of the fact that there was some objection to it the other day, some one might want to discuss the proposition. If it will hasten the matter, I make the request as the Senator from Utah suggests, and I hope it will be granted.

Mr. LODGE. That would restore it to the calendar, and I see no reason why it should not be done.

Mr. SMOOT. That would restore it to the calendar.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Oregon? The Chair hears none. The vote is reconsidered unanimously, and, upon the request of the Senator from Oregon, the bill goes to the calendar.

HOUSING OF SHIPYARD EMPLOYEES.

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes.

Mr. RANSDELL. I move that the Senate disagree to the amendments of the House and request a conference on the disagreeing votes of the two Houses thereon, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the President pro tempore appointed Mr. RANSDELL, Mr. MARTIN, and Mr. NELSON conferees on the part of the Senate.

RAILROAD CONTROL.

Mr. JOHNSON of South Dakota submitted an amendment intended to be proposed by him to the bill (S. 3752) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes, which was ordered to lie on the table and be printed.

The PRESIDENT pro tempore. Morning business is closed.

Mr. SMITH of South Carolina. I move that the Senate proceed to the consideration of the unfinished business, Senate bill 3752, the railroad bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3752) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes.

Mr. KELLOGG obtained the floor.

Mr. JOHNSON of California. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Cummins	Gallinger	Henderson
Chamberlain	Curtis	Gerry	Hitchcock
Colt	Dillingham	Gore	Johnson, Cal.
Culberson	France	Hardwick	Johnson, S. Dak.

Jones, N. Mex.	Nelson	Sheppard	Swanson
Jones, Wash.	New	Sherman	Thomas
Kellogg	Norris	Simmons	Thompson
Kenyon	Nugent	Smith, Ariz.	Tillman
Kirby	Overman	Smith, Ga.	Trammell
Lodge	Page	Smith, Md.	Vardaman
McCumber	Phelan	Smith, Mich.	Watson
McKellar	Pittman	Smith, S. C.	Weeks
McLean	Pomerene	Smoot	Williams
McNary	Robinson	Sterling	Wolcott
Martin	Saulsbury	Stone	
Myers	Shafroth	Sutherland	

Mr. KIRBY. I desire to announce that the Senator from Florida [Mr. FLETCHER] is detained by illness.

Mr. GERRY. I wish to announce that the senior Senator from Kentucky [Mr. JAMES], the junior Senator from Kentucky [Mr. BECKHAM], and the Senator from Illinois [Mr. LEWIS] are detained on official business.

Mr. JONES of Washington. I desire to announce the necessary absence of the Senator from Wisconsin [Mr. LA FOLLETTE] on account of illness in his family.

Mr. MYERS. My colleague [Mr. WALSH] is still detained from the Senate on account of the state of his health.

Mr. SUTHERLAND. I desire to announce the absence of my colleague, the Senator from West Virginia [Mr. GOFF] on account of illness.

Mr. McKELLAR. I desire to announce that my colleague [Mr. SHIELDS] is detained from the Chamber on business.

The PRESIDENT pro tempore. Sixty-two Senators have answered to their names. There is a quorum present.

Mr. KELLOGG. Mr. President, this bill involves the most far-reaching and momentous economic transition that has ever taken place in so short a time. What effect it will have upon our industrial and political structure no one, of course, can accurately tell, but judging from other nations and from the political experience in our own country, it can not be anticipated that it will meet with success. But the railroads have been taken over under the war power conferred upon the President and we are confronted with the necessity of making payment for the use of the property thus taken and rendering as effective as possible the operation under Government control. It may be said that as the roads have been taken over the advisability of so doing is no longer in issue. I think, however, as bearing upon the question of the continuance of the operation beyond the war, it is worth while for us to be fully informed as to the condition of the railroads, their accomplishment during the last year, and the necessity, if any existed, of taking them over to Government operation.

It is generally claimed that the railroads had broken down, were unable to handle the traffic of the country, and that it was necessary for the Government to take over the operation during the war.

I should like for a few moments to call the attention of the Senate to the actual condition of the railroads of this country and the reasons why they have not been able to handle all of the traffic, and what their accomplishments have actually been. I am not here to claim that our transportation system is perfect; that it can not be improved; or that the laws governing the railroads are all they should be. But when the public hopes, by the medium of Government operation, to cure all the evils resulting from transportation congestion, we are likely to be disappointed, and we should look the facts squarely and candidly in the face.

We have in this country, all in all, the best system of railroads in the world, the cheapest constructed, the lowest capitalization per mile—to be sure there are some exceptions to this statement, but I am speaking generally—the cheapest freight rates, and the best service, considering the varied conditions of climate, industry, and development, and the necessity for vast increase in transportation facilities to meet the rapid growth of the country.

Let us for a moment consider the reasons why the railroads, as is commonly said, have broken down and have been in the last few months unable to handle all traffic in the country expeditiously:

From 1907 to 1916 were years of depression in railroad business. Then came the tremendous stimulus, owing to the increase of our exports on account of the European war—an increase whereby our foreign commerce has increased from $4,258,504,805 in 1914 to over $8,953,335,185 in 1917. The increase in railroad traffic from 1915 to 1917 was nearly 50 per cent, or, stated in another form, was 135,164,000,000 ton-miles—that is, tons hauled 1 mile. According to the latest statistics available, this was equal to the entire railway transportation of the railroads of Canada, Germany, Great Britain, Russia, France, and Austria (excluding Hungary), which was substantially 137,928,000,000 ton-miles. In addition to this, the railroads have moved to cantonments and mobilization points, points on the Mexican border, and Atlantic and Gulf ports 2,052,418 troops in 36,735 passenger cars and 10,640 freight cars, assembled in 3,603 special trains. The passenger traffic has increased about 23 per cent in October this year over last, the mail about 6 per cent, the parcel post about 14 per cent, and express about 20 per cent for the year ended June 30, 1917, over the year ended June 30, 1916.

In speaking of the accomplishments of the railroads Secretary Baker said:

> I am happy, therefore, to join the Quartermaster General in pointing out the extraordinary service rendered by the transportation agencies of the country, and I concur also in his statement that "of those who are now serving the Nation in this time of stress there are none who are doing so more whole-heartedly, unselfishly, and efficiently than the railroad officials who are engaged in this patriotic work."

Again, commenting on troop movements, the Secretary said:

> This strikingly illustrates the patriotic cooperation of American railroads with the Government and also the tremendous capacity of American railways.

It is not denied, however, that there has been tremendous congestion in certain sections of this country. This congestion is principally, if not entirely, in the district east of Chicago and north of the Ohio River and principally east of Pittsburgh, very largely on the lines of the Baltimore & Ohio, Pennsylvania, and other lines in their immediate territory. The reason is that in this great manufacturing and coal-producing country east of Chicago came the enormous increase in coal shipments—amounting, I believe, to about 50,000,000 tons this year over last year—iron and steel, and all manufactured products for use in the war. This congestion was further accentuated by the fact that the great body of shipping went through the ports between New York and Norfolk, and very largely through New York City, because the allied nations and the United States would not, and I have no doubt could not, send their vessels to some distant southern port, and by the further fact that there was an inadequate amount of shipping to take the traffic away when delivered at these ports. Furthermore, by the impressment of steamships engaged in the Atlantic coast traffic of the Southern Pacific Co., Ocean Steamship Co., and Mallory and Clyde Lines, the railroads have been called upon to transport 962,000 tons of freight in the last half of the calendar year which heretofore has been transported by water. The substantial closing up of the Panama Canal required the railroads to handle over 2,000,000 tons of freight between the Atlantic and Pacific which would otherwise have gone by water. To move this tonnage would require the monthly use of 46,200 freight cars and 619 locomotives.

There was undoubtedly a shortage of motive power and cars. The Interstate Commerce Commissioners not only testified but as a body reported (p. 20 of record) that from 1907 to 1916 the number of cars in the country exceeded the demand. Then came the increase of business in the latter part of 1916 and the tremendous increase in 1917, and cars and locomotives could not be purchased, principally for the reason that the Government compelled the locomotive manufacturers to divert engines for use in Russia and France and that steel could not be obtained for the construction of cars on account of the Government priority (p. 267 of record). Of course at that time this seemed to be necessary, and I have no doubt that the information the War Department then had warranted this action.

Another fact which has very much injured the service of the railroads is the loss of men through the selective draft and attractive offers by munition and Government plants. In some cases they have lost as high as 12½ per cent of their men, and the loss of efficiency is greater than this, because the best mechanics and the best men in the railway service have been taken.

One of the principal causes for the congestion is the Government priority orders. This appears by the testimony of the Interstate Commerce Commission, of the railroad executives, and the fact is well known to everybody in Government service. It is a most glaring example of abuse of governmental power, through separate branches of the service, in no way coordinated.

Senators will remember that on the 10th day of August, 1917, Congress passed a law to regulate commerce, providing as follows:

> That during the continuance of the war in which the United States is now engaged the President is authorized, if he finds it necessary for the national defense and security, to direct that such traffic or such shipments of commodities as, in his judgment, may be essential to the national defense and security shall have preference or priority in transportation by any common carrier by railroad, water, or otherwise. He may give these directions at and for such times as he may determine, and may modify, change, suspend, or annul them, and for any such purpose he is hereby authorized to issue orders direct or through such person or persons as he may designate—

And so forth.

It was the understanding of Congress that after this time there would be but one power directing the preference and priority in transportation. As a matter of fact, instead of all of

the priorities going through Judge Lovett the War Department, the Navy Department, the Food Administration, and Fuel Administration were all issuing priority orders, not only through the heads of the departments, but commissary clerks and employees scattered all over the country were furnished with blue cards to place upon cars to denote a priority or preference shipment. But, beyond this, these employees gave the cards to manufacturers, and manufacturers making a Government preference of shipment not only used the cards for the Government but for themselves. I quote the statement of Commissioner Hall, on pages 54 and 55 of the record:

Senator KELLOGG. To what extent have the priority orders which have been issued by the various departments of the Government interfered with or congested transportation? I notice by the report of Mr. McChord, a member of the commission, or, rather, his separate report, that there are several Federal agencies authorized by law to issue orders or directions with respect to transportation, and that they are executing that power. Has that tended to congest traffic?

Commissioner HALL. I think so; yes, sir.

Senator KELLOGG. You mean that priority orders have been given by different departments of the Government which conflict or were unnecessary?

Commissioner HALL. I do not mean any priority orders issued by the transportation priority director, by Judge Lovett; I do not mean that. I mean that in the War Department there are at least five bureaus or boards—I think Gen. Baker said 12 a few days ago—each undertaking to direct the kind of munition or supply that it is interested in which shall receive preference movement. Then there is the Shipping Board seeking preference movement for what it is interested in; and there is the Navy; and those things frequently conflict. More than that, there is a system in vogue of placing in the hands of a manufacturer who has a contract for furnishing supplies so-called envelopes that can be used to obtain preference, and those have been sometimes quite carelessly used, probably under officers who are looking after particular plants, with the result that the volume of movement under preference direction has grown to be very great.

Now, I do not know it as a fact—if you will pardon hearsay, but it comes from a very good source—I understand that quite recently something like 75 per cent of what was moving on the Pennsylvania Railroad was moving under preference directions of some sort. Is that so, Mr. Patterson?

Mr. PATTERSON. Yes, sir; east of Pittsburgh.

Commissioner HALL. If you get 100 per cent preference, then it can all move right along; but where you get 85 per cent preference to be separated from the remaining 15 per cent it tends to produce congestion.

Mr. LODGE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Massachusetts?

Mr. KELLOGG. I yield.

Mr. LODGE. If it will not disturb the Senator, I understood him to say that the right to issue priority orders was exercised by the Fuel Administration, the Food Administration, and by the Shipping Board.

Mr. KELLOGG. Yes; and by the War Department and the Navy Department.

Mr. LODGE. I know about it as to the War and Navy Departments.

Mr. KELLOGG. That is what Commissioners Hall and McChord said.

Mr. LODGE. It is correct, then, according to the testimony before the committee, that the Food and Fuel Administrations and the Shipping Board were all equally entitled to issue priority orders?

Mr. KELLOGG. According to the testimony of Commissioners Hall and McChord they did do it, and there is other testimony to the same effect.

I send to the desk, and ask to have incorporated in my remarks at the end, as an appendix, the testimony of Mr. Kruttschnitt, from which I will read one sentence:

You can imagine the state of mind of a yardmaster at a terminal, say, like Pittsburgh, when he was confronted with the freight covered by all of these blue envelopes, and covered by other orders giving priority of transportation to different commodities; he would be a fit subject for an insane asylum; he would not know how to get around his work.

The PRESIDENT pro tempore. Without objection, the matter referred to will be printed in the RECORD without reading.

Mr. KELLOGG. Mr. Kruttschnitt, a member of the railway executive war board, testified that the principal cause of the congestion was the cross hauling of coal—because under the act of Congress the shipper had a right to designate not only where the freight should go, but the route—and the priority and preference orders given by the Government. He testified that when the flood of preference envelopes threatened to overwhelm the railroads they appealed to Judge Lovett, the priority commissioner, for relief, but without avail. Many of these priority orders were absolutely unnecessary, each department of the Government struggling to get its own material shipped ahead of some other department. The result was that thousands of freight cars were rushed to a point and tied up because materials were shipped in advance of necessity.

Mr. POMERENE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Ohio?

Mr. KELLOGG. I do.

Mr. POMERENE. I simply want to add, if I may, to what the Senator has already said, that one of the witnesses—I think it was Mr. Kruttschnitt—suggested that these tags were often given to manufacturers, and the manufacturers would place these tags on private shipments as well as on Government shipments.

Mr. KELLOGG. Yes; that is true. I have among my papers a report from an agent of transportation—I have forgotten what he is called—submitting copies of these envelopes that were reprinted and used, and notice was given that by telephoning to certain departments they could get all the envelopes they wished. For instance, 700 cars of material for construction of Government buildings in Washington stood upon the tracks for weeks because they could not be unloaded; anchors were shipped under priority orders for ships not yet built, and 1,000 cars were tied up carrying shipyard material—I believe it was for Hog Island——

Mr. GORE. Thirteen hundred.

Mr. KELLOGG. Thirteen hundred cars, I understand; which could not be unloaded and used faster than about 15 cars a day. It shows that a transportation system run by Executive orders, through noncoordinated departments, is an absolute impossibility. Now, as a matter of fact, in spite of the Sherman law and nonpooling law and the laws authorizing the shipper to designate the route, and in spite of priority orders unwisely issued, railroads did accomplish a great deal during the first six months of the war.

Mr. GORE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Oklahoma?

Mr. KELLOGG. I yield.

Mr. GORE. I wish to ask the Senator, before passing from the subject of priority orders, if it is his intention to state the English system with regard to priority orders?

Mr. KELLOGG. No; it was not my intention. The whole history of the English operations is available, and I think the Senate is pretty familiar with the subject.

Mr. GORE. If the Senator will permit me, I think it ought to go in at this point.

Mr. KELLOGG. I have no objection to the Senator stating it.

Mr. GORE. The English method, Mr. President, is this: They have selected a committee on priority of shipments, made up of representatives of the navy and army and other departments and organizations, including the industries of the country. It requires a unanimous vote on the part of this priority committee to grant a preferential order for shipment of any commodity; but in case of a deadlock the minister of munitions stands over and above the priority committee, with the power to unlock the situation and grant mandatory orders.

Mr. KELLOGG. I thank the Senator for the information.

Mr. NORRIS. Mr. President, may I interrupt the Senator?

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Nebraska?

Mr. KELLOGG. I yield.

Mr. NORRIS. I came in after the Senator had started, but the suggestion made by the Senator from Oklahoma reminds me that it might be well to inquire at this point whether the law did not place all this power in the hands of the President?

Mr. KELLOGG. Yes.

Mr. NORRIS. So that it would not be necessary to have a committee. The President had power at any time, had he not, under the law to change the system in any way that he saw fit, by order, or to put some one person in charge and give him absolute control of it all?

Mr. KELLOGG. The President undoubtedly had authority under the act of August 10, 1917, to create a single priority agent. Now, I apprehend that the way this system developed was through action taken under authority of laws providing preference and priority for Government shipments. Apparently there was already in existence when the law was passed this system of obtaining preferences and priorities, and instead of abolishing the system in vogue and placing the power in the hands of one man or one board it was allowed to continue, and the enterprise of each one of these departments in obtaining priority and preference orders for their shipments was the result of the tremendous overburdening and congestion of the railroads.

It appears, as requested by the Council of National Defense, that they organized an executive committee of railway heads, to represent all the roads and to constantly sit in Washington, the expense of which was paid by the railroads. That with practically no increase of equipment and with a decrease of men they succeeded, by coordination, in handling 20.3 per cent more freight traffic in the first six months of the war—April to Sep-

tember, 1917—than the corresponding six months of 1916, and 50 per cent over the monthly average of 1915. They greatly increased the car loading, car mileage per day, and train load—the resultant effect of which was that it increased the ton-miles handled per locomotive per month 16 per cent for the six months ending September 30, 1917, over the corresponding period of 1916.

Through the acquiescence of the public, and by the consent of the State commissions, 28,656,983 unnecessary passenger train miles were eliminated, resulting in the saving of 1,800,000 tons of coal per annum, a release of 570 locomotives, and 2,800 train and engine men for freight service.

This railway committee undoubtedly coordinated the facilities of various roads and enormously increased the amount of transportation. My own opinion is that it was unnecessary to take over the railroads for Government operation, and that transportation, in order to be most effective, must proceed in its usual and natural channels, without too much arbitrary interference. That all that was necessary for Congress to do was to authorize the President to appoint a director or agent of the Government, who should have authority to see that the railroads were operated as a unit, in order to facilitate, so far as possible, the transportation of those articles absolutely necessary to the life of the people and the prosecution of the war, and that if the transportation of any class of products or articles, such as luxuries, pianos, automobiles, and so forth, became inadvisable, this transportation could be stopped and preference given to necessaries for the Army and the public. That this could have been done without material injury to any of the railroads, but if they were injured by any such action a tribunal might have been created to assess the damage to be paid by the Government. As a general proposition, private management is far more successful and efficient than management through Government agencies. The railroads were undoubtedly hampered by certain laws and restrictions which should have been abolished. They should have been supported by Government authority to operate as a unit, to route freight over lines least congested, and to transport the largest amount of materials necessary for the maintenance of the public and of the Army. Bearing in mind that this congestion was simply in the eastern and northeastern territory, I am constrained to believe that as great service could have been obtained through the Government's cooperation as by taking over the entire railroad system of the United States and operating it as a Government institution. By allowing the railroads to operate their own property we would have maintained the personal interest and preserved the enterprise that goes with great organizations of this kind. One of the most valuable features of a railroad, as in all other private enterprises, is the organization and the personal interest that each employee feels, where there is an opportunity for promotion, and the highest position is within his grasp. By doing this I believe the Government would have obviated a guarantee to the railroads of an income by way of compensation for the use of the properties thus taken over. But the President and his advisers thought otherwise, and I bow to that decision, and I am going to do, as is my duty, everything I can to strengthen and facilitate the Government operation and to insure justice to the people and the railroads and the vast army of security holders vitally interested in this great measure.

There are three principal provisions of this bill to which I wish to invite the attention of the Senate, and in doing so I shall try to state with impartiality the facts and arguments pro and con which should appeal to individual Senators.

This bill was reported, after four weeks of testimony, argument, and careful consideration by the committee. It is not perfect, but under the circumstances it reflects the best judgment of the administration and the committee. There are three controlling propositions which I desire to discuss. First, the compensation to be paid the railroads; second, the manner of fixing and regulating rates; and, third, the duration of Government operation.

COMPENSATION TO THE RAILROADS.

With the varied conditions surrounding the earning capacity, capitalization, and financial strength of the railroads, a most difficult proposition is presented in prescribing a general rule or basis for compensation. The Army appropriation act of August 29, 1916, provides as follows:

> The President, in time of war, is empowered, through the Secretary of War, to take possession and assume control of any system or systems of transportation or any part thereof, and to utilize the same to the exclusion as far as may be necessary of all other traffic thereon for the transfer or transportation of troops, war material, and equipment, or for such other purposes connected with emergency as may be needful or desirable.

I have cited this act in order that the attention of the Senate may be called to the fact that no compensation is there provided.

This act undoubtedly constitutes a valid exercise of the war power in the President, and the rules of law governing our action and the necessity of providing compensation for the use of properties during such Government operation are clearly defined by the Constitution and the decisions of the highest court of the land.

The act failing to provide the means and methods for determining compensation, the Constitution imposes an obligation to pay just compensation for the use. Unless such compensation is implied, the law would be unconstitutional. Congress has no power to provide what that compensation shall be. Now, remember this: We can not fix the compensation. Congress is powerless to do it. We can, however, prescribe a rule, the means, or the machinery by which a tribunal shall fix the compensation. As to each individual railway corporation or system of transportation owned and operated as one railroad, the question of what is reasonable compensation is a judicial one which may be determined first by an administrative officer or commission, with a right of appeal to the courts for final determination. It is, therefore, not only a legal necessity for Congress to provide the means for determining and paying a just compensation, but it is of the highest importance to the country that this should be speedily determined.

The property taken over represents a value of somewhere between fifteen and seventeen billions of dollars. It represents securities, stocks, and bonds in the hands of the public of substantially $16,500,000,000. The exact amount is difficult to determine by reason of what is known as intercorporate holdings. In making these figures the Interstate Commerce Commission has eliminated stocks of one road held by another, and has only given the amount of securities in the hands of the public.

Mr. THOMPSON. Mr. President, will the Senator permit a question?

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Kansas?

Mr. KELLOGG. I yield.

Mr. THOMPSON. Does that estimate include the short-line railroads?

Mr. KELLOGG. I believe it includes all railroads.

Mr. THOMPSON. All the railroads of the country?

Mr. KELLOGG. All railroads. As thus determined, the railroads represent a stock and bond issue of $16,710,000,000, as of June 30, 1916, and a book investment of $17,380,000,000, as of December 31, 1917. These figures have been furnished by the statistician for the Interstate Commerce Commission. The interest and dividends upon these securities come due at various periods during each year and must be paid in order to maintain the stability of this vast investment.

The President and the Secretary of the Treasury, and everybody who appeared before the committee, realized, and many of them urged with great force, the necessity (at this time of great strain on our financial institutions) of maintaining the security of this railroad investment. It is not a question of the Government maintaining the securities of any industry. The Government owes no obligation to maintain securities. It is a question, however, of the Government taking the property and using it for Government purposes, and the obligation to pay for the use and the duty of maintaining the stability of securities are coexistent. These securities in various forms are in the hands of millions of our citizens. There is scarcely a bank, trust company, savings bank, or insurance company in this country which has not a large investment, either as owner or pledgee of railway securities. It is estimated that 32½ per cent of the assets of the Connecticut savings banks consist of railroad securities, and undoubtedly a very large percentage of all the savings banks and insurance companies are in the same position. In 1915 it was estimated that $818,000,000 of railroad securities were held by mutual savings banks alone. A further decline in these securities (which ought to be the best investment in the country) would threaten a public disaster.

The committee was therefore faced with two propositions—either to create a tribunal to take up each railway separately and, upon a hearing, to determine the value of the use during Government operation, or to authorize the President to speedily agree with the railroads on some fair basis which would not involve long litigation, with a provision that if no agreement could be made with any railroad company the compensation should be determined by a tribunal to be appointed by the Interstate Commerce Commission, with a right of appeal to the Court of Claims.

You will readily see that if we had adopted the first proposition it would have been years before any tribunal could have thus determined the value of the use of each and every system of railroads and have arrived at a fair and reasonable rental value. The Government operation would have been ended long before

this could have been accomplished. In order to expedite this determination, the latter proposition was adopted by the committee, and the committee was unanimous in desiring some speedy determination of this question. It was, of course, impossible for the committee, as it is impossible for Congress, to take each road separately, hear testimony as to the value of its use, and fix a compensation. Nor could this be done legally.

The most we could do was to prescribe a plan with a maximum above which the President could not go.

Section 1 of the bill, in substance, authorizes the President to agree with the carriers and to guarantee to each an income, called the "standard return," not exceeding the average of the net operating income for the three years of 1915, 1916, and 1917, with an allowance of a percentum, to be fixed by the President, covering the cost of additions and betterments, less retirements and road extensions made during the six months between June 30 and December 31, 1917. (That is the three years ending June 30, and the President was authorized to allow a percentage upon the net betterments and additions made between June 30 last and December 31.) The Government to have all income above this guaranteed compensation and to maintain the properties in their present condition.

Mr. CUMMINS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Iowa?

Mr. KELLOGG. I yield.

Mr. CUMMINS. In order to discern clearly the point the Senator from Minnesota has just stated, that the Government is entitled to all the income above the amount named—that is, the guaranteed net operating income—did the Senator mean just that, or did he mean that the Government was entitled to all the operating income above?

Mr. KELLOGG. The net operating income, I should have said to be accurate. I thank the Senator. This basis was recommended by the President and his advisers, by the Secretary of the Treasury, and by the Interstate Commerce Commission. The President undoubtedly had the advice of the commission and other technical experts upon this question. The Interstate Commerce Commission has for years been dealing with the question of rates, gross and net income of railways, maintenance, betterments, and capitalization. No body of men in this country whose opinion could be taken is so well equipped to recommend an equitable basis for compensation as is the commission.

Mr. CUMMINS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield?

Mr. KELLOGG. I yield.

Mr. CUMMINS. I was present at nearly every hearing of the committee on this subject, and I do not remember any recommendations of the Interstate Commerce Commission as such in behalf of the standard which was proposed by the President. One of the Interstate Commerce Commissioners had very much to do with the formation of the bill and undoubtedly recommended that standard, and I have no doubt that there are some other members of the commission who concurred with him, but I do not think that the commission has recommended any such proposition.

Mr. KELLOGG. Mr. President, I understand the Interstate Commerce Commission first made recommendations to Congress. During the session of the committee the chairman of the committee asked the Interstate Commerce Commission as a body to take the bill proposed by Mr. Anderson, one of the members, and to make criticisms and suggest any changes which they thought should be made. The commission did so as a body, and as I read their letter, which the Senate is entitled to read—I have not time to read it now—I take it to be a recommendation of this bill with the amendments they suggested, except as to one or two points upon which they declined to pass any opinion, one of them involving the question as to what body should regulate the rates. I have not time now to read that letter, and I shall ask to have the Senators themselves read it.

Mr. CUMMINS. I hope the letter will be read by Senators. I do not construe it in the way just stated by the Senator from Minnesota. I remember very distinctly that Mr. Anderson told the committee, it is my memory, that the question of compensation had not been considered by the commission as a commission, whatever might be the views of some of its individual members.

Mr. KELLOGG. That is true. When Mr. Anderson appeared before the committee and testified, he stated that he was not speaking for the commission. At that time the commission had not considered the question of compensation or the other provisions of the bill, but subsequently the chairman of the committee asked the commission to submit their recommendations in respect of the bill and this was done. Their report can be submitted to the Senate and will, no doubt, be so submitted by the chairman.

Mr. WATSON. That was after Commissioner Anderson had testified.

Mr. KELLOGG. It was after Commissioner Anderson had testified.

Mr. ROBINSON. I wish the Senator would follow that statement a little further. The Senator, of course, has read the letter. The commission did recommend the so-called standard return as a fair basis of compensation.

Mr. KELLOGG. They did not make any suggestion about that section at all. Now, under the interstate commerce act, the duty is imposed upon the Interstate Commerce Commission to recommend appropriate legislation to Congress from time to time, and the commission had previous to that time recommended that the railroads of the country be either taken over under Government operation or that Congress should change the law with respect to coordinating the railroads.

Mr. SMITH of South Carolina. If the Senator will allow me, the question as to the attitude of the Interstate Commerce Commission came up on the very point he is now making. A member of the commission acting in another capacity than as commissioner was instrumental in the draft of the bill as it came to us as an administration bill. The committee was anxious to know what was the opinion of the commission as to the bill, knowing that they perhaps were the best posted as to the matter in hand and were more competent perhaps than any other body to advise in respect of the proposed legislation, and in sending my request to them I asked that they make the report as an official body in reference to the bill. I, like the Senator who is now addressing the Senate on this subject, was of the opinion that where they did not recommend any change it was to be inferred that they acquiesced in the proposition as now contained in the bill, because, had they objected or had they reason to think that it was not the proper basis, it was manifestly their duty, as an official body asked for an opinion, to have stated what their objection might be.

Mr. CUMMINS. I will deal with the communication of the Interstate Commerce Commission later. I only want to make my own position clear now. I do not believe the letter contains any recommendation either expressly or inferentially upon the matter of compensation, and I know that one member of the commission has told me since that it was not the purpose—not his purpose anyhow—to make a recommendation with regard to compensation.

Mr. KELLOGG. The commission considered the whole bill and specifically excepted the provisions they did not wish to recommend, and I think from the reading of their letter the Senate will conclude that the fair inference is that it is a recommendation of the whole bill with the amendments suggested. The Senate, however, is entitled to the opinion of the commission.

Mr. President, I think it may be useful in determining whether the basis adopted by the committee was a fair one to consider the various bases suggested by different men who appeared before the committee and made recommendations. The committee heard representatives of commercial organizations, certain experts, members of the Interstate Commerce Commission, the Secretary of the Treasury, and anyone who desired to be heard.

BASIS OF VALUE OF STOCK.

Many bases were suggested to the committee and discussed by it, but while all have some good points, none seemed, on the whole, to be so reasonable and practical as the one adopted. I say "seemed," for it was the opinion of the majority of the committee.

A basis suggested and discussed to some extent was that the market value of the stocks and bonds of all the railways be taken, allowing a percentage of income on this value. The objections to this plan were principally that the stocks fluctuate in the market and frequently do not represent the real value of the property, to say nothing about the value of the use. Stocks often reflect in the market the amount of the dividends, so that if a property was skinned to pay dividends the market price would be high and the real value and earning capacity much less.

Then also stocks depend often upon speculative values, a bull or bear market, and many other considerations not here necessary to mention. To illustrate: It appeared by an investigation by the commission that in 1912 the value of all the railroad stocks, as near as the commission could estimate it, was 110.08 per cent of par; in 1915, 94.6 per cent; and in 1917, 79.03 per cent, although the roads' gross and net earnings

continued to increase and were greater in 1916 and 1917 than in 1915.

I should remark here, of course, that the commission simply made this computation by taking the market value of those stocks quoted on the New York exchange, and of course it is not absolutely accurate. No computation could be made that would be absolutely accurate, but this is a fair indication of the value of the stocks.

Mr. CUMMINS. But if the Senator will permit me, there is another fact to be taken into consideration there, namely, that these market quotations, taking the high point and the low point in a year, did not include all the railroads' stock of the country, only those which were dealt in upon the New York Stock Exchange.

Mr. KELLOGG. That is true. I so stated.

Mr. CUMMINS. There are a great many of the poorer stocks that are not dealt in upon the exchange at all.

Mr. ROBINSON. It is also true that as to particular roads, it appeared in the hearings that when their earning capacity was greater their stocks were comparatively the lowest.

Mr. KELLOGG. Yes; because those roads being conservatively managed would pay a small dividend and would invest a large amount of their surplus in property. The stocks of such a road would be comparatively low, but as to a road that put all of its income into dividends, Wall Street estimated the value of the stock according to the amount of dividends. My recollection is, and I am speaking now from memory, that the commission's statement was based upon the par value of the railroad stocks listed on the New York Stock Exchange, and this was made up on the basis of about 75 per cent of all railroad stocks. It is a fair illustration, however, that as the earnings increased the value of the stock declined.

Then, again, no basis for payment of interest upon the value of the stocks could be determined by Congress, because many roads pay no dividends and others pay large dividends. The Congress could not determine the rate of dividend which would be a fair rental value of the property.

Some roads pay a moderate dividend and use the balance of their surplus for improvement of their property, and there is no uniform basis for such investments. If this basis was adopted, it would have to be determined by some official or body of officials pursuant to inquiry into each case.

BASIS OF ACTUAL VALUE OF PROPERTY.

Another basis considered was that the actual value of each railroad property be taken, fixing the rate of income on this value. This determination was impossible. As the Senate well knows, in 1913 Congress passed an act authorizing and directing the Interstate Commerce Commission to determine the physical valuation of property of common carriers, involving the cost of reproduction and the present value of each railroad. The commission has been working upon this for four years, but reported to our committee that it would be about three years before it could be finished, and that no property had yet been valued, so the commission could give us no real information as to the present actual value of railroad properties.

BASIS OF ORIGINAL CASH INVESTMENT.

Another basis suggested was that the amount of cash which had been invested in the railroads under the charters of each company be determined, paying a reasonable rate of interest fixed by Congress upon this cash investment. I think everyone knows that this is an impossible task. Many railroads were built in the early days by contracting companies, which companies received a lump sum in stocks and bonds of the railroad for the construction, and no one can determine the actual cost of such property. Again, many of these properties paid no interest or dividend to investors for many years. Some of them were foreclosed, went through receiverships several times, capitalization was reduced and additional money invested, and there is no way of determining the cost of property except from the books of the companies.

If the taking over of the property by the Government had been permanent, the problem would be much simpler, for a tribunal could be established to find the present value of all the property of each company, and the Government would pay the sum thus determined. But the taking over is only temporary. It is simply a taking over and use of the property during the war and for a reasonable period thereafter, and the problem is to determine the value of the use, and determine it as speedily as possible, because it will not do to allow this determination to be suspended by years of litigation.

There were many other suggestions, but the foregoing will illustrate the difficulties confronting the committee.

PLAN FINALLY ADOPTED.

Let us come now to a consideration of the plan finally adopted. There is reason in the proposition that property devoted to a public service is worth simply what it will earn. It may be earning too much, in which case the power of public supervision may rightfully and justly be invoked to reduce its earnings or to provide such rates for its service as will accomplish this end. But, after all, it can only be worth what it will earn to its owners, because it can not be disconnected from such use, for a railroad can not be scrapped and its material sold. It can not voluntarily cease to perform its public functions, whether it pays or not, and therefore the only way to use the property is to make it earn a net income.

There is also force in the argument that as all the rates are now being fixed by public authority, the earnings of the properties are the best evidence of the value of their use. I may say, in passing, that the Interstate Commerce Commission, in a report made within a year or two, stated that as the power to fix rates had been in the commission for something like 10 years they thought it was a fair conclusion to say that the rates now in force as a whole were fair and reasonable, and would be so considered by the commission. I am not saying that some of them are not too high. That would be the inevitable result in a vast rate structure such as we have in this country. I do not say that this is a conclusive rule, because undoubtedly some properties are earning more than a just compensation, taking into consideration alone the cost or value of the investment, while others are earning less. Some railroads are fortunately situated as to location, cost of construction, density of population, and other advantages which give them a large earning capacity, while other competing lines, less fortunately situated, do not earn a reasonable income on the investment. This is inevitable under our system of individual ownership and competition between railway lines. It grows out of a system and is a part of those great competitive activities which have made the development of this country the marvel of the age.

Another factor which must be taken into consideration is that the taking over is only temporary. A guaranty by the Government of a permanent income on an investment would be reasonable at a very much lower rate, like a Government bond. In such a case the Government not only agrees to pay the interest on the bonds, but to pay the principal also. In this case the Government simply agrees to pay a certain income during the indefinite period of Government control. The guaranty is only for the period of the war and a short time thereafter, and, therefore, it should, as near as possible, represent the earning capacity of the roads over a reasonable term of years. The President is authorized to agree with the railroads upon a guaranty of a maximum of the average net earnings of the years 1915, 1916, and 1917, ending July 1. This was as follows:

[Railroads of class 1 include all the railroads having a gross earning capacity of over $1,000,000.]

Net railway operating income for class 1 roads:	
1915	$683,104,833
1916	984,872,959
1917	1,020,800,000
Average	896,259,264

The commission took railroads of classes 2 and 3, which involved a good deal of work, and made an estimate of one year, applying the same percentage of increase for 1916 and 1917 for the other years. The commission reported to us that the maximum guaranty which the President was authorized to make to all of the railroads in the United States was $935,000,000, which is about $100,000,000 less than their best year, namely, 1917.

Extending the above basis for arriving at the average net railway operating income so as to include classes 2 and 3, the average $896,259,264 becomes approximately $935,000,000 for all carriers.

To this should be added the income on investments in the property made from June 30, to December 31, 1917, estimated at $130,403,315, on which the President is authorized to allow interest. If 5 per cent is allowed, it would amount to about $6,500,000; total, $941,500,000.

Of course, out of this the railroads must pay their war excess-profits tax, which was estimated by the commission to be somewhere between fifty and ninety million dollars. Of course, this tax is borne by the stockholders. The railroads should be taxed exactly in the same manner as are all other corporations engaged in business in this country, and the war tax, of course, should be assessed against the stockholders, to be deducted from this net guaranty; and it is so provided in the bill. So the figures which I shall submit showing the per cent this guaranty represents upon the railway capital of the country and upon the book value of the railway assets of the country will include taxes before deduction. The gross figure of $941,000,000 is taken and applied to all the railroads in the country.

Mr. LODGE. Does that include the fixed charges?

Mr. KELLOGG. That is the net after taking out all charges.

Mr. LODGE. After deducting all fixed charges?

Mr. KELLOGG. That is the net operating income of the railroads—the average net operating income for the last three years after paying fixed charges.

Mr. LODGE. And paying interest?

Mr. KELLOGG. No; not after paying interest, but only after paying operating expenses. Out of this $941,000,000 the railroads must pay, first, their excess-profits tax; second, their interest; and third, whatever dividends they have averaged for the last three years. Then they must use whatever balance they have for the betterment or improvement of their property, and they can only pay the average dividends declared for the last three years.

Mr. GORE. What is the amount of the interest?

Mr. KELLOGG. The interest on their bonds is about $450,000,000.

Mr. SHERMAN. Are the local taxes, which amount to something like one hundred and thirty-five or one hundred and forty million dollars a year, deducted?

Mr. KELLOGG. The local taxes are part of their operating expenses, which are first deducted, but the Federal excess-profits taxes, of course, are not deducted, being paid by the stockholders.

Mr. STONE. Mr. President, did I understand correctly the answer of the Senator from Minnesota [Mr. KELLOGG] to the interpolation of the Senator from Oklahoma [Mr. GORE] to be that out of the nine hundred and odd million dollars of earnings payments of the interest on obligations of these railroads must be met?

Mr. KELLOGG. Yes; my recollection is—and I will correct it if I find that I am not speaking accurately—that the interest charges of the railroads are about $450,000,000, which comes out of this guaranty. The balance, after paying taxes, may be applied to dividends, betterments, and improvements, which I shall discuss later. The railroads annually have paid dividends from two hundred and fifty to three hundred and seventy-five million dollars. They have paid less in the last two or three years than they paid at an earlier period.

It is claimed by the railroads that the three years selected are not fair to them, because 1915 was an extremely poor year, and it is claimed by some members of the committee that they are more than fair, because 1916 and 1917 were very good years. It is true that in the year 1915 the earnings—with perhaps one exception, to wit, 1914—were the lowest since 1900, based on the net operating income to property investment or total capital obligations.

I am inclined to think, after consultation with the members of the Interstate Commerce Commission, especially with the expert statistician, that 1915 was the lowest year since the year 1900. I send to the desk, and ask to have incorporated in my remarks, a statement formulated by the Interstate Commerce Commission showing the relation of net operating income to property investment for the years 1900 to 1917. In 1915 it seems to have been 4.09 per cent; in 1914 it was 4.19 per cent; and the figures range all the way from that up to 6½ per cent in 1917. The percentage for 1917, however, is an estimate, because the reports of the railroads for the calendar year 1917 have not all been received.

I ask at this point that the table referred to may be placed in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The table referred to is as follows:

RETURN ON PROPERTY INVESTMENT.

The annual report of Interstate Commerce Commission dated December 1, 1917 (pp. 36, 37), shows relation of operating income (not net operating income) to property investment as follows:

Years ended June 30—	Per cent.	Years ended June 30—	Per cent.
1900	4.52	1909	5.34
1901	4.69	1910	5.73
1902	5.02	1911	4.87
1903	5.19	1912	4.62
1904	4.83	1913	5.12
1905	5.10	1914	4.19
1906	5.58	1915	[1]4.09
1907	5.61	1916	5.80
1908	4.78	1917 [2]	6.50

[1] Lowest in period. [2] Estimated.

Mr. KELLOGG. I also ask that there be incorporated in my remarks a memorandum showing the gross dividends paid by all the railroads of the country for the years 1912 to 1916, inclusive.

The PRESIDENT pro tempore. Without objection, the matter will be printed in the RECORD.

The matter referred to is as follows:

ITEM III.

Information called for: Table showing aggregate dividends paid by all railroads in each of the said years and average for the period stating each separately.

Modification: Can not be given for 1917. Would suggest that the aggregate only for all class 1 roads be given for each year 1912 to 1916, ending June 30, and the detail by roads for one year. Dividends declared, not actual payments, have been used as the only measure of the effect in the year's income account.

NOTE.—See note under Item I.

Aggregate dividends declared—Class 1 roads.

Year ended—	Amount.
Dec. 31, 1916 [1]	$306,070,530
June 30, 1916	281,936,371
June 30, 1915	259,899,529
June 30, 1914	376,098,785
June 30, 1913	322,300,406
June 30, 1912	339,964,855

[1] See accompanying statement, which includes similar information, by roads, for the year ended Dec. 31, 1916.

Mr. KELLOGG. It appears that in 1912 in round figures the railroads paid $339,000,000 in dividends; in 1914, which was a poor year, they paid $376,000,000, but of course the earnings which paid the dividends in 1914 were mostly made the year before; that in 1915 dividend payments went down to $259,000,000; in 1916 they amounted to $281,000,000, and for the calendar year 1916, $306,000,000. While the railroads were making more money in 1916 and 1917, they were manifestly putting more money into their property and paying less in dividends. To be sure, a great many of the railroads, standard lines, paid the same dividend year after year, like the New York Central, the Great Northern, the Northern Pacific, and the Pennsylvania. The latter paid 6 per cent, the Northern Pacific and Great Northern 7 per cent each, and the New York Central 5 per cent. Those were regular dividend-paying lines, but some roads did not pay dividends after the poor years of 1913, 1914, and 1915.

Mr. POMERENE. Mr. President, if I may be permitted a suggestion in that connection, in order that we may be able to give proper effect to any statement of net profits or of moneys that shall be passed to surplus, we must bear in mind that the purchasing power of the dollar or of that surplus to-day is only about 60 per cent of what it was a year or two ago. That was developed in the course of the hearings. There was some information given showing the relative cost of freight cars, of passenger cars, of locomotives, and it was demonstrated that the price of equipment of this kind is nearly twice what it was two years ago.

Mr. KELLOGG. That is correct. The $941,000,000 of net operating revenue to be used for the payment of interest and dividends and to provide betterments and improvements, of course, does not mean what it did a few years ago. So far as interest upon securities is concerned, it means the same thing, because the loser is the man who collects the interest; but, so far as dividends are concerned, of course the stockholder does not get actually as much as he used to get, and so far as betterments and improvements are concerned, it takes twice as much money to buy the material to improve the railroad to-day as it took five years ago. So we must consider that as a very important factor in this question. I do not think we should guarantee a greater income on that account, because everyone must bear his loss because of the depreciation of currency, and the committee did not take that into consideration in authorizing the guaranty; but the consideration suggested by the Senator from Ohio, however, is a very important factor.

Inability to get ships for the transportation of our products, and the effect of the war, greatly depressed railroad earnings. This is particularly true in Southern States, where the cotton crop could not be marketed and the railroads suffered very greatly on that account.

Another thing must be also considered in connection with this subject. The guaranty which this bill authorizes the President to make to the railroads as a maximum is the average of the net earnings for those three years.

We are not guaranteeing to each of the railroads the income that this maximum provides; we are simply providing a maximum, as I shall show later, beyond which the President can not go. He can go below that as far as he pleases, or as far as the railroads will accept it; and if any one railroad is receiving too much (as some very fortunately situated lines undoubtedly are, as I shall show you), the President is not required by this bill to guarantee the maximum amount; in fact, Congress could not provide for any maximum or minimum amount that should

be guaranteed to the railroads; we could simply provide that he should not make an agreement going above that amount. The railroads may or may not accept it, as they see fit. This would be fair to the railroads if the capital invested in 1915, 1916, and 1917 was the same as the capital investment during the time of the Government operation. But there was invested by the railroads between 1914 and 1916, $795,043,061. In other words, the capital which earned the income of 1916 was $795,000,000 more than the capital which earned the income of 1915; but it is the amount in dollars which we take, and we do not increase it to make up the extra capital which was invested in the lines. It is a fact also that between June 30, 1914, and June 30, 1917, the railroads invested in their properties $1,172,669,161. Considering the fact that 1915 was an extremely low year in net earnings and, further, that there had been an investment in the property of these large sums between 1914 and 1916, I am inclined to think that it is a fair offset to the very prosperous years of 1916 and 1917. A longer period than three years was suggested by some who appeared before the committee. There are objections to taking a long period, because, from year to year, there is an average investment in the railroads from $300,000,000 to $500,000,000, and unless the earnings of the earlier years were increased in proportion to the added capital, it would not be a fair basis for the value of the use during Government operation. The entire standard return, allowing nothing for betterments and improvements, is equal to 5.19 per cent on the property investment, as shown on the books of the railroads, amounting to $17,380,000,000, and it is 5.63 per cent on the total capitalization of all the railroads—that is, stocks and bonds—amounting to $16,710,650,327. As the average interest on the bonds of railroads is not quite as large as the 5.19 per cent or 5.63 per cent mentioned, if the interest was first deducted and all the balance applied on total stocks of railways, it would be more than this. Assuming the value of the property to be either the investment value shown on the books or the face of the stocks and bonds, of course, this return would be small, because it would allow no surplus for investment in betterments and improvements. It is said, however, that the investment in property, as shown on the books of the railroads, is entirely unreliable, and, to a great extent, this is undoubtedly true. It is a fact, however, that for the last 10 years the Interstate Commerce Commission has regulated the accounts of railroads so as to accurately show the amount invested in betterments, improvements, extensions, and new railway properties, and during that time $4,500,000,000, or a little over 25 per cent, of the entire book value of the railways, has been invested. It is a fact, more in early days than in late years, in the construction of railroads in the country, the book value, as shown by the accounts, was generally the face of the stock and bonds issued and that in many instances these stocks and bonds did not represent actual cash invested.

For instance, a construction company would be organized which would agree to build road A for so many bonds and so much stock; and everybody knows that in the early days usually the stock was a bonus for building the road. Much of the inflation introduced in railway accounts in this way has been eliminated through receiverships, foreclosures, reorganizations, and by additional money put into the properties. There are undoubtedly some railroads which are excessively overcapitalized, like the Chicago & Alton, Kansas City Southern, and other lines. No one denies that. There are many that are undercapitalized, and whether the most accurate investigation which can be made will show that the total value of railroad properties exceeds or is under total capitalization no one can tell. I might say that it is my own judgment that it will be found, if the railroads of this country are revalued, that their value is a figure not far from their present capitalization. As I say, there are many railroads—and I will mention a few of them—which are very much undercapitalized. There are those who advocate that railroads should be allowed 5 per cent or 6 per cent on the actual money invested, and that the Government should ascertain the exact or approximate investment. However, the public will never buy railroad stocks, subject to the fluctuations and hazards of such securities, when they realize more for their money by loaning it out on good security at an equal rate of income.

The railroad systems of this country, which were built before the country was settled and industries developed, would never have been built under such conditions. We must remember that European railroads were built after the country was fully settled and industry largely developed. With us the railroad was the pioneer, pushing its way into the wilderness before the country was settled and industries developed. I went to Minnesota 53 years ago by railway, steamship, stagecoach, and ox team. At that time there was not a mile of railroad west of the Missouri River. Yet in this short space of time, in the life of nations, that country has been developed, peopled with millions of progressive, virile men and women, traversed by lines of railroad, and filled with great centers of industry. Who believes this could have been done if the only reward the investors received would be 5 per cent or 6 per cent on the money invested, if the railroads should be fortunate enough to earn it, and nothing, if they were not? I am, and have been for many years, earnestly in favor of the Federal Government establishing a uniform system to regulate the issue of railway stocks and bonds. It would prevent such abuses as in the Chicago & Alton case, and others, and render such securities a better investment. But no one is going back to examine the accounts of railroads to determine how much of the stocks and bonds is represented by actual cash.

One of the serious problems encountered in this bill is that this standard return is not divided equally between all railroads so as to be a uniform payment on investment or capitalization. The net earnings of the roads vary, some pay no dividends and the dividend-paying roads vary a great deal; and it has been said before the committee that this guaranty would give some of the roads a very large income while others would receive a small one. As I have said before, this is the inevitable result of our competitive system of separate corporations and ownerships. Some, like the Burlington, the Pennsylvania, and other roads, have short lines, advantageously located, cheaply constructed through densely populated communities, yielding heavy traffic, while others are less fortunately situated, and rates which would yield one an exceedingly small income would pay the other a large one.

But, as I said before, we must not forget that this authorization to the President is merely of a maximum. He is not obliged to allow, and I suppose he will not allow, a railroad a guaranty which will give it an excessive income.

But if we are to concede that the earning capacity is not a reasonable basis for the value of the use of the properties, I know of no way to arrive at an accurate rental value without years of investigation and litigation. It is said that the standard return, after paying interest on the bonds of all the railroads in the country and after deducting an estimated $70,000,000 excess-profits tax, would pay about 7.15 per cent on the net capital stock; I mean net capital stock outstanding in the hands of the public. Before deduction of this excess-profits tax it would amount to about 8.26 per cent. But this, of course, would allow nothing for betterments and improvements, which represents one of the most important questions in railroad management. Every year the railroads in this country must spend millions of dollars in betterments and improvements in order to properly serve the public. Many of these betterments and improvements are such that they will not pay a return on the investment, such as new stations, elevation of tracks, safety appliances, elevated or depressed crossings, and very many other improvements. Take the Pennsylvania Railroad as an illustration. It appeared in the hearing that it has in the last 10 years invested about $350,000,000 out of surplus in betterments and improvements and about $150,000,000 out of new capital. Of these improvements the Hudson River tunnel and the New York Station, as well as the track elevations which that company has made to a very great extent, have undoubtedly cost more than $200,000,000; and yet these improvements would yield little, if any, revenue.

Now, that is true all over this country. The public is constantly demanding and is entitled to better stations, elevated tracks in cities, and so forth; yet those stations and those tracks do not yield any revenue at all to the company, and they should be paid for out of a reasonable surplus over and above a fair income to the stockholders.

Mr. SHERMAN. Mr. President, I assume that it will not break in on the course of the Senator's remarks if I make a suggestion at this point.

Mr. KELLOGG. Not at all.

Mr. SHERMAN. The Union Station at St. Louis is not permitted by the proprietary lines to pay anything more than maintenance. Dividends can not be paid on the vast expenditures in connection with that station. That has been decided, as no doubt the Senator is aware, in adjudicated cases, and the practice is followed very scrupulously by the proprietary lines.

Mr. KELLOGG. Why, Mr. President, in Chicago to-day they are preparing to erect a station, which is badly needed, at a cost of millions of dollars. It will not add a dollar of revenue to the railroads' earnings, and if we are going to maintain the great railroad systems of this country properly to serve the public they must be allowed something more than dividends upon their stock. One of the weaknesses of the English system has been that the English railroads have to a much greater extent than in this country paid out their entire income to

their stockholders. I do not say they have paid it all out, but they have paid out a very much greater per cent, and they have capitalized improvements and betterments until the English railways to-day are capitalized away beyond what is reasonable, and the stocks of English railways in the last 10 years have reflected in their downward course that bad practice of capitalizing improvements and property investments which will not earn any interest upon the cost.

Mr. WATSON. Mr. President, if it will not interrupt the Senator——

Mr. KELLOGG. Not at all.

Mr. WATSON. My recollection is that the English railroads are capitalized at $275,000 a mile and the American railroads at a shade under $70,000 per mile.

Mr. KELLOGG. I think the American railroads are capitalized at about $62,000 per mile.

Mr. WATSON. Yes.

Mr. KELLOGG. But I am not sure of those figures. I have, however, examined the railroad statistics of the world very carefully, and, generally speaking, our railroads are capitalized at less per mile than most of the railroads of the world.

Mr. SHERMAN. Mr. President, before the Senator leaves that item I should like to make this further suggestion: Referring to the cost of $274,000 per mile in England, text-writers and reports from Parliament say that the original cost was largely caused by getting authority from Parliament to build the roads. I should like to add that comparison and put it alongside the railroad conditions in our own country, showing that it is not as bad as it might appear to be.

Mr. ROBINSON. Mr. President——

Mr. KELLOGG. I yield to the Senator from Arkansas.

Mr. ROBINSON. The further statement ought to be made in that connection that most of the English roads, or practically all of them, are double-track or multiple-track, so that the comparison does not mean all that it would seem to mean upon the simple statement.

Mr. KELLOGG. No; it does not; but making an actual comparison per mile of track, of course our railroads cost very much less.

Mr. ROBINSON. Yes.

Mr. KELLOGG. These improvements and betterments which do not yield revenue can not or ought not to be capitalized, and a railroad must retain a surplus amount of income over and above a reasonable dividend to make such improvements. It is my opinion that it is much better railway economics that some surplus be allowed over and above reasonable dividends to make improvements and betterments, and not to allow those improvements to be capitalized.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER (Mr. KING in the chair). Does the Senator from Minnesota yield to the Senator from Iowa?

Mr. KELLOGG. I do.

Mr. CUMMINS. Will the Senator from Minnesota state exactly what he means by "capitalizing"?

Mr. KELLOGG. I think that if Congress would take the whole railway situation of the country, determine that the capitalization now is fair, or determine what is fair, and provide a system for controlling future capitalization, it should not permit those improvements made out of surplus and beyond reasonable dividends to be capitalized or used as the basis for increasing rates. That is what I mean, exactly.

Mr. CUMMINS. In connection with the point just stated it must be borne in mind that in Great Britain they permit stock to be issued for these betterments and improvements. In this country some roads issue stock for betterments and improvements made out of the earnings—some do not—but they all insist that the public shall pay rates that will return interest upon these added values. So the result is capitalization, no matter whether capital stock be issued for the values or not. So far as the public is concerned it is asked to pay for the added value, and I am very glad to hear the Senator from Minnesota say that he thinks the money that is contributed toward capital by those to whom service is rendered and out of which betterments and extensions are made should not be the basis for additional returns.

Mr. KELLOGG. I thank the Senator from Iowa. Of course we can not stop in this bill to work out any elaborate scheme of control of capitalization and rate regulation, and we have not attempted it. The bill does contain a clause, however, which I may ask the indulgence of the Senate at some later time to discuss briefly, that betterments and improvements made out of surplus during the continuance of the war or Government control shall not be used to increase the guaranteed rate of income. That is a question, however, I shall wish to discuss separately.

It is sufficient to say here that under this bill any part of the guaranteed income which the President may give to any railroad, over and above the rate of dividends invested in the property, can not be used during the Government control to increase the income of the railroad thus guaranteed.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Iowa?

Mr. KELLOGG. I do.

Mr. CUMMINS. I shall not interrupt the Senator much further, but I think it would lead to a better understanding of the matter if I would point out that the part of the bill to which he refers, and which meets with my entire concurrence, is imperfect in that it saves the public from the additional imposition during the period of Federal control, but when the roads pass back to their owners then they are permitted to use these very betterments and extensions made out of the surplus as a basis for the increase of rates, and that is my objection to it.

Mr. ROBINSON. It may or it may not be. That is yet to be determined by Congress. That is for future determination.

Mr. CUMMINS. I suppose Congress will be of the same mind then that it is now, and that it will allow the railroads to have the surplus.

Mr. KELLOGG. It is sufficient to say we have tried to make this bill a bill to regulate the railroads during the period of Government control, leaving Congress to settle those important questions hereafter, and that is the way this provision was left. If Congress desires now and in this bill to determine a permanent policy I have no objection, but I wish to suggest that we had better keep out of the bill as much as possible our various theories of railroad operation and control, because I am quite aware that most of us believe that we can do it a good deal better than it has been done, or better than the railroad men themselves can do it.

Mr. President, there has been submitted a minority report by the senior Senator from Iowa [Mr. CUMMINS], and there appears in it a statement of how much this guaranteed return will give to certain railroads upon their stock. This is an important question which the Senate should fully understand. Those figures are made up in this way: The guaranteed return, assuming the President gives each road the maximum, and you then take from that road the interest on its bonds and apply all the balance on stock as a dividend—which no company has done in the past—would show in some cases a very large income. As to all the railroads in the United States it would show, as I said before, about 7.15 per cent after deduction of excess-profits tax, but many roads pay no dividend, and all of them apply a large sum, greater or less in each case, for betterments and improvements of their property.

I wish to call the attention of the Senate for a few moments to a statement in the minority report of the senior Senator from Iowa, which graphically illustrates how dangerous it is to rely on a statement, though accurate, made up from books without knowing all the circumstances surrounding it. While I shall not discuss each one of these railroads, I would like to call the attention of the Senate to a statement on page 9 of that report, which I beg the indulgence of the Senate to read. Reading from the minority report:

> I have referred to the larger systems, but, to emphasize both the excessiveness of the standard and the disparity it introduces, it may be well to suggest that the following will have for their stockholders—

Now, note that it is made up by taking all the net earnings and applying them on the stock after paying interest on the bonds—

	Per cent.
Bessemer & Lake Erie Railroad Co	647.22
The Chicago & Erie Railroad Co	70.45
New York, Philadelphia & Norfolk Railroad Co	35.74
The Cumberland Valley Railroad Co	24.01
The Lehigh & Hudson River Railway Co	27.98
Charleston & Western Carolina Railway Co	21.67
Duluth, Missabe & Northern Railway Co	114.12
Duluth & Iron Range Railroad Co	38.27
Panhandle & Santa Fe Railroad Co	64.37
St. Louis, Brownsville & Mexico Railway Co	52.71
Colorado & Wyoming Railway Co	162.64

The report continues:

> These are astounding facts which the majority of the committee seems to have either overlooked or ignored. It can not be possible that Congress will tax the people of the country, either through rates for transportation or through other impositions, to pay these returns upon capital stock, the most of which was issued in defiance of both law and morals.

I am sure the senior Senator from Iowa did not wish to charge the committee with being careless or callous to the wishes of the people of this country or to their interests. I wish to say that the members of the committee were familiar with these facts.

Now, Mr. President, I wish to read a letter, which I shall ask to have incorporated in my remarks without reading the whole

of it, calling attention to the actual capitalization and the real facts as to some of these roads. The letter is from M. O. Lorenz, statistician for the Interstate Commerce Commission, to whom I submitted the minority report. It is dated February 11, 1918. I will only read a part of it and ask that all of it be inserted in the RECORD:

In reference to certain roads showing a high return on capital stock, the following data from reports to the Interstate Commerce Commission are submitted.

The Bessemer & Lake Erie is said to earn 647.22 per cent. Here is what the statistician says:

This road owns but 8.81 miles of road, but it operates 205 miles. It operates the property of its two subsidiaries. The property of the three roads is reported as follows for the year ending June 30, 1916:

Bessemer & Lake Erie	$17,583,494
Pittsburgh, Bessemer & Lake Erie	27,329,801
Meadville, C. L. & L.	445,761
Total	45,359,056

The $4,745,332 proposed standard return for these three roads combined is a little more than 10 per cent of the above total property. It is obvious that the $500,000 of capital stock gives no indication of the value of the property.

The report this year shows the total bond and stock obligations of the subcompanies which this company operates under a lease to be about $38,000,000 and a book value of $51,000,000; and the Interstate Commerce Commission report for 1917 shows that they earned 9.45 per cent upon the property investment as it appears upon the books.

Mr. POMERENE. Has the Senator any reason to believe that the book valuation in that particular instance is an overstatement of the valuation?

Mr. KELLOGG. No; I have no reason to believe it, because the whole question of the rates on iron ore from Lake Erie ports to Pittsburgh was considered by the commission in three or four cases within the last two years, and the rates under which these earnings were made were fixed by the commission with a full knowledge of the capitalization and value of the property of this particular road and the other competing roads running from Lake Erie to Pittsburgh, where this road runs. This road does have an enormous earning capacity, and I am not saying that its earnings are not too large. I am inclined to think that they are very large, and I am inclined to think that the President will not make a guarantee equal to the amount of those earnings. He is not obliged to do that under this proposed law.

Mr. SMITH of South Carolina. What was the total outstanding stock of the Bessemer & Lake Erie?

Mr. KELLOGG. Twelve million four hundred and ninety-eight thousand eight hundred and fifty dollars ($12,498,850) in stock and $25,630,000 in bonds; but all those companies are in a holding company, and for some reason or other the men who control it thought it was only necessary to have a nominal stock of $500,000. That is the real fact, but I do not say it is not earning too much.

Now, the Chicago & Erie—

is a subsidiary of the Erie Railroad—

Quoting from letter—

With only $100,000 capital stock it reports a property investment for the 250 miles of road which it owns of $29,954,145 for June 30, 1916. Its proposed standard return of $228,186 is less than 1 per cent of this investment. This road owes the Erie on open account of nearly $10,000,000, and on this debt it pays no interest.

I will omit the New York, Philadelphia & Norfolk, the Cumberland Valley Railroad, and the Lehigh & Hudson River Railway Co., all of which are explained in the same manner. I will not tax the patience of the Senate to read them.

Mr. POINDEXTER. What were their earnings?

Mr. KELLOGG. The New York, Philadelphia & Norfolk earned 9 per cent on its investment, the Cumberland Valley Railroad earned 12 per cent, and the Lehigh & Hudson River Railroad earned 8.4 per cent. The Charleston & Western Carolina earned 5.8 per cent on its book value.

Mr. POMERENE. Before the Senator goes to that, may I ask him this question: Does the letter from which the Senator is reading cover all the railroads referred to in the minority report?

Mr. KELLOGG. No; it covers all of those classed as exorbitant in their earnings. On page 9 there is another list of railroads. I will mention a few of them when I finish. I am not going through the whole list, because the task is beyond my time and strength.

Take the Duluth, Missabe & Northern and the Duluth & Iron Range. I have been familiar with those roads since the first preliminary line was run through the wilderness. The Duluth, Missabe & Northern is a road which is said to earn 114.12 per cent on its capital. This is what the statistician of the Interstate Commerce Commission says:

The Duluth, Missabe & Northern shows a property investment on June 30, 1916, of $36,048,455. The proposed standard return is $5,377,214.

Dependent on iron ore traffic.

I wish to go further with that. Three years ago the Interstate Commerce Commission entered into an inquiry as to all iron-ore rates in Minnesota. The Senate probably knows that the greatest iron belt developed in the world lies from 60 to 100 miles north of Duluth and Two Harbors. The density of traffic on those roads is probably beyond anything ever known in this country. I have seen ore trains follow one another every five minutes upon those lines of railroad.

After an elaborate investigation lasting for more than a year the commission found the Duluth, Missabe & Northern to have a capital stock of $4,112,500 and bonds in the amount of $16,298,000, making a total of $20,410,500, and at the same time found the actual value of its property to be $28,464,955, at least $8,000,000 more than its total bond and stock liability, and I think anyone who will read the report of the commission will learn that the finding was exceedingly conservative.

Again, as to the Duluth & Iron Range Railroad, which is said to earn 38.27 per cent, it showed a property investment, on June 30, 1916, of $27,354,603. The proposed standard return is $2,398,945.

In this case the commission found that the Duluth & Iron Range had a capital stock of $3,000,000 and bonds in the amount of $12,651,000, making a total of $15,651,000. The commission found that the actual value of the property was $22,130,635, about $7,000,000 more than its total stock and bond liability.

Mr. SMITH of Michigan. When the Senator says the commission found the values, he refers to the physical valuation?

Mr. KELLOGG. Yes. It appears, as I understand it, that the State of Minnesota made a physical valuation of all its railroads, under the charge of a man whom the State authorities employed, which took several years. This physical valuation was in evidence before the commission and there was a vast amount of other testimony, and the commission found that for the purposes of this case the physical value of the roads was as stated. It is over $8,000,000 in one case and over $7,000,000 in the other more than the total stocks and bonds of the road.

Mr. SMITH of Michigan. One more question, if the Senator will permit me. Was that examination for the purpose of fixing a basis of taxation?

Mr. KELLOGG. A basis of rates for carrying iron ore.

Mr. SMITH of Michigan. Which were to be prescribed by the State?

Mr. KELLOGG. To be prescribed by the Interstate Commerce Commission, and the Interstate Commerce Commission fixed the rates. I do not say that the Duluth, Missabe & Northern, the Bessemer & Lake Erie, the Chicago & Erie, and the roads named in this list are not earning too much. I am not defending their earnings. They are so situated in relation to an enormous single kind of traffic that almost any rate which would yield an income over operating expenses would earn a big dividend on their stock, because the stock in nearly every case is merely nominal. But the answer to all that is this: It was impossible for the committee, and it is impossible for Congress, if it had the legal power to do it, to investigate each case and fix a guaranteed rental value of the property. It can not be done legally, nor is it within the compass of the time of Congress. So the committee was obliged to fix a maximum, beyond which the President should not go in making a guaranty. It was wise to give somebody the authority to make an agreement with all the great railroad systems in this country, because to appoint a commission or a court to try each case separately would take years, as everybody knows. We are in a great conflict. We must maintain the integrity of the railroads and insure earnings which will pay interest upon their vast securities, but we must at the same time see that the people of this country are not overtaxed and that the roads are not overpaid. So the power was vested in the President to make an agreement, simply providing a maximum. It may be said that it would be wiser to confer that power upon some board to inquire into each case. Some one must be trusted to determine the facts and make an agreement with the railroads, or litigation will result which will last for years, and it therefore seemed to the committee that it was wise to confer this power upon the President.

Now, then, if any of these lines of roads by reason of their fortunate situation are earning too much money on the rates prescribed by the commission, the President is not obliged to guarantee them this maximum, and I assume that he will not do it. They do not need a guaranty, but many of them have

competitors not earning an excessive income. Take the Pennsylvania Road: In 1916 it paid 6 per cent and earned 5 per cent more. In 1915 it paid 6 per cent and only earned six-tenths of 1 per cent more.

Take the New York Central: It pays 5 per cent on its stock. Some years it earns 5 per cent more, which it invests in property; and it is compelled to invest a large sum in its property from year to year—in nonrevenue-paying improvements to meet the demands of this great and growing country. If the President finds that these amounts are excessive, I assume he will not make the maximum guaranty.

Now, take the St. Louis, Brownsville & Mexico. I never heard of it until I saw it in the minority report. The statistician of the Interstate Commerce Commission reports as follows:

This road is reported as in hands of receiver in 1916. The high return on capital stock is explained by the fact that the capital stock was reported at $500,000, while the property investment appears as more than $15,000,000.

I ask that the letter entire may appear in my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The letter is as follows:

INTERSTATE COMMERCE COMMISSION,
Washington, February 11, 1918.

Hon. FRANK B. KELLOGG,
Senate Office Building.

MY DEAR SENATOR KELLOGG: In reference to certain roads showing a high return on capital stock the following data from reports to the Interstate Commerce Commission are submitted:

BESSEMER & LAKE ERIE.

This road owns but 8.81 miles of road, but it operates 205 miles. It operates the property of its two subsidiaries. The property of the three roads is reported as follows for the year ending June 30, 1916:

Bessemer & Lake Erie	$17,583,494
Pittsburgh, Bessemer & Lake Erie	27,329,801
Meadville, Conneaut Lake & Linesville	445,761
Total	45,359,056

The $4,745,332 proposed standard return for these three roads combined is a little more than 10 per cent of the above total property. It is obvious that the $500,000 of capital stock gives no indication of the value of the property.

CHICAGO & ERIE.

This is a subsidiary of the Erie Railroad. With only $100,000 capital stock, it reports a property investment for the 250 miles of road which it owns of $29,954,145 for June 30, 1916. Its proposed standard return of $228,186 is less than 1 per cent of this investment. This road owes the Erie on open account nearly $10,000,000, and on this debt it pays no interest.

NEW YORK, PHILADELPHIA & NORFOLK.

This road is controlled by the Pennsylvania Railroad, but its accounts are distinct. It owns all the road which it operates. Its property investment is nearly $11,000,000, on which the proposed standard return is a little over 9 per cent.

CUMBERLAND VALLEY RAILROAD CO.

This is also controlled by the Pennsylvania Railroad. With its two subsidiaries which it leases, a combined property investment for June 30, 1916, was reported amounting to $10,308,715. The proposed standard return is about 12 per cent of this amount.

THE LEHIGH & HUDSON RIVER RAILWAY CO.

This is a subsidiary of various coal roads. It reports a property investment of $6,247,586 for the year June 30, 1916. The proposed standard return is $525,315, or 8.4 per cent.

CHARLESTON & WESTERN CAROLINA.

This is a subsidiary of the Atlantic Coast Line. On June 30, 1916, it reported an investment in road and equipment of $8,275,090. The proposed standard return of $478,916 is 5.8 per cent of this amount.

DULUTH, MISSABE & NORTHERN.

Shows a property investment on June 30, 1916, of $36,048,455. The proposed standard return is $5,377,214.
Dependent on iron-ore traffic.

DULUTH & IRON RANGE.

Shows a property investment on June 30, 1916, of $27,354,603. The proposed standard return is $2,398,945.
Dependent on iron-ore traffic.

PANHANDLE & SANTA FE RAILWAY CO.

Controlled by Atchison, Topeka & Santa Fe. It operates most of its road under lease. The following is the property statement of the Panhandle & Santa Fe and its subsidiaries as reported for June 30, 1916:

Panhandle & Santa Fe	$5,039,771
Pecos & Northern Texas	14,725,881
Pecos River	1,399,588
Total	21,165,240

The proposed standard return is $1,341,385, or 6.3 per cent.

ST. LOUIS, BROWNSVILLE & MEXICO.

This road is reported as in hands of receiver in 1916. The high return on capital stock is explained by the fact that the capital stock was reported at $500,000, while the property investment appears as more than $15,000,000.

COLORADO & WYOMING.

This is an independent operating road. With only $100,000 capital stock, it claims a property investment of $4,705,021 on December 31, 1916. The standard return of $333,053 yields a little over 7 per cent on this investment. The preceding, while independent of other roads, was incorporated in the interest of the Colorado Fuel & Iron Co., and the bonded debt is probably not in the hands of the public.

The high ratio of net income to capital stock shown for the preceding roads is correct according to the reports, but where the capital stock is nominal in relation to the total property operated or where the property is closely associated with a parent or controlling company, such a ratio is not indicative of the degree of the prosperity of the road.

Yours, respectfully,

M. O. LORENZ, *Statistician.*

Mr. THOMAS. I should like to know if the letter gives any information regarding the last of the roads on the list—the Colorado & Wyoming Railway Co.—which, according to the minority report, would receive under the arrangement of this bill 162 per cent. My inquiry is as to whether or not this letter contains any information with regard to that road.

Mr. KELLOGG. I shall read what the statistician says in regard to the Colorado & Wyoming road. I know nothing about it whatever beyond the information contained in this statement. It is an independent operating road, and it belongs to the Colorado Fuel & Iron Co., so Senator THOMAS says.

This is an independent operating road. With only $100,000 capital stock, it claims a property investment of $4,705,021 on December 31, 1916. The standard return of $333,053 yields a little over 7 per cent on this investment. The preceding, while independent of other roads, was incorporated in the interest of the Colorado Fuel & Iron Co., and the bonded debt is probably not in the hands of the public.

I have no knowledge of the road whatever, but, as I said before, if the earnings are too great, the President will not make the guaranty. We were obliged to adopt some plan to permit an agreement. In doing so it was thought wise to make a maximum above which Congress would not authorize the President to go. On the other hand, as to roads very unfortunately situated, there is an exception made, that the President may make a greater guaranty than the standard return. So with this maximum, and what we might call the power of declaring a minimum guaranty which we give the President, it is hoped that he may be able to work out, with his experts, an agreement with the great body of the railroads of the country, avoid litigation, maintain the integrity of their securities during the war, and maintain the railroads, so that when they are turned back to their owners they will be in as good condition as at the present time. There are many other roads named here, though I have not the time to consider them. The Burlington seems to be a conspicuous example, and it was mentioned many times before the committee. The Chicago, Burlington & Quincy is undoubtedly an advantageously situated road, running through a very rich country in the Central West and the great Mississippi Valley. Its capitalization is admittedly low. Its average earnings for the three years 1915, 1916, and 1917, on average book value or investment of $484,507,951, was 7.02 per cent. To be sure, I have no doubt, if you deduct interest on its bonded debt and apply all the balance of the Burlington income to a dividend on this $115,000,000 of stock, it will show undoubtedly the figures given by the senior Senator from Iowa [Mr. CUMMINS]. I have no reason to question those figures; I have not examined them; but I presume they are correct. The Burlington Road, however, pays 8 per cent, and has done so for many years. The balance is used and invested in its property, and I think wisely so, because it is one of the best systems of railroad in the country. The answer, however, to the proposition is that right alongside of it are other lines of road, running through the same territory, which compete with it under the same rates, and the earnings and guaranteed returns of those roads are not excessive.

Mr. SHERMAN. There is the Rock Island, for instance.

Mr. KELLOGG. Yes; there is the Rock Island. I presume the Rock Island has been badly managed and is not entitled to any sympathy. I do not deny that there are many roads in the country like the Rock Island and the Alton that have been badly managed. That is true in every line of business. I hope Congress will pass a law which I have advocated for many years and have asked the Interstate Commerce Commission to recommend to Congress, regulating the issue of stocks and bonds of railroads in one central authority of the Federal Government. Such action would make railroad securities a better investment for the public. It would also be better for the railroads. We can not, however, stop here to determine what in each case is a fair return to guarantee the railroads. I have the figures for all of the roads, and many of them are published in the hearings before the committee.

I know Senators will give this very important question most careful consideration. If the plan provided in the bill is not fair, of course the Senate will not adopt it. I wish to submit the facts as I understand them.

Another phase of this guaranty question is—and it should not be overlooked—that this is not a permanent taking whereby the Government guarantees a perpetual income on the securi-

ties of the railroad. What would be reasonable under such circumstances would bear little relation to what would be reasonable as a temporary taking. The Government is taking property out of the hands of the railroads during the war, and the railroads are taking the chances of traffic being diverted to water lines or from one railroad to another, of the personnel of their organizations being changed, and of their whole system of business being revolutionized. For any of the incidental damages that may accrue the Government is not liable.

It was stated by Mr. Anderson before the committee that the President might, in controlling the railroads, divert the traffic from one line to another; that he might establish water lines in competition, and thus injure some of the railroads; and that there ought to be compensation provided in that event. For that injury, however, we can not provide compensation. We pay the railroads a guaranteed income during the period of Government operation, and it must and will cover all injury, direct and incidental. If, when the roads go back, any of them have been thus injured, that is one of the risks of Government operation which they must assume.

My own judgment is that it is not a serious risk. My opinion is that if the roads had been left in the hands of their owners, with authority vested in the President to appoint a director who should regulate their operation during the war, with power to divert traffic to lines least congested and to coordinate all their facilities and equipment the injury any road would suffer would be small and would occur in only a few instances; we would thereby have avoided consideration of this very complicated question of guaranty. As I have previously said, however, the President and his advisers thought otherwise, and I bow to that decision. It is our duty to determine as best we can a fair and reasonable basis of guaranty.

The railroads have no claim against the Government for anything beyond the guaranteed earnings, if they accept this, or, failing to reach an agreement, what the court should finally determine is a fair and just rental charge.

I am taking very much more time than I should, and more than I had intended to take, but if the Senate will bear with me I should like to discuss briefly two more questions.

First, as to the rate-making power. This bill proposes to vest the ultimate decision as to the reasonableness of rates, both relatively and otherwise, in the Interstate Commerce Commission, a body provided by law which has long been in existence and charged with all railroad-rate regulation in interstate commerce matters.

There is no subject more vital to the industrial interests of this country than that of transportation. The time was when each city and village was supplied with nearly all of its products from the surrounding country and in turn the cities and villages furnished the country with the principal manufactured articles. That time has passed. The specialization of industry, the inventive genius of mankind, the introduction of rapid transit, the building of great manufactories, which absorbed the small industries of the villages and towns, have made all parts of the country and Nation, to a greater or lesser degree, interdependent. Transportation, therefore, is a subject vital to every individual and every business in the country, and while, of course, the amount of rates is important the most important thing is the relative reasonableness of such transportation charges. The great rate structure of this country has grown up under competitive influences. I do not mean so much competitive influences between railroads, although this has been an important factor, but competitive influences between communities, States, and different sections of the country. The merchants and manufacturers of Chicago compete with the merchants and manufacturers of New Orleans, St. Louis, Kansas City, Omaha, St. Paul, and Minneapolis. The cities of the Atlantic and Pacific seaboard compete with one another for the inland trade. A difference of 1 mill per ton per mile will make or break the railroad systems of this country, and a small increase or decrease in competitive rates, unless just and equitable, may ruin the merchants and business men of one city and build up those of another. And while I do not claim that the rate structure of this country is in all respects perfectly just and reasonable, it is an approximation which has come into existence through years of experience of railroad men, State and Federal railway commissions, and competitive influences, so that the farmers of the Mississippi Valley may place their products on the markets in competition with those in other sections of the country. To build this great structure has required the best ability of an army of traffic managers, rate experts, and of the Interstate Commerce Commission and its employees. It is appalling to say that because we are at war this entire rate structure, and the absolute power to change a rate, affecting the billions of dollars of railroad property and hundreds of millions of dollars of commerce shall be placed in the hands of one man, without right of appeal, be he ever so great and though he possess the wisdom of Solomon. It is not the business of an executive. The making of rates is a legislative and administrative function.

The legislature must lay down the rules for making rates; for instance, that they shall be just and reasonable and nondiscriminatory as between communities and individuals; and the legislature may then delegate to a board or an officer the power to inquire as to whether the rates comply with the legislative fiat, whether they are reasonable, just, and equitable, and if the board or person finds such to be the case, to establish the rate. Of course, this is axiomatic, and I am merely making the statement in order that I may base further argument upon it. Nothing is further from the business of a purely executive office. In no nation of the world is the making of rates in the hands of a single executive officer of the Government. There is no more reason for this power being delegated to one official, without the right of appeal, in times of war than there is in times of peace. The making of rates does not affect the operation of the roads. It is simply a question of compensation. The great majority of traffic is not Government troops and materials, but is private; and no country in the world, even as to Government railways, has ever delegated the power to fix rates to a single official. In Canada it is vested in a Canadian railway commission; in Great Britain, in the railway and canal commission; and in France a most elaborate system has been adopted. A rate may be originated by a company, but before taking effect it must be approved by the minister of public works. It is submitted to the prefects of the departments or the arrondissements and to the chambers of commerce of the districts affected. It must be passed on by a consultative committee consisting of a body of men created to investigate rates, composed of 150 members, including officials of States, representatives of agriculture, commerce, and industry, and a representation of senators and deputies. In Prussia there is a general advisory council and nine district councils, and in Austria-Hungary and Italy they have established similar bodies.

In every country the making of rates is considered of such great importance to commercial life that it is surrounded by the greatest safeguards; and yet it has been proposed, simply because we are at war, that we not only turn over the operation of all the railroads to the President but allow the President to delegate to some official the extraordinary power of making all rates. I have seen in the newspapers within the past few days a statement that the Director General intends to increase the passenger rates in a certain part of the country to deter traveling. I hope it is to Washington. He might accordingly advance freight rates to deter shipments, and without knowledge and consideration of the far-reaching effect might ruin thousands of business institutions. Everyone knows that the President himself can not give time and consideration to the matter of fixing rates. The proclamation in this case, in substance, provides that until further order the State and Federal commissions are to continue their functions. I think it is the duty of Congress to provide the tribunal which shall have charge of this question, necessarily quasi judicial in its nature. It might be remarked here that the Interstate Commerce Commission is an arm of the Federal Government.

It is especially important that this power be vested in a body which has for years been gathering information, which has an intimate knowledge of the vast and complicated rate structure, and is conversant with business conditions and needs throughout the country. I do not claim that the system now in vogue is not capable of improvement. I speak, however, from an intimate knowledge of the operation of the present system extending over a period of 25 years, and it is my opinion that the Interstate Commerce Commission has performed a function of inestimable value to the business interests of this country. I know of no shipper or railroad who would return to the system which existed before the establishment of the Interstate Commerce Commission. We can all remember when the system of rebates was the rule rather than the exception; when the small shippers, who were without influence, alone paid the rates, and when industries and towns were built up by reason of partiality and others destroyed for the same reason. It was the natural outgrowth and logical result of excessive competition and unlimited power vested in railroad managers. That condition, however, is now one of the past.

The Interstate Commerce Commission has performed a great public service in investigating commercial and industrial conditions; in compiling statistics with regard to practically every phase of railroad operation and management, in enforcing the laws affecting commerce, and in coordinating the rate systems throughout the country.

It is argued that the President is responsible for the operation of the roads, and therefore should be vested with the power to establish rates. As Executive head of the Nation, he is responsible for many of the activities of the country, especially during the present emergency, but it is also true that, under the law, he is not charged with the execution of all the various war powers, and I know of no problem which can be more properly submitted to a tribunal familiar with rate structure than that involving the establishment of and change in rates.

It is provided in this bill that in the event the President fails to reach an agreement with the railroads with regard to compensation the determination of that question shall be submitted to a board or boards of referees appointed by the Interstate Commerce Commission.

I am as desirous as any Senator in this Chamber to vest in the President all the power necessary for the successful prosecution of the war, and I have voted accordingly since becoming a Member of this body. Moreover, in the event there is any doubt of the necessity for so doing, I shall resolve that doubt in favor of the President; but I can not believe that the President will ever desire to exercise the power of fixing rates or that such power should be delegated to a single individual.

DURATION OF GOVERNMENT OPERATION.

I am very strongly of the opinion that this bill shall provide a definite time after the termination of the war when Government operation shall cease and that it should not be left to the uncertain result of future congressional action.

Under the extraordinary war power the President, by proclamation, took possession and assumed control under the law which authorized this to be done during the period of the war. Having thus acquired possession of the railroads, under a statute which only authorized the taking of possession during the war, the Director General of Railroads now comes before our committee and asks that this possession continue until Congress shall otherwise provide. I have no doubt that under the war power Congress may keep the railroads for a reasonable time after the termination of the war. But to keep them an indefinite time and pay rent therefor is obtaining property under false pretenses, so far as the American people are concerned.

There are many reasons which convince me that this is unwise. I am quite aware that it will receive the approval of those who believe in Government ownership and operation. They see, without squarely meeting the issue, an opportunity to get permanent possession of the railways and carry out their ideas, or to experiment with the railroads with this in view.

I must admit that I have had to revise my ideas a good many times since the beginning of this war, and it is our duty as Senators to meet these startling changes with the most liberal spirit. *Though I did not believe it was wise or necessary to take over the railroads, I am prepared to go to the full limit to make Government operation as successful as possible and to grant all the powers necessary to that end.* But I am not yet prepared to take a step that will vest such powers in Government-ownership advocates and force Government operation of railroads upon the people of this country. That question should be met by the American people squarely and fairly, unhampered by any other issue, and should the time come when the people of this country deem it wise to take over the railroads their mandate is final. I may support it myself, but I am not yet ready to do so. Why are the railroads taken for war-emergency purposes to be kept by the Government indefinitely, while campaign after campaign is waged over the question of Government ownership, where the President can, by vetoing a measure turning them back to their owners, require a two-thirds vote of Congress to return the property thus taken?

But as there are undoubtedly men who believe that any means of Government ownership and operation justify the end, I may be pardoned for considering for a moment the result of experience in Government ownership and operation. I believe there is no question that the result of experience has shown that Government operation of railways is more expensive, less efficient, and less beneficial to the people generally than private operation. We have a splendid system of railroads, with cost of construction and capitalization the lowest, in comparison, of the leading countries in the world, with the best equipment, the cheapest service, and, in most respects, the best service.

I do not say that it is all it should be, for I do not think it is. I remember very well a remark made by the late James J. Hill, who built the Great Northern Railroad through the wilderness to the coast. Only a few years ago he said "the railroads of this country ought to spend a billion dollars a year for the next 10 years," and I have no doubt that it is true.

The freight rates are very much lower in this country than in any other country except Japan. In some countries the passenger rates for all passengers carried are lower than in this country, but this is largely due to the fact that there they have third and fourth classes, which, on the Continent of Europe, constitute the greater part of the traveling. In Prussia, for instance, third and fourth classes constitute 95 per cent of the travel, and this, to a great extent, is true all over Europe, while in this country the extraordinary passenger service is equaled nowhere in the world.

It is true that in one respect our service is not as good as that of Great Britain, Prussia, and France, and that is in the number of accidents to employees and passengers. But this is principally due to the training of the employees. In those countries, under the law, there are severe penalties accruing in the event of errors and mistakes by employees, which are enforced. In Prussia, especially, the trains are in charge very largely of soldiers, trained to obey orders, whereas our people are reckless and careless and there is no reason to believe that there will be fewer accidents under Government operation than under private. It is impossible for me, in the time at my command, to go through all the statistics and comparisons between Government and private ownership operating side by side. But experience has undoubtedly shown in Canada, France, England, Austria-Hungary, Italy, Australia, and New Zealand that Government operation is less effective, less efficient, and more expensive and subject to all kinds of political interference. This is especially true in the countries where the railroad management is responsible to parliaments and congresses.

I should like to call the attention of the Senate to the report of Pierre Leroy Beaulieu, a French deputy, upon the experience of France in respect of Government operated railways and privately operated railways, and I ask that this article, commencing on page 21 and ending on page 25, be incorporated in the RECORD at the end of my remarks.

The PRESIDING OFFICER (Mr. HENDERSON in the chair). Without objection, permission is granted.

Mr. KELLOGG. I shall not stop to read it all, but I invite the attention of the Senate to a few sentences.

Mr. THOMAS. What is the date of it?

Mr. KELLOGG. This report was published in 1912. Quoting:

> A main argument used in Parliament in favor of transfer from the company to the State was that the company never did, and never could, earn its guaranteed dividend in full, still less the extra dividend which it would be entitled to if earned; that the company was accordingly a mere caretaker and not interested in financial results, and did not operate, and could not be expected to operate, with economy. The State, on the other hand, would have a direct interest in operating economically. That was the argument. Here are the facts: During the last 10 years of company management the State had to pay an average of $2,894,280 a year to meet its liability under the guarantee to make up the deficiency in net operating income.

In France all the private railroads receive a guaranteed income on their stock.

> During the first three years after the transfer, the sums it had to find under the same head were $6,753,320, $8,875,792, and $14,934,484, respectively. For the year 1913 the figure was $14,752,237.
>
> Nor do these deplorable financial results tell the whole story. The service to the public was absolutely demoralized. * * * In the first place it is the abuse of formalism and red tape, with all the delays which follow and which are directly in conflict with commercial needs. In the second place, it is the lack of stability. The director and all the chiefs of the service change at the will of the ministers, whilst in the private companies the higher personnel is maintained a long time, fulfilling the same functions. It is next the political influence which enters into the choice and advancement of the personnel. It is, lastly, the lack of discipline which also results from the political influence at work. From the electoral point of view, the lower staff, being much more numerous, will always have much more power than the superior staff.
>
> * * * * * * *
>
> From all points of view, the experience of State railways in France is unfavorable, as was foreseen by all those who had reflected upon the bad results given by the other industrial undertakings of the State, such as the telephone, matches, and many others. The State, above all, an elective administration, can not be a good commercial manager.

Mr. SHERMAN. Mr. President——

Mr. KELLOGG. I yield to the Senator from Illinois.

Mr. SHERMAN. Before the Senator lays aside the part referring to French railways, does the report or article from which he quoted show that the State-owned railways of France kill more of their passengers, compared with the mileage, than the privately owned roads?

Mr. KELLOGG. I do not know.

Mr. SHERMAN. I have a number of tabulations for several years that indicate that such was the case.

They not only kill more passengers but they kill more of their employees, although a lower per cent of them.

Mr. CUMMINS. Mr. President, I want the Senator from Minnesota to know that I am not going to draw him into an argument with regard to Government ownership, or participate in an argument on that subject; but I want to ask him if it is not

true with regard to the Western Railroad of France, which is the one he has just been speaking about, that under private ownership and operation the road had been permitted to fall into such decadence and dilapidation that when the Government of France took possession of it it was necessary almost to rebuild it and reequip it, and that these facts furnish the reason for the increased cost to the State for the few years after the Government took possession?

Mr. KELLOGG. No; the facts were the contrary. The road was in worse condition afterwards than it was before, and its operating expenses immediately increased. The Senator I think, will find that he is entirely mistaken about that proposition.

Mr. CUMMINS. The operating expenses did increase—I know that—but if the Senator will examine a document that was presented to the joint committee of the two Houses investigating the matter of railway legislation and control I think he will find that the extraordinary expenses for the few years after Government possession were due to what we call, in railway parlance, deferred maintenance; that is, private management had allowed the property to run down.

One other question, and then I will not ask further questions. The Senator stated that freight rates in the United States were lower than in any other country in the world except Japan. Will the Senator state what the rate upon a haul of 50 miles is in the United States as compared with the haul of the same commodity for 50 miles in Germany or in any other country?

Mr. KELLOGG. I can not give the exact rate, but I have compared the rates, together with the distance hauled, not only between this country and Germany, but between this country and Great Britain, France, Italy, and other countries. I have examined the statistics and the opinions of experts on this question, and so far as I have been able to discover they uniformly agree that, taking distances and all the conditions into account, the rates are very much lower in this country than in any other country, I believe, except Japan. There may be some minor exceptions.

Of course you have to take many things into consideration. In Great Britain the railroad rates cover the collection and delivery of shipments. That is one reason why Great Britain's freight rates are high; but when you disregard that feature all the experts, in my opinion, will agree that the freight rates in this country are lower than in any of the other leading countries in the world, excepting Japan.

Mr. CUMMINS. That is not my understanding of the facts, although I do not want to disparage our own railway system; but I venture to say that when reduced to a comparable basis—that is, when the length of haul is considered—our rates are as high as, if not higher than, those of any other country in the world.

Mr. KELLOGG. The Senator is entirely mistaken, and I will refer him to any number of experts who have examined and written upon the subject.

Over and over again has it been shown where railroads are nationalized operating expenses immediately advance, the number of employees is increased, and the efficiency is decreased. Political influence is exercised over construction, betterments, and extensions to meet the demands of the people, and, with the exception of Prussia and Japan, there is not a Government system in the world that pays its operating expenses and a fair rate of interest on the cost, and in many cases there are very large deficits. It is true that even the German States outside of Prussia do not make their railways pay, and the result in Austria has been exceedingly disappointing and disastrous. It may be asked, Why do so many European countries own their own railways? There are various reasons, some of them military, others because the Government had guaranteed the indebtedness and was compelled to take over the railroads or lose the investment, and, again, because the cost of construction was too great and income too uncertain for private enterprise. In Germany it was very largely military consideration. Bismarck was desirous of constructing and maintaining Prussian railroads in a system most advantageous for the handling of troops and Government materials in case of war, and vast sums have been spent to construct railway tracks for strategic military purposes. This is more or less true in other countries. In France some railroads were taken over, especially the western roads, because the Government had guaranteed the income and took the roads over to save its investment. This is true also in Italy, to a very great extent, and in some other countries. It may be well here to remark in passing that the Government guarantees dividends of from 7 to 13 per cent on all of the private railroads in France and reserves a division of profits over and above from 10 to 22 per cent. The following is a table which gives the information as of 1910, the last date available:

	Par value of stock (francs).	Rate of dividends guaranteed.	Revenue reserved to stockholders before division of profits.	Dividends paid.	Market price Nov. 25, 1910, per 100 francs.
		Per cent.	*Per cent.*	*Per cent.*	*Per cent.*
Nord	400	13.725	22.125	18.0	407
Est	500	7.10	10.10	7.1	175
Ouest	500	7.50	10	7.7	186
Orleans	500	11.20	14.40	11.8	266
P. L. M	500	11	13.50	11.2	244
Midi	500	10	12	10	225

But one of the most serious objections to Government ownership and operation is the political influence and pressure brought to bear. One of the difficulties with railroads of this country has been that in many instances they have been too valuable as a political asset. But this is nothing to what it will be if the Government takes over all the railroad properties, valued at more than $17,000,000,000, and makes Government employees of over 1,700,000 men.

One of the scandals of our Government occurs in connection with its appropriations for internal improvements, such as rivers and harbors, post-office buildings, drainage projects, and so forth, where Congressmen and Senators deem it perfectly legitimate to obtain any kind of an appropriation for the benefit of the people of their districts in utter disregard of whether it is necessary for the national welfare or not. If all railroads of the country were placed in the same category, improvements, extensions, and betterments to meet the demands of the people of the various communities would be obtained through political influence; the running of trains, freight and passenger, furnishing facilities, would be constantly subject to political pressure through Congressmen, Senators, and public men generally. It has already commenced and the people in this country are demanding that they have a right to have their Congressmen and Senators intercede with the Director General of Railroads in behalf of their particular section of the country. Their Senators and Representatives can not do otherwise than present these matters, and will not do otherwise.

I do not say that this is objectionable other than as to the system involved. The building of railroads to meet the great commercial conditions of a growing country ought not to be constantly the subject of political pressure.

But there is another serious objection. In turning the railroads over to Government operation the employees and officers will be divested of the incentive and enterprise essential to any great undertaking. To-day the highest positions with the railroads of the country are within the reach of the humblest boy in the service. I know most of the railroad presidents to-day controlling the destinies of this vast property, and they advanced from very humble positions, and the value of the organization of the railroad company is derived largely from motives of self-interest and individual enterprise which opportunity offers to every man in railroad employ.

Hope of preferment and opportunity are the guiding stars which have made this country foremost in the industrial and commercial fields of the world. Nationalizing the railways makes all of the men mere Government employees. There is no hope that they can reach the position of president of the railway and enjoy the power and influence which goes with that position. They are mere clerks. They lose interest and ambition. Men with capacity, ability, and authority to employ their own men could run the departments in Washington for very much less money and very much more efficiently. It is, of course, one of the things that go with a democracy. I do not wish to see it changed, except to see it bettered. I am not in favor of turning over the vast railways of this country merely to reduce men to the dependent influences of Government operation.

Mr. President, there is a rising tide of socialism to-day which threatens the foundations of representative democracy the world over. There are well-meaning men in its ranks. They believe that the millennium is coming and the Government can exercise the function of all private enterprise and all fields of human endeavor can be equalized.

Sir, it is an old, old dream, which the world has discarded again and again since the dawn of civilization. The best guaranty to the people of this country for their security of our institutions are those principles embodied in the Bill of Rights, which have been tried by the experience of ages and are firmly fixed in the Constitution of this land.

In times of stress and storm, when nations are struggling for their existence, when all the resources and forces of society must be marshaled for the supreme test, it is unwise, under the guise of necessity, to forsake the fundamental principles of government and of economics which lie at the foundation of all progress and organized society. Business and industry should flow, as far as possible, through its natural channels. Always remembering, however, that the lives and fortunes of the people are pledged for the liberty and welfare of the Nation.

APPENDIX A.

Mr. KRUTTSCHNITT. Well, this crosshauling, particularly of coal, was one of if not the controlling influence that has brought about this congestion on the eastern roads. There is absolutely no control of crosshaul. The War Board six or eight weeks ago—I think in the latter part of November—had a conference with the Fuel Administrator and called his attention to the waste of transportation by crosshauling of coal and recommended that he issue orders that would stop it, and he asked us if we would not work up a plan and submit it to him. We did so and submitted that plan, I think, early in December. It was very carefully worked up, after the fashion of the English plan, which you have no doubt seen, by which the routing of coal from one producing district to a consuming district is marked out; and the principle on which the maps were drawn was that any consuming district should get its coal, regardless of its wishes as to quality of coal, from the nearest coal-producing district. That, of course, cut off the crosshaul, but nothing has ever been done about it. We urged action on it, but no action has been taken.

Senator WATSON. You had no power to enforce action?

Mr. KRUTTSCHNITT. Oh, absolutely none.

The CHAIRMAN. To what extent did that prevail in other shipments? Have you mentioned coal as the principal one?

Mr. KRUTTSCHNITT. Well, coal was the principal one, because its tonnage is so great. No doubt the crosshaul existed as to other commodities, but the crosshauling was not as potent an influence in bringing about this congestion as the crosshauling of coal.

The CHAIRMAN. I thought perhaps you might have some figures to show or some data to give the committee in reference to munitions and supplies to be exported abroad.

Mr. KRUTTSCHNITT. I was going to come to that, but I will answer that question now, that the next most potent influence in bringing about this congestion was the indiscriminate use of a preference envelope by shipping agents of the War Department. At the beginning of the war, in conference with the Quartermaster Department of the United States Army, the railroads printed what they called a blue envelope, and freight on any waybill or bill of lading inclosed in the blue envelope, which was clearly marked "United States Government service," was given preference, it being understood by the Quartermaster Department of the Army that whenever that envelope was used there would be no question about the preference. If it was marked "Government service," it would be rushed. Now, the Army, because of the vast tonnage which it was shipping and the great number of officers charged with shipping freight, got to using those envelopes for a great deal of freight that did not require preference movement. In other words, it was used for everything that the Government bought and abuses crept in thus: We will say a manufacturer who was turning out 10,000 tons might have been turning out a thousand for the Government and 9,000 for the general public, yet he would get preference envelopes to use for the Government shipments and he would use these preference envelopes for his whole output.

Senator ROBINSON. That same system has prevailed in the shipments to a large number of cantonments throughout the country.

Mr. KRUTTSCHNITT. Of course the railroad was helpless. We can not go behind the blue envelope and investigate when the freight is tendered, covered by these bills of lading, asking, "Is this really Government freight? Is it vouched for by so and so?" You have got to trust the men to whom these preference envelopes are given, and if they will let them slip out so that Tom, Dick, and Harry can use them, the result is just what you have seen. One of the trunk lines estimated that 85 per cent of the total tonnage they were handling, including coal, was covered by these blue envelopes. You can imagine the state of mind of a yardmaster at a terminal, say, like Pittsburgh, when he was confronted with the freight covered by all of these blue envelopes and covered by other orders giving priority of transportation to different commodities, he would be a fit subject for an insane asylum; he would not know how to get around his work.

Senator ROBINSON. Everything that came in had a priority?

Mr. KRUTTSCHNITT. Pretty much everything; and it resulted in this, that if everything had preference, nothing had preference; it simply congested the roads.

Now, those two influences were the principal ones that have brought about the congestion on the roads east of Chicago and north of the Ohio and Potomac Rivers.

* * * * * * * *

Senator KELLOGG. On that question of priority orders, prior to the act of August 10, 1917, the interstate-commerce law provided "that in time of war or threatened war preference and precedent shall, upon the demand of the President of the United States, be given over all other traffic for the transportation of materials of war, and carriers shall adopt every means within their control to facilitate and expedite the military traffic; and in times of peace shipments consigned to agents of the United States for its use shall be delivered by the carriers as promptly as possible and without regard to any embargo that may have been declared, and no such embargo shall apply to shipments so consigned."

That was the law in existence as to the shipment of materials of war. Now, on August 10, 1917, the Congress passed a bill providing "that during the continuance of the war in which the United States is now engaged the President is authorized, if he finds it necessary for the national defense and security, to direct that such traffic or such shipment of commodities as in his judgment may be essential to the national defense and security shall have preference or priority in transportation by any common carrier, by railroad, water, or otherwise."

I am sure it was the intention of Congress to place in one hand the power to direct preference or priority of shipments, but, as I understand you, notwithstanding that the War Department and the Navy Department, the Food Administration and the Coal Administration gave indiscriminate preference orders.

Mr. KRUTTSCHNITT. The understanding of the War Board, Senator, was substantially your own; that is to say, we supposed that when that priority act was passed that the man charged by the President with administering his duties under the authority of the act would determine priority for everything. Prior to that we had been acting under the clause you read from the interstate-commerce act; that is, we simply took it for granted that officers of the War Department and the Navy Department, all of whom were under the President as Commander in Chief, were under his orders, and anything that those departments wanted shipped we ought to give preference to, according to that law, and even after the passage of that priority bill we continued doing that.

Now, when this flood of preference envelopes threatened to swamp us we had a meeting with Mr. Lovett, who was priority commissioner, and we told him of our troubles with the departments, particularly the War Department, because there were more men shipping and more goods shipped, and they were using these preference envelopes in such numbers that they were getting beyond our control. We asked him if he would not take charge and straighten that matter out, and he said that he did not understand that it came under him. We had quite an argument about it. We wanted him to help us to that extent, and he said he could not; that it did not come within his purview, and also, if I understood him correctly, that his duty was simply to establish priority of movements as between different commodities, and he could not undertake to say that some things should be shipped and some should not. However, he was so impressed with our difficulties that he said he would take the matter up with the Secretary of War, and he told us a few days after that that the Secretary of War recognized the difficulties under which we were laboring and would have the matter straightened out, but nothing was ever done until Mr. McAdoo took charge. When we explained the troubles with these preference orders he at once appointed Mr. Chambers to coordinate all shipping facilities of the Government, and Mr. Chambers is now performing those duties.

APPENDIX B.

EXPERIENCE OF STATE OPERATION IN FRANCE.

Here in broad outline is the story of the result of the transfer. In the five years, 1904–1908, before the transfer the gross receipts rose steadily from $37,084,000 to $42,145,000. In the five subsequent years, 1909–1913 (the war upset entirely the figures for 1914), the gross receipts rose from $42,333,000 to $48,701,000, a slightly greater rate of increase. In the five years before the transfer, the operating expenses rose from $20,796,000 to $28,388,000, this last figure being unduly inflated by the fact that, from the date the Chamber voted the acquisition of the railway, the staff became entirely demoralized. The first year after the acquisition the operating expenses were $30,304,000. The next year they were $34,921,000, and the year after, $39,454,000. In 1912 they had reached $41,800,000, and for 1913 they fell back to $41,478,000. In other words, to earn a net revenue increased by 31 per cent, the operating expenses increased by 100 per cent. The net revenue was never below $13,757,000 in the worst year of company rule. It fell to $5,352,000 after the Government had been in possession four years. The operating ratio, which had risen from 56.4 to 67.8 under the company, was for the next five years as follows: 72.7, 79.9, 87, 89.4, and 85.2. It is fair here to make a qualification. The operating ratio had gone up on all the French railways between the two periods. It averaged 50.3 for the other five great companies for the years 1905 and 1906, and 58.4 for the two years, 1912 and 1913. But a rise from 50.3 to 58.4 is one thing; a rise from 56.4 to 89.4 is quite another.

A main argument used in Parliament in favor of transfer from the company to the State was that the company never did, and never could, earn its guaranteed dividend in full, still less the extra dividend which it would be entitled to if earned; that the company was accordingly a mere caretaker and not interested in financial results, and did not operate, and could not be expected to operate, with economy. The State on the other hand would have a direct interest in operating economically. That was the argument. Here are the facts. During the last 10 years of company management the State had to pay an average of $2,894,280 a year to meet its liability under the guarantee to make up the deficiency in net operating income. During the first three years after the transfer, the sums it had to find under the same head were $6,753,320, $8,875,792, and $14,934,484, respectively. For the year 1913 the figure was $14,752,237.

Nor do these deplorable financial results tell the whole story. The service to the public was absolutely demoralized. There were several very serious and numerous smaller accidents, and the staff and the public got so frightened that the express trains on the main line, already the slowest in France, were decelerated down to a timing that had been abandoned as inadequate in 1896. In addition, a number of trains were suppressed altogether. Punctuality went to the winds. Commuters on the system in the suburbs of Paris were compelled by their employers to live elsewhere because of the unpunctuality of their arrival at their work. As for the service in general, one figure will suffice. Compensation for accidents, loss and damage, averaged some $400,000 or $500,000 a year in the last days of the company. In 1911 the figure was $2,045,291. The minister of public works himself publicly criticized the State administration as a "frightful fraud." And the Senate passed unanimously a resolution beginning, "The deplorable situation of the State system, the insecurity and irregularity of its workings."

M. Leroy-Beaulieu gives the reasons for the "deplorable situation" as follows: "In the first place, it is the abuse of formalism and red tape, with all the delays which follow and which are directly in conflict with commercial needs. In the second place, it is the lack of stability. The director and all the chiefs of the service change at the will of the ministers, whilst in the private companies the higher personnel is maintained a long time, fulfilling the same functions. It is, next, the political influence which enters into the choice and advancement of the personnel. It is, lastly, the lack of discipline which also results from the political influence at work. From the electoral point of view, the lower staff, being much more numerous, will always have much more power than the superior staff. It is always on the side of the former that many deputies will be systematically ranged. Above all, it is impossible to be at once controller and controlled. If one of the great French companies under private management renders poor service, the public opinion is not slow to move the public power, and as this has the means to bring pressure indirectly but in many ways upon the companies, they are led to reform. On the contrary, when complaints are made against the State itself, the administration, irresponsible, does not listen. Rather, it seems indignant that particular individuals or even large associations should dare to find that all is not perfect. 'I have not

seen without a certain astonishment,' said the minister of public works in the Chamber, 'the chambers of commerce criticize the actions of the State in its (their) reports upon the railways.' The same minister has dismissed an employee from his office who was at the head of a section of a passenger line which emitted protestations against the delays on the western state service in the Paris suburbs. When the minister was reproached in the Senate, he declared himself ready to do the same again. One may see how dangerous to the liberty of citizens the extension of the industrial régime of the State would be where the number of functionaries would be indefinitely multiplied and where they would no longer have the right to complain.

"From all points of view, the experience of State railways in France is unfavorable, as was foreseen by all those who had reflected upon the bad results given by the other industrial undertakings of the State, such as the telephones, matches, and many others. The State, above all an elective administration, can not be a good commercial manager. It works expensively, and is powerless before its employees. The experience which we have recently gained has had at least one result. It has provoked a very lively movement, not only against the repurchase of the railways, but against all extension of State industry. This result seems to me fortunate. I hope this opinion will be maintained, and that not only we but our neighbors may profit by the lesson of these facts."

M. Leroy-Beaulieu gives examples of what has happened under the various heads. "As for formalism and red tape," on the eve of the handing over of the railway to the State, there were 1,526 employees in the central office. Within three years the number had increased to 2,587. "The single service of the accountant general was increased by 70 persons directly after the repurchase." And this was due partly to political pressure and partly to excessive red tape. For example, in the Caen division, the preparation of the pay sheets, which under the company took 9 persons 3 days, or 27 days, under the State administration took 12 persons 6 days, or 72 days. "According to official documents, there are not less than 96 persons receiving a salary of more than $1,929.52 in the State system" as against 33 on the system of a neighboring company of much the same mileage but with much higher receipts. In the five years from 1908 to 1912, the total expenditure increased $10,573,770, of which $8,412,707 were for salaries and wages. In 1908, out of every $19.30 of receipts the company paid $7.24 in salaries and wages. In 1912 this figure was $9.70. The comparative figure for the five great companies is only $5.70. In 1910 per $192,952 of receipts the State railways employed 235 persons, the private companies 174.

Again, as the result of the great strike of October, 1910, the Chamber of Deputies voted a large all-round increase in the wages of the staff. Naturally, the staff thought there were shorter cuts to increases of wages than hard work. As a sample of want of ordinary business management on the financial side, the budget commission of the Chamber reported that it could not draw up a proper estimate for 1912 from lack of the necessary accounts. "The statements addressed to the budget commission by the administration were manifestly inaccurate. * * * The great part of the statements of receipts and expenditures were found to lack any sufficient justification. Thus as regards the expenditure upon personnel, the tables accompanying the statement only stated the numbers of workmen and staff and the amount of their salaries in round figures. * * * We wrote for further statements, more particularly the numbers of the personnel. * * * The minister replied (three years after the railway had been taken over) that the enumeration of employees had not yet been made. * * * This example suffices to show the trust that may be placed in the other parts of the budget estimate." This is not the opinion of an outside and unfavorable critic. It is the report of a committee of the Chamber of the same political complexion as its predecessor which voted for the purchase, based upon a draft drawn up by a deputy well known as an advocate of State ownership.

One story given by M. Leroy-Beaulieu is so striking as a sample of the highest quality of red tape that it deserves to be given at length. It is from a letter of a station master read in the Chamber of Deputies: "In the time of the western company, we station masters had orders to use the rolling stock as quickly as possible, and to send to a given station all that we did not ourselves require. Under the State all is changed. Every station master is forbidden to load any wagon without the orders of the distribution bureau of the district. This bureau is, as is well known, a new creation specially designed for the purpose of finding situations for so many more bureaucrats. Recently, having received two wagons loaded with horses, accompanied by an order to send these wagons to Caen after they were unloaded, I thought to do well by loading in these two wagons 200 sacks of grain which had been waiting in the sheds for several days to go to Caen. But alas, I did not know the bureaus of distribution. The next day I saw my two wagons return, and I received at the same time an order to unload them. I was reproved into the bargain for excess of zeal. I had to obey the order. That evening I sent the wagons empty to Caen. Next day I received two others, also empty, in which to load the grain."

Mr. McLEAN. Mr. President, the issue raised by the minority report offered by the Senator from Washington [Mr. POINDEXTER] is one of overshadowing importance, and it is an issue that will be paramount at the ballot box in the near future. As a member of the Committee on Interstate Commerce I feel it to be my duty to let my constituents know precisely where I stand upon the question of Government operation of the railroads of the country.

The only possible justification for the bill reported by the committee is the fact that it is a war measure. We are facing the probable necessity of sending millions of men to France, there to contend against the largest and most brutal and best-equipped army in history. We know that unless the fighting strength of our Army and the armies of our allies is sustained to the highest possible point of efficiency the result may be disaster in which the history of self-government will be written in failure and disgrace.

Regular and sufficient transportation is the great and prime necessity in the business of waging war, a necessity which can not be met without unity of action and perfect cooperation, and this, in turn, can not be had unless the power to secure it is placed beyond interference by private interests. As a war measure, therefore, I am willing to confer upon the President all the power and latitude of action necessary to enable him to make fair and reasonable agreements with the carriers for the use of their properties during the war emergency and for a period thereafter long enough to permit the carriers to readjust themselves to peace conditions.

To extend the operation of this act until Congress shall "otherwise order" would be to give to this law all the permanency and length of life that it is possible for Congress to give to any law, and considering the ease with which attempts to repeal this law could be delayed and ultimately defeated, I can not escape the conclusion that those who vote against fixing a time within which this act shall cease to operate vote for the permanent Government ownership of the railway systems of the country. Certainly those who favor Government ownership would have every advantage, and beginning from the day of the enactment of this law they would endeavor to convince the people of the country that Government regulation had failed and that the only possible solution of the problem must be found in Government ownership.

It is possible that the New York & New Haven Road and other roads in New England will prefer a permanent Government guaranty of their fixed charges and maintenance to a return to the old system of regulation by Congress and the Interstate Commerce Commission, but as far as the stockholders and the public are concerned they will be the losers in the long run, in my opinion. New England must import her raw materials from great distances, and the cost of transportation is a serious burden. Private initiative and ingenuity will reduce this cost, if it is given a breathing chance, much faster than will be possible if the roads are managed by Government employees selected because of their value to party managers on election day. It is my guess that a large percentage of the carriers of the country, smarting under the injustices inflicted by the system in vogue prior to the 28th of December, 1917, will join forces with the Government-ownership advocates of every name and nature, including Socialists and Bolsheviki, and those of us who disagree with them and want cheap, regular, and safe transportation would best begin to drill for the coming onslaught.

There is no economic distinction in the public service rendered by a common carrier and the public service rendered by the producer of other things which are necessary to meet public needs.

The producers of transportation render a great public service, but not as great as the producers of food or clothing. Justification for Government interference with the seller of transportation arises only when he secures a monopoly of his product and is in a position to exact extortionate prices, and precisely that same situation will arise whenever the producers of food and clothing and shelter find it possible to create a monopoly in their products. The fact that the railroad must first secure a charter, charged with certain duties to the public, and the further fact that this charter may be revoked or altered at any time has no significance.

The railroad is a prime necessity to the people. The Government, in order to meet this necessity, has given to the railroad companies the right to take land and construct its lines, demanding in return nondiscriminating rates and accommodations.

There are instances of large public grants to railroads, and there are instances of large public grants to other private enterprises. Millions of acres have been practically given away, and properly so, to the farmers who have settled the great West. In the East the railroads have had to pay two prices for the land they have purchased. The claim that railroad property, though private, is charged with obligations to the public from which other private enterprises are free is untenable, and it is just this fallacy that will bring consternation to those who later on may desire to stop before they cross the dead line of socialism.

All private property is charged with its obligations to the public, and those obligations are measured by the economic necessities of the body politic, whether they be imposed by taxes or by restrictive and punitive statutes.

In the present emergency the Government has not yet taken possession of the farms and mines, but it has fixed the prices of coal and wheat and steel; and let me remark in passing that this price fixing will end in lamentable failure unless it be liberal enough to insure constantly increasing production. You can not compel men to do business at a loss.

The war necessity may demand many sacrifices in life and property, but when you destroy the sources of income you insure the loss of the war.

England and France early saw the need of increasing production, and they did it in the one sure way. They made prices a secondary matter. England raised passenger rates 50 per

cent on the outbreak of the war, and she also realized that enough wheat at $3 a bushel would be much cheaper than no wheat at $2 a bushel. I do not care how patriotic the producers are, they can not produce at a loss for any length of time. If wages are high, the products of labor will be high. As we are all consumers and nearly all of us are producers, high prices can be endured if they are relative. If the Government fixes the price of a product so low that it will hazard the margin of profit, it will very soon be compelled to lower the price of the labor which goes into that product or the industry will collapse, and it has been the failure of Congress and the Interstate Commerce Commission to understand this elemental principle that has caused the alleged breaking down of the railroads.

President Hadley, of Yale, acting as chairman of the Railroad Securities Commission, added to his reputation as a prophet, honored both at home and abroad, in his report published in December, 1911. Let me quote one or two of his conclusions as to what would happen if the railroads were denied reasonable compensation for the service rendered:

> A reasonable return is one which, under honest accounting and responsible management, will attract the amount of investors' money needed for the development of our railroad facilities. If rates are going to be reduced whenever dividends exceed current rates of interest, investors will seek other fields where the hazard is less or the opportunity greater.
>
> Neither the rate of return actually received on the par value of American railroad bonds and stock to-day nor the security which can be offered for additional railroad investments in the future will make it easy to raise the needed amount of capital. The rates of interest and dividends to outstanding bonds and stocks of American railroads is not quite 4½ per cent in each case.
>
> The necessary development of railroad facilities is now endangered by the reluctance of investors to purchase new issues of railroad securities in the amounts required. This reluctance is likely to continue until the American public understands the essential community of interest between shipper and investor and the folly of attempting to protect the one by taking away the rewards of good management from the other.

We must not forget that the record of the railroads prior to their regulation by Congress and the States is a remarkable one. For years the building of railroads furnished a field of speculative adventure unequaled in history. For years the railroad was considered the chief material need of growing America. Railroad building became almost a mania. Great financial risks were taken. Millions were lost as well as made. It has been stated that the total investment in railroads has returned a dividend of less than 2½ per cent. With the completion of the Union Pacific and the great trunk lines of the East came the consolidation era. As the possibilities and the advantages of combination and cooperation in transportation became apparent extravagant prices were paid for the stock of competing and contributing lines. In the East trolley lines and terminals and hotels were bought and built at extravagant cost. Ambitious managers lost their heads in their eagerness to secure vertical and horizontal monopolies of everything that promised a profit. Discrimination in rates was the order of the day. To get a low rate one must "play poker with the local manager and let him win."

Naturally, the public did not take to this idea. The tide of popular sentiment turned against the carriers. The States created commissions whose sole duty it was to watch and regulate transportation by rail. The free passes that had been proudly exhibited by molders of public opinion as a mark of distinction were either returned or kept in an inside pocket. State legislators that had been the tools of the carriers found safety in a complete change of front. Finally, Congress took a hand and in due time the other extreme was reached. Rates were fixed and rate pooling was prohibited. Competition was made mandatory and combinations forbidden. The Interstate Commerce Commission has repeatedly recommended a repeal of the antipooling law, but Congress has never had the courage to do it. The Interstate Commerce Commission has conceded the justice of higher rates, which it has not had the courage to grant.

Putting aside for a moment the wicked things that managers of the railroads have done in the past, or would have done but for the interposition of the Government, what has the capital that has been put into the railroads done for the country, and what do the railroads themselves stand for to-day as a national asset? The 400,000 miles of track in the United States have been put down for less than half the average cost per mile in other countries. Transportation in the United States costs less than half the average cost in other countries. The wages paid are more than double the average wage in other countries. The average tonnage per car and the total tonnage per mile is greatly in excess of that in other countries. The regularity, safety, and comfort of the service provided by the American roads is far better than that of the roads in other countries. For every dollar that the railronds have taken from the public more than a dollar has been returned. Is it not time to quit visiting upon the railroads the sins of the nineteenth century and do to them as we would be done by?

If we want to get a fairly definite idea of the value of the railroads to the American people, suppose we try to imagine what would be the effect of their removal.

Our total wealth is estimated at $240,000,000,000. Of that total, the railroad investment is said to be about $20,000,000,000, or about 9 per cent. Is there anyone bold enough to believe that the United States would be worth half what it is to-day if the railroads were removed? Moreover, the railroads are owned by somebody. There are 43,000 women who own stock in the New Haven Road alone. Thirty-three per cent of the assets of the savings banks in Connecticut are invested in railroad bonds and stocks, and probably more than 10 per cent of the assets of the insurance companies.

There are more than a million men and women who own stock in the railroads of the country, and the railroads employ directly nearly 2,000,000 men and women. Assuming that the stockholders and employees are heads of families, we have at least 15,000,000 of people directly interested in the prosperity of the railroads, to say nothing about the 13,000,000 of people who have deposits in our savings banks, and the 40,000,000 life insurance policies in the country, in the safety and security of which railroad stocks and bonds are a very important item.

Why should the transportation companies be denied fair treatment under honest management? The average dividend paid by the railroads in the last 20 years is less than half the average dividend paid by the other great enterprises of the country, including banking institutions, manufacturing concerns, and mines.

In 1909 the average net return from railroad operations was 4.07 per cent, and the net income from manufacturing industries was 13.06 per cent.

Railway supplies and equipment—new cars, engines, and nearly everything that is required to sustain the roads and meet the increased demands upon their carrying capacity—costs nearly three times to-day what it did three years ago. Congress and the Interstate Commerce Commission have stubbornly refused to authorize or permit the railroads to charge self-sustaining rates, or to unify and consolidate control in the interests of economy. No business on earth could survive such treatment. The farmer who, for want of hay, put green goggles on his horse and fed him shavings was a magician in the solution of transportation problems compared with the American Congress.

And, after all, has it been the fault of Congress or the fault of a distorted public opinion which has sustained Congress in its efforts to teach the railroads to live without eating? If the American people will demand an intelligent regulation of railway rates when peace is restored, the carriers will meet every need at constantly decreasing comparative cost.

Why should the Government assume this colossal burden, a burden that will constantly increase in weight and finally result in constantly increasing cost of transportation?

Combination is an economic necessity, but we must remember that the success of all combination requires the fiercest internal competition.

The necessities of the war require the gathering together of millions of men in one great unit, but that unit would be a dead and contemptible thing if the individuals which compose it did not constantly seek to rival and excel each other in deeds of valor and loyalty. The units of the great Steel Corporation must constantly vie with each other in their efforts to reduce cost of production. Combination and competition are inseparable to the economic growth of any business. Competition within industrial units and the combination of those units will be mandatory if we are to successfully stand against the competition that will be forced upon us by the combinations of other countries, and the cost of transportation may be the controlling factor in that great struggle. Cheaper and yet cheaper transportation may be the only weapon that will win for America the commercial wars that are bound to come in years of peace. The clear outstanding fact that American roads, with all their handicaps, have reduced the cost of transportation to the American people to less than half that imposed in those countries where the carriers are owned or managed by public officials is a fact that can not be wisely disregarded.

The American railroad, belonging to class 1—that is, roads that handle a gross revenue of $1,000,000 or more, as classified by the Interstate Commerce Commission—carried in the year 1917, 409,000,000,000 ton-miles of freight, which is an increase of 135,000,000,000 tons over the year 1915, and this increase in itself was as great as the entire freight traffic handled by the railroads of Canada, Germany, Great Britain, Russia,

France, and Austria in 1917, and these countries have a population more than three times that of the United States.

In the first six months after the beginning of the war the American roads carried more freight than they did in the entire year 1906. A freight-train load in 1906 was 344 tons, and in 1917, 655 tons. Notwithstanding this astounding increase in tonnage, the rates were such as to prohibit an increase in net revenues.

Yet the roads did not neglect their duty to the public. From 1906 to 1916 the roads ordered an average of 2,846 locomotives per year and an average of 147,000 cars.

In the year 1917 the average gross earnings per ton-mile in the United Kingdom was 2¼ cents. Using this as a basis figure of 100 for comparative purposes, in Germany it was 1.37 cents; in France, 1.3 cents; Switzerland, 2.5 cents; and in the United States it was 0.71 cent, or 31 per cent of the British rate.

One of the reasons why the American roads have been able to live, notwithstanding the low rate at which they have been compelled to serve the public, is due to the fact that the roads are capitalized at much less per mile than the roads of other countries. The average per mile capitalization in the United Kingdom is $274,222; Germany, $120,874; France, $150,322; Switzerland, $133,255; United States, $66,447.

The minority report submitted by Senator POINDEXTER cites the New Haven road as a shining example of the folly of attempting Federal regulation under private ownership. It does not follow that because a good and much-needed bank is badly managed for a time that all the banks should be owned and run by the Government. The way the New Haven road has served the public, in spite of its misfortunes, is little short of miraculous, and the Senator who says that the present coal shortage in New England is the fault of the New England railroads is badly misinformed. The New York, New Haven & Hartford, the Boston & Albany, and the Boston & Maine roads, the three roads serving New England, transported 2,817,000 tons more of anthracite and bituminous coal into New England in 1917 than they did in 1916. The scarcity of coal and its grave consequences is largely due to the fact that the Government impressed the tugs which had customarily towed coal barges plying between New York, Philadelphia, Baltimore, and Hampton Roads to New England ports.

The wonder is that in view of the startling increase in labor cost and cost of equipment the great trunk lines of the country are not all in the hands of receivers.

Ties have increased in price 225 per cent since 1897; steel rails, 213 per cent; bar iron, 301 per cent; car brasses, 261 per cent; bridge timbers and stringers, 157 per cent. Freight cars that cost a thousand and eleven hundred dollars each in August, 1914, have doubled in price. Freight engines that cost from $28,000 to $32,000 each prior to August 1, 1914, now cost from $60,000 to $65,000, and this notwithstanding the Government has greatly reduced the price of steel.

The average freight rates per ton-mile, which in 1897 was 1.126 cents, was, in 1910, 0.977 cent.

The Government seems to have traveled upon the theory that the way for the railroads to survive the strain is to keep on increasing the total of an unprofitable business. If the shippers of the country had paid in 1910 the same average rate that was paid in 1870, they would have paid $3,000,000,000 more than they were compelled to pay.

Compensation for passenger service is still less satisfactory. Mr. Elliott, in his book on The Truth About Railroads, states that the passenger trains of the United States earned, on an average, for the year ending June 30, 1908, $1.27 per train-mile, while the average cost per train-mile, not allowing for taxes, was $1.47. A very large percentage of the passenger trains on the New Haven road are run at a loss.

In 1901 the Government received $100 for every $34.18 it paid the New Haven road for transporting the mails, and by 1911 the Government reduced this sum to $21.26.

I desire now to quote from the report of the Interstate Commerce Commission the following statement of the cause of the breakdown of the Boston & Maine:

> The financial strength of the Boston & Maine, which has been made manifest for more than half a century, was converted into a financial weakness in half a decade after passing into the control of men who had the reputation of being eminent financiers.
>
> There is reason for belief that this railroad in the hands of its former management wou'd have continued to pay dividends and serve its constituency of passengers and shippers with reasonable rates and adequate facilities.

It is hard to account for such unfair and wholly unfounded statements. Every informed person knows that for many years before it was taken over by the New Haven the Boston & Maine paid dividends that were not earned. The New Haven road put tens of millions of dollars into the Boston & Maine, and so saved it from bankruptcy, and enabled it to serve the public much better than before it took possession. The stockholders have suffered the losses due to mismanagement, and they should have the sympathy of every fair-minded man. But the railroads have struggled on with marvelous courage and skill, and under decent treatment would soon rehabilitate themselves financially.

We are risking all now to make the world safe for democracy. Yet history tells us that there is no tyranny so hard to bear as the tyranny of the majority when it ceases to act intelligently. The torch of democracy can scorch as well as illumine. It can light the way with equal certainty to slavery or liberty. Majorities of men, like individuals, are prone to take the easier, if not the easiest, way. To avoid the agonies consequent upon a serious injury the young man takes his first morphine tablet. The doctor orders it and the result is miraculous. As the young man slowly recovers he finds it easier to continue to take morphine than to stop, and in a few years the very thing that saved his life kills him. Shall we, in this hour of great suffering and in order to relieve that suffering, encourage the formation of a habit that will destroy us later on? We have already contracted a habit that will lead to disaster if we are not very careful, and that is the taxing habit. Income and inheritance taxes constitute a double-barreled gun with which Congress can compel the rich and poor to stand and deliver into the Public Treasury every dollar they possess. If this habit is indulged in to an extent that will discourage the accumulation of wealth, if the taxing power results in reducing production, there will soon be nothing to tax, but if it consistently leaves to the individual a margin of gain sufficient to enable him to continue his business at a profit to himself—a possible reward large enough to stimulate him to risk his capital and his health in new and renewed endeavors to make three blades of grass grow where but one grew before, then the American people will be able to meet the colossal obligations incurred by the war and to insure an ever-increasing share to be expended for the benefit of the public.

But to return to the railroads. Why should we expect results very different from those which have inevitably inflicted Government ownership in other countries? In the Utopia of Government-owned railroads policies will be dictated by politicians. Employment will depend upon the favor of the Director General and his subordinates. Qualifications for service will depend on ability to get votes rather than ability to avoid accidents or secure regular and sufficient transportation. New lines of road will be paid for out of the annual congressional pork barrel. Rolling stock will soon compare favorably with the sorry rigs which the rural free-delivery carriers use to deliver mails. An utter lack of incentive and initiative will exist in every department. Incompetency and "red tape" and a rapidly increasing number of employees will inevitably result. The people will not only be taxed to pay the interest on the original cost of $20,000,000,000 but the annual deficits will constantly increase. In Italy, where the chief railways were nationalized in 1905, the number of employees increased within three years from 97,000 to 137,000, and the systems do not earn enough to pay one-quarter of the interest on the investment in them.

Canada has been in the railroad business since 1867. It has owned the Prince Edward Island road since 1873, and it has never earned operating expenses. The Intercolonial road cost the Government $237,000 a mile.

A committee appointed to investigate the construction of the National Transcontinental Railway, extending from Quebec to Winnipeg, 1,334 miles, reported that $40,000,000 had already been wasted and that the original estimate of $61,000,000 for the total cost would fall $170,000,000 short of the actual cost.

Mr. James Bryce, whose insight into such matters is unsurpassed by any living man, entertains the following opinion of the wisdom of putting the enormous railway systems of this country into the hands of the Government. He says:

> The railroads can hardly be taken over and worked by the National Government as are the railways of Switzerland and many roads of Germany and Austria-Hungary. Only the most sanguine State Socialist would propose to impose so terrible a strain on the virtue of American politicians, not to speak of the effect upon the constitutional balance between the States and the Federal authority.

As I intimated at the opening of my remarks, it is quite probable that the managers of the great transportation lines, circumscribed and crippled as their organizations will be at the close of the war, will beg the Government to buy their roads and end their sufferings. I put this question to the president of one of the leading roads of the country, and his reply was: "As an American citizen I am very certain that a time limit should be fixed, but as a railway manager I would welcome permanent Government possession and operation with a fair guaranty on the investment." I am already receiving postal cards from rail-

way stockholders, all printed and exactly alike in terms, urging me to oppose a time limit on the operation of the carriers by the Government.

Again, it is even urged by those supporting the minority report that competing lines which do not pay should be helped out by those which do pay. The self-sustaining roads and the capital which went into them are to be compelled to stand and deliver to the roads that were built for the express purpose of compelling a prosperous competitor to buy them out. The advocates of this plan insist that the nonpaying roads are just as necessary to those who use them as are the self-sustaining roads to their patrons. Their idea seems to be that farmer A, who has a farm 100 or 1,000 miles from farmer B, or mechanic A, who lives 100 or 1,000 miles from mechanic B, should contribute toward the payment of B's railroad fare.

There are many instances where competing lines may combine advantageously, as was frequently done until the Government forbade it, but to compel the stockholders of a legitimate industry, first in the field, organized and constructed to meet a legitimate demand, to support a rival industry subsequently organized that can not get legitimate business enough to support itself, is to inaugurate a variety of statecraft approved by highwaymen only.

If the Government should confiscate and pay just compensation for all the roads, and own them as well as operate them, the upkeep and support of the weak roads would still fall heavily upon sections of the country which have no use for them whatever. We might satisfy the Constitution in this way, but the injustice would remain as declarative as ever.

It is claimed that, because the system in vogue prior to the 28th of December last was a failure, Government ownership is the only alternative. If it is true that the system which failed was clearly unintelligent and unjust, it would seem to be clear that an intelligent regulation of the railroads of the country, under private control, should be given a trial before we adopt a system which both experience and reason tell us will result in unsafe, irregular, insufficient service, to say nothing of the opportunities for political chicane and graft.

The present plan of Government possession under private management is a half-slave, half-free policy that can be justified only at a time when the life of the Nation itself is at stake. It has all the defects of Government ownership and none of the benefits of private management under private ownership.

It may be necessary to submit to this in order to win the war, and I shall vote for the bill as reported by the committee, but it will be neither justifiable nor necessary at the close of the war.

We are already experiencing some of the blessings of Government management of the means of transportation and production. As time goes on other delights will probably follow. If the samples which have been supplied by the heads of the executive departments are fairly representative of the remaining stock in trade, those of us who will need food and fuel to sustain life would best start for the banana belt early next fall.

I have tried to set forth some of the reasons which compel me to oppose Government possession and control of the railways "until Congress shall otherwise order." I hope the Senate will insist upon fixing a time limit. I hope the American people will give this subject the attention it deserves before it becomes a national issue at the polls.

Mr. TOWNSEND. Mr. President, I propose an amendment to the bill and ask that it be printed. I shall offer it later, not particularly with the idea of securing its adoption as a substitute for the bill, but because the measure was prepared outside of the Committee on Interstate Commerce; it contains several prominent features to which the committee gave particular attention, and after having read and reread it I am satisfied, as every Senator will be satisfied who reads it, that it does not convey in the best manner possible even the ideas which we have attempted to adopt. For the purpose of calling attention to that fact I offer an amendment which I shall propose later on.

The PRESIDING OFFICER (Mr. HENDERSON in the chair). The amendment will lie on the table and be printed.

Mr. SMITH of South Carolina. Mr. President, there being no other Senator who can go on this afternoon, as the chairman of the Committee on Agriculture and Forestry desires to run over some of the amendments in the Agricultural appropriation bill that will not be objected to, I ask unanimous consent that the pending bill be temporarily laid aside for that purpose.

Mr. SMOOT. Do I understand that the Senator from Oklahoma desires to have action taken on the amendments to the Agricultural appropriation bill?

Mr. GORE. I wish to take up the Agricultural appropriation bill and merely dispose of the unobjected amendments. Of course, if any amendment is objected to by any Senator it will be passed over.

Mr. SMOOT. We shall have to have a quorum here, because otherwise we could not know what amendments would be objected to. It seems to me that it is so late in the day now that the Senator had better call up the bill at some other time.

Mr. GORE. I think there are about as many Senators present as we generally have for the consideration of appropriation bills. I will say that if any amendment is agreed to and any Senator not present desires to have it considered open later, of course there will be no objection to going back to it.

Mr. SMOOT. If the Senator desires to have the bill taken up and read without action upon any amendments, I have no objection to that course.

Mr. GORE. I shall ask to have the formal reading of the bill dispensed with, of course.

Mr. SMOOT. I do not think there will be any objection to that; but it seems to me it would be quite unfair to Senators who have not had any intimation that the bill was to be taken up to-day to take it up at this hour and act upon the amendments.

Mr. GORE. I will say to the Senator that there are very few amendments which will arouse any opposition whatever, and there is no reason why we should not spend an hour or an hour and a half to-day in considering unobjected amendments. Of course, if the Senator desires to have a quorum present, that recourse is open to any Senator who chooses to make the suggestion.

Mr. SMITH of South Carolina. I request unanimous consent that the pending bill, the unfinished business, be temporarily laid aside.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the unfinished business is temporarily laid aside.

AGRICULTURAL APPROPRIATIONS.

Mr. GORE. I ask unanimous consent that the Senate proceed to the consideration of House bill 9054, the Agricultural appropriation bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 9054) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1919, which had been reported from the Committee on Agriculture and Forestry with amendments.

Mr. GORE. I ask that the formal reading of the bill be dispensed with.

The PRESIDING OFFICER. The Senator from Oklahoma asks unanimous consent that the formal reading of the bill be dispensed with. Does he desire to have the bill read for amendment?

Mr. GORE. Mr. President, has the request that the formal reading of the bill be dispensed with been acceded to?

The PRESIDING OFFICER. It has not been. Is there objection to dispensing with the formal reading of the bill? The Chair hears none, and it is so ordered.

Mr. GORE. That request being acceded to, I now ask that the consideration of the bill be proceeded with, and that unobjected amendments of the committee be first considered.

The PRESIDING OFFICER. Is there objection?

Mr. SMOOT. Mr. President, I do not know what amendments are objected to, I will say to the Senator from Oklahoma. Does the Senator now ask that the bill be read for committee amendments?

Mr. GORE. I have asked, and I understand the request was acceded to, that the formal reading of the bill be dispensed with—I mean the reading of the bill from beginning to end, word for word. That has been dispensed with. I now ask to proceed with the consideration of committee amendments. If any Senator objects to the consideration of any amendment it will, of course, be passed over.

The PRESIDING OFFICER. The Senator, then, means that the bill shall be read for committee amendments?

Mr. GORE. Yes, sir. I understand that important amendments ought not to be disposed of in the absence of so many Senators.

The PRESIDING OFFICER. The Secretary will proceed with the reading of the bill.

The Secretary proceeded to read the bill.

Mr. GORE. I merely wanted the committee amendments stated.

Mr. THOMAS. I think the bill should be read for amendment. Of course the formal reading of the bill has been waived, but not the reading of the bill for amendment.

The PRESIDING OFFICER. The Secretary will proceed with the reading of the bill.

The Secretary resumed the reading of the bill.

Mr. GORE. Mr. President, it seems to me that the Senate has caught the meaning of the bill by the reading which has been had. I hope that we may now proceed with the consideration of committee amendments.

The PRESIDING OFFICER (Mr. KING in the chair). The Chair thinks that the Secretary is proceeding with the reading of the bill in an orderly and expeditious way and in conformity to the rule. Nine pages of the bill have already been read.

The reading of the bill was resumed.

The first amendment of the Committee on Agriculture and Forestry was, under the subhead "Bureau of Animal Industry," on page 13, line 19, after the word "authorities," to strike out "$250,000" and insert "$500,000: *Provided*, That hereafter the act approved May 29, 1884 (23 Stat. L., p. 31), be, and the same is hereby, amended to permit cattle which have reacted to the tuberculin test to be shipped, transported, or moved from one State, Territory, or the District of Columbia, to any other State, Territory, or the District of Columbia for immediate slaughter, in accordance with rules and regulations prescribed by the Secretary of Agriculture"; so as to make the clause read:

For investigating the disease of tuberculosis of animals, for its control and eradication, for the tuberculin testing of animals, and for researches concerning the cause of the disease, its modes of spread, and methods of treatment and prevention, including demonstrations, the formation of organizations, and such other means as may be necessary, either independently or in cooperation with farmers, associations, State or county authorities, $500,000: *Provided*, That hereafter the act approved May 29, 1884 (23 Stat. L., p. 31), be, and the same is hereby, amended to permit cattle which have reacted to the tuberculin test to be shipped, transported, or moved from one State, Territory, or the District of Columbia, to any other State, Territory, or the District of Columbia for immediate slaughter, in accordance with rules and regulations prescribed by the Secretary of Agriculture.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. THOMAS. Mr. President, I notice that this amendment doubles the amount of the appropriation made by the bill as it came from the House, making the total $500,000. This sum is to be devoted to the investigation of "the disease of tuberculosis of animals, for its control and eradication, for the tuberculin testing of animals, and for researches concerning the cause of the disease, its modes of spread," and so forth.

It is a remarkable fact in connection with legislation of this kind that the more money we appropriate for these researches and investigations, the more there seems to be needed with the recurrence of every year; in other words, the investigation and the research work carried on under previous appropriations does not seem to have accomplished anything. If it has, then certainly it is unnecessary to appropriate more money for the same purpose. If it has not, then it would indicate that the investigations and the researches have proven abortive up to this time, and further attempts in that direction will be equally so.

The sum of $250,000 is a small amount in these days of millions and billions, but still it is an item for which the Treasury must respond. I do not think we should now, unless it is absolutely necessary, increase the ordinary expenses of the Government in any direction; I think it wrong. We are spending more money than any nation engaged at war, and many times more money than we have ever been called upon to expend before. Certainly there should be some restriction upon the ordinary, every-day appropriations which affect our permanent expenditures and for which we would be obliged to legislate even in times of peace. I think this is as good a place as any to begin, and if $250,000 is not enough for this particular purpose, at least to attempt to put up with it and make it go as far as possible, so that if it should appear that some additional amount is necessary we can cover it in some deficiency bill.

Mr. CHAMBERLAIN. May I interrupt the Senator from Colorado?

Mr. THOMAS. I yield.

Mr. CHAMBERLAIN. In that connection, while we are increasing the appropriation for this purpose, does the Senator understand that in line 22 we are throwing down the bars for interstate shipment of cattle that have tuberculosis?

Mr. THOMAS. No; I do not think that is designed. Of course, my objection goes to the amount of the appropriation rather than to the proviso which follows it.

Mr. CHAMBERLAIN. But if it is necessary to increase the appropriation are we not running the risk of increasing the spread of the disease? I am not sure that I understand it.

Mr. THOMAS. That depends upon what is meant by the expression "to permit cattle which have reacted to the tuberculin test to be shipped."

Mr. SMITH of South Carolina. Mr. President, if the Senator from Colorado will permit me, I desire to say that, if he will read on, he will see that this interstate shipment is restricted to cattle which are to be slaughtered; that they are carried to the slaughter pen and are not allowed to be carried into another State, to be mingled with other cattle for dairy purposes.

Mr. THOMAS. The Senator from South Carolina will understand that my objection goes to the increased appropriation. With the effect of the proposed proviso I am not immediately concerned, although I think that the inquiry of the Senator from Oregon [Mr. CHAMBERLAIN] is most appropriate in connection with it.

Mr. CHAMBERLAIN. It seems to me, if the Senator please, that while we are increasing the appropriation to prevent the disease we are opening the bars to the spread of the disease by permitting the interstate shipment.

Mr. THOMAS. Of course, if that is so, then under all the circumstances the entire amendment should be rejected.

Mr. SMITH of South Carolina. If the Senator from Colorado will permit an interruption, let me call his attention to the fact that the Senator from New York [Mr. WADSWORTH], who seems to have been familiar with this disease and the conditions of its spreading, informed the committee that it was only when cows were confined in their stalls a larger part of the day on the ordinary dairy farm that this disease was found to be prevalent or to any appreciable extent contagious; that in the open country, where cattle graze all day practically, it has been discovered that the disease does not exist; but when they are condemned for the purpose of eradicating the disease they are taken to slaughter. The pure-food people claim that the little nodules formed by tuberculosis do not render the meat unfit for consumption, and that the cattle so infected may be shipped with impunity to the slaughter pen without any danger of spreading the contagion. The committee therefore thought that where a farmer had a herd which was condemned for milk purposes he should not be prohibited from getting the market value of the beef under the pure-food inspection; that if there was no danger of spreading the contagion by shipment he should be allowed to ship such cattle, specifically restricting such shipments for slaughtering purposes.

Mr. THOMAS. Mr. President, the experience of the Senator from New York upon that subject is quite considerable, and I should be disposed to accept his assurances in the absence of challenge on the part of some one who was equally well informed. I do not pretend to know anything about the matter. I cordially agree, however, with the Senator from Oregon [Mr. CHAMBERLAIN] that, if it should result in increasing the opportunity for the spread of the disease to be eradicated, the amendment ought to go out.

What I am concerned with is this constant tendency, in times of war as well as in times of peace, to increase our ordinary expenses. We ought to stop it.

Mr. GORE. Mr. President——

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. GORE. I wish to say that I agree entirely with the Senator from Colorado as to the general proposition he has just laid down. I think that we ought not to increase our ordinary expenditures, except where the necessity is urgent or overpowering.

The losses resulting in the United States annually from tuberculosis among cattle aggregate about $25,000,000. There is an undoubted requisition upon the food supplies of this country, and it was hoped that by increasing this appropriation we might arrest the progress of this disease and might in great measure conserve the cattle of the country against the ravages of tuberculosis. That is the justification which caused the committee to report this amendment. Of course, it is for the Senate to determine whether or not that reason is sufficient; but the necessity for increased food undoubtedly exists, and we entertained the hope that this might augment the available food supply of the country.

Now, with respect to the objection raised by the Senator from Oregon [Mr. CHAMBERLAIN], I may say that this amendment does not change the law as to the availability for slaughter of cattle reactors to the tuberculin test. It only changes the law as to interstate shipments. I have here a letter from the department recommending this amendment, which I will ask to have read to the Senate in a moment. In support of such a change in the law this case is cited in particular: Iowa cattle are generally shipped for slaughter either to Omaha, St. Joe, or Kansas City. Cattle in Iowa, within sight of Omaha, which have been infected with tuberculosis can not be shipped across the river to Omaha for slaughter, but must be shipped to some point in Iowa. There certainly is no sufficient reason why that should be done. This amendment undertakes to accommodate that situation. I will ask to have the letter from the department on this subject read to the Senate.

Mr. THOMAS. I yielded the floor, I thought, for the purpose of a statement only.

Mr. GORE. I did not so understand.

Mr. THOMAS. I am perfectly willing, however, that the letter should be read now.

The PRESIDING OFFICER (Mr. SHAFROTH in the chair). In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

The act of May 29, 1884, prohibits the interstate movement of diseased animals for any purpose. Animals which have been tested for tuberculosis and have reacted can not, under the law as it now stands, be shipped in interstate commerce to an official establishment for slaughter under Federal inspection. This situation very often works a hardship. For instance, the principal markets for Iowa cattle are Omaha, Nebr., or St. Joseph and Kansas City, Mo., but it is impossible to ship those which are affected with tuberculosis, even under appropriate regulations, across the border. Other instances could be cited where, because of State boundary lines, the tuberculin reactors can not legally be shipped to the nearest slaughtering point, which, in many cases, is only a few miles away. In order to avoid crossing the State line, and thus violating the act of 1884, they must be transported longer distances to slaughterhouses within the same State.

The department has received copies of resolutions recently adopted by the American Shorthorn Breeders' Association asking that the act of 1884 be amended so as to permit the return interstate of pure-bred animals which have reacted to the tuberculin test at destination. A number of State veterinarians, including those of Iowa and Kansas, also have recommended that the law be changed so as to authorize the interstate shipment to official establishments for slaughter of cattle which have reacted to the tuberculin test. At a conference of live-stock officials held in Chicago on December 3, 1917, it was the consensus of opinion that the law should be amended in these particulars.

The department knows of no good reason why the change suggested should not be made and hopes that the Senate Committee will give it favorable consideration. On the contrary, the officials of the Bureau of Animal Industry believe that the proposed amendment will be of definite assistance in the campaign against tuberculosis which has been inaugurated by the department. The movement of reactors would be permitted only in accordance with rules and regulations to be prescribed by the department, and every precaution would be taken, of course, to safeguard the live-stock industry.

It will be noted that a separate paragraph has been included in the present bill to cover the activities of the department relating to tuberculosis. This action was taken by the House committee in view of the growing importance of the work. Under the items "Inspection and quarantine" and "Diseases of animals" the department is now expending $132,618 in efforts to control or eradicate tuberculosis. As indicated in the report of the House committee, the department believes that it can effectively use $250,000, the amount included in the House bill, during the next fiscal year in the prosecution of the work.

Mr. THOMAS. Now, Mr. President, it will be observed that my objection goes to the increase of the appropriation for the purposes recited in the preceding lines. I do not understand that the proposed increase in the appropriation really affects the proviso that was inserted in the bill in connection with it and which might have been inserted in any other part of the bill with equal propriety.

Mr. GORE. There is no connection between the two.

Mr. THOMAS. There is no connection between the two. Now, if I thought that the doubling of this appropriation would result in a material increase in our meat food supply and that without it there would be no such increase, I would not oppose it for a moment; but when we consider that an appropriation for this specific purpose has been made year in and year out for an indefinite period of time and that the researches which were to be made concerning the disease to be eradicated have not resulted in any very material change in the situation, why should we at this time, when the Treasury is so hard put to it to meet the enormous expenditures of the Government, double the appropriation? I do not think we ought to do it.

Mr. WARREN. Mr. President——

Mr. THOMAS. I will yield to the Senator in a moment. I may say, in that connection, that there are other amendments which follow this which seem to me to be equally inexpedient at this time. I now yield to the Senator from Wyoming.

Mr. WARREN. Mr. President, the amount is already too small at $500,000. In the committee I offered an amendment to add $750,000 to the $250,000 appropriated by the House, making the total $1,000,000 instead of the $500,000 which the amendment proposes to appropriate.

Mr. THOMAS. Perhaps my objection will result in an increase of the appropriation; I do not know. [Laughter.]

Mr. WARREN. It is a very important matter, and while the expenditure may not increase the number of cattle of the country, it will preserve and save a great many, and therefore increase the meat product.

The language added is that of the officials of the department. They evidently see the justice of it and ask us to change the law in regard to shipping across State lines of cattle which have reacted to the tuberculin test. I think the Senator from Colorado understands that, and I presume he needs no information from me; but now if there is the slightest indication of the presence of the germ cattle can not be shipped across a State line to a slaughtering establishment.

Mr. THOMAS. I did not raise any objection to that portion of the amendment; that objection was suggested by the Senator from Oregon [Mr. CHAMBERLAIN].

Mr. WARREN. The disease, like the foot-and-mouth disease, is exceedingly destructive to cattle, and when its ravages reach the extreme, as has been the case sometimes in the past, there have been millions of cattle lost. It had been supposed that the disease was pretty nearly stamped out, but it has reappeared in a most virulent form. I therefore hope that neither the Senator from Colorado nor any other Senator will make any objection to the amount or to the language of the proviso, which has been added by way of amendment.

Mr. NORRIS. Mr. President——

Mr. THOMAS. Mr. President, I always like to agree with my friend from Wyoming, but I shall insist upon the appropriation made by the House. Of course, I know that tuberculosis of cattle is one of the diseases that are common to that class of live stock; I know that its eradication is very greatly to be desired; but I also know that up to this time there seems to be just as much apparent need for large appropriations for that purpose as there was 10 or 15 years ago. I am unable to perceive, therefore, the necessity for increasing it at this time, because I do not believe that by so doing the disease is going to be eradicated. I now yield to the Senator from Nebraska.

Mr. NORRIS. Mr. President, this particular amendment was added to the bill in the committee on my motion. I had no idea that the bill was going to be taken up to-day, because the railroad bill was before the Senate, and I am not prepared just at this moment to go into a full discussion of it.

Mr. GORE. I will say to the Senator from Nebraska that, if he so desires, the amendment can be passed over.

Mr. NORRIS. If there is going to be any serious objection to it, I should not like to have it acted on to-day. My own idea is that it is a very important amendment. As the Senator from Wyoming [Mr. WARREN] has suggested, this disease is reappearing, and cattlemen are anxious about it. The provision in the bill does not mean that the whole amount to be appropriated will necessarily be expended, but it is desirable to have the funds, so as to be ready for any emergency that may arise. In my judgment, at this time more than at any other, we ought to guard against anything that would interfere with the production of the meat supply of the country.

I have great sympathy for the Senator from Colorado in his opposition to large appropriations, and as a rule I fully agree with him. Of course, he is moved by the purest motives now in opposing this amendment; but, to my mind, there is no one other item of the bill of more importance, for the meat production of the country ought to be guarded jealously, and it will be guarded in one respect, at least, by this amendment.

The Senator from Wyoming said that he favored a much larger increase than was recommended by the committee in this particular amendment. I am satisfied from my conversation——

Mr. WARREN. Mr. President——

Mr. NORRIS. Just a moment. I am satisfied from my conversation with some of the cattle and meat producers of the country and from a large amount of correspondence I have had that there is a great deal of fear that unless we do make at least as liberal an appropriation as the committee has suggested we may later on, when it is too late, find that great damage has been done and the carrying on of the war has been really interfered with, because meat is one of the things of which there is a scarcity now.

Mr. THOMAS. Mr. President, before the Senator takes his seat will he inform me how many years we have appropriated money "for researches concerning the cause of the disease, its modes of spread, and methods of treatment"?

Mr. NORRIS. No; I can not answer the question directly. I suppose such appropriation has been made for a good many years and probably will continue to be made; but one of the difficulties in this case is that this disease, for instance, may break out in the East among the dairy herds, and as it is contagious it may then shift across the country and whole herds become infected with it. I assume that the department will exercise proper care and judiciously handle the money and not use it unless it is needed. It may be that it will not be needed; but I should like to have it where it can be used to meet whatever contingency may arise during the coming fiscal year.

Mr. THOMAS. Has the Senator any doubt that if this appropriation is made the department will exhaust it all?

Mr. NORRIS. Yes.

Mr. THOMAS. And that we will also be required to meet a deficiency caused by an inadequate appropriation?

Mr. NORRIS. Oh, I do not look for that. I do not think the Senator has any reason to believe that that will occur.

Mr. GORE. Mr. President, I will say that the appropriation bill for the current fiscal year carries a million dolars for the foot-and-mouth disease. The pending bill carries a million dollars for the foot-and-mouth disease. My understanding is that none of that will be used during the current year. Of course it is the hope of all of us that none will be used for the next fiscal year.

Mr. THOMAS. Why appropriate it, then, unless you are going to use it on two-legged animals instead of four-legged animals?

Mr. GORE. It is a sort of insurance fund.

Mr. NORRIS. I think so.

Mr. GORE. When the disease breaks out it is so virulent and violent that it must be met at once, and has to be stamped out at once, else the losses are out of all proportion to the amount that would have been required to stop it in its incipiency. I do not think it is a thing that we ought to dally with, particularly in times of this sort.

This is only 1 per cent of the estimated annual loss—$25,000,000. This increase is $250,000. If we save half a million dollars' worth of cattle by this increased appropriation of $250,000 we are still gainers by 200 per cent. If we should save the loss of several millions, of course the gain would be proportionate; and it seems to me that in times of this sort it is erring at least on the side of safety and conservation to have a provision of this sort in the bill.

Mr. THOMAS. Mr. President, it is quite evident that my objection may receive one vote. I doubt very much, from the trend of this discussion, that it will be very greatly augmented.

Mr. KENYON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Iowa?

Mr. THOMAS. I do.

Mr. KENYON. I want to suggest to the Senator from Colorado, in a kindly spirit and in the interest of economy, that he had better not stir up this matter, because the committee voted at one time to make the appropriation $750,000.

Mr. THOMAS. I have just stated that my objection probably would result in an increase of the appropriation.

Mr. KENYON. I think the Senator had better be careful. It might.

Mr. THOMAS. Well, it will not be the first time.

Mr. KENYON. It was only because of the protest that members of the committee made, saying that they would fight the matter on the floor, that the amount was put at $500,000.

Mr. THOMAS. Mr. President, in the last five or six years I have made a number of specific objections to items of increase in appropriations; and it is somewhat peculiar that in each instance almost every Senator who has interrupted me or spoken upon the matter has agreed with me upon the general proposition that we should economize, but they have always insisted that that was not the proper point to begin. Now, where are we going to begin unless we begin somewhere?

Mr. WARREN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Wyoming?

Mr. THOMAS. I do.

Mr. WARREN. Mr. President, the Senator from Colorado is always diligent in the line of economy, but of course he recognizes and must recognize that matters do change from time to time. We must recognize that some things that perhaps he may have opposed, that others have opposed, and that I have opposed along military lines it was not well to oppose at that time. We should have been better prepared.

The matter before the Senate at this time is largely a matter of preparation. We have here, on page 88, concerning the eradication of foot-and-mouth disease, in case of an emergency arising, and so forth, an appropriation of $1,000,000. There have been appropriations of from $1,000,000 to $2,500,000 annually for that purpose; and while one year there had to be a large deficiency appropriation after the first appropriation, in other years the appropriation has not been used in any large proportion, but it is there as an insurance.

Next to the foot-and-mouth disease, and almost as destructive, comes this matter of tuberculosis. I have no idea that the $500,000 would be expended, unless the disease develops a strong and virulent increase, and I did not have any idea when I asked that it might go to a million dollars that it would be expended unless we should receive an unexpected call to stamp out something that got so great a start that, unless immediately checked, even a million dollars would be but a moiety toward relief. I believe this is a direct matter of insurance, and, in view of the dangers that are surrounding us, it is not too much. I hope the Senate will take that view of it—that it is a matter of insurance—and will stand by the entire amount.

Mr. THOMAS. Mr. President, I am inclined to believe, from the discussion, that the Senator's hope will be realized. The Senator says that my experience ought to teach me, and it certainly does, that there is a change in many things as time goes by.

Mr. WARREN. The Senator must not apply that to himself alone, but to all of us.

Mr. THOMAS. I understand; but I notice that there is one thing that does not change, and that is the tendency always to increase House appropriations when bills come over to the Senate. That is one of the rules which, like time and tide, goes on forever.

Mr. WARREN. Has the Senator noticed how few changes we have made this time?

Mr. THOMAS. Yes; and I think the committee are entitled to considerable credit for not making as many as they generally do.

Mr. WARREN. In an experience of more than 20 years I have never known an Agricultural bill to come to the Senate with so few changes and so few additions as are made in this one.

Mr. THOMAS. Yes; I want to give the committee credit for that, and now I want to help them, I want to encourage them, by making some more reductions. As I have said, we should consider the prevailing state of the Public Treasury, the enormity of our public expenditures, and the vast increase of taxation. Senators, after a while you are going to hear from the poor devil who pays the taxes, and when he does speak he is going to speak in tones that will reverberate across the entire continent. He is a very patient animal, but there is a limit even to his patience; and as far as I can I want to demonstrate to him that we have saved him money wherever it is possible, especially in the matter of our ordinary expenditure.

While I am on my feet, Mr. President—for I am not going to stand here alone and make objections specifically to all these items—I want to call attention to an amendment here, on page 81:

> To enable the Secretary of Agriculture to install an experimental flour mill, baking and other apparatus, in order to investigate the milling and baking qualities of wheat and other grains, including the payment of rent in the city of Washington, $50,000.

Why, Mr. President, civilized people at least, and perhaps some who are uncivilized, have been experimenting with flour mills, with baking, and with apparatus for baking ever since the days when Abraham lived on the plains of Mesopotamia. If there is anything connected with the preparation of wheat flour as an edible substance by way of cookery or baking that has not been discovered by private enterprise and experiment, in God's name how are we going to find it out by building a mill here in the city of Washington and paying some other landlord $50,000 rent? To my mind, it would be so extraordinary in times of peace as to require comment; but now, when we have plenty of money, evidently, we seriously propose to expend $50,000 for experimenting in something that has been the subject of experiment for centuries. That, too, I suppose, will offer an instance where, while economy is good, we ought not to begin there.

If this is going to pass, let me suggest that an exeception should be made of the operation of this mill on "wheatless days," because otherwise you may get into trouble with the Food Administration.

Mr. GORE. Mr. President, I appreciate both the good sense and the humor of the Senator from Colorado.

Mr. THOMAS. I do not think the Senator will vote with him.

Mr. GORE. I merely want to waive the discussion of this flour mill at this time. I do not want the Senator to conjure up too many——

Mr. THOMAS. I mention it now because I do not want to take the floor again if I can avoid it. I want to say now what I would say to-morrow, or later on to-day, when that amendment comes up.

Mr. GORE. Mr. President, when the amendment just referred to, touching a flour mill, comes up I think there will be argument at least tending to justify its presence in the bill.

Mr. THOMAS. Oh, I have not a particle of doubt of that.

Mr. GORE. I will merely make one observation at this time. The present method of grading wheat is based upon other points and other facts and factors than the flour-producing quality of the grain. It is the belief of the farmers of this country that the grades of grain ought to be based on the actual flour-producing capacity of the grain. It is their belief that it would save millions of dollars annually to the farmers of this country which they now lose merely on points of taste and fancy under the more or less artificial system of grain grading; and it is in the belief that that might be true that this appropriation is

incorporated in the bill. It is in the interest of the farmer and in the interest of the agricultural classes of this country. But, as I say, I do not wish to thrash out that subject at this time. It was recommended by the department, and adopted upon the very urgent recommendation of the department.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from North Dakota?

Mr. THOMAS. I have yielded to the Senator from Oklahoma. If he has finished, I of course yield to the Senator from North Dakota.

Mr. GORE. I have finished.

Mr. GRONNA. I do not want to interrupt the Senator. I thought the Senator was through.

Mr. THOMAS. Oh, I am perfectly willing to be interrupted.

Mr. GRONNA. I simply want to say for the information of the Senator from Colorado that only to-day I was asked by a delegation from three States—North and South Dakota and Minnesota—to go with them to the Secretary of Agriculture in the hope of remedying an evil which, instead of having been remedied, has been growing worse, namely, what the chairman of the committee has just stated, the grading of grain. If I had known that the Agricultural bill would be up this afternoon I should have had my samples of grain here, and I could have demonstrated to the Senator from Colorado that this is not a foolish thing.

I have in my office, Mr. President, a sample of grain grown on my own farm. The wheat is conceded to be a No. 1 hard wheat, but it contains 4.3 per cent of rye; and the Senator from Colorado will be surprised to learn that on account of that 4.3 per cent of rye it is graded No. 5 and it reduces the price 24 cents a bushel.

Mr. THOMAS. I assume the Senator knows that to be so?

Mr. GRONNA. Why, certainly I know it to be so.

Mr. THOMAS. Yes. It was not necessary, in order for the Senator to ascertain the truth of that fact, to build a mill here in Washington, at an expense of $50,000, for baking and other apparatus.

Mr. GRONNA. I was just coming to that. This delegation, which consists of the railroad commissioners of these three States, together with the appeal board of the State of Minnesota, deems it important enough to come here regarding it, and the Secretary of Agriculture said to this delegation to-day that he knew of no other way of making a just and honest standard than by a milling test. The Senator knows, of course, that providing this mill does not require the erection of buildings. The appropriation is simply for the purchase of machinery, which may be installed in a very small room. We have such a mill in the State of North Dakota in our agricultural department; but, of course, it can not be expected that the Secretary of Agriculture will take the word of the faculty of the Agricultural College of North Dakota.

Mr. THOMAS. He might go farther and fare worse.

Mr. GRONNA. The only way in which Mr. Brand, who is now fixing these standards, can have the information will be to have the machinery bought for grinding this wheat and the machinery for baking the flour, so that the producer as well as the consumer can get an honest deal. It is for the purpose of aiding the Agricultural Department in standardizing the grain.

I will say to the Senator that we raise in my State from 100,000,000 to 150,000,000 bushels of wheat annually. Taking the sample which I showed to the Agricultural Committee on last Saturday, and which I showed to the Secretary of Agriculture to-day, we have lost from 24 to 25 cents a bushel. That is a greater loss than the farmers of my part of the country are willing to stand.

Mr. THOMAS. If the Senator will pardon an interruption. I had labored under the impression that the improper grading was due to the manipulations of certain chambers of commerce and elevator men in other sections of the country.

Mr. GRONNA. That is true.

Mr. THOMAS. Not to the fact that the farmers and the Agricultural Department were not aware of the nutritious qualities embodied in the grain itself, a test of which must be made before a proper grading can be established.

Mr. GRONNA. That is true. That has been maintained, and it is true; but, if the Senator will permit me, under the standardization act which was passed here a year ago it is possible, if he will say 3 per cent of durum wheat is mixed with the best quality of hard wheat that it will reduce the grade of that wheat not one grade but three grades. There is not a miller in the United States who will not testify that the product of that wheat, although it may be mixed either with this durum wheat or with winter wheat is absolutely as good as if it were not mixed; and yet the farmer has to sell his grain for that reduced price.

The Senator will remember that when we passed the standardization act I objected to the words "foreign matter" going in. Those words, "foreign matter," apply not to what we call dockage, such as weed seeds, but to other grains. If there is rye in the wheat, the rye is foreign matter. If there is barley in the wheat, the barley will be foreign matter to the wheat, of course; and the farmer is not only docked for that foreign matter, and gets nothing whatever for it, but it reduces the price of his product.

Mr. THOMAS. I think there is no doubt about that, but I do not perceive how the proposed amendment either helps or hurts that situation. I think the Senator's objection to the insertion of the word "foreign" in the section of the law to which he refers should have been sustained, and that would have done away with the evil of which he now complains.

Mr. GRONNA. I want to assure the Senator in all seriousness that among these men who appeared before the Secretary of Agriculture to-day, and who are to appear before the President of the United States at 5.30 to-day on this very question, there is not one but that approved of this very provision in the bill. They are men who do know something about wheat, and they do know something about how the farmers of the Northwest have been robbed under the system which we have had.

Mr. THOMAS. I think there is no doubt about the fact that they have been robbed. I have sympathized with the fight which they have made, and I think that the legislation which we adopted tended—perhaps not as extensively as it should, but nevertheless tended—to cure that evil; and I am ready to vote for any additional legislation which will cure it. But, with all due regard to the distinguished gentlemen who have come here and who favor this measure, I do not see how the establishment of a bakery here is going to interfere with or affect, beneficially or otherwise, the things which they wish to accomplish. I would as soon expect this amendment to provide for a corps of officeholders to eat the bread and test its efficiency as it is baked. It would be as much a necessary part of the proposed remedy as the things which the bill does contain.

Mr. SMITH of South Carolina. Mr. President, if the Senator will allow me, if the object that the Senator thinks has been attained had in fact been attained, I do not think for a minute we would have voted to put in this amendment; but, as I understand, the object here was this, and if I am not correct the Senator from North Dakota will correct me.

Grain is now classified under certain standards. The price is fixed according to those standards. His contention and the view of the committee, as I understood it, was that the wheat that brings the lesser price on account of certain physical appearances has as great No. 1 flour-producing qualities as, and perhaps better than, some that are classified in the markets as higher grades.

Mr. THOMAS. I have not a particle of doubt about it.

Mr. SMITH of South Carolina. Now, the Government has standardized these grades of grain under the bill that we previously passed. The farmer's wheat is bought and sold upon its physical appearance. The farmers now ask that $50,000 be appropriated to enable the Government, in the interest of fair dealing, to grind and test under its own supervision samples of wheat of these standards taken from the great grain country or wherever you see fit to take them from, so that the Government may know of its own knowledge, by actual experiment here, where it has fixed the standards, whether or not the contention of the farmer is true that this wheat that is graded No. 2 is just as good as No. 1, to all intents and purposes, in bread-making qualities.

Mr. THOMAS. And the appropriation bill of 1919, Mr. President, will provide perhaps $100,000 for this identical purpose, and that of the next succeeding year will probably provide $250,000, and the next will provide for these baking establishments in all the agricultural schools of the States of the West, and we will have baking and milling establishments for corn and for barley and for rye and for all the other grains that are nutritious. This is simply the intrusion of the camel's head into the tent once more. It is going to pass, however. There is no question about that.

Mr. GRONNA. Mr. President, may I interrupt the Senator?

Mr. THOMAS. Certainly.

Mr. GRONNA. I want to assure the Senator that there will be no demand for any increase or for any extra appropriation. This is simply to provide a flour mill for scientific purposes, to be established in a little room which the Agricultural Department already has. It may not cost $50,000, but the Secretary thought he ought to have $50,000; and he said to-day to this committee: "I do not know of any other way in which to really ascertain the value and fix the standards than to adopt the amendment which I sent to the Agricultural Committee on last Friday or Saturday."

Mr. THOMAS. Oh, I know the Senator thinks that, and I do not think there will be any increase of appropriation or any continued appropriation, as far as he is concerned, but we must judge of these things by the history of similar innovations in our legislation in the past.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Utah?

Mr. THOMAS. I do.

Mr. SMOOT. I want to ask the Senator if the object of the mill is to change the grade of the wheat? Is that the object?

Mr. GRONNA. It is to enable those who fixed the standards to establish honest standards. That is the object.

Mr. SMITH of South Carolina. That is it.

Mr. GORE and Mr. PAGE addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Oklahoma?

Mr. THOMAS. As was stated by a Senator here to-day, the Senator from Minnesota [Mr. KELLOGG], I am perfectly willing to yield to one Senator, but I can not yield to three. I yield to the Senator from Oklahoma.

Mr. GORE. Mr. President, I merely wanted to say that, as I understand it, the contention of the farmer is that we might just as well classify gold ore by its exterior appearance and by extraneous circumstances, and without reference to its gold content, as to classify grain by its exterior appearance or extraneous circumstances rather than by its flour-producing qualities.

Mr. THOMAS. I think that is true, but we classify gold by sampling it in private. We do not call upon the Government of the United States, in its Agricultural or other appropriation bills, to sample our gold ore.

Mr. GORE. I thought we had assay offices all over the country.

Mr. THOMAS. You have assay offices, but they do not sample ore. They purchase ore.

Mr. GORE. I thought they also tested it.

Mr. GRONNA. Mr President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from North Dakota?

Mr. THOMAS. I do.

Mr. GRONNA. May I say to the Senator from Colorado that the Government of the United States now fixes the price upon the grain of the farmers by its standardization?

Mr. THOMAS. I understand that is true. My impression is that corn is now worth more than wheat, in some parts of the country, because of that fact. That is, they standardize wheat, but they do not standardize corn.

Mr. GORE. Relatively it is worth more everywhere, and absolutely in some places.

Mr. PAGE. Mr. President——

Mr. THOMAS. I will yield to the Senator from Vermont in a moment. Of course, this bill is going to require the employment of some more officeholders; and there never was an officeholder on earth, and never will be, including Senators of the United States, who will not do all he can while in office to make himself indispensable, and therefore secure of a life job. That of itself is going to result in repeated appropriations for this identical purpose, and for the other grains, as I have stated heretofore.

I now yield to the Senator from Vermont.

Mr. PAGE. Mr. President, I simply wanted to ask if the statement made by the Senator from North Dakota did not indicate that there was a wrong being done somewhere when wheat was classified at a grade which brings 24 or 25 cents a bushel less than standard No. 1 wheat when the real difference, perhaps, was not more than 4 or 5 cents a bushel?

Mr. THOMAS. There is no question but that the farmers of the Senator's State and other States have been robbed for the last quarter of a century through false standardization of their grain. There is no doubt about that.

Mr. PAGE. Is there not some way to remedy that wrong?

Mr. THOMAS. We have tried to do it by legislation, and I think we have fairly well succeeded. If our legislation is defective, let us remedy it. I am willing to vote for any system of standardization that the Senators from the wheat States of the Union desire.

Mr. GRONNA. Mr. President, if the Senator will pardon me, the consumer pays the highest price for the finished product—the flour. We know that.

Mr. THOMAS. There is no doubt about that.

Mr. GRONNA. If this difference in price were saved to the consumer, we would not complain; but we know absolutely that while this reduction is being made to the producer the consumer pays a price based upon the highest value of the grain.

Mr. THOMAS. Unquestionably.

Mr. PAGE. Is it not possible for the Senator from North Dakota to suggest some remedy for that?

Mr. GRONNA. This is a suggestion that will remedy it.

Mr. THOMAS. If I could believe that, Mr. President, I would not make any objection to it; but I am unable to perceive how it is going to affect it a particle. Of course that may be due to my ignorance and obtuseness. Probably it is.

Mr. GORE. Mr. President——

Mr. THOMAS. I yield to the Senator from Oklahoma.

Mr. GORE. Without meaning to interrupt the Senator, I merely want to say that I think the Senate has got to milling on this matter a little too soon, and I hope we will hark back to the item with regard to tuberculosis.

Mr. THOMAS. I think perhaps it is better to change from baking wheat to consumption.

The PRESIDING OFFICER. The question is upon the committee amendment, on pages 13 and 14, which increases the appropriation from $250,000 to $500,000, with a proviso.

Mr. THOMAS. Mr. President, I do not know that I am proceeding in parliamentary fashion; but if it is in order I wish to strike out the sum of $500,000 provided by the amendment, and I make a motion to that effect.

Mr. SMOOT. That object can be attained by simply disagreeing to the amendment.

Mr. MARTIN. I suggest that the Senator simply ask to have the amendment rejected.

Mr. NORRIS. Yes; just vote "no" on the amendment.

Mr. THOMAS. I accept the suggestion that we disagree to the amendment, by which I mean the figures "$500,000." I do not object to the remaining part of the proviso. It does not carry an appropriation this year, but it will next year.

The PRESIDING OFFICER. Does the Senator desire the committee amendment divided?

Mr. THOMAS. I do not want to suggest the absence of a quorum, so I would suggest that this matter go over until to-morrow.

Mr. GORE. Very well, Mr. President. If the Senator desires, I am willing to have that course taken.

Mr. THOMAS. I have reference, of course, to the part of the amendment which precedes the colon. There are really two amendments.

RAILROAD CONTROL.

Mr. SMITH of South Carolina. I ask that the unfinished business, Senate bill 3752, be laid before the Senate.

The PRESIDING OFFICER. The Chair lays the unfinished business before the Senate.

The SECRETARY. A bill (S. 3752) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes.

EXECUTIVE SESSION.

Mr. MARTIN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 5 o'clock and 5 minutes p. m.) the Senate adjourned until to-morrow, Thursday, February 14, 1918, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate February 13, 1918.

TARIFF COMMISSION.

Thomas W. Page, of Virginia, to be a member of the United States Tariff Commission, vice Daniel C. Roper, resigned.

COAST AND GEODETIC SURVEY.

Leo C. Wilder, of Vermont, to be junior hydrographic and geodetic engineer (by promotion from aid), vice W. H. Kearns, promoted, and

Aaron G. Katz, of New York, to be aid (by promotion from deck officer), vice G. H. Durgin, promoted, in the United States Coast and Geodetic Survey, Department of Commerce.

JUSTICES OF THE SUPREME COURT, TERRITORY OF HAWAII.

James L. Coke, of Honolulu, Hawaii, to be chief justice of the Supreme Court, Territory of Hawaii, vice A. G. M. Robertson, resigned. (Mr. Coke is now serving as associate justice of that court.)

Samuel B. Kemp, of Honolulu, Hawaii, to be associate justice of the Supreme Court, Territory of Hawaii, vice James L. Coke, nominated to be chief justice of that court. (Mr. Kemp is now serving as second judge of the Circuit Court, First Circuit, Territory of Hawaii.)

JUDGES OF THE CIRCUIT COURT, TERRITORY OF HAWAII.

William S. Edings, of Honolulu, Hawaii, to be second judge of the Circuit Court, First Circuit, Territory of Hawaii, vice Samuel B. Kemp, nominated to be associate justice of the Supreme Court, Territory of Hawaii. (Mr. Edings is now serving as judge of the Circuit Court, Second Circuit, Territory of Hawaii, at Wailuku, Maui.)

L. L. Burr, of Honolulu, Hawaii, to be judge of the Circuit Court, of the Second Circuit, Territory of Hawaii, vice William S. Edings, nominated to be second judge of the Circuit Court, First Circuit, Territory of Hawaii.

APPOINTMENTS IN THE ARMY.

MEDICAL CORPS.

To be first lieutenants.

First Lieut. William Charles Munly, Medical Reserve Corps, with rank from January 25, 1918.

First Lieut. Albert Elwood Pagan, Medical Reserve Corps, with rank from January 26, 1918.

First Lieut. Forrest Pitt Baker, Medical Reserve Corps, with rank from January 27, 1918.

First Lieut. Cole Blease Gibson, Medical Reserve Corps, with rank from January 28, 1918.

First Lieut. George William Rice, Medical Reserve Corps, with rank from January 29, 1918.

Capt. Royal Kendall Stacey, Medical Reserve Corps, with rank from January 30, 1918.

First Lieut. William Campbell Colbert, Medical Reserve Corps, with rank from January 31, 1918.

First Lieut. Ernest Leroy Wilson, Medical Reserve Corps, with rank from February 1, 1918.

First Lieut. William Stephen Culpepper, Medical Reserve Corps, with rank from February 2, 1918.

First Lieut. Charles Roland Glenn, Medical Reserve Corps, with rank from February 3, 1918.

First Lieut. Gordon Adams Clapp, Medical Reserve Corps, with rank from February 4, 1918.

First Lieut. Clive Paul Mueller, Medical Reserve Corps, with rank from February 5, 1918.

FIELD ARTILLERY ARM.

To be second lieutenant with rank from date of appointment.

Second Lieut. Ansel G. Wineman, Philippine Scouts.

PROMOTIONS IN THE ARMY.

COAST ARTILLERY CORPS.

To be first lieutenants with rank from August 30, 1917.

Second Lieut. Dean I. Piper, Coast Artillery Corps, vice First Lieut. Homer A. Bagg, promoted.

Second Lieut. Otto M. Jank, Coast Artillery Corps, vice First Lieut. Cherubusco Newton, jr., promoted.

Second Lieut. Herman U. Wagner, Coast Artillery Corps, vice First Lieut. Walter Smith, promoted.

Second Lieut. Philip S. Day, Coast Artillery Corps, vice First Lieut. Hugh J. Knerr, promoted.

Second Lieut. George W. Hirsch, Coast Artillery Corps, vice First Lieut. George F. Humbert, promoted.

Second Lieut. Forrest C. Shaffer, Coast Artillery Corps, vice First Lieut. Reuben N. Perley, promoted.

Second Lieut. William R. Deeble, jr., Coast Artillery Corps, vice First Lieut. John H. Birdsall, promoted.

Second Lieut. Frank F. Reed, Coast Artillery Corps, vice First Lieut. Levin H. Campbell, jr., promoted.

Second Lieut. John W. Coffey, Coast Artillery Corps, vice First Lieut. Harold De F. Burdick, promoted.

Second Lieut. Frank C. Meade, Coast Artillery Corps, vice First Lieut. Philip G. Blackmore, promoted.

Second Lieut. Lawrence Dwight, Coast Artillery Corps, vice First Lieut. George I. Thatcher, promoted.

Second Lieut. Everett T. Brown, Coast Artillery Corps, vice First Lieut. Edwin F. Silkman, promoted.

Second Lieut. Clyde H. Morganthaler, Coast Artillery Corps, vice First Lieut. Cedric M. S. Skene, promoted.

Second Lieut. Willard M. Hall, Coast Artillery Corps, vice First Lieut. Edward Montgomery, promoted.

Second Lieut. Tracy C. Dickson, jr., Coast Artillery Corps, vice First Lieut. Stewart W. Stanley, promoted.

Second Lieut. Robert W. Hasbrouck, Coast Artillery Corps, vice First Lieut. Roy S. Atwood, promoted.

Second Lieut. Howard P. Faust, Coast Artillery Corps, vice First Lieut. Samuel F. Hawkins, promoted.

Second Lieut. John T. de Camp, Coast Artillery Corps, vice First Lieut. Charles Thomas-Stahle, promoted.

Second Lieut. Wallace D. Collins, Coast Artillery Corps, vice First Lieut. Edwin J. O'Harra, promoted.

Second Lieut. Sargent P. Huff, Coast Artillery Corps, vice First Lieut. Alexander C. Sullivan, promoted.

Second Lieut. William H. Donaldson, jr., Coast Artillery Corps, vice First Lieut. Harold B. Sampson, promoted.

Second Lieut. Henry M. Black, Coast Artillery Corps, vice First Lieut. Clarence L. Gilbert, promoted.

Second Lieut. Willard D. Murphy, Coast Artillery Corps, vice First Lieut. Arthur E. Rowland, promoted.

Second Lieut. Council B. Palmer, Coast Artillery Corps, vice First Lieut. Lee R. Watrous, jr., promoted.

Second Lieut. John C. Hawkins, Coast Artillery Corps, vice First Lieut. Charles A. French, promoted.

TEMPORARY PROMOTIONS IN THE ARMY.

CORPS OF ENGINEERS.

To be lieutenant colonel with rank from July 9, 1917.

Maj. Lewis H. Rand, Corps of Engineers, vice Lieut. Col. Edgar Jadwin, appointed colonel in the National Army.

To be lieutenant colonels with rank from July 13, 1917.

Maj. Edward M. Markham, Corps of Engineers, vice Lieut. Col. Herbert Deakyne, appointed colonel in the National Army.

Maj. Thomas H. Jackson, Corps of Engineers, vice Lieut. Col. William P. Wooten, appointed colonel in the National Army.

To be lieutenant colonel with rank from July 14, 1917.

Maj. George B. Pillsbury, Corps of Engineers, vice Lieut. Col. Harry Burgess, appointed colonel in the National Army.

To be lieutenant colonel with rank from July 18, 1917.

Maj. Gustave R. Lukesh, Corps of Engineers, vice Lieut. Col. James B. Cavanaugh, appointed colonel in the National Army.

To be lieutenant colonels with rank from August 5, 1917.

Maj. John R. Slattery, Corps of Engineers, vice Lieut. Col. William Kelly, appointed colonel in the National Army.

Maj. Albert E. Waldron, Corps of Engineers, vice Lieut. Col. Edward H. Schulz, appointed colonel in the National Army.

Maj. Francis A. Pope, Corps of Engineers, vice Lieut. Col. John C. Oakes, appointed colonel in the National Army.

Maj. Gilbert A. Youngberg, Corps of Engineers, vice Lieut. Col. Sherwood A. Cheney, appointed colonel in the National Army.

Maj. Edward N. Johnston, Corps of Engineers, vice Lieut. Col. Frank C. Boggs, appointed colonel in the National Army.

Maj. Clarence O. Sherrill, Corps of Engineers, vice Lieut. Col. George B. Pillsbury, appointed colonel in the National Army.

Maj. Ernest D. Peek, Corps of Engineers, vice Lieut. Col. Lytle Brown, appointed colonel in the National Army.

Maj. George R. Spalding, Corps of Engineers, vice Lieut. Col. Harley B. Ferguson, appointed colonel in the National Army.

Maj. Elliott J. Dent, Corps of Engineers, vice Lieut. Col. James A. Woodruff, appointed colonel in the National Army.

Maj. William P. Stokey, Corps of Engineers, vice Lieut. Col. John R. Slattery, appointed colonel in the National Army.

Maj. Wildurr Willing, Corps of Engineers, vice Lieut. Col. Clarence O. Sherrill, appointed colonel in the National Army.

Maj. William A. Mitchell, Corps of Engineers, vice Lieut. Col. George R. Spalding, appointed colonel in the National Army.

Maj. Mark Brooke, Corps of Engineers, vice Lieut. Col. William J. Barden, appointed colonel in the National Army.

Maj. Laurence V. Frazier, Corps of Engineers, vice Lieut. Col. Edward M. Markham, appointed colonel in the National Army.

Maj. Harold C. Fiske, Corps of Engineers, vice Lieut. Col. Francis A. Pope, appointed colonel in the National Army.

Maj. Max C. Tyler, Corps of Engineers, vice Lieut. Col. Robert R. Raymond, appointed colonel in the National Army.

Maj. Ulysses S. Grant, 3d, Corps of Engineers (General Staff Corps), vice Lieut. Col. Earl I. Brown, appointed colonel in the National Army.

Maj. William H. Rose, Corps of Engineers, vice Lieut. Col. Ulysses S. Grant, 3d, retained in the General Staff Corps.

Maj. Lewis M. Adams, Corps of Engineers, vice Lieut. Col. James P. Jervey, appointed colonel in the National Army.

Maj. William D'A. Anderson, Corps of Engineers, vice Lieut. Col. Charles Keller, promoted.

Maj. Joseph H. Earle, Corps of Engineers, vice Lieut. Col. Meriwether L. Walker, appointed colonel in the National Army.

Maj. Thomas M. Robins, Corps of Engineers, vice Lieut. Col. William B. Ladue, appointed colonel in the National Army.

Maj. Roger D. Black, Corps of Engineers, vice Lieut. Col. Clarke S. Smith, appointed colonel in the National Army.

Maj. Theodore H. Dillon, Corps of Engineers, vice Lieut. Col. Spencer Cosby, promoted.

Maj. De Witt C. Jones, Corps of Engineers, vice Lieut. Col. William D. Connor, appointed colonel in the National Army.

Maj. Ernest Graves, Corps of Engineers, vice Lieut. Col. George M. Hoffman, appointed colonel in the National Army.
Maj. Francis B. Wilby, Corps of Engineers, vice Lieut. Col. James F. McIndoe, promoted.
Maj. Clarence S. Ridley, Corps of Engineers, vice Lieut. Col. Jay J. Morrow, promoted.
Maj. Alvin B. Barber, Corps of Engineers, vice Lieut. Col. George P. Howell, promoted.
Maj. Roger G. Powell, Corps of Engineers, vice Lieut. Col. Frederick W. Altstaetter, promoted.
Maj. John N. Hodges, Corps of Engineers, vice Lieut. Col. Lewis H. Rand, promoted.
Maj. James J. Loving, Corps of Engineers, vice Lieut. Col. Ernest D. Peek, appointed colonel in the National Army.
Maj. Edward D. Ardery, Corps of Engineers, vice Lieut. Col. Elliott J. Dent, appointed colonel in the National Army.
Maj James G. Steese, Corps of Engineers, vice Lieut. Col. Wildurr Willing, appointed colonel in the National Army.
Maj. Roger G. Alexander, Corps of Engineers, vice Lieut. Col. William A. Mitchell, appointed colonel in the National Army.
Maj. James A. O'Connor, Corps of Engineers, vice Lieut. Col. Edward N. Johnston, appointed colonel in the National Army.
Maj. Lewis H. Watkins, Corps of Engineers, vice Lieut. Col. Amos W. Fries, appointed colonel in the National Army.
Maj. Gilbert E. Humphrey, Corps of Engineers, vice Lieut. Col. Charles W. Kutz, appointed colonel in the National Army.
Maj. Richard Park, Corps of Engineers, vice Lieut. Col. Albert E. Waldron, appointed colonel in the National Army.
Maj. Daniel I. Sultan, Corps of Engineers, vice Lieut. Col. Thomas H. Jackson, promoted.
Maj. Glen E. Edgerton, Corps of Engineers, vice Lieut. Col. Gustave R. Lukesh, promoted.

To be major with rank from July 9, 1917.

Capt. Clarence L. Sturdevant, Corps of Engineers, vice Maj. Lewis H. Rand, promoted.

To be majors with rank from July 13, 1917.

Capt. Earl J. Atkisson, Corps of Engineers, vice Maj. Edward M. Markham, promoted.
Capt. Richard T. Coiner, Corps of Engineers, vice Maj. Thomas H. Jackson, promoted.

To be major with rank from July 14, 1917.

Capt. Robert S. A. Dougherty, Corps of Engineers, vice Maj. George B. Pillsbury, promoted.

To be major with rank from July 18, 1917.

Capt. Stuart C. Godfrey, Corps of Engineers, vice Maj. Gustave R. Lukesh, promoted.

To be majors with rank from August 5, 1917.

Capt. Francis C. Harrington, Corps of Engineers, vice Maj. John R. Slattery, promoted.
Capt. Cleveland C. Gee, Corps of Engineers, vice Maj. Albert E. Waldron, promoted.
Capt. John M. Wright, Corps of Engineers, vice Maj. Francis A. Pope, promoted.
Capt. John R. D. Matheson, Corps of Engineers, vice Maj. Gilbert A. Youngberg, promoted.
Capt. William H. Sage, jr., Corps of Engineers, vice Maj. Edward N. Johnston, promoted.
Capt. Charles J. Taylor, Corps of Engineers, vice Maj. Clarence O. Sherrill, promoted.
Capt. Edwin H. Marks, Corps of Engineers, vice Maj. Michael J. McDonough, appointed colonel in the National Army.
Capt. Earl North, Corps of Engineers, vice Maj. Curtis W. Otwell, appointed colonel in the National Army.
Capt. Albert H. Acher, Corps of Engineers, vice Maj. Ernest D. Peek, promoted.
Capt. Gilbert Van B. Wilkes, Corps of Engineers, vice Maj. George R. Spalding, promoted.
Capt. John C. H. Lee, Corps of Engineers, vice Maj. Paul S. Bond, appointed colonel in the National Army.
Capt. Frank S. Besson, Corps of Engineers, vice Maj. Elliott J. Dent, promoted.
Capt. Lindsay C. Herkness, Corps of Engineers, vice Maj. William L. Guthrie, appointed colonel in the National Army.
Capt. Albert K. B. Lyman, Corps of Engineers, vice Maj. William P. Stokey, promoted.
Capt. Frederick S. Strong, jr., Corps of Engineers, vice Maj. Wildurr Willing, promoted.
Capt. Daniel D. Pullen, Corps of Engineers, vice Maj. William A. Mitchell, promoted.
Capt. Carey H. Brown, Corps of Engineers, vice Maj. Mark Brooke, promoted.
Capt. Oscar N. Solbert, Corps of Engineers, vice Maj. Laurence V. Frazier, promoted.
Capt. Beverly C. Dunn, Corps of Engineers, vice Maj. Harold C. Fiske, promoted.
Capt. Donald H. Connolly, Corps of Engineers, vice Maj. Warren T. Hannum, appointed colonel in the National Army.
Capt. Raymond F. Fowler, Corps of Engineers, vice Maj. Robert R. Ralston, appointed colonel in the National Army.
Capt. David McCoach, jr., Corps of Engineers (General Staff Corps), vice Maj. Max C. Tyler, promoted.
Capt. James G. B. Lampert, Corps of Engineers, vice Maj. David McCoach, jr., retained in the General Staff Corps.
Capt. Philip B. Fleming, Corps of Engineers, vice Maj. William H. Rose, promoted.
Capt. John W. Stewart, Corps of Engineers, vice Maj. Lewis M. Adams, promoted.
Capt. Joseph C. Mehaffey, Corps of Engineers, vice Maj. William D'A. Anderson, promoted.
Capt. Paul S. Reinecke, Corps of Engineers, vice Maj. Joseph H. Earle, promoted.
Capt. Raymond A. Wheeler, Corps of Engineers, vice Maj. Thomas M. Robins, promoted.
Capt. W. Morris Chubb, Corps of Engineers, vice Maj. Roger D. Black, promoted.
Capt. Howard S. Bennion, Corps of Engineers, vice Maj. W. Goff Caples, appointed colonel in the National Army.
Capt. William C. Sherman, Corps of Engineers, vice Maj. Theodore H. Dillon, promoted.
Capt. Rudolph C. Kuldell, Corps of Engineers, vice Maj. De Witt C. Jones, promoted.
Capt. Roscoe C. Crawford, Corps of Engineers, vice Maj. Henry C. Jewett, appointed colonel in the National Army.
Capt. Earl G. Paules, Corps of Engineers, vice Maj. Ernest Graves, promoted.
Capt. Bradford G. Chynoweth, Corps of Engineers, vice Maj. Arthur R. Ehrnbeck, appointed lieutenant colonel in the National Army.
Capt. Milo P. Fox, Corps of Engineers, vice Maj. Francis B. Wilby, promoted.
Capt. John C. Gotwals, Corps of Engineers, vice Maj. Clarence S. Ridley, promoted.
Capt. Francis K. Newcomer, Corps of Engineers, vice Maj. Alvin B. Barber, promoted.
Capt. Charles F. Williams, Corps of Engineers, vice Maj. Roger G. Powell, promoted.
Capt. Gordon R. Young, Corps of Engineers, vice Maj. John N. Hodges, promoted.
Capt. Richard U. Nicholas, Corps of Engineers, vice Maj. James J. Loving, promoted.
Capt. James A. Dorst, Corps of Engineers, vice Maj. Edward D. Ardery, promoted.
Capt. Rufus W. Putnam, Corps of Engineers, vice Maj. James G. Steese, promoted.
Capt. Lunsford E. Oliver, Corps of Engineers, vice Maj. Roger G. Alexander, promoted.
Capt. William H. Holcombe, Corps of Engineers, vice Maj. James A. O'Connor, promoted.
Capt. James B. Cress, Corps of Engineers, vice Maj. Lewis H. Watkins, promoted.
Capt. Charles P. Gross, Corps of Engineers, vice Maj. Gilbert E. Humphrey, promoted.
Capt. Bernard A. Miller, Corps of Engineers, vice Maj. Richard C. Moore, appointed lieutenant colonel in the National Army.
Capt. Peter C. Bullard, Corps of Engineers, vice Maj. Ralph T. Ward, appointed lieutenant colonel in the National Army.
Capt. Brehon B. Somervell, Corps of Engineers, vice Maj. Thomas H. Emerson, appointed lieutenant colonel in the National Army.
Capt. Xenophon H. Price, Corps of Engineers, vice Maj. Robert P. Howell, appointed lieutenant colonel in the National Army.
Capt. Robert W. Crawford, Corps of Engineers, vice Maj. Robert S. Thomas, appointed lieutenant colonel in the National Army.
Capt. Frederick S. Skinner, Corps of Engineers, vice Maj. Harold S. Hetrick, appointed lieutenant colonel in the National Army.
Capt. Dabney O. Elliott, Corps of Engineers, vice Maj. Jarvis J. Bain, appointed lieutenant colonel in the National Army.
Capt. Allen P. Cowgill, Corps of Engineers, vice Maj. William A. Johnson, appointed lieutenant colonel in the National Army.
Capt. George F. Lewis, Corps of Engineers, vice Maj. Charles R. Pettis, appointed lieutenant colonel in the National Army.

Capt. Harrison Brand, jr., Corps of Engineers, vice Maj. Frederick B. Downing, appointed lieutenant colonel in the National Army.

Capt. Frederick W. Herman, Corps of Engineers, vice Maj. Julian L. Schley, appointed lieutenant colonel in the National Army.

Capt. John H. Carruth, Corps of Engineers, vice Maj. Edmund L. Daley, appointed lieutenant colonel in the National Army.

Capt. Oscar O. Kuentz, Corps of Engineers, vice Maj. Henry A. Finch, appointed lieutenant colonel in the National Army.

Capt. William E. R. Covell, Corps of Engineers, vice Maj. James F. Bell, appointed lieutenant colonel in the National Army.

Capt. Edwin R. Kimble, Corps of Engineers, vice Maj. Richard Park, promoted.

Capt. Joseph D. Arthur, jr., Corps of Engineers, vice Maj. Daniel I. Sultan, promoted.

Capt. Ernest F. Miller, Corps of Engineers, vice Maj. Glen E. Edgerton, promoted.

COAST ARTILLERY CORPS.

To be lieutenant colonels with rank from August 5, 1917.

Maj. Malcolm Young, Coast Artillery Corps, vice Lieut. Col. Lawrence S. Miller, appointed colonel in the National Army.

Maj. Laurence C. Brown, Coast Artillery Corps (Signal Corps), vice Lieut. Col. Earle D'A. Pearce, appointed colonel in the National Army.

Maj. Harry L. Steele, Coast Artillery Corps (Quartermaster Corps), vice Lieut. Col. Laurence C. Brown, retained in the Signal Corps.

Maj. Thomas F. Dwyer, Coast Artillery Corps (Quartermaster Corps), vice Lieut. Col. Harry L. Steele, retained in the Quartermaster Corps.

Maj. James B. Mitchell, Coast Artillery Corps (Inspector General's Department), vice Lieut. Col. Thomas F. Dwyer, retained in the Quartermaster Corps.

Maj. Alfred S. Morgan, Coast Artillery Corps (Adjutant General's Department), vice Lieut. Col. James B. Mitchell, retained in the Inspector General's Department.

Maj. Charles H. Hilton, Coast Artillery Corps (General Staff Corps), vice Lieut. Col. Alfred S. Morgan, retained in The Adjutant General's Department.

Maj. Edward L. Glasgow, Coast Artillery Corps (Quartermaster Corps), vice Lieut. Col. Charles H. Hilton, retained in the General Staff Corps.

Maj. Percy Willis, Coast Artillery Corps, vice Lieut. Col. Edward L. Glasgow, retained in the Quartermaster Corps.

Maj. William F. Stewart, jr., Coast Artillery Corps, vice Lieut. Col. Sam F. Bottoms, appointed colonel in the National Army.

Maj. Joseph B. Douglas, Coast Artillery Corps (Signal Corps), vice Lieut. Col. Edwin O. Sarratt, appointed colonel in the National Army.

Maj. Hudson T. Patten, Coast Artillery Corps, vice Lieut. Col. Joseph B. Douglas, retained in the Signal Corps.

Maj. Edward Kimmel, Coast Artillery Corps, vice Lieut. Col. Frederick E. Johnston, appointed colonel in the National Army.

Maj. John R. Procter, Coast Artillery Corps (Adjutant General's Department), vice Lieut. Col. Arthur S. Conklin, appointed colonel in the National Army.

Maj. John B. Christian, Coast Artillery Corps (Signal Corps), vice Lieut. Col. John R. Procter, retained in The Adjutant General's Department.

Maj. Frederick W. Phisterer, Coast Artillery Corps, vice Lieut. Col. John B. Christian, retained in the Signal Corps.

Maj. Robert H. C. Kelton, Coast Artillery Corps, vice Lieut. Col. James F. Brady, appointed lieutenant colonel in the National Army.

Maj. Percy P. Bishop, Coast Artillery Corps (General Staff Corps), vice Lieut. Col. Thomas Q. Ashburn, appointed colonel in the National Army.

Maj. Henry J. Hatch, Coast Artillery Corps, vice Lieut. Col. Robert S. Abernethy, appointed colonel in the National Army.

Maj. Elmer J. Wallace, Coast Artillery Corps, vice Lieut. Col. Harold E. Cloke, appointed colonel in the National Army.

Maj. William F. Hase, Coast Artillery Corps, vice Lieut. Col. Philip R. Ward, appointed colonel in the National Army.

Maj. William R. Doores, Coast Artillery Corps, vice Lieut. Col. Samuel A. Kephart, promoted.

Maj. James F. Howell, Coast Artillery Corps, vice Lieut. Col. William Forse, promoted.

Maj. Jesse C. Nicholls, Coast Artillery Corps (Ordnance Department), vice Lieut. Col. Louis A. Burgess, promoted.

Maj. Henry W. Schull, Coast Artillery Corps (Ordnance Department), vice Lieut. Col. Jesse C. Nicholls, retained in the Ordnance Department.

Maj. Clifton C. Carter, Coast Artillery Corps, vice Lieut. Col. Henry W. Schull, retained in the Ordnance Department.

Maj. Stanley D. Embick, Coast Artillery Corps (General Staff Corps), vice Lieut. Col. James A. Shipton, promoted.

Maj. William H. Monroe, Coast Artillery Corps (Ammunition Train), vice Lieut. Col. Stanley D. Embick, retained in the General Staff Corps.

Maj. Leonard D. Waldron, Coast Artillery Corps, vice Lieut. Col. William H. Monroe, retained in Ammunition Train.

Maj. Ernest A. Greenough, Coast Artillery Corps (Quartermaster Corps), vice Lieut. Col. William Chamberlaine, promoted.

Maj. Alexander Greig, jr., Coast Artillery Corps, vice Lieut. Col. Ernest A. Greenough, retained in the Quartermaster Corps.

Maj. James A. Ruggles, Coast Artillery Corps, vice Lieut. Col. Gordon G. Heiner, appointed brigadier general in the National Army.

Maj. Terence E. Murphy, Coast Artillery Corps, vice Lieut. Col. George H. McManus, promoted.

Maj. Harry W. Newton, Coast Artillery Corps (Quartermaster Corps), vice Lieut. Col. James W. Williams, promoted.

First Lieut. Albert D. Chipman, Cavalry, from November 5, 1917, vice Capt. William C. Christy, detailed in the Quartermaster Corps.

First Lieut. Arthur H. Truxes, Cavalry, from November 5, 1917, vice Capt. Henry D. F. Munnikhuysen, detailed in the Quartermaster Corps.

First Lieut. Gordon J. F. Heron, Cavalry, from November 5, 1917, vice Capt. Leon M. Logan, detailed in the Quartermaster Corps.

First Lieut. Carl C. Krueger, Cavalry, subject to examination required by law, from November 5, 1917, vice Capt. James S. Mooney, detailed in the Quartermaster Corps.

First Lieut. Hugh M. Gregory, Cavalry, from November 5, 1917, vice Capt. Lindsley D. Beach, detailed in the Quartermaster Corps.

First Lieut. Oron A. Palmer, Cavalry, from November 6, 1917, vice Capt. Pearson Menoher, placed on the detached officers' list.

First Lieut. Stanley Bacon, Cavalry, from December 11, 1917, vice Capt. George B. Comly, detailed in The Adjutant General's Department.

First Lieut. Samuel V. Constant, Cavalry, subject to examination required by law, from December 19, 1917, vice Capt. Abbott Boone, detailed in the Signal Corps.

First Lieut. William C. Chase, Cavalry, from December 22, 1917, vice Capt. George A. Purington, detailed in Ammunition Train.

First Lieut. Norman E. Fiske, Cavalry, from December 29, 1917, vice Capt. John C. Montgomery, detailed in Ammunition Train.

First Lieut. Donald O. Miller, Cavalry, from December 29, 1917, vice Capt. Ralph I. Sasse, detailed in Ammunition Train.

To be first lieutenants.

Second Lieut. Vance W. Batchelor, Cavalry, with rank from October 12, 1917, vice First Lieut. Ion C. Holm, promoted.

Second Lieut. Truman E. Boudinot, Cavalry, with rank from October 12, 1917, vice First Lieut. Robert C. Candee, promoted.

Second Lieut. James R. Wood, Cavalry, with rank from October 12, 1917, vice First Lieut. Harrison Herman, placed on the detached officers' list.

Second Lieut. William J. Gallagher, Cavalry, with rank from October 12, 1917, vice First Lieut. Chapman Grant, placed on the detached officers' list.

Second Lieut. Charles Rudd, Cavalry, with rank from October 12, 1917, vice First Lieut. Daniel A. Conner, placed on the detached officers' list.

Second Lieut. James G. Strobridge, Cavalry, with rank from October 12, 1917, vice First Lieut. Harley C. Dagley, placed on the detached officers' list.

Second Lieut. Stephen Boon, jr., Cavalry, with rank from October 12, 1917, vice First Lieut. George W. Wersebe, placed on the detached officers' list.

Second Lieut. Harold G. Holt, Cavalry, with rank from October 12, 1917, vice First Lieut. Milton R. Fisher, placed on the detached officers' list.

Second Lieut. Walter Gunther, Cavalry, with rank from October 12, 1917, vice First Lieut. John S. Jadwin, placed on the detached officers' list.

Second Lieut. Roy V. Morledge, Cavalry, with rank from October 12, 1917, vice First Lieut. Arthur P. Thayer, placed on the detached officers' list.

Second Lieut. John W. Noble, Cavalry, with rank from October 12, 1917, vice First Lieut. Edward R. Scheitlin, placed on the detached officers' list.

Second Lieut. Herman R. Crile, Cavalry, with rank from October 12, 1917, vice First Lieut. Edwin A. Martin, placed on the detached officers' list.

Second Lieut. Joseph E. Torrence, Cavalry, with rank from October 12, 1917, vice First Lieut. John B. Harper, placed on the detached officers' list.

Second Lieut. Charles G. Hutchinson, Cavalry, with rank from October 12, 1917, vice First Lieut. James G. Monihan, placed on the detached officers' list

Second Lieut. Chester P. Dorland, Cavalry (Signal Corps), with rank from October 12, 1917, vice First Lieut. Anthony J. Kirst, placed on the detached officers' list.

Second Lieut. Ernest D. McQueen, Cavalry, with rank from October 12, 1917, vice First Lieut. Rexford E. Willoughby, placed on the detached officers' list.

Second Lieut. Archie E. Groff, Cavalry, with rank from October 12, 1917, vice First Lieut. John D. Austin, placed on the detached officers' list.

Second Lieut. George D. Wiltshire, Cavalry, with rank from October 12, 1917, vice First Lieut. John P. Kaye, placed on the detached officers' list.

Second Lieut. Alfonso F. Zerbee, Cavalry, with rank from October 12, 1917, vice First Lieut. James W. Barnett, placed on the detached officers' list.

Second Lieut. Jackson B. Wood, Cavalry, with rank from October 12, 1917, vice First Lieut. Howard C. Tobin, placed on the detached officers' list.

Second Lieut. Arthur J. Wehr, Cavalry, with rank from October 12, 1917, vice First Lieut. John A. Weeks, placed on the detached officers' list.

Second Lieut. Robert C. Scott, Cavalry, with rank from October 12, 1917, vice First Lieut. Lester A. Sprinkle, placed on the detached officers' list.

Second Lieut. Ernest F. Apeldorn, jr., Cavalry, with rank from October 12, 1917, vice First Lieut. Terrill E. Price, placed on the detached officers' list.

Second Lieut. John R. Evans, jr., Cavalry, with rank from October 12, 1917, vice First Lieut. Arthur C. D. Anderson, placed on the detached officers' list.

Second Lieut. De Lancey Bentley, Cavalry, with rank from October 24, 1917, vice First Lieut. Nelson M. Imboden, placed on the detached officers' list.

Second Lieut. William P. Rauch, Cavalry, with rank from October 24, 1917, vice First Lieut. Randolph Dickins, placed on the detached officers' list.

Second Lieut. John A. Garvin, Cavalry, with rank from October 24, 1917, vice First Lieut. Wharton G. Ingram, placed on the detached officers' list.

Second Lieut. Daniel D. Streeter, Cavalry, with rank from October 24, 1917, vice First Lieut. Edward T. Moale, placed on the detached officers' list.

Second Lieut. Randolph Russell, Cavalry, with rank from October 24, 1917, vice First Lieut. Frederick J. Holzbaur, placed on the detached officers' list.

Second Lieut. Brock Putnam, Cavalry, with rank from October 24, 1917, vice First Lieut. Joseph M. Hurt, jr., placed on the detached officers' list.

Second Lieut. Leland L. Miller, Cavalry, with rank from October 24, 1917, vice First Lieut. Charles B. Duncan, placed on the detached officers' list.

Second Lieut. Edwin M. Sumner, Cavalry, with rank from October 24, 1917, vice First Lieut. Ferris M. Angevine, placed on the detached officers' list.

Second Lieut. William J. McChesney, jr., Cavalry, with rank from October 24, 1917, vice First Lieut. Sam G. Fuller, placed on the detached officers' list.

Second Lieut. Joseph Sheehan, Cavalry, with rank from October 24, 1917, vice First Lieut. Delmore S. Wood, placed on the detached officers' list.

Second Lieut. James M. Currin, Cavalry, with rank from October 24, 1917, vice First Lieut. Laurence C. Frizzell, placed on the detached officers' list.

Second Lieut. Thomas H. Green, Cavalry, with rank from October 24, 1917, vice First Lieut. Henry D. Jay, placed on the detached officers' list.

Second Lieut. William H. C. Grimes, Cavalry, with rank from October 24, 1917, vice First Lieut. George Sawtelle, placed on the detached officers' list.

Second Lieut. Russell C. Winchester, Cavalry, with rank from October 24, 1917, vice First Lieut. Ray Harrison, placed on the detached officers' list.

Second Lieut. James S. Rodwell, Cavalry, with rank from October 24, 1917, vice First Lieut. Charles H. Gerhardt, placed on the detached officers' list.

Second Lieut. Charles F. Choate, 3d, Cavalry, with rank from October 24, 1917, vice First Lieut. Walter H. Schulze, placed on the detached officers' list.

Second Lieut. Charles D. Ryan, Cavalry, with rank from October 24, 1917, vice First Lieut. Herbert C. Holdridge, placed on the detached officers' list.

Second Lieut. Nathaniel Holmes, Cavalry, with rank from October 24, 1917, vice First Lieut. Nicholas W. Lisle, placed on the detached officers' list.

Second Lieut. Kirk Broaddus, Cavalry, with rank from October 24, 1917, vice First Lieut. William K. Harrison, jr., placed on the detached officers' list.

Second Lieut. Paul Blackmer, Cavalry, with rank from October 24, 1917, vice First Lieut. Josiah F. Morford, placed on the detached officers' list.

Second Lieut. Herbert A. Suman, Cavalry, with rank from October 24, 1917, vice First Lieut. Ernest N. Harmon, placed on the detached officers' list.

Second Lieut. Harold de B. Bruck, Cavalry, with rank from October 24, 1917, vice First Lieut. Herbert N. Schwarzkopf, placed on the detached officers' list.

Second Lieut. Donald A. Young, Cavalry, with rank from October 24, 1917, vice First Lieut. Robert N. Kunz, placed on the detached officers' list.

Second Lieut. Hans C. Minuth, Cavalry, with rank from October 24, 1917, vice First Lieut. Charles S. Kilburn, placed on the detached officers' list.

Second Lieut. Edwin C. Gere, Cavalry, with rank from October 24, 1917, vice First Lieut. Charles R. Johnson, jr., placed on the detached officers' list.

Second Lieut. John M. Sweeney, jr., Cavalry, with rank from October 24, 1917, vice First Lieut. Mortimer H. Christian, placed on the detached officers' list.

Second Lieut. George G. Ball, Cavalry, with rank from October 24, 1917, vice First Lieut. Heywood S. Dodd, placed on the detached officers' list.

Second Lieut. Samuel C. Skemp, Cavalry, with rank from October 24, 1917, vice First Lieut. Maurice Morgan, placed on the detached officers' list.

Second Lieut. Jacob M. Carter, jr., Cavalry, with rank from October 25, 1917, vice First Lieut. Carter R. McLennan, placed on the detached officers' list.

Second Lieut. Thomas P. Hazard, Cavalry, with rank from October 25, 1917, vice First Lieut. James L. Franciscus, placed on the detached officers' list.

Second Lieut. Francis C. Dossert, Cavalry, with rank from October 25, 1917, vice First Lieut. Erskine A. Franklin, placed on the detached officers' list.

Second Lieut. George W. Ewing, jr., Cavalry, with rank from October 25, 1917, vice First Lieut. Herbert E. Watkins, placed on the detached officers' list.

Second Lieut. Crawford C. Madeira, Cavalry, with rank from October 25, 1917, vice First Lieut. Lathan A. Collins, placed on the detached officers' list.

Second Lieut. Charles P. Davis, Cavalry, with rank from October 25, 1917, vice First Lieut. John A. Hettinger, placed on the detached officers' list.

Second Lieut. Harry R. Kilbourne, Cavalry, with rank from October 25, 1917, vice First Lieut. Lloyd W. Biggs, placed on the detached officers' list.

Second Lieut. Elmer E. Finck, Cavalry, with rank from October 25, 1917, vice First Lieut. William D. Savage, placed on the detached officers' list.

Second Lieut. Harry H. Semmes, Cavalry, with rank from October 25, 1917, vice First Lieut. Kenneth McCatty, promoted.

Second Lieut. Clifford A. Eastwood, Cavalry, with rank from October 25, 1917, vice First Lieut. Joseph W. Geer, promoted.

Second Lieut. Guy A. Russell, Cavalry, with rank from October 25, 1917, vice First Lieut. Leslie B. C. Jones, promoted.

Second Lieut. Fenton S. Jacobs, Cavalry, with rank from November 5, 1917, vice First Lieut. Beverly H. Coiner, promoted.

Second Lieut. Catesby ap C. Jones, Cavalry, with rank from November 5, 1917, vice First Lieut. Albert D. Chipman, promoted.

Second Lieut. Charles Wharton, Cavalry, with rank from November 5, 1917, vice First Lieut. Arthur H. Truxes, promoted.

Second Lieut. W. Dirk Van Ingen, Cavalry, with rank from November 5, 1917, vice First Lieut. Carl C. Krueger, promoted.

Second Lieut. Herbert V. Scanlan, Cavalry, with rank from November 5, 1917, vice First Lieut. Hugh M. Gregory, promoted.

Second Lieut. Sigurd von Christierson, Cavalry, with rank from November 5, 1917, vice First Lieut. Frank H. Barnhardt, placed on the detached officers' list.

Second Lieut. Kenneth O. Spinning, Cavalry, with rank from November 10, 1917, vice First Lieut. Louis Cansler, detailed in the Signal Corps.

Second Lieut. Curt E. Hansen, Cavalry, with rank from December 1, 1917, vice First Lieut. Richard N. Mather, dismissed.

Second Lieut. Vincent P. Ryan, Cavalry, with rank from December 2, 1917, vice First Lieut. Horace K. Havlicek, died December 1, 1917.

Second Lieut. Raymond C. Blatt, Cavalry, with rank from December 11, 1917, vice First Lieut. Stanley Bacon, promoted.

Second Lieut. Clinton de Witt, Cavalry, with rank from December 22, 1917, vice First Lieut. William C. Chase, promoted.

Second Lieut. Harold J. Adams, Cavalry, with rank from December 29, 1917, vice First Lieut. Norman E. Fiske, promoted.

Second Lieut. William B. Van Auken, Cavalry, with rank from December 29, 1917, vice First Lieut. Donald O. Miller, promoted.

Second Lieut. Harold Kitson, Cavalry, with rank from January 8, 1918, vice First Lieut. Merl J. Flatt, appointment terminated.

Second Lieut. John Boies, Cavalry, with rank from January 9, 1918, vice First Lieut. Alan B. Edson, appointment terminated.

INFANTRY ARM.

To be major with rank from November 29, 1917.

Capt. Harry H. Pritchett, Infantry, vice Maj. George E. Goodrich, detailed in the Signal Corps.

To be major with rank from November 30, 1917.

Capt. Edward L. Field, Infantry, vice Maj. James W. H. Reisinger, detailed in the Quartermaster Corps.

To be majors with rank from December 1, 1917.

Capt. Earl C. Buck, Infantry, vice Maj. Charles B. Elliott, resigned commission as temporary major.

Capt. Jere Baxter, Infantry, detached officers' list, vice Maj. Edmund C. Waddill, resigned commission as temporary major.

Capt. A. Ellicott Brown, Infantry, vice Maj. Arthur M. Ferguson, detailed in The Adjutant General's Department.

To be majors with rank from December 19, 1917.

Capt. Donald J. MacLachlan, Infantry, vice Maj. Resolve P. Palmer, detailed in the Signal Corps.

Capt. Charles H. Rice, Infantry, vice Maj. James G. Boswell, detailed in the Signal Corps.

To be captains.

First Lieut. Sigurd J. Simonsen, Infantry, to be captain from December 2, 1917, subject to examination, vice Capt. James A. O'Brien, transferred to the detached officers' list.

First Lieut. Thomas G. Bond, Infantry, to be captain from December 19, 1917, subject to examination, vice Capt. Otis K. Sadtler, detailed in the Signal Corps.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *February 13, 1918.*

The House met at 12 o'clock noon.

The Rev. William Couden, of Washington, D. C., offered the following prayer:

O God, Father Almighty, from wicked intrigue and unholy sedition defend our country. Let our growth as a Nation be not merely an accruing of worldly wealth and potency, but in equal measure at least edify us in the things not seen but eternal.

We beseech Thee to give success to our fighting forces on sea, on land, and in the air; and to be with every individual man of them in office and in the ranks, and with every doctor, nurse, Red Cross worker, and laborer for moral health among our forces.

For ourselves personally, we beg Thee, let not our desires outrun conscience. Bar us from insidious fallacies of act as well as of thought. Steer a right course for us between our wistfulness and our power. And keep us in correct relationship to self, to our neighbor, and to Thee; that for us the dear Savior may not have lived and died in vain. Amen.

The Journal of the proceedings of yesterday was read and approved.

CHANGE OF REFERENCE.

Mr. CLARK of Florida. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Florida rise?

Mr. CLARK of Florida. Mr. Speaker, I rise to make a motion to change the reference of a bill. I move that the bill H. R. 9642, referred to the Committee on Labor, be rereferred to the Committee on Public Buildings and Grounds.

The SPEAKER. Has the gentleman authority to make that request from the committee?

Mr. CLARK of Florida. Yes; by direction of the committee I make the motion, and pending that I ask——

The SPEAKER. The Clerk will report the bill.

Mr. CLARK of Florida. Then I will not make the unanimous-consent request. I simply wanted the House to understand what it was.

The SPEAKER. The gentleman from Florida, by authority of the Committee on Public Buildings and Grounds, moves that the bill which the Clerk is about to report be taken from the Committee on Labor and rereferred to the Committee on Public Buildings and Grounds. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 9642) to authorize the Secretary of Labor to provide housing for war needs.

Be it enacted, etc., That the Secretary of Labor, for the purposes of providing housing, transportation, and other community facilities for employees of the Government and for industrial workers engaged in industries connected with the national defense and security, and their families, is hereby authorized and empowered within the limits of the amounts herein authorized—

(a) To purchase, lease, construct, requisition, or acquire by condemnation or otherwise such houses, buildings, furnishings, improvements, facilities, and parts thereof as he may determine.

(b) To purchase, lease, requisition, or acquire by condemnation or otherwise any improved or unimproved land or any right, title, or interest therein, on which such houses, buildings, improvements, facilities, and parts thereof have been or may be constructed.

(c) To equip, manage, maintain, alter, sell, lease, exchange, or otherwise dispose of such lands or right, title, or interest therein, houses, buildings, improvements, facilities, parts thereof, and equipment, upon such terms and conditions as he may determine.

(d) To aid in providing, equipping, managing, and maintaining houses, buildings, improvements, and facilities by loan or otherwise to such person or persons and upon such terms and conditions as he may determine.

The Secretary of Labor may exercise any power and discretion herein granted, and may enter into any arrangement or contract incidental thereto, through such agency or agencies as he may create or designate.

SEC. 2. That whenever the Secretary of Labor shall purchase, lease, requisition, or acquire by condemnation or otherwise such land or right, title, or interest therein, or such houses, buildings, furnishings, improvements, facilities, and parts thereof, he shall make just compensation therefor, to be determined by him, and if the amount thereof so determined is unsatisfactory to the person entitled to receive the same, such person shall be paid 75 per cent of the amount so determined and shall be entitled to sue the United States to recover such further sum as, added to such 75 per cent, will make up such amount as will be just compensation therefor in the manner provided for by section 24, paragraph 20 and section 145 of the Judicial Code.

SEC. 3. That upon the requisition of or the filing of a petition for the condemnation hereunder of such land, or any right, title, or interest therein, or such houses, buildings, furnishings, improvements, facilities, and parts thereof, immediate possession thereof may be taken to the extent of the interest to be acquired, and the same may be occupied and used, and the provisions of section 355 of the Revised Statutes, providing that no public money shall be expended upon such land until the written opinion of the Attorney General shall be had in favor of the validity of the title, nor until the consent of the legislature of the State in which the land is located has been given, shall be, and the same are hereby, suspended as to all real estate acquired hereunder.

SEC. 4. That the word "person" used herein shall include any person, trustee, firm, or corporation.

SEC. 5. That the power and authority granted in paragraphs (a), (b), and (d) hereof shall cease with the termination of the present war with Germany.

SEC. 6. That for carrying out the provisions of this act, and for the administration thereof, the sum of $50,000,000 is hereby appropriated out of any funds in the Treasury not otherwise appropriated.

Mr. LONDON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LONDON. Is this motion debatable?

The SPEAKER. It is not.

Mr. LONDON. Reserving the right to object——

The SPEAKER. The gentleman can not object.

Mr. LONDON. I ask unanimous consent to make a statement for one minute.

Mr. FLOOD. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Virginia makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred gentlemen are present, not a quorum.

Mr. KITCHIN. Mr. Speaker, I move a call of the House.

The SPEAKER. The gentleman from North Carolina [Mr. KITCHIN] moves a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

Mr. CLARK of Florida. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CLARK of Florida. On this call is the vote on the motion?

The SPEAKER. No; the vote is simply "present."

The roll was called, and the following Members failed to answer to their names:

Almon	Dyer	Knutson	Scully
Anderson	Edmonds	LaGuardia	Sisson
Ashbrook	Ellsworth	McCormick	Smith, Charles B.
Austin	Fairchild, Geo. W.	Magee	Snyder
Britten	Flynn	Maher	Steenerson
Brumbaugh	Godwin, N. C.	Miller, Minn.	Sterling, Pa.
Capstick	Goodall	Montague	Strong
Carlin	Gray, Ala.	Nicholls, S. C.	Sullivan
Chandler, N. Y.	Gray, N. J.	Olney	Temple
Classon	Hamilton, N. Y.	Padgett	Tilson
Coady	Haskell	Platt	Vare
Crosser	Hastings	Pratt	Venable
Curry, Cal.	Heintz	Ragsdale	Volstead
Davidson	Holland	Riordan	Ward
Davis	Hollingsworth	Rodenberg	Watson, Pa.
Dewalt	Hood	Rowland	White, Ohio
Dillon	Humphreys	Sanders, La.	Wilson, La.
Drukker	Johnson, S. Dak.	Sanders, N. Y.	Young, N. Dak.
Dunn	Kettner	Scott, Pa.	

The SPEAKER. On this vote 353 Members, a quorum, have answered to their names.

Mr. KITCHIN. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors.

The question is on the motion made by the gentleman from Florida [Mr. CLARK].

Mr. NOLAN. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from California rise?

Mr. NOLAN. I rise to make a point of order on the motion of the gentleman from Florida [Mr. CLARK] that his motion is not in order at this time. It is contrary to the practice of the House to interfere with a committee that has held hearings on the bill, and we have held extensive hearings on this labor-housing bill.

Mr. CLARK of Florida. Mr. Speaker, I rise to make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CLARK of Florida. Does not the gentleman's objection come too late? The matter has already been considered and submitted.

The SPEAKER. The matter has not been considered and is not debatable. If the conditions as stated by the gentleman from California [Mr. NOLAN] are correct, this motion is not in order.

Mr. CLARK of Florida. Mr. Speaker, I want to be heard on that.

The SPEAKER. Does the gentleman dispute the fact? If so, the Chair will hear the gentleman.

Mr. CLARK of Florida. Mr. Speaker——

The SPEAKER. The Chair wants to find out before this argument starts whether or not it is conceded that the Committee on Labor has had hearings on this bill?

Mr. CLARK of Florida. I understand they have.

The SPEAKER. Then the point of order is well taken.

Mr. CRISP. Mr. Speaker, I want to be heard on that proposition.

Mr. CLARK of Florida. I would like to be heard.

The SPEAKER. If the gentleman will proceed, the Chair will hear him.

Mr. CLARK of Florida. Under the third paragraph of Rule XXIV, provision is made for the making of this motion immediately after the reading of the Journal upon any day. I will show the Speaker in the rulings, in the fourth volume of Hinds' Precedents, that Mr. Speaker Crisp, Mr. Speaker Reed, and Mr. Speaker CANNON have each one of them concurred in the opinion that this motion can be made until the bill is actually reported to the House.

The SPEAKER. Well, the gentleman will please read the authority.

Mr. CLARK of Florida. The question has been raised in a number of cases, and in section No. 4365, in the fourth volume of Hinds' Precedents, it says:

According to the later practice of the House the erroneous reference of a public bill, if it remain uncorrected, in effect gives jurisdiction to the committee receiving it.

On October 19, 1893, Mr. Joseph Wheeler, of Alabama, on behalf of the Committee on the Territories, presented for consideration the bill (H. R. 3606) to require railroad companies operating railroads in the Territories over a right of way granted by the Government to establish stations and depots at all town sites on the lines of said roads established by the Interior Department.

Mr. W. A. Stone, of Pennsylvania, made the point of order that the bill, not being within the jurisdiction of the Committee on the Territories, had been erroneously reported and was improperly on the calendar.

Mr. KITCHIN. Reported?

Mr. CLARK of Florida. Yes; and was improperly on the calendar.

The Speaker overruled the point, holding as follows—

And the Speaker was Mr. Crisp, of Georgia—

The reference of a public bill, as described by the rules, is different from that prescribed in regard to private bills. An erroneous reference of a public bill may be corrected any morning immediately after the reading of the Journal, either by unanimous consent or on motion of a Member representing the committee to which the bill has been erroneously referred or on motion of the committee claiming jurisdiction. And where a public bill has been suffered, even erroneously, to be considered by a committee and that committee has reported it back to the House, there is no way of raising the question of jurisdiction if the bill is a public bill.

On January 12, 1897, is another case, as follows:

During the call of committees, in the morning hour, Mr. Charles S. Hartman, of Montana, called up, when the Committee on Mines and Mining was called, the bill (H. R. 6780) to amend section 2335 of the Revised Statutes.

Mr. John F. Lacey, of Iowa, reserved the point of order that the bill should have been referred to the Committee on Public Lands and not to the Committee on Mines and Mining.

The Speaker, Mr. Reed, said:

The rules prescribe that if by any error or misunderstanding a bill has been sent to the wrong committee, it is the duty of the committee who desire jurisdiction to present the matter to the House for a change; and no question having been raised, and the committee having reported, the Chair thinks it is too late to raise the question.

And then again, in section 4370 of Hinds:

On January 15, 1900, the bill (H. R. 5042) to provide for improvements in the tax departments of the District of Columbia, which had been reported from the Committee on the District of Columbia, was called up for consideration, when Mr. William W. Grout, of Vermont, raised the question that the bill should have been referred to the Committee on Appropriations, as it carried an appropriation.

After debate the Speaker, Mr. Henderson, of Iowa, said:

The point of order made by the gentleman from Vermont, as the Chair understands, is that this committee—the Committee on the District of Columbia—has no jurisdiction over this bill because it contains an appropriation. It has been said by Speaker Crisp, Speaker Reed, and others that an erroneous reference of a public bill, remaining uncorrected, in effect gives jurisdiction to the committee. The House has had its day in court to have the erroneous reference corrected and has failed to do so. The Chair is of the opinion, therefore, that this matter is properly within the control of this committee, and that it is within the power of the House in considering the bill to determine whether to leave the appropriation in the bill or to strike the appropriation out of the bill and leave only the matters of general legislation.

That was after the bill was reported and was in the House and being considered. And I assert, Mr. Speaker, that there is not a single precedent in these books to show where any Speaker has ever held that a motion to change a reference was not in order up to the very moment that the bill was reported by the committee having charge of it and it was on the calendar. Even if it had been reported and had not been placed on the calendar the motion can be made, and it is in order to make it. I do not think, Mr. Speaker, that there is anything further to say on the point of order.

Besides that it has been suggested to me, Mr. Speaker, that if that were not the rule a Member, if he saw fit to do so, could introduce a bill, have it all understood, have a meeting of his committee, and conduct hearings, and thus deprive any committee of this House of jurisdiction simply by getting it to the committee and having a hearing started.

Mr. NOLAN. Mr. Speaker, the precedents cited by the gentleman from Florida are decisions rendered by previous Speakers of this House on an erroneous reference. Our contention is that there is no such thing here as an erroneous reference of this bill.

Mr. CLARK of Florida. Mr. Speaker, a point of order. The gentleman can not discuss the merits of the question, whether it is erroneous or not. It is not debatable.

Mr. NOLAN. I was calling attention to the fact that the precedents cited by the gentleman refer to an erroneous reference.

The SPEAKER. What does the gentleman say about these authorities that have been cited?

Mr. NOLAN. I will say this about it: If they are allowed to stand in this instance, there is no reason in the world why the Committee on Public Buildings and Grounds can not come in here and take away from the Committee on Military Affairs, or the Committee on Naval Affairs, or from every other appropriating committee of the House, its authority to appropriate for buildings for war purposes, and there is hardly a bill that comes into this House, or that has come into this House since we declared war, that has not contained some appropriation for building purposes in connection with war activities.

Now, this bill gives the Secretary of Labor the right to erect housing facilities, building activities in reference to war industries; and if the gentleman's suggestion is sound, there is not a committee of this House that is safe in the future, so far as making appropriations and provisions for building purposes are concerned. In other words, the Committee on Public Buildings and Grounds becomes supreme over the Committee on Appropriations, over the Committee on Military Affairs, and over the Committee on Naval Affairs, and every other appropriating committee of the House.

Mr. CANNON. Mr. Speaker, will the gentleman yield?

Mr. NOLAN. Yes; I yield.

Mr. CANNON. It takes a majority of the House to take the bill from the Committee on Labor and refer it to the Committee on Public Buildings and Grounds. The only question I see is the question whether the motion is in order, the bill not having been reported to the House under the rules.

Mr. NOLAN. In support of the gentleman's motion, and against the point of order, he is citing certain precedents and rulings established by former Speakers of the House. My contention is that if that is good, sound logic, there is not a committee of the House that has the right to appropriate, or the right to authorize appropriations, that is safe during the period of the war, or at any other time, from a motion to rerefer after

hearings have been held; and my point is that the Committee on Labor has given consideration to this measure, it is about ready to report the bill, and would undoubtedly have reported it this morning but for the fact that the Secretary of Labor himself has been out of town and could not get before the committee.

The SPEAKER. The Chair is ready to rule. The House, of course, is the highest parliamentary authority, higher than any Speaker or than all the Speakers, and it takes a majority of this House present to make the transfer and the House has the absolute right to refer any bill to any committee. The authorities cited by the gentleman from Florida [Mr. CLARK] convince the Speaker that the point of order of the gentleman from California [Mr. NOLAN] ought to be overruled.

Mr. SHERLEY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SHERLEY. Is it in order to amend the motion of the gentleman from Florida by moving that the bill be referred to the Committee on Appropriations, where under the rules it belongs?

The SPEAKER. Yes.

Mr. SHERLEY. Then I make that motion.

The SPEAKER. The gentleman from Kentucky offers to amend the motion of the gentleman from Florida by referring this bill to the Committee on Appropriations.

Mr. CRISP. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CRISP. Is the gentleman from Kentucky authorized by the Committee on Appropriations to make that motion?

The SPEAKER. Was the gentleman authorized by his committee?

Mr. SHERLEY. No. I did not make the request in that form, Mr. Speaker. I asked if it was in order, the motion having been made, to amend.

Mr. SAUNDERS of Virginia. I make specifically the point of order, Mr. Speaker, against that, that in order to be qualified to move this amendment he must come within the rule and be vested by the committee with the power to make it, just as much as to make an original motion.

The SPEAKER. The Chair thinks the gentleman from Virginia is right.

Mr. LENROOT. Mr. Speaker, may I be heard?

The SPEAKER. Heard about what?

Mr. LENROOT. About the question that the gentleman from Kentucky has raised.

The SPEAKER. Yes. The Chair will hear the gentleman.

Mr. LENROOT. I would like to call the attention of the Chair to the rule under which this motion is in order at all, and I submit to the Chair that the motion being then in order under the rule, it is within the province of the House to refer this bill to any committee that it sees fit.

The rule says, "Correction in case of error of reference may be made by the House, without debate, in accordance with Rule XI." Now, the House is not confined, if it sees fit to correct a reference, to the committee that makes the motion or asks for the correction. It is open to the House in the case of an erroneous reference to refer the bill to any committee that the House thinks it ought to be referred to under the general rules of the House, and therefore I submit that the amendment of the gentleman from Kentucky is in order.

Mr. SAUNDERS of Virginia. Mr. Speaker, I call attention to the fact that any Member can make this motion only when the proceeding is by unanimous consent. The rule provides that "correction in case of error of reference of a general bill may be made by the House without debate, in accordance with Rule XI, on any day immediately following the reading of the Journal, by unanimous consent, or on motion of a committee claiming jurisdiction." Hence the contention of the gentleman from Wisconsin can not be maintained with respect to the present situation, which is a motion for correction by direction of a committee claiming jurisdiction. No question of unanimous consent is presented.

If some other committee claims jurisdiction of this bill, and desires to assert its claim by an amendment to the pending motion, then the amendment should be offered by direction of, and under authority from, that committee. This amendment is nothing but another claim of jurisdiction, seeking to supersede the claim of the Committee on Public Buildings and Grounds. Of necessity it must stand precisely on the footing of the original motion, and the Member making it, is not in order, unless he speaks by authority and direction of his committee. Otherwise it is not the motion of a committee claiming jurisdiction.

Mr. SHERLEY. Mr. Speaker, I can not concede the proposition just made by the gentleman from Virginia [Mr. SAUNDERS]. It is perfectly manifest that there is a difference between a situation that arises after a matter gets before the House and what might be the situation when some one is endeavoring to get it before the House. Manifestly I would have no right to move a change of reference as an original proposition, except by instruction of my committee; but when the matter has been moved, why, then, I submit, as the gentleman from Wisconsin says, the motion before the House is subject to any proper amendment.

But I do not want to complicate this situation. The Committee on Appropriations is going to appropriate the money to deal with the situation, irrespective of where these bills go. I withdraw my motion.

The SPEAKER. The question is on the motion of the gentleman from Florida to take this bill away from the Labor Committee and refer it to the Committee on Public Buildings and Grounds.

The question being taken, the Speaker announced that the ayes appeared to have it.

Mr. NOLAN. Division!

The House divided; and there were—ayes 173, noes 59.

Mr. NOLAN. Mr. Speaker, I ask for the yeas and nays.

The SPEAKER. The gentleman from California asks for the yeas and nays. All those in favor of ordering the yeas and nays will rise and stand until they are counted. [After counting.] Thirty-eight Members rising, not a sufficient number.

Mr. LONDON. Mr. Speaker, I ask for the other side.

The SPEAKER. The gentleman from New York demands the other side. Those opposed to taking this vote by the yeas and nays will rise and stand until they are counted. [After counting.] Two hundred Members in the negative. Thirty-eight are not a sufficient number. The yeas and nays are refused, and the motion of the gentleman from Florida is agreed to.

LEAVE TO FILE VIEWS OF MINORITY.

Mr. TINKHAM. Mr. Speaker, I desire unanimous consent to file the views of the minority on H. R. 9248, which is to be considered to-morrow.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to file the views of the minority on the bill he names. Is there objection?

There was no objection.

CALENDAR WEDNESDAY—DEPORTATION OF CERTAIN ALIENS.

The SPEAKER. This is Calendar Wednesday. The unfinished business is the bill (H. R. 5667) to provide for the deportation of certain aliens, and for other purposes, and the House automatically resolves itself into the Committee of the Whole House on the state of the Union, with the gentleman from Missouri [Mr. RUSSELL] in the chair.

The CHAIRMAN. The House is in Committee of the Whole for the further consideration of House bill 5667, to provide for the deportation of certain aliens, and for other purposes.

Mr. BURNETT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Chair will say to the gentleman that there is an amendment pending not disposed of.

Mr. BURNETT. What is the amendment?

Mr. PARKER of New Jersey. My amendment.

The CHAIRMAN. The amendment offered by the gentleman from New Jersey [Mr. PARKER], which was pending when the House adjourned last Wednesday.

Mr. BURNETT. Mr. Chairman, I believe the gentleman from New Jersey had spoken on that amendment.

The CHAIRMAN. All debate on the amendment was exhausted.

Mr. RAKER. I move to strike out the last two words.

Mr. PARKER of New Jersey. I ask unanimous consent that the paragraph in which the amendment occurs may be read, so that the House may see the result of the amendment.

The CHAIRMAN. The gentleman from New Jersey asks unanimous consent that the paragraph of the bill affected by the amendment be read for the information of the House. Is there objection?

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. PARKER of New Jersey: Page 1, line 3, after the words "that any alien," strike out the words "eligible by existing law to become a naturalized citizen"; also all of lines 4, 5, 6, 7, 8, and 9; and also the word "said," in line 11, after the words "exemption from"; also, on page 2, line 3, strike out "and shall as soon as practicable be deported"; also strike out all of line 4 and the words "and deportation" in line 11, so that as amended the paragraph will read:

"That any alien who by himself or by anyone else has heretofore claimed, or shall hereafter claim, exemption from selective draft on account of being an alien, shall forever be denied the right of becoming a citizen of the United States or of any of its possessions.

"Any alien who may have been exempted from said selective draft on account of his alienage prior to the passage of this act may, within 60 days after the passage of this act, withdraw such exemption and

submit himself to the operation of said selective draft, and in that event shall not be held to be within the operations of this section as to the forfeiture of citizenship. *Provided*, That the President is hereby authorized to make such rules and regulations as may be necessary to enforce the provisions of this section."

Mr. RAKER. Mr. Chairman, a parliamentary inquiry. Is not this amendment divisible?

The CHAIRMAN. Does the gentleman desire to be heard on the question?

Mr. RAKER. It seems so plain that it ought not to require any presentation, and I simply want the ruling of the Chair that it is divisible.

Mr. PARKER of New Jersey. I desire to speak on that point of order for a moment when the gentleman has yielded the floor.

The CHAIRMAN. Does the gentleman from California yield the floor?

Mr. RAKER. On the point of order; yes.

Mr. PARKER of New Jersey. I claim it is not divisible.

The CHAIRMAN. Does the gentleman from New Jersey desire to be heard?

Mr. PARKER of New Jersey. Only on the point of order. I say it is not divisible. I want to get rid of deportation, which is obviously applicable to only one class of aliens, those who are subject to military duty abroad against the Germans; this will leave only the bar to naturalization which is applicable to all aliens. The matter can not be fairly considered separately, because what I wish to do is to make this bill a complete bill as to barring all these aliens from naturalization. That does not come within any treaty, and if you include all the aliens that are here it does not conflict with the provision in many treaties called the most favored nation clause. We make a simple statement by this provision, that no man who is here who claims exemption from draft because he is a foreigner can hereafter become an American citizen. I have given notice that if my amendment carries I shall move an amendment at the end of the word "possessions" that he shall be barred from hereafter acquiring any interest in lands in the United States.

Mr. RAKER. Mr. Chairman, the very statement which the gentleman from New Jersey makes as to what he desires to accomplish shows that this amendment is divisible. He could move to strike out and insert an amendment to cover what he desires, but unquestionably the Chair will not hold that a man can not move to strike out all through the section a paragraph here, a sentence there, and a word here, and not have the amendment divisible.

Mr. SAUNDERS of Virginia. Mr. Chairman, why is not the motion divisible? The Chair is not concerned with what the gentleman from New Jersey seeks to accomplish, but with the rights of the House under parliamentary law with respect to his motion. He says that he has a certain definite object to be accomplished by his amendment, and if it is held to be divisible so that certain portions may be stricken out by a vote and in the results, are stricken out, then he will not attain that object. But the gentleman's object is not a parliamentary proposition. The parliamentary proposition with which the House is concerned is the right to fashion this bill according to its notion, conformably to parliamentary law. The gentleman has moved to strike out various sentences in a paragraph, embodying respectively different propositions. The House might be willing to strike out some of the sentences to which the gentleman's motion relates, and unwilling to strike out others. Why should the House be denied the right to do this? The House might not be willing to strike out all that the motion proposes to strike out, but might be perfectly willing to go part of the way and strike out some of the language proposed to be eliminated. Upon what principle of parliamentary practice or procedure can it be held that the right to a division of this motion should be denied? Any motion including more than one proposition may be divided, and the several propositions voted on seriatim.

Mr. PARKER of New Jersey. Did the gentleman ever have a motion to strike out that was divisible?

Mr. SAUNDERS of Virginia. I do not recollect that personally I ever had, but that does not affect the parliamentary right of a Member to demand a division. The question is one of parliamentary law, of fundamental principle in parliamentary procedure, not of my personal experience.

Mr. PARKER of New Jersey. The first paragraph is in one sentence, and you could not make any sense of it if you divide up the amendment. It is to strike out certain words in that paragraph, and that motion is not divisible. The motion as to the other paragraph would follow as a matter of course to strike out the words "and deportation," but the first paragraph is one sentence and you can not divide it.

Mr. SAUNDERS of Virginia. Mr. Chairman, when I make a motion to strike out certain words, is it not competent for any Member to move to amend by striking out certain language contained in my motion? This would be an amendment to an amendment, nothing more nor less.

Mr. WALSH. Will the gentleman yield for a question?

Mr. SAUNDERS of Virginia. Yes.

Mr. WALSH. Does the gentleman contend that this motion can be divided so as to permit a separate vote on each word to be stricken out?

Mr. SAUNDERS of Virginia. Oh no, not at all. The principle of divisibility applies only when the amendment, or other matter proposed to be divided for the purpose of voting, contains more than one distinct proposition.

The CHAIRMAN. The Chair is ready to rule. The Chair has looked into this in the limited time that he has had, and he is satisfied that the amendment is divisible. It strikes out language in four different places. One might be agreed to by the House and another defeated and still not interfere with the sense of the section. I see no reason why it should be held to be indivisible when it is to strike out language in four places.

Mr. RAKER. Mr. Chairman, I raise the point of order to the first amendment on the ground that the committee has already passed on that amendment. There was a motion made to strike it out and the House defeated the motion. That is the first amendment offered by the gentleman from New Jersey.

Mr. STAFFORD. Mr. Chairman, I make the point of order that the gentleman's point of order comes too late. If the ruling of the Chair is to be followed, then it comes too late now for the gentleman from California to make the point of order that the original motion of the gentleman from New Jersey is not in order because the amendment has been debated. In last Wednesday's proceedings we debated this question for 15 minutes or half an hour. A point of order was reserved on the paragraph and it was overruled on that occasion. As soon as the Chair rules on the point of order I wish to make a parliamentary inquiry.

Mr. RAKER. Mr. Chairman, I made the point of order and the Chair overruled the point of order, and I came back here to-day with authorities to show that the Chair had misconstrued the law. He now holds that the motion to amend is divisible, and, therefore, my point of order against the amendment must lie. Therefore the first portion of the amendment can not be considered.

The CHAIRMAN. The Chair is ready to rule. The Chair is of opinion that the point of order made by the gentleman from Wisconsin [Mr. STAFFORD] must be sustained. This amendment was debated on Wednesday last, for 15 or 20 minutes, and the point of order of the gentleman from California [Mr. RAKER] comes too late.

Mr. STAFFORD. Mr. Chairman, I desire to submit a parliamentary inquiry. I would like to inquire of the Chair what are the four substantive propositions involved into which this amendment to strike out is divisible?

The CHAIRMAN. The Chair understands that the authorities have held that the grammatical construction and not the legislative intent controls. The first portion of the amendment is on the first page, beginning with the word "eligible," in line 3, and runs to the word "act," in line 9. The Chair understands the motion is to strike out that part of the section. That is the first substantive proposition.

Mr. BURNETT. Mr. Chairman, I move that all debate upon this amendment close in five minutes.

Mr. PARKER of New Jersey. Mr. Chairman, I thought my amendment had already been debated and that debate had been closed upon it.

The CHAIRMAN. Debate has been closed on the amendment. That was done when we adjourned on Wednesday last.

Mr. PARKER of New Jersey. Mr. Chairman, I ask for a vote on the various parts of my amendment.

Mr. FLOOD. Mr. Chairman, I ask unanimous consent to have the amendment again reported.

The CHAIRMAN. If there is no objection, the Clerk will report the first substantive portion of the amendment.

There was no objection, and the Clerk read as follows:

Page 1, line 3, after the word "alien," strike out the words "eligible by existing law to become a natural," and also all of the matter on lines 4, 5, 6, 7, 8, and 9.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. PARKER of New Jersey) there were—ayes 11, noes 38.

So the amendment was rejected.

The CHAIRMAN. The Clerk will report the next portion of the amendment.

The Clerk read as follows:

Page 1, line 11, strike out the word "said."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will report the next part of the amendment.

The Clerk read as follows:

Page 2, lines 3 and 4, after the word "possessions," in line 3, strike out the words "and shall as soon as practicable be deported to the country of which he is a subject or citizen."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will report the remaining portion of the amendment.

The Clerk read as follows:

Page 2, line 11, after the word "citizenship," strike out the words "and deportation."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

Mr. PARKER of New Jersey. Mr. Chairman, may I ask the gentleman from Alabama [Mr. BURNETT] if he has any objection to the following amendment being offered: To insert on page 2, line 3, after the words "of its possessions," the words "and shall forever be denied the right of acquiring any interest or estate, legal or equitable, in any lands within the United States or any of its possessions." That strengthens the gentleman's bill, and I would like to offer that amendment if it is agreeable

Mr. BURNETT. Mr. Chairman, I could not agree to that. I now call for the reading of my amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Alabama.

The Clerk read as follows:

Page 1, line 3, after the word "alien," insert the words "whose status is such that he may become."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. GRAHAM of Illinois. Mr. Chairman, I desire to offer a substitute for that amendment.

Mr. BURNETT. Let the substitute be reported.

The CHAIRMAN. The Clerk will report the amendment in the nature of a substitute offered by the gentleman from Pennsylvania.

Mr. MOORE of Pennsylvania. Mr. Chairman, before that amendment is read, may we not have the amendment of the gentleman from Alabama again reported?

The CHAIRMAN. Without objection, the Clerk will again report the amendment offered by the gentleman from Alabama.

There was no objection, and the Clerk again reported the amendment.

The CHAIRMAN. The Clerk will report the substitute offered by the gentleman from Pennsylvania.

The Clerk read as follows:

Strike out in the third line, page 1, the words "that any alien eligible by existing law to become" and insert in lieu thereof the words "that any alien a resident of the United States who under existing law could become eligible to become."

The CHAIRMAN. The question is on agreeing to the substitute.

Mr. BURNETT. Mr. Chairman, does the gentleman from Pennsylvania desire to be heard on his substitute?

Mr. GRAHAM of Pennsylvania. Yes.

Mr. BURNETT. I desire to be heard in reply to the gentleman.

Mr. GRAHAM of Pennsylvania. Mr. Chairman, on Wednesday last I presented for the consideration of my colleagues a criticism upon the use of the words "eligible to become a citizen," and it is in furtherance of those views that I have now offered this substitute for the amendment which the gentleman from Alabama has offered.

My reasons are the same as those which were urged at that time. I do not think that his amendment cures the difficulty. The gentleman has intimated to me that the interpretation of the word "eligible" as explained at that time is correct. "Eligible" means qualified to become citizens, they must have the requisites necessary for citizenship, and he has simply substituted the words "status to become." Now, "status to become" does not change the effect a particle, because the status covers and includes a qualification of eligibility. Mine covered the ground of the objection and in addition inserts the words "and resident." I understand the State Department is very solicitous about people who are here from other countries attending our schools or colleges, and surely we do not want to pass an amendment that would make one who through accident was caught in the country a subject of the draft and inflict upon him the pains and penalties of the deprivation of becoming a citizen. The language which has been suggested by the substitute makes both points perfectly clear. First, it applies to a resident. It takes away the vicious effect of the language that is now in the bill, for under that language this bill could not apply to anyone until he was eligible to citizenship. The substitute language will protect every interest, and I offer it for the purpose of making the bill more perfect, so that I may be able to vote for it. The language of the amendment offered by the gentleman from Alabama does not cure the evil, and I respectfully call his attention to that fact. I wish to get the exact words, and will ask that the amendment be sent to me. The language of the amendment offered by the gentleman from Alabama is this, "whose status is such that he may become." What? A naturalized citizen. Well, now, is his status when he lands in this country such that he is qualified to be a naturalized citizen? His status means when he can come into court with his petition after having resided here for five years and then get his naturalization papers. The substitute covers this defect, for in it, if you adopt it, you will have provided that the act shall cover any alien, a resident of the United States, who under existing law could become eligible to be naturalized, thus clearing away all the doubt and all the difficulty connected with the question.

Mr. McKENZIE. Will the gentleman yield for a question?

Mr. GRAHAM of Pennsylvania. Yes.

Mr. McKENZIE. I am asking for information. Under the gentleman's amendment, of course, the matter of the definition of the word "resident" would be involved.

Mr. GRAHAM of Pennsylvania. Yes.

Mr. McKENZIE. Now, the question I have in mind is this: Suppose a man living in Canada desiring to avoid military service in Canada comes over to the United States, and in most of the States the matter of residence is limited to six months or one year, and so on. Now, suppose he stays five months in one place and moves to another place and stays there six months and then to some other place and stays five or six months, could not that alien absolutely avoid the law we are trying to pass?

Mr. GRAHAM of Pennsylvania. No. He could not, because he would become a resident. Resident will not, in its definition, cover a student who is here or a wayfarer who is sojourning in the country and caught by the exigencies of war conditions. But it would cover a man who comes and resides five months in one place or six months in another place, no matter how he might intend to evade the law.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LENROOT. Mr. Chairman, I will ask that the gentleman be granted five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman? [After a pause.] The Chair hears none.

Mr. GRAHAM of Pennsylvania. I have no desire to do anything more than to call the attention of my colleagues to the effect of these two amendments.

Mr. BURNETT. Mr. Chairman, the gentleman on last Wednesday—has the gentleman concluded?

Mr. LENROOT. I want to ask the gentleman from Pennsylvania a question.

Mr. GRAHAM of Pennsylvania. If there is no objection, I will be glad to answer any question.

Mr. LENROOT. I am interested in the gentleman's definition or interpretation of the word "resident," and I want to ask the gentleman whether residence is not a matter of intention?

Mr. GRAHAM of Pennsylvania. It may.

Mr. LENROOT. If the word "resident" is included, might not any alien say that it was never his intention to become a resident of the United States and the reason he had not made declaration was because he intended to return to his native land and therefore is he not entirely excluded from the operation of the bill?

Mr. GRAHAM of Pennsylvania. No; the gentleman is in error. Resident is not solely a question of intention. Residence is a question of fact, and if you could prove that a man has taken up his residence here by extraneous evidence he would come under the provisions of this bill.

Mr. LENROOT. Let me ask the gentleman this question: We have clerks employed here in the District of Columbia who may have been here several years. In the legal sense, does the gentleman think that because they may have been domiciled here for years that they are residents of the District of Columbia?

Mr. GRAHAM of Pennsylvania. Residents, yes; but not citizens. And if it were a State they could not become citizens without——

Mr. WALSH. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WALSH. I desire to inquire if the debate upon this section was not closed by the committee on last Wednesday.

The CHAIRMAN. This is a different amendment.

Mr. WALSH. Was not debate closed upon this section?

The CHAIRMAN. The Chair thinks not, but upon the amendment offered by the gentleman from New Jersey.

Mr. BURNETT. Mr. Chairman, after listening to the discussion of this matter by the very able gentleman from Pennsylvania [Mr. GRAHAM] last Wednesday I was of the opinion there was much force in his suggestion.

I therefore asked the opinion of the Department of Labor, that has to construe these questions as to immigration, and submitted that very phase of it to them, and the suggestion that I have offered in my amendment is their suggestion, namely, "whose status is such that he may become a citizen by naturalization." The objection, and the only objection I have, to the amendment of the gentleman from Pennsylvania [Mr. GRAHAM] is the use of the word "resident."

Mr. GRAHAM of Pennsylvania. Will the gentleman allow me a suggestion?

Mr. BURNETT. Certainly.

Mr. GRAHAM of Pennsylvania. I am going to ask unanimous consent to strike out the words "resident of the" from the substitute and insert in lieu thereof "domiciled in the United States," accepting the suggestion of the gentleman.

The CHAIRMAN. Does the gentleman ask unanimous consent to make the change in his amendment?

Mr. BURNETT. Mr. Chairman, I have no objection to the unanimous consent, but I desire to oppose it in that form, because even the difference between domicile and residence is very shadowy in construction frequently, and it would be a dangerous thing. And the danger of it is that these fellows that are coming over are the very men we are wanting to send back or to make fight. They are the slackers. The objection I had to the Chamberlain bill as it was passed in the Senate was that if a man had not resided here for a year you could not conscript him.

Now, a part of the purpose of this bill is to get at these very fellows, and the Department of Labor, that will construe these matters of immigration and deportation, have recommended the words "whose status is such that he may become eligible," and it seems to me that it meets the whole trouble. And I am afraid when we inject this question of domicile and residence and draw those shadowy lines of definition that later on in its interpretation many questions will arise that will enable the very men that we are wanting to leave the country or force to fight to escape through that kind of loophole. And for that reason, Mr. Chairman, I object to that amendment and ask a vote on my own amendment.

The CHAIRMAN. Is there objection to the unanimous-consent request of the gentleman from Pennsylvania to modify his amendment? [After a pause.] The Chair hears none.

Mr. RAKER. Mr. Chairman——

The CHAIRMAN. The Chair will state that the debate on this amendment is now exhausted.

Mr. RAKER. I move to strike out the last word.

I desire to discuss the question presented by the gentleman from Pennsylvania [Mr. GRAHAM], viz, the meaning of the words "eligible by existing law to become a naturalized citizen of the United States." After hearing his discussion upon that phrase last Thursday, I went to the law library and gave as much investigation as I could to the subject, and the only place I find wherein the question is discussed is in relation to eligibility to office, to be elected to office, or to hold office. Now, there are two lines of decision. One is that a man eligible to office must be qualified at the time he takes the office and assumes the duties thereof. Another line of decision holds that he must be qualified at the time of nomination. The authorities are clear upon the question that a man eligible to become an officer may have a dozen disqualifications before the day he takes the oath of office and qualifies. For instance, in one of the Southern States a man could not be appointed judge if he held a county office. He held the district attorney's office. He filed his resignation as district attorney and in two minutes afterwards was appointed to the office of judge, and the supreme court of the State held that at the time of the taking office he was qualified, although but five minutes before was disqualified, though eligible to become judge, and when he resigned as district attorney he had removed the existing impediment and became fully qualified to hold the office of judge.

Now, I want to call the attention of the committee to this fact.

Mr. GRAHAM of Pennsylvania. Will the gentleman yield?

Mr. RAKER. I yield for a question.

Mr. GRAHAM of Pennsylvania. All the interpretations of the word "eligible" sustain the view I have expressed, do they not?

Mr. RAKER. I think not; in particular as the word is used in this bill.

Mr. GRAHAM of Pennsylvania. Is it not true that the dictionary meaning of the word, as found in the dictionaries, sustains my view?

Mr. RAKER. No; I think not. "Eligible" does not stand alone. It is "eligible to become naturalized," and so forth.

Mr. GRAHAM of Pennsylvania. And is it not true that Bouvier's Law Dictionary gives the same meaning, namely, that when you are eligible to an office you must have all the qualifications that fit you for that office?

Mr. RAKER. Of course you can overcome it at the time you enter into office. But you may have a dozen qualifications, and if you are eligible at the time you are elected or appointed to the office that is what the word "eligible" means, as long as the statute provides as in this case. If it was "any alien eligible for final naturalization," then my friend from Pennsylvania [Mr. GRAHAM] would be correct, and there would be no doubt about it. But the language of this bill is "eligible under existing law to become." Now, a man when he comes to this country may have a dozen disqualifications. He may not have lived here long enough; he may not have been able to read and write——

Mr. McKENZIE. Will the gentleman yield right there for a question?

Mr. RAKER. I will.

Mr. McKENZIE. Is it not a fact that these words refer rather to the person or character of the man when he lands on our shores than to the conditions and qualifications thrown about him?

Mr. RAKER. Sure.

Mr. McKENZIE. The naturalization of the subject. You know and I know, without mentioning it, that there are certain peoples in this world who under our law are not eligible to citizenship.

Mr. RAKER. The gentleman is clearly correct in his statement.

Mr. WALSH. Will the gentleman yield?

Mr. RAKER. For a question.

Mr. WALSH. Will not this whole confusion and controversy be avoided by inserting language to make that first line read as follows?—

That any alien who has not become a naturalized citizen.

Mr. RAKER. No. I think not.

Mr. WALSH. Why not?

Mr. RAKER. I want to call the committee's attention to this fact, and there is no need of passing it over. You can not conceive language that will make this plainer if you consider in this connection the statutes in regard to the naturalization, namely, that a man who believes in assassination of public officials, and so forth, can not become eligible at the time he makes his application. A man who has committed a crime and is an alien, and applies for naturalization, can not become eligible for citizenship in the United States.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. RAKER. Mr. Chairman, I ask unanimous consent to proceed for three minutes more.

The CHAIRMAN. The gentleman from California asks unanimous consent to proceed for three minutes more. Is there objection?

There was no objection.

Mr. GRAHAM of Pennsylvania. Mr. Chairman, will the gentleman yield for a question?

Mr. RAKER. I yield to the gentleman for a question.

Mr. GRAHAM of Pennsylvania. Suppose an alien has filed his application to become a citizen and he comes up before the court. Inquiry is made as to whether or not he has been for five years a resident of the United States and for one year a resident of the State in which he makes his application, and it turns out that he has not been either. Will not the court say to him, "Sir, you are not eligible to become a naturalized citizen"?

Mr. RAKER. No. It is just the reverse. If he belong to the class that the law permits to be naturalized, if he has not been convicted of a crime, if he is of the proper age and comes under the other conditions, and comes to this country and lives here five years and has taken out his first papers and made the necessary showing upon his final hearing, the court would grant him his papers. But if he applies and has only been here two years, he is nevertheless eligible to become naturalized when he has lived here three years longer, when he can read and write, and when he is able to show that he is not in favor of assassinating public officials and complies with all the other

conditions. A man can never be eligible to become a naturalized citizen of the United States who believes in sabotage under the laws as they exist here to-day; and, no matter how long he has been here, he is not eligible to become a citizen of the United States if he believes in assassinating public officials. Therefore it means fundamentally the person himself, that has none of the disqualifications, may at some time in the future, when he complies with the law, be admitted to citizenship; and that is all the purpose and object and intent of this statute. I trust the committee will not mix it up by inserting other language that will make it hazy and uncertain, when it is just as plain now as the English language can make it that whenever a man is able to show the things that he can show he is then at that time eligible to become naturalized and become a citizen. But if there are any restrictions against him that he can not overcome, he never can be in a position to become eligible for naturalization and be finally naturalized.

The CHAIRMAN. The time of the gentleman from California has again expired.

Mr. HAYES. Mr. Chairman, all this learned disquisition is very interesting, but it is not applicable to the present case. The confusion in gentlemen's minds arises from the fact that they do not understand the word "naturalization" as used in the naturalization law. The word "naturalization" does not mean just the granting of the certificate of citizenship by the court. Naturalization begins when a man declares his intention to become a citizen, just as a suit at law in my State, and I presume in the States of you all, does not consist merely in the appearance of the parties before the court and the adjudication of the issues and entry of judgment, but begins with the issuance of the summons. That is the beginning of the suit. So the beginning of naturalization is the declaration of the intention of the alien, and the whole proceeding is laid out in the naturalization law, which provides exactly what that declaration shall state—every step is provided, and it takes it all to make a naturalized citizen of the United States.

Mr. FLOOD. May I ask the gentleman a question?

Mr. HAYES. Yes.

Mr. FLOOD. What would be the objection, in the gentleman's opinion, to striking out, after the word "alien," the words "eligible by existing law to become a naturalized citizen of the United States," and let the section read: "Any alien who is a native or subject of a country that is engaged in war with Germany"?

Mr. HAYES. That includes students and everybody else.

Mr. FLOOD. Will the gentleman answer that question?

Mr. HAYES. I think that would cover more ground than we desire to cover in this case.

Mr. FLOOD. As at present drawn, it takes in students. You can exempt students. This would take in Japanese and Chinese who desire to become members of our Army.

Mr. HAYES. There is now no objection to their joining the Army. This does not prevent them. They do not have to claim their exemption if they do not want to.

The gentleman from Pennsylvania [Mr. GRAHAM] is usually—in fact, is always—very clear in his statements and very clear in his thought, and his confusion arises in this case because he has in mind the naturalization law that existed prior to the law of 1906, when a man had to live in this country for two years before he could declare his intention.

To-day he can declare his intention the minute he puts his foot on the soil of the United States, and then naturalization can begin; and therefore if he is eligible to naturalization at all, the moment he lands on our soil he is eligible to naturalization. When he makes his declaration the process of naturalization begins.

Now, if a man is a Chinaman, no matter how long he stays here, he is not eligible to naturalization, and can not make a declaration of his intention to become a citizen. And all this seeming confusion is caused because gentlemen do not understand what naturalization means. It means the whole process from the declaration of intention to the issuance of the certificate of citizenship.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. HAYES. Yes.

Mr. WALSH. If the contention of the gentleman from Pennsylvania [Mr. GRAHAM] is correct, before an American-born citizen could become President of the United States it would be necessary for him to be elected to that office?

Mr. HAYES. Rather. [Laughter.]

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. HAYES. Yes.

Mr. LENROOT. I would like to ask the gentleman this question: If the amendment of the gentleman from Alabama [Mr. BURNETT] were further amended by adding to it the words "comply with the naturalization laws and thereafter become," so that it would read "any alien whose status is such that he can comply with the naturalization laws and thereafter become a naturalized citizen of the United States," would not that clear it up?

Mr. HAYES. It does not need any clearing up. The words "eligible to naturalization" have a perfectly well understood meaning under the law, and they include the whole process of naturalization, and not merely the signing and delivery to the alien of a certificate of citizenship.

Mr. GORDON. Mr. Chairman, will the gentleman yield?

Mr. HAYES. Yes.

Mr. GORDON. Is a person 24 years old eligible to be elected to the House of Representatives.

Mr. HAYES. Certainly not.

Mr. GORDON. Then I do not know how an alien who has been here less than the statutory time could be eligible to citizenship.

Mr. HAYES. He is eligible to become a naturalized citizen, if he is eligible at all, the moment he lands.

The CHAIRMAN. The time of the gentleman from California has expired. The debate on this substitute is exhausted.

Mr. McKENZIE. Mr. Chairman, I ask unanimous consent to proceed for one minute.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. McKENZIE. Mr. Chairman, as I understand this proposition, these words should not be stricken from the bill, and the bill should stand exactly as it is now drawn. My understanding—and I think it is that of every man who has given this matter any consideration—is that in this war we have as our allies against the German Empire two classes of nations or people. One class are eligible under our law to become citizens of this country. The subjects of two of the other countries who are our allies in this war are not permitted under our law to become citizens of this country. Therefore they should be excluded from the provisions of this law, and the word "eligible" in the bill as it now stands protects those people and makes the law clear. Therefore I hope no amendment to this section will be adopted.

Mr. FLOOD. May I ask the gentleman a question?

Mr. McKENZIE. Yes.

Mr. FLOOD. Why should these people be excluded?

Mr. McKENZIE. As a man who believes in conscription, I do not believe in conscripting a man who has not the right to have something to say about this Government of ours.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BURNETT. I ask for a vote.

The question being taken, the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama [Mr. BURNETT].

The amendment was agreed to.

Mr. EMERSON. I have an amendment.

The CHAIRMAN. The gentleman from Ohio offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. EMERSON: Page 2, line 11, insert a new paragraph as follows:

"That any alien who enlists or is drafted into the military or naval service of the United States and waives his exemptions, serves his time of enlistment, and is honorably discharged, and is at least 21 years of age at the time of his discharge, shall, because of such service, become a citizen of the United States without complying with any of the naturalization laws, and may vote on his discharge papers."

Mr. BURNETT. I make a point of order against that amendment.

Mr. EMERSON. I should like to be heard on the point of order.

The CHAIRMAN. Does the gentleman from Alabama desire to be heard on the point of order?

Mr. BURNETT. I do not. It is not germane, and I want to say to the gentleman that that is the law now.

The CHAIRMAN. The Chair will hear the gentleman from Ohio.

Mr. EMERSON. Mr. Chairman and gentlemen of the House, I want to talk on the point of order. I understand that this bill punishes the alien who refuses to comply with our laws when he is drafted into the military service of the United States. Now, if you can punish a man for refusing to enter the military service of the United States, why can you not reward him when he waives his exemption and enters the military service of the United States? I can not see anything inconsistent about it. We say to the alien, "If you are drafted and you refuse to respond, you have got to leave the country and you can not become a citizen, and you can not do this and many other things."

Now, if we can do that in this bill, why can we not reward him when he does comply? I think we should. If any man ought to be rewarded it is the alien who has come here, who enlists in the service of the United States, or waives his exemption and enters the military or naval service, fights loyally through the war and is honorably discharged. He is entitled to all the advantages of citizenship and should have it.

Mr. GORDON. Will the gentleman yield?

Mr. EMERSON. Yes.

Mr. GORDON. Why is he entitled to a reward? Is it because he is not liable to render military service? Is that why you want to reward him?

Mr. EMERSON. No; I did not say that.

Mr. GORDON. Why do you want to conscript him, if he is not liable?

Mr. EMERSON. I say an alien who is willing to fight for this country, who enlists voluntarily, who waives his exemption, shoulders his musket, and goes to the front and offers his life for this country, is as good as any citizen of this country. I am willing to take that position, and I am a natural-born citizen; my father was, and my ancestors were for hundreds of years; but I am willing to accept the man who will shoulder his musket as an alien and go to the front and fight for this country.

If we are going to punish men for not enlisting we should reward aliens who do enlist or waive their exemptions. I believe the alien should do his part in the winning of this war, but I believe that the alien who volunteers his services or who waives his exemptions when drafted and enters the military or naval service of the United States, serves out his time and is honorably discharged, is entitled to citizenship. An alien who will fight for this country and is willing to die for this country, if need be, is entitled to the honor of being an American citizen. I know of no greater pledge of loyalty we could ask of an alien than to be willing to fight and die for this Republic, in this the hour of its greatest crisis, and the alien who is willing to do it should be crowned with citizenship. I would set aside all obstacles for an alien who would do this and admit him into the great brotherhood of American citizens. In my city a great many aliens have enlisted or waived their exemptions. I know of Jews, Italians, Bohemians, and many other nationalities in Cleveland who have enlisted in the military or naval service of the United States, and they deserve great credit for doing it.

The CHAIRMAN. The Chair is ready to rule. The point of order is made against this amendment, and after some investigation by the Chair he finds that the section provides for denying citizenship and for deportation, while this amendment provide for creating citizens and giving them the right to vote, exactly at cross-purposes with the section that it seeks to amend. The Chair thinks the point of order should be sustained. The amendment is out of order.

Mr. McCULLOCH. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Ohio offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. McCULLOCH: Page 2, line 11, after the word "deported," insert

"*Provided*, That the local draft board shall call for service of such aliens liable to military service in the order of their original liability under the selective draft, and all such shall be called in the same order as they would have been called if no claim had been filed for exemption on account of alienage."

Mr. McCULLOCH. Mr. Chairman, thousands of aliens have already been exempted under the selective-draft law who were physically and otherwise qualified because they were aliens. I believe if this bill passes these aliens who have been exempted should be required to serve in the order that they would have been called if they had not filed their original claim for exemption under the alienage provisions of the law. This amendment will accomplish that result. It is somewhat different in its language from the amendment I offered on last Wednesday, and I believe if this amendment is adopted it will accomplish the result I have stated. We should see to it that the intention of Congress is made clear and that aliens are called in the order of their original liability. While the provision in the section giving the President the power to make rules and regulations may take care of the question in regard to their being called, or the order of their being called, yet I believe this amendment will make the intention of Congress clear and that it should be adopted. I have talked the matter over with the chairman of the committee, and I trust that he will see fit to express the views of his committee and himself before this vote is taken.

Mr. BURNETT. Mr. Chairman, the draft law as it now stands confers upon the President and the draft officials the right to make its rules and regulations. If we get this bill through in time, which I have been trying to do—if it gets in before the next call is made—I think the power is already vested in the Provost Marshal, under the authority of the President, to make this kind of a call. If the call is made, if this bill is passed in time, I hope there will be something of that kind. There is merit in the proposition of the gentleman from Ohio, but if we undertake to prescribe rules and regulations by which it shall be done I think there is danger of getting into confusion.

Mr. McCULLOCH. Will the gentleman yield?

Mr. BURNETT. Yes.

Mr. McCULLOCH. Does the gentleman mean to say that he does not expect aliens exempted in the first draft to be called?

Mr. BURNETT. They are in the fifth class now, under the ruling of the boards, where they claim exemption, but that does not divest the boards of the authority to change and put them in the first class. Under the provision "that the President is hereby authorized to make such rules and regulations as may be necessary to enforce the provisions of this section," I think all of that power is included. I think it ought to be left to the Provost Marshal to make the rules and regulations by which that shall be done.

Mr. McCULLOCH. Will the gentleman yield for another question?

Mr. BURNETT. Yes.

Mr. McCULLOCH. Does the gentleman say that the board has the power not to call those who have been exempted who have not been called?

Mr. BURNETT. It is an automatic power. I sympathize with the gentleman's purpose. I voted against conscription, Mr. Chairman, but, as it was passed, I believe it is unfair that our boys and the naturalized boys of this country should have to go off and fight and leave these fellows here to take their positions. The speech of the gentleman from Ohio the other day along the same line was a good one, as that to-day, and, instead of being criticized, as was done by one gentleman, I compliment my friend on the able manner in which he presented his views. [Applause.] Did I not believe that this matter is better provided for in the bill already, I should consent to the amendment which has been submitted by my friend from Ohio.

Mr. McCULLOCH. Will the gentleman yield further?

Mr. BURNETT. Yes.

Mr. McCULLOCH. Will the gentleman say that the bill as it now is will require all aliens to serve, regardless of whether or not they were exempted in the first draft?

Mr. BURNETT. It will require them to waive exemption or be deported.

Mr. McCULLOCH. Mr. Chairman, I withdraw the amendment.

The CHAIRMAN. Without objection, the amendment will be withdrawn.

There was no objection.

Mr. PARKER of New Jersey. Mr. Chairman, I offer the following amendment.

Mr. JOHNSON of Washington. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Washington makes the point that no quorum is present. The Chair will count. [After counting.] One hundred and three Members present, a quorum, and the Clerk will report the amendment offered by the gentleman from New Jersey.

The Clerk read as follows:

Page 2, line 3, after the word "possessions," insert "and shall forever be denied the right of acquiring any interest or estate, legal or equitable, in any lands within the United States or any of its possessions."

Mr. BURNETT. I make a point of order against that.

Mr. PARKER of New Jersey. Will the gentleman reserve his point of order?

Mr. BURNETT. No; I will not. If it has come to a filibuster I want to get this bill through.

Mr. PARKER of New Jersey. I am not delaying the bill. This is not subject to a point of order, it is simply adding another penalty to the one we already have, and I think it is in order.

The CHAIRMAN. The Chair is of the impression that the amendment is in order, but the Chair will hear the gentleman from Alabama.

Mr. BURNETT. Mr. Chairman, there are two reasons why I think it is objectionable and subject to a point of order. In the first place it goes outside of the scope of the bill, which relates simply to naturalization and deportation. Another

thing, it invades the principle of State rights. The States alone can control the question of ownership of land, as many of the States have done. It seems to me that it is out of order in any bill, and is not germane or legitimate for Congress to enact such legislation. Certainly in that view of it it would be out of order.

The CHAIRMAN. On second thought the Chair believes that the amendment is out of order. Here is an authority in the Manual:

One individual proposition may not be amended by another individual proposition, even though the two belong to the same class.

This is adding another penalty to the same class, and the Chair holds it out of order.

Mr. BORLAND. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 1, line 9, after the word "act" insert "and physically qualified therefor."

Mr. BORLAND. Mr. Chairman, I have always believed and still believe that this is not the way in which to get soldiers into the Army, by asking the aliens to enlist or else be deported. It has very much the appearance to me of an attempt to further accentuate the labor shortage in this country by deporting a lot of available labor, a thing which I believe is inimical to the best interests of the country at this time when we are facing a shortage in every branch of industry. This bill says to aliens, "If you do not enlist you will be deported." I realize that gentlemen say that it is going to scare the aliens into the service. They have provided that any man who is liable or subject to the selective draft and does not withdraw his exemption shall be deported.

Mr. WALSH. Will the gentleman yield?

Mr. BORLAND. In a minute. I want to open up my thought first. It says that any man who is subject to the selective-draft law, defining it, who does not withdraw the exemption shall be deported. As a matter of fact thousands of men may be subject to the draft law who would not be accepted if they were examined for service. We are put in the position of deporting possibly thousands of available laborers who never would be accepted for service in the Army, no matter whether they withdrew their exemptions or not.

Mr. DOWELL. Mr. Chairman, will the gentleman yield?

Mr. BORLAND. It simply accentuates the proposition that we are driving labor out of this country at the instance of some interest that is anxious to cut down the available supply of labor and enhance the price of labor during the present emergency. I yield to the gentleman from Massachusetts.

Mr. WALSH. Mr. Chairman, I desire to ask the gentleman if he contends that a citizen or alien with only one arm or one leg would be subject to the selective-draft law?

Mr. BORLAND. I understand that every man within the qualified ages is subject to the selective-draft law, but whether he be accepted for service depends upon the exemption board. I do not think there is any doubt about that proposition.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. BORLAND. Yes.

Mr. LENROOT. Has the gentleman observed in the bill that the only exemption that the alien is required to withdraw is the exemption that he claims on account of being an alien?

Mr. BORLAND. That is all.

Mr. LENROOT. And that he has every other exemption that a citizen has?

Mr. BORLAND. He would have all the other exemptions under that; but if he does not withdraw the exemption of alienage, the remedy is that he shall be deported, regardless of his other exemptions.

Mr. DOWELL. Mr. Chairman, if he withdraws his exemption, he then stands precisely as an American who has not that same right for exemption?

Mr. BORLAND. Yes; he stands exactly as an American would who had submitted himself to the draft board; but suppose he does not withdraw his exemption. This law, if it operates as it says on its face, will deport him. I realize that the proponents of the law insist that they do not mean what the law says; they do not mean to deport any labor or drive any labor out of the country, or to accentuate the labor shortage on farms or in the mines, but I contend that is a necessary operation of their law, and the direct operation is not to get soldiers. The direct operation of the law is to accentuate the shortage of labor.

Mr. RAKER. The gentleman will concede that if a man withdraws his exemption that he is an alien, and he turns out to have one eye or one arm——

Mr. BORLAND. Oh, I think I have already answered that question.

Mr. RAKER. He would not be subject to be deported.

Mr. BORLAND. If an alien withdraws his exemption and submits himself to the draft board, and is afterwards rejected for other causes, of course he remains here; but suppose he does not withdraw his exemption and submits to being deported, how have we gained anything by losing that amount of labor? I want to ask that question of the gentleman from California. How are we gaining anything by driving laborers out of this country when we need them in every line of industry?

Mr. SABATH. How did the gentleman vote on the immigration law?

Mr. BORLAND. I voted against overriding the President's veto. I voted against any labor shortage. The gentleman and I, I think, were right about that. We ought never to have driven labor out of the country.

Mr. BURNETT. Mr. Chairman, I do not deem it worth while to reply to a speech that is in the interest of letting the alien laborers stay here and having the American laborer sent to fight. Therefore I ask for a vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

SEC. 2. That after the expiration of 60 days from the passage of this act the President of the United States is authorized and empowered, under such rules and regulations as he may prescribe, to draft any alien in the United States to perform such mental or physical labor on the farms, in the manufacturing establishments, or other enterprises in the United States as he may deem necessary or proper: *Provided*, That the President may exempt from the draft authorized by this section such individuals or classes of aliens as he may believe for the best interests of the United States: *Provided further*, That the expenses of carrying out the provisions of this section shall be paid out of the Treasury of the United States.

Mr. BURNETT. Mr. Chairman, I move to strike out section 2.

The CHAIRMAN. The question is on the motion of the gentleman from Alabama, to strike out section 2.

The question was taken, and the motion was agreed to.

Mr. BURNETT. Mr. Chairman, I ask unanimous consent that section 3 be renumbered section 2.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. DENT. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the recommendation that its consideration be postponed until February 27.

Mr. LENROOT. Mr. Chairman, I make the point of order that that motion is not in order at his time.

Mr. FLOOD. Mr. Chairman, this is a preferential motion.

The CHAIRMAN. The Chair thinks this is a preferential motion. The question is on the motion that the committee do now rise.

Mr. FLOOD. Mr. Chairman, I would like to say a word on this motion, in favor of it.

Mr. WALSH. Mr. Chairman, I make the point of order that the motion is not debatable.

The CHAIRMAN. The Chair thinks it is debatable.

Mr. SLAYDEN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SLAYDEN. Is it ever in order for the Committee of the Whole House to instruct the House what to do?

Mr. DENT. This is a mere recommendation.

The CHAIRMAN. It is in order for the committee to rise and make a recommendation to the House.

Mr. DENT. And that is all there is to this motion.

Mr. WHEELER. Mr. Chairman, if this motion prevails, then it is up to the House whether it will consider the recommendation?

The CHAIRMAN. The Chair so understands.

Mr. WALSH. Mr. Chairman, I make the further point of order——

The CHAIRMAN. What is the point of order?

Mr. WALSH. I make the further point of order that this motion has previously been made in the committee and defeated, and it is not in order to renew a motion that has already been acted upon by the committee.

Mr. DENT. In reply to that, Mr. Chairman, it has not been made to-day. The rule provides that it can not be made on the same day. This motion was made last Wednesday, but it has not been made to-day.

Mr. WALSH. Mr. Chairman, in reply to the suggestion I would say that this motion was made upon a Calendar Wednesday, and that this is a continuation of that Calendar Wednesday that was started last week——

Mr. FLOOD. No; it is not. It is two Calendar Wednesdays.

Mr. WALSH. And that it is not a separate Calendar Wednesday.

Mr. FLOOD. The Chair has ruled, as I understand it.

Mr. HARRISON of Mississippi. I was going to cite the Chair to the ruling to which attention has been called, where it says:

And no motion to postpone to a day certain, to recur, or to postpone indefinitely, being decided, shall be again allowed on the same day at the same stage of the question.

This is not the same day or the same stage of the question.

The CHAIRMAN. The Chair understands that. The Chair understands, too, that a different rule has been applied upon rather a similar question, that is the question of consideration on Calendar Wednesday, and that two motions of that sort may be made to that question. The Chair is of the impression that this point of order should be overruled.

Mr. BURNETT. Mr. Chairman, I make the point of order that no debate is in order on this motion.

Mr. FLOOD. The Chair has ruled on that.

The CHAIRMAN. Decisions under the rule provide that this motion may be debated to a limited extent, but the debate must be confined to the advisability of postponing only. The merits of the bill can not be discussed.

Mr. BURNETT. Mr. Chairman, I move that all debate on this motion now close.

Mr. HARRISON of Mississippi. Mr. Chairman, I make the point of order that the Chair has recognized the gentleman from Virginia.

Mr. BURNETT. No; he has not.

The CHAIRMAN. The gentleman from Virginia has the floor. When he surrenders the floor the Chair will recognize the gentleman from Alabama to make that motion, but the gentleman from Virginia now has the floor.

Mr. FLOOD. Mr. Chairman, I want to argue this motion. I think it should prevail, and in support of it I desire to read a letter addressed this morning by the Secretary of State to the gentleman from Alabama [Mr. BURNETT], which I read with the consent of the gentleman from Alabama:

FEBRUARY 13, 1918.

Hon. JOHN L. BURNETT,
House of Representatives.

MY DEAR MR. BURNETT: Referring to House bill H. R. 5667, providing for refusal of citizenship in the United States or compulsory deportation of subjects of our co-belligerents who do not submit to compulsory military service in this country, I wish to state to you formally what I have said to you orally on previous occasions that the passage of this bill or its consideration at the present time by either House of Congress will interfer seriously with the progress of negotiations looking to the conclusion of conscription conventions with the entente powers. We are on the point of signing such conventions with Great Britain and Canada, and negotiations with Italy and France and other countries are proceeding rapidly. As the proposed conventions will attain by agreement with the powers the object of this bill without violation of treaties now in force and without subjecting their subjects to treatment which they can not but regard as harsh and unbecoming a country aligned with them in the present war, I would regard it as unfortunate if the negotiations were suspended or nullified by the passage of the bill mentioned.

I have, therefore, no other course open to me, as you know, but to ask you as chairman of the committee in charge of the bill to request suspension of consideration of this measure by the House for a short time in order that the outcome of the present negotiations with the entente powers may be determined. As we both have the same object in view, I am sure you will feel disposed to cooperate with me and with the Government in accomplishing it, if possible, in the manner which the President and the Senate have agreed upon as appropriate.

Mr. Chairman, it does seem to me that in the important international situation presented by this letter when the Secretary of State, who is negotiating at this minute treaties with our cobelligerents which cover the purposes of this bill, tells the House that the passage of this bill to-day would interfere with, if not nullify, these negotiations there should not be any hesitancy on the part of the House to vote for this motion. Now, those of us who have talked to the Secretary of State—and the gentleman from Alabama [Mr. BURNETT] is one of them—know how earnestly he feels about this matter and know how the entire State Department feel about it and how the representative of the War Department, who was in conference with us this morning, feels.

What the Secretary of State asked was a delay of two weeks, within which time negotiations could be concluded or put in such process of conclusion that the Members of the House would be satisfied that satisfactory conventions would be arranged with our cobelligerents. What we propose to do here if we pass this bill to-day is to deny the request of an executive department of this Government that is handling this delicate and important question, nullify the power of this department to accomplish the purposes of this bill in an orderly and friendly way, and deny a request for only two weeks' delay. No Member can justify his action in voting against this motion.

Mr. DENT. Will the gentleman yield for a suggestion?

Mr. FLOOD. Yes.

Mr. DENT. May I state to the gentleman from Virginia and to the committee that there is no notion on the part of the War Department to call the next draft within the next two weeks; that the draft that has been called is simply those men who were in the first draft, and the second draft would certainly not be called for some time hence; and it can not possibly do any harm to postpone.

Mr. FLOOD. Possibly it will not be called before May or June and there will be ample time, if these negotiations fail, for this House to take up this bill two weeks from now and pass it.

Mr. WALSH. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. WALSH. Is not the gentleman aware that under the rules of the House if this postponement prevails we can not consider this matter on Calendar Wednesday two weeks from to-day?

Mr. FLOOD. The suggestion was made to the gentleman from Alabama that unanimous consent be asked for that, and, failing in that, we can get a rule. This House is master of its proceedings, and no rule can make it do wrong when it wishes to do right.

Mr. WALSH. This has nothing to do with the question of postponement. Under the rules of the House, as the gentleman is aware, if postponement prevails, it could not be considered two weeks from to-day.

Mr. FLOOD. There would be no trouble in the world in getting unanimous consent of this House if this reasonable request of the State Department is granted——

Mr. WALSH. That has nothing to do with the question of postponement.

Mr. FLOOD. I said there would be no trouble in getting unanimous consent to take it up two weeks from now.

Mr. HARRISON of Mississippi. That would be the action of the House to postpone it to a day certain for consideration——

Mr. LENROOT. We have no power to do it in committee——

Mr. HARRISON of Mississippi. If the House accepts the action of the committee——

Mr. WALSH. But we can not, as far as the rules of the House apply.

Mr. FLOOD. We can suspend the rules by a two-thirds vote, or we can get a rule. Do not becloud an international question with parliamentary objection.

Mr. WALSH. This is not a motion to suspend the rules.

Mr. FLOOD. There will be no difficulty in getting unanimous consent of this House or a two-thirds vote of this House to take up this proposition two weeks from now, and if there is we can get a rule. This reasonable request of the State Department should be granted.

Mr. McCULLOCH. Will the gentleman yield?

Mr. FLOOD. No; I can not yield.

Here we are asked to pass a bill to-day that the legal advisors of the State Department and the Secretary of State tell us is in violation of the treaties with two of our cobelligerents. We are asked to do it without very much consideration, because this bill is not a well-considered measure. The second section of it has just been stricken out on a motion of its patron, the gentleman from Alabama [Mr. BURNETT], and it was only discussed here a few minutes on last Wednesday. Now, we are asked to violate treaties; we are asked to violate the principles of international law, that great body of laws which have grown up among civilized nations through the centuries, and for the upholding of which we are engaged in this great war; we are asked to violate the usages that have always existed between friendly nations in regard to the conscription of their respective nationals—all that Members may not postpone for two weeks an opportunity to cast a popular vote.

Mr. RUCKER. Will the gentleman yield?

Mr. FLOOD. I will.

Mr. RUCKER. Can the gentleman inform the committee, if it is proper to do so, if the Secretary of State believes that these negotiations will be completed within two weeks?

Mr. FLOOD. The Secretary of State said this—and if I am not correct I will ask the gentlemen who were at the State Department with me to correct me—that the basis of these treaties was the British treaty. The Canadian treaty has absolutely been concluded, and in the British treaty there were a few words they had to adjust, and which they understood from a communication they had last night would be adjusted. The new British ambassador is here, and they are satisfied the British treaty will be concluded in a day or two. That will be the basis of all the treaties. The Secretary of State said he did not anticipate any trouble with Italy; that Italy and France were willing to enter into these conventions. He wanted to conclude this British treaty so as to make it constitute the basis

of the others; and while he did not say that he could get it through in two weeks, he did say that the negotiations had proceeded so far that he thought he could satisfy the gentlemen in that length of time; that they would be successfully concluded.

Mr. BUTLER. I would like to ask a question.

Mr. FLOOD. I yield to the gentleman from Pennsylvania.

Mr. BUTLER. Can the gentleman inform us if the purpose of the proposed treaty will be to enable us to draft these men?

Mr. FLOOD. Oh, yes.

Mr. BUTLER. In other words, we will by this treaty obtain permission from the other countries to draft their subjects?

Mr. FLOOD. Their nationals, within the ages of their draft law, and not between the ages of our draft law, will be drafted into our Army by their consent, and there will be no friction between the enemies of Germany. The draft laws of our allies run to 40 and 45 years of age.

Mr. WALSH. Mr. Chairman, a point of order. The Chair has already ruled that the discussion of this motion to postpone is confined to narrow limits, and that it is not in order to discuss treaties and date of the next draft but to oppose this legislation on its merits. It should be confined to postponement.

Mr. FLOOD. I will observe the rule.

The CHAIRMAN. The gentleman from Virginia will confine himself to the narrow limits of postponement.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. FLOOD. Yes.

Mr. MADDEN. If we postpone action on the bill that is pending before the House, and the Secretary of State is able to conclude the negotiations that are now pending between other countries and this country, will these negotiations when completed cover the conditions that are sought to be arrived at through this legislation?

Mr. FLOOD. Oh, absolutely. There is no question in the world about that.

Mr. MADDEN. Then there ought not to be any question about the postponement.

Mr. FLOOD. I do not think so.

Mr. McCULLOCH. The gentleman has confidently said that there will be no trouble about receiving unanimous consent for the consideration of this bill later. Is the gentleman aware that there are many men on this floor who are absolutely opposed to the drafting of aliens?

Mr. FLOOD. I do not think they will object.

Mr. JOHNSON of Washington. Is not the object to give the State Department an opportunity to conclude these treaties without being knocked down by one branch of the Congress?

Mr. FLOOD. The Secretary of State says it will be interfered with in its negotiations. And how can Congress justify itself when an executive department of the Government says to you that the passage of this bill to-day may nullify the negotiations that are being carried on, and which within a few weeks will be concluded, by which these aliens may be drafted into the Army? And you propose to-day to nullify negotiations and pass this law, which, if you do pass, a representative of the War Department stated to us, could not be effective because it was not workable.

Mr. RUCKER. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. RUCKER. In the ordinary course, how long does the gentleman think it would take to decide it?

Mr. FLOOD. The statement is made in this letter here that if either House of Congress passes this bill——

Mr. RUCKER. Would the proponents of this bill gain anything in point of time by passing it to-day?

Mr. FLOOD. I do not think so. I do not believe the Senate would pass it in that time. I hope it would not pass it at all. I believe it would stand by our treaties.

Mr. RUCKER. It seems to me that our duty is very clear.

Mr. FLOOD. I think so, too.

Mr. WALSH. I would like to inquire if these negotiations were commenced before this bill was drafted and had come before the House?

Mr. FLOOD. I am not prepared to answer that, but I suppose so. I know they were begun last fall, whether before this bill——

Mr. NOLAN. Mr. Chairman, a parliamentary inquiry.

Mr. WALSH. It was before this bill was up here?

Mr. FLOOD. Oh, yes.

Mr. NOLAN. Mr. Chairman, is the gentleman from Virginia [Mr. FLOOD] discussing this motion under the five-minute rule?

The CHAIRMAN. No. The gentleman from Virginia has the floor.

Mr. MOORE of Pennsylvania. Mr. Chairman, if I vote for postponement, will I be voting to sustain the administration or will I be opposing it?

Mr. FLOOD. You will be voting to sustain the administration.

Mr. MOORE of Pennsylvania. Then I will vote to sustain the administration.

Mr. WALSH. Mr. Chairman, I rise to a point of order that this is not in order.

Mr. HEFLIN. Mr. Chairman, I did not get to hear all this letter read. Does the letter state that if either House takes action on this matter now it will embarrass and hamper the administration in the treaty negotiations that are now pending?

Mr. FLOOD. It says it will probably nullify its efforts; it will not only embarrass the administration, but nullify its efforts if either House takes action. [Cries of "Vote!" "Vote!"]

Mr. BURNETT and Mr. WALSH rose.

The CHAIRMAN. Does the gentleman from Virginia yield the floor?

Mr. FLOOD. No.

Mr. BURNETT. I want to know how long the gentleman is going to speak. I want to reply to him.

Mr. FLOOD. I was going to answer any questions that might be asked of me.

Now, gentlemen, this is a simple request. This motion does not kill this bill. Postponement is asked——

Mr. FARR. For how long?

Mr. FLOOD. For two weeks, in which we might conclude negotiations begun months ago with our cobelligerents.

Mr. BURNETT. If they do not do it, will the gentleman then withdraw his objection to this bill?

Mr. FLOOD. I will, at the end of two weeks, withdraw my objection.

Mr. BURNETT. If they do not conclude negotiations with whom?

Mr. FLOOD. Here within two weeks, if the gentleman from Alabama desires to bring this bill up again, I do not care with whom they have concluded negotiations and with whom they have not concluded negotiations, I will raise no objection to the consideration of the bill.

Mr. BUTLER. Mr. Chairman, will the gentleman permit a question?

Mr. FLOOD. Yes.

Mr. BUTLER. Will the gentleman agree to it with the Rogers amendment on it?

Mr. FLOOD. Two weeks from now?

Mr. BUTLER. Yes.

Mr. FLOOD. I will not vote for the bill without the Rogers amendment. I will not vote for a bill that violates a treaty, but beyond voting against it I will not oppose the bill.

Mr. BURNETT. How does the gentleman know that this is not putting this bill out of court? What assurance can he give that on this date two weeks hence—our day expires to-day—what assurance can he give to this House that two weeks from to-day the point of order will not be made that we are not in order?

Mr. FLOOD. I see before me gentlemen who are opposed to this bill from every standpoint, some opposed to it on principle. I will say here, facing these gentlemen, that I do not think there will be objection to unanimous consent; and if there is, a rule can be brought in two weeks from now making this bill in order.

Mr. SAUNDERS of Virginia. If we withdraw this bill now and go into the House, consent to a unanimous request can be given. We can try it out in the House.

Mr. BURNETT. Will the gentleman agree to so amend his motion that it will specify that on that day it shall be considered?

Mr. SAUNDERS of Virginia. That would not do any good at all. You could not by any action in the committee give to the committee on Calendar Wednesday any right that the rules say they can not enjoy, but we can try it out in the House.

Mr. FLOOD. We can come back into the Committee of the Whole.

Mr. McKENZIE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Illinois?

Mr. FLOOD. Yes; I yield to the gentleman from Illinois.

Mr. McKENZIE. Mr. Chairman, I just simply wish to suggest as my thought to the gentleman from Virginia and the chairman of the committee [Mr. BURNETT] that it would be wise, in order to get a settlement of this question and to protect those of us who favor this bill, to move that the committee do now rise and go into the House and make this agreement, and then we will understand that if it is an agreement it will be binding.

Mr. FLOOD. It is practically the same thing.

Mr. McKENZIE. Otherwise an agreement in this committee will have no effect when we get into the House. I suggest that

that be done for the protection of those of us who would like to see this bill enacted into law.

Mr. SAUNDERS of Virginia. There can be no agreement in committee.

Mr. FLOOD. I will make this suggestion: That the gentleman from Alabama [Mr. DENT] withdraw his motion, with the understanding that when we come back into Committee of the Whole his suggestion will be carried out.

Mr. KITCHIN. If they can come to an agreement.

Mr. FLOOD. I suggest that the gentleman from Alabama [Mr. BURNETT] move that the committee rise now.

Mr. WALSH. I will not agree to it.

Mr. FLOOD. I suggest that the gentleman move that the committee rise now, and that we reach an agreement that the matter shall be taken up two weeks from now. Let us make the agreement in the House.

Mr. BURNETT. Mr. Chairman, I move that the committee do now rise.

Mr. WALSH. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Massachusetts rise?

Mr. WALSH. I desire to submit a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WALSH. Has the motion to postpone been withdrawn?

The CHAIRMAN. It has been proposed to be withdrawn. There has been no objection to its being withdrawn.

Mr. WALSH. I desire to submit a preferential motion.

Mr. DENT. Mr. Chairman, I will ask unanimous consent temporarily to withdrawn my motion in view of the motion that my colleague from Alabama [Mr. BURNETT] will make. I ask for that now.

The CHAIRMAN. The gentleman from Alabama [Mr. DENT] asks unanimous consent to withdraw his motion. Is there objection?

There was no objection.

The CHAIRMAN. The motion is withdrawn.

Mr. BURNETT. Mr. Chairman, I move that the committee do now rise.

The CHAIRMAN. The gentleman from Alabama moves that the committee do now rise. The question is on agreeing to that motion.

The question was taken, and the Chairman announced that the ayes seemed to have it.

Mr. WALSH and Mr. DOWELL demanded a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 91, noes 26.

So the motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the Chair, Mr. RUSSELL, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 5667) to provide for the deportation of certain aliens, and for other purposes, and had come to no resolution thereon.

Mr. BURNETT. Mr. Speaker, under the statements made a few moments ago it was thought by a majority of the House that this matter should be postponed, without losing its preferential position, for two weeks. I therefore ask unanimous consent that this bill be made a special order for to-day two weeks hence, superseding Calendar Wednesday and all business on that day.

The SPEAKER. The gentleman from Alabama asks unanimous consent that this bill be postponed until two weeks from to-day, and that it be made a special order for that day, to take precedence of the regular Calendar Wednesday business. The Chair will state that if they get through with this bill on that day we will go on with the calendar.

Mr. MADDEN. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Alabama a question. Before I ask it I want to state that I have no objection to the consideration of the bill on the date that he sets, or upon any other day when it may be properly reached; but I would like to ask the gentleman from Alabama if he would not be willing to consent to postpone the bill until two weeks from to-day, and then, in case the Secretary of State finds himself unable to complete the negotiations that are now pending, and he is willing to assure the House that one additional week will enable him to complete these negotiations, whether the gentleman would not be willing to postpone it another week?

SEVERAL MEMBERS. No!

Mr. BURNETT. Mr. Speaker, I could not agree to that. The chairman of the Committee on Foreign Affairs is so certain that something will be done at once that he has stated to the House that he will withdraw his objection to the consideration of the bill at that time unless something is done. Now, if there was probably going to be another postponement I would not agree to this one. The gentleman from Virginia [Mr. FLOOD] stated two weeks ago that there would be no unnecessary delay; that the agreements had been concluded with Great Britain and with Canada, and that they should be concluded with France and Italy within a short time. Yet we find to-day that they have not been concluded with Great Britain and Canada——

Mr. FLOOD. They have been concluded.

Mr. BURNETT. They have not been signed, and I will not agree to anything except to a postponement until Wednesday two weeks.

Mr. MASON. I rise to make a parliamentary inquiry, and beg leave to make a suggestion to the gentleman asking unanimous consent. I think the Chair intimated that if two weeks from to-day the bill is not concluded it will then be indefinitely postponed.

The SPEAKER. No; the gentleman did not understand what the Chair said. The Chair said that if this request of the gentleman from Alabama prevails, and two weeks from to-day we get through with this bill before the adjournment of the House, we will proceed with the regular Calendar Wednesday business.

Mr. DUPRÉ. May I make a suggestion to the gentleman from Alabama that may help to clarify the situation?

Mr. BURNETT. Certainly.

Mr. DUPRÉ. My suggestion is that the gentleman amend his request so as to get unanimous consent that this matter go over until Thursday, February 28, which would be only one day longer, and thereby eliminate the violation of the privileges of Calendar Wednesday. It seems to me that should help the situation.

The SPEAKER. Does the gentleman from Alabama accept that suggestion?

Mr. BURNETT. I do not, Mr. Speaker.

The SPEAKER. The gentleman from Alabama [Mr. BURNETT] asks unanimous consent that this bill be postponed until two weeks from to-day, that it be made the special order for that day, shutting out the business of Calendar Wednesday, as far as it goes.

Mr. WALSH. Reserving the right to object, I should like to ask the gentleman from Alabama [Mr. BURNETT], the chairman of the Committee on Immigration and Naturalization, to state what new reasons were given him, in addition to those given when the motion was made to postpone this before, which impel him to ask now for a postponement.

Mr. FLOOD. Regular order!

Mr. BURNETT. Mr. Speaker, I have very serious doubts about the State Department being any further along two weeks from to-day than they are now, but it seems to me after the receipt of that letter read by the chairman of the Committee on Foreign Affairs [Mr. FLOOD], and the expressions that I get now from the House, to be the opinion of a majority of the House that this last chance ought to be given. They have been promising for six months, it is true. Now, we are giving them a last clear chance; and as to getting through on Wednesday, I think if gentlemen will stay here and vote, we will get through with it, because we will start in fresh and we will have that whole day, and I hope Members will agree to that. I have no pride of authorship in this bill, but I do not want to see the time come, next May or at any other time, when our boys will be called and these fellows sitting back here taking their jobs and refusing to fight with them. [Applause.] If the State Department can accomplish the same purpose, then I have no objection to their doing it, and I would rather they would.

The SPEAKER. Is there objection.

Mr. WALSH. Reserving the right to object, I should like to ask the chairman of the Committee on Immigration and Naturalization if he has received any assurances, personally or directly, from the Secretary of State in addition to the information contained in the letter read by the gentleman from Virginia [Mr. FLOOD]?

Mr. BURNETT. I was at the office of the Secretary of State this morning, and I want to say that no additional assurances were given me except those contained in that letter, as I recollect.

Mr. GOODWIN of Arkansas. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GOODWIN of Arkansas. What would be the status of the bill if it should not be concluded and passed two weeks from to-day? Would the bill come up for consideration on the following day, Thursday?

The SPEAKER. According to the terms of this request, it would not.

Mr. KINCHELOE. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. KINCHELOE. I understand that if this goes over for two weeks, and is not concluded on Calendar Wednesday, that will be the end of it. The inquiry which I desire to propound is

this: If the gentleman from Alabama should amend his request for unanimous consent by asking that it go over until Thursday, two weeks, the 28th, and if it is not finished on that day what will be the status of it on the day following?

The SPEAKER. It would be up in the air.

Mr. KINCHELOE. In what way?

The SPEAKER. Because if the bill was not finished on Thursday, unless made a continuing order, then whoever had business on Friday morning would get that business considered.

Mr. KINCHELOE. In order to make it a continuing order would it take a request at that time?

The SPEAKER. Of course it would, or you can make it now if you want to make it a continuing order.

Mr. BURNETT. I modify the request by asking that it be made a continuing order until finished. My request is that it be postponed until two weeks from to-day, and that it then be made the continuing order until disposed of.

The SPEAKER. The gentleman from Alabama [Mr. BURNETT] asks unanimous consent that this bill be postponed until two weeks from to-day—Calendar Wednesday, February 27—and made the special order for that day, to the exclusion of the regular business upon that Wednesday call as far as it goes; that if it is not finished on Wednesday it be the continuing order until disposed of, and that if it is finished on Wednesday, then that the House take up the regular Calendar Wednesday business for the remainder of that day.

Mr. BURNETT. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. BURNETT. As I understand, the bill will be taken up at the point where we leave off to-day?

The SPEAKER. Yes. Is there objection to the request of the gentleman from Alabama? [After a pause.] The Chair hears none. The Clerk will call the committees.

When the Committee on the Library was called,

Mr. SLAYDEN. Mr. Speaker, I call up House joint resolution No. 70, "authorizing the erection on the public grounds in the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States."

The SPEAKER. The Clerk will report the joint resolution.

The Clerk read as follows:

Resolved, etc., That the Chief of Engineers, United States Army, be, and he is hereby, authorized and directed to grant permission to the trustees designated in the will of Mrs. Harriet Lane Johnston for the erection of a memorial to James Buchanan, a former President of the United States, on public grounds of the United States in the city of Washington, D. C., in the southern portion of Meridian Hill Park, between Fifteenth, Sixteenth, W, and Euclid Streets NW.: *Provided*, That the design and location of said memorial and the plan for the treatment of the grounds connected with its site shall be approved by the Commission of Fine Arts, and that the United States shall be put to no expense in or by the erection of said memorial.

Mr. WALSH. Mr. Speaker, I raise the question of consideration.

The SPEAKER. The gentleman from Massachusetts raises the question of consideration. The question is, Will the House vote to consider the bill?

The question was taken; and on a division (demanded by Mr. WALSH) there were—ayes 48, noes 42.

Mr. WALSH. Mr. Speaker, I make the point that there is no quorum present.

The SPEAKER. The gentleman from Massachusetts makes the point that no quorum is present, and evidently there is not. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

Mr. SLAYDEN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SLAYDEN. The vote is on the question of consideration?

The SPEAKER. Yes; those in favor of considering the House joint resolution will, when their names are called, answer "aye," and those opposed will answer "no." The Clerk will call the roll.

The question was taken; and there were—yeas 213, nays 127, not voting 88, as follows:

YEAS—213.

So the House voted to consider the resolution.

The following pairs were announced:

Until further notice:

Mr. SANDERS of Louisiana with Mr. MAGEE.

Mr. ALMON with Mr. STRONG.

Mr. RIORDAN with Mr. AUSTIN.

Mr. RAGSDALE with Mr. MCCORMICK.

Mr. SCULLY with Mr. HOLLINGSWORTH.

Mr. STEDMAN with Mr. LAGUARDIA.

Mr. WILSON of Louisiana with Mr. GEORGE W. FAIRCHILD.

Mr. FLYNN with Mr. HEINTZ.

Mr. MONTAGUE with Mr. RODENBERG.

Mr. ASHBROOK with Mr. CARTER of Massachusetts.
Mr BLACKMON with Mr. CHANDLER of New York.
Mr. BRUMBAUGH with Mr. DAVIDSON.
Mr. CALDWELL with Mr. CRAMTON.
Mr. CHURCH with Mr. DEMPSEY.
Mr. DALE of New York with Mr. CURRY of California.
Mr. CLARK of Florida with Mr. DYER.
Mr. CROSSER with Mr. EDMONDS.
Mr. ESTOPINAL with Mr. ANTHONY.
Mr. GODWIN of North Carolina with Mr. FESS.
Mr. GRAY of Alabama with Mr. BRITTEN.
Mr. HASTINGS with Mr. FOCHT.
Mr. HELVERING with Mr. COPLEY.
Mr. HOOD with Mr. GOODALL.
Mr. LEA of California with Mr. GRAY of New Jersey.
Mr. MAHER with Mr. KAHN.
Mr. OLNEY with Mr. KELLEY of Michigan.
Mr. O'SHAUNESSY with Mr. MILLER of Minnesota.
Mr. PRICE with Mr. MOORE of Pennsylvania.
Mr. HOWARD with Mr. HAMILTON of New York.
Mr. RAINEY with Mr. KING.
Mr. RANDALL with Mr. PLATT.
Mr. ROBINSON with Mr. PRATT.
Mr. RUCKER with Mr. SANDERS of New York.
Mr. SABATH with Mr. HASKELL.
Mr. SAUNDERS of Virginia with Mr. SMITH of Michigan.
Mr. SHERLEY with Mr. SNYDER.
Mr. STEPHENS of Mississippi with Mr. STERLING of Illinois.
Mr. STERLING of Pennsylvania with Mr. TILSON.
Mr. SULLIVAN with Mr. WARD.
Mr. WHALEY with Mr. WATSON of Pennsylvania.
Mr. WHITE of Ohio with Mr. WINSLOW.

The result of the vote was then announced as above recorded.

A quorum being present, the doors were opened.

The SPEAKER. The House will automatically resolve itself into Committee of the Whole House on the state of the Union.

Mr. STAFFORD. Mr. Speaker, I rise to a question of order.

The SPEAKER. The gentleman will state it.

Mr. STAFFORD. I would like to submit that this bill is erroneously on the Union Calendar. It involves no charge whatsoever on the Treasury. It is merely an authorization to confer upon the Chief of Engineers the right to accept a statue that is to be donated by trustees under the will of one Mrs. Harriet Lane Johnson.

The SPEAKER. The point of order is overruled. The gentleman from Kentucky [Mr. JOHNSON] will take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. JOHNSON of Kentucky in the chair.

The CHAIRMAN. The Clerk will report the resolution.

The Clerk read as follows:

Joint resolution (H. J. Res. 70) authorizing the erection on the public grounds in the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States.

Resolved, etc., That the Chief of Engineers, United States Army, be, and he is hereby, authorized and directed to grant permission to the trustees designated in the will of Mrs. Harriet Lane Johnston for the erection of a memorial to James Buchanan, a former President of the United States, on public grounds of the United States in the city of Washington, D. C., in the southern portion of Meridian Hill Park, between Fifteenth, Sixteenth, W, and Euclid Streets NW.: *Provided* That the design and location of said memorial and the plan for the treatment of the grounds connected with its site shall be approved by the Commission of Fine Arts, and that the United States shall be put to no expense in or by the erection of said memorial.

Mr. SLAYDEN. Mr. Chairman, this resolution proposes to permit the erection in the city of Washington of a stutue to the memory of James Buchanan, who was the fifteenth President of the United States. For that purpose his niece, Harriet Lane Johnston, provided in her will the sum of $100,000. Mrs. Johnston was President Buchanan's housekeeper while he was in the White House, and, I am told, made a very gracious lady of the White House and dispensed its hospitalities in a charming way. That sum of $100,000 has accumulated until now it is about $130,000 or $135,000. The Government of the United States is to be at no expense. The design of the monument must be acceptable to the Commission of Fine Arts, and the monument will be located in the city of Washington. Those are the terms of the resolution. I personally think it would be an ungracious thing for us to reject this offer on the part of this lady. I have talked to the members of the Commission of Fine Arts about it, and the designs submitted already indicate a high degree of artistic excellence. I would like to have the House agree to this unanimously as an act of grace. It costs us nothing. Some gentlemen in the House have informed me that they voted against its considerartion because they thought it was costing the taxpayers of the country $100,000, and that this was not an opportune moment for indulgence in expenditures of that kind. Their reasoning is perfectly sound. If that had been the case, I would have been with them and would have voted against its consideration, but that is not true. It does not cost us a cent.

It is guarded in every possible way to secure a work of art, and I hope that the House will by a practically unanimous vote permit the erection of this statue under the conditions laid down.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. SLAYDEN. Yes.

Mr. WALSH. The gentleman states that this does not cost the Government a cent. It is true, however, that the Government allots a location on public grounds for the erection of a statue to former President Buchanan, which plot of ground might be occupied by a statue of some more distinguished citizen, some one who had rendered distinguished services to the country.

Mr. SLAYDEN. Mr. Chairman, I am not willing to discuss the politics of the period before 1860 with the gentleman. I think the effort to make politics out of this is an unfortunate thing. I think it would be an ungracious thing to refuse to accept this monument because Mr. Buchanan happened to be a Democratic President in trying times in the history of the country. It does not cost the Government anything, and if it is a work of art it will help to decorate the grounds and make them more pleasant to the eye of the residents and visitors to the Capital.

Mr. WALSH. Mr. Chairman, will the gentleman yield further?

Mr. SLAYDEN. Certainly.

Mr. WALSH. The gentleman speaks of an act of grace. He, I assume, means an act of grace to the heirs or descendants of the former President?

Mr. SLAYDEN. Perhaps I chose my words unfortunately. I think it is due to the memory of the gracious lady who presided over the White House, and I think it is due to the fact that the politics of that period have gone into the past forever, I hope, that at this time when Democrats as well as Republicans are doing their duty in the trenches in this great war, and I dare say there is no question of politics or previous political affiliations considered by the men who command them or by the men themselves. Within the last 10 days more than 25 young men from my district have been aboard a ship of war and in serious peril of their lives, and more than a dozen of them have lost their lives in going abroad to fight the battles of this country. Every one of them was a Democrat, and would you vote to refuse to recognize that service because of the fact that they are Democrats?

Mr. WALSH. Does the gentleman upon that argument and the statement that he is making wish to put this in the class of war measures?

Mr. SLAYDEN. Oh, no.

Mr. WALSH. Will the gentleman, without touching upon the politics of the situation in any way, briefly inform the committee what distinguished service this former President of the United States rendered to his country?

Mr. SLAYDEN. I do not intend to occupy the time of the House by doing any such thing as that, but I shall refer the gentleman to the works of Jeremiah Black, one of the greatest and most eminent lawyers in the country, one of the greatest and most eminent patriots the country has ever had, and I dare say the gentleman will find a vast amount of information in them. I yield the balance of my time to the gentleman from Maryland [Mr. LINTHICUM].

Mr. ROBBINS. Mr. Chairman, before the gentleman does that I desire to ask him a question. I am the head of a commission to build a monument in my district. In taking the matter up and investigating it we were informed that it was an inopportune time to erect structures of that kind, that labor that would be employed in getting out the stone and transporting material ought to be used in war activities, and we were discouraged. I want to ask the gentleman if he has made any investigation to find whether it would be practicable to do this thing at this time? I ask for information.

Mr. SLAYDEN. As a matter of fact, I think it will not be done right now. I doubt if it is ever done during the period of the war. I think it will be delayed if there is any competition found in the labor market. I am sure it will be.

Mr. ROBBINS. I was anxious to know whether the gentleman had investigated in reference to that, because we meet that situation.

Mr. SLAYDEN. I yield to the gentleman from Maryland, whose bill it is.

The CHAIRMAN. How much time?

Mr. SLAYDEN. Whatever time at my disposal he desires.

The CHAIRMAN. The gentleman from Texas has used five minutes. The Chair recognizes the gentleman from Maryland.

Mr. LINTHICUM. For how long?

The CHAIRMAN. Fifty-five minutes.

Mr. LINTHICUM. Mr. Chairman and gentlemen of the committee, there is very little I can add to what the distinguished gentleman from Texas [Mr. SLAYDEN] has said. This is a resolution to provide in the city of Washington a site for the erection of a monument to James Buchanan, a former President of the United States. The money has been provided by the will of Harriet Lane Johnston, his niece, the lady of the White House during his administration, who presided with great distinction and with the love and admiration of all. This money was provided first to erect a stone at the birthplace of Mr. Buchanan in Stony Batter, near Mercersburg, Pa. That has been done out of the income from the money.

There is now in hand sufficient to erect a monument to cost $100,000, the sum mentioned in her will. It is left to the Fine Arts Commission to select the design of the monument and approve the work. That commission says that they have already inspected the design which is in contemplation and have practically given it their approval. They have not yet settled upon a site, though it is their intention or their idea to place it in Meridian Park, and I understand there is to be a large basin in front of the monument to the memory of some other person. The control of the entire matter is absolutely left in the hands of the Commission of Fine Arts, and nothing can be done without their consent. The money is to come out of the Harriet Lane Johnston estate, and the Government is put to no expense whatever, unless you construe the site as such, as maintained by the gentleman from Massachusetts [Mr. WALSH]. Meridian Hill Park, as we know, will be an ideal location, and if that is selected it will be a splendid place for this monument. There is not much I can say, and if I should attempt to tell this body of distinguished gentlemen of the works of James Buchanan, of what he accomplished, it seems to me it would be like carrying coals to Newcastle.

Mr. Chairman, I appreciate, however, that there is to-day among the public a widely accepted opinion hostile to the memory of President Buchanan. I also appreciate that the task of correcting that opinion is a formidable one, yet I would feel recreant to my duty and to truth itself if I did not now raise my voice in protest against a grave wrong done an honorable gentleman.

The history of the period preceding the Civil War, as it now stands written, is all too highly colored by the passions and prejudices of that period. It is not to be compared with the history of the great conflict itself, for the history of the latter has been made just by a more critical study and by the appreciation of warriors who meet foemen worthy of their steel. Little is said now of James Buchanan prior to his turbulent term in the White House.

Mr. Buchanan had a long and distinguished career from the time he entered the Legislature of Pennsylvania in 1814 to the time of his retirement from the Presidency in 1860.

In 1821 he took his seat in this honorable body, making his first speech in support of President Monroe and of John C. Calhoun, his Secretary of War. For 10 years he labored here during Monroe's second term, the term of John Quincy Adams, and two years of Andrew Jackson's, of whom he was a strong supporter and personal friend. He was sent by President Jackson to Russia in 1833, and at St. Petersburg negotiated a commercial treaty with that great country.

In 1834 he was elected to the United States Senate and served for three terms. He was conspicuous in his support of President Jackson's financial policy, and likewise of Van Buren during his administration. Under Van Buren he declined the Attorney Generalship of the country, and in 1843 was elected for a third term to the United States Senate, his name being mentioned as Democratic candidate for the presidential nomination, at which time he refused.

He became Secretary of State under James K. Polk and decided many important questions; for instance, the establishment of the boundary between Oregon Territory and the British possessions, and the annexation of Texas, which resulted in the Mexican War.

When Mr. Taylor became President Mr. Buchanan retired to private life, but in 1852 he was the unsuccessful candidate for the Democratic nomination. He was appointed minister to England by President Pierce in 1853, and was recalled at his own request in 1855, being nominated for President by the Democratic national convention at Cincinnati, Ohio, June 4, 1856. After a fiercely contested election he was, when 66 years of age, elected President of the United States by 174 electoral votes as against 114 for John C. Fremont and 8 for Millard Fillmore.

If you behold a man standing on some mountain peak you know he did not light there, but he gained that dizzy height by ability, energy, perseverance, and strength. So it is in public life. If you behold a man President of the greatest Republic which the world has ever known, it is positive proof that he would not have gained that eminence without great ability and the love and confidence of his people. [Applause.]

Few men here to-day, few men in our history have longer stood the acid test of public service than James Buchanan. No weakling made that record; no coward nor incompetent could have kept the public favor for so many years.

Mr. Buchanan represented that element in our Government who fully believed in the sovereign rights of States, and who implicitly believed in the absolute property right in slaves. Let not the present-day moralist look askance at his beliefs. Remember rather that those beliefs were the beliefs of the founders of our Government. Those beliefs came down by birth and breeding to James Buchanan. If Buchanan was wrong in upholding them then the fathers were wrong in originating them. Remember that the doctrine of the sovereign rights of States came to him from the great Jefferson, and that it was Jefferson who wrote the Kentucky resolutions of 1798, which laid down the doctrine: "This Commonwealth is determined, as it doubts not its co-States are, to submit to undelegated and consequently unlimited powers in no man or body of men on earth." Remember as well that the Kentucky resolutions were followed by those of Virginia, drawn by Madison, which put forth a doctrine equally strong as those of Kentucky. Remember also that the Democratic platform of 1856, on which Buchanan was elected, reaffirmed the belief in and loyalty to the Kentucky and Virginia resolutions of 1798 and pledged the faith of its candidate to the upholding of the principle therein laid down. So with Buchanan's belief in the institution of slavery. His belief was based on the organic law of the land. He could look back and see the great founders of this country, many of them surrounded by their slaves. By every tenet he was born to, and by the plighted word of his party he was bound to, uphold the institution of slavery and the sovereign rights of States.

That in brief was the situation confronting President Buchanan in 1860. When the great party conventions met in that year the Democratic Party split on the slavery issue, and that party passed from the position of power it had so long held and became merely a protesting minority. It has well been said that "The wages of discord is defeat." For half a century the Democratic Party paid the penalty for discord, just as its successor in power is now and will continue to pay that penalty. When the Democratic split of 1860 opened the way for the success of the Republican Party, then for the first time was seriously considered the forming of a southern republic, then for the first time was the cry of secession raised with purpose deep to the point of menace. Up to that time no criticism had been made, nor can be made, of the administration of President Buchanan. It is on what he did or failed to do from the national election in November, 1860, to March 4, 1861, that he has been, as I firmly believe, most unjustly and most ungenerously condemned.

The first move of the Southern States was the South Carolina State convention, which on December 20, 1860, passed the ordinance of secession. What was President Buchanan's position and belief on secession? I quote from his last message to Congress in December, 1860:

> In order to justify secession as a constitutional remedy it must be on the principle that the Federal Government is a mere voluntary association of States, to be dissolved at pleasure by any one of the contracting parties. If this be so, the Confederacy is a rope of sand, to be penetrated and dissolved by the first adverse wave of public opinion in any of the States.
>
> In this manner our 33 States may resolve themselves into as many petty, jarring, and hostile republics, each one retiring from the Union without responsibility whenever any sudden excitement might impel them to such a course. By this process a Union might be entirely broken into fragments in a few weeks which cost our forefathers many years of toil, privation, and blood to establish. Such a principle is wholly inconsistent with the history as well as the character of the Federal Constitution. After it was framed with the greatest deliberation and care it was submitted to conventions of the people of the several States for ratification. Its provisions were discussed at length in these bodies composed of the first men of the country. Its opponents contended it conferred powers upon the Federal Government dangerous to the rights of the States, whilst its advocates maintained that under a fair construction of the instrument there was no foundation for such apprehensions. In that mighty struggle between the first intellects of this or any other country it never occurred to any individual, either among its opponents or advocates, to assert or even to intimate that their efforts were all vain labor, because the moment that any State felt herself aggrieved she might secede from the Union. What a crushing argument this would have proved against those who

dreaded that the rights of the States would be endangered by the Constitution. The truth is that it was not until many years after the origin of the Federal Government that such a proposition was first advanced. It was then met and refuted by the conclusive arguments of Gen. Jackson, who in his message of the 16th of January, 1833, transmitting the nullifying ordinance of South Carolina to Congress, employs the following language:

"The right of the people of a single State to absolve themselves at will and without the consent of the other States from their most solemn obligations and hazard the liberty and happiness of the millions composing this Union can not be acknowledged."

It (the Union) was intended to be perpetual and not to be annulled at the pleasure of any one of the contracting parties.

Mr. Chairman, that is not the doctrine of a weak man. No one has ever spoken more clearly his devotion to the Federal Union. But while President Buchanan believed and strongly urged the preservation of the Union he was elected on a platform and pledged to the doctrine that no sovereign State should ever be coerced by force.

By honor he was bound and by belief he was restrained from attempting to coerce South Carolina to recede from her position and to return to the Union. Had he employed force to this end he would have been false to his trust, as he construed it, false to his party, false to the convictions and belief of a lifetime, and he then would have been worthy of censure without stint. President Buchanan sought to preserve the Union without the use of force. That is a true statement, but more clearly proved than this statement. President Lincoln sought to preserve the Union without the use of force. President Lincoln did not take the steps which opened hostilities. He waited, hoping to effect a reconciliation. Buchanan waited for the same high purpose. Buchanan failed in this as also did Lincoln, for war was inevitable. Buchanan's reasons for not using force were threefold.

First. His belief that force should not be used to coerce a sovereign State;

Second. The absolute impossibility of his gaining from Congress the right to use such force; and

Third. His conclusion as to the effect of the use of force on the perpetuity of the Union, which he expressed in these words:

But, if we possessed this power, would it be wise to exercise it under existing circumstances? The object would doubtless be to preserve the Union. War would not only present the most effectual means of destroying it, but would banish all hope of a peaceful reconstruction. Besides, in the fraternal conflict a vast amount of blood and treasure would be expended, rendering future reconciliation between the States impossible. The fact is that our Union rests on public opinion, and can never be cemented by the blood of its citizens shed in civil war.

Does any man here say that was not a reasonable conclusion in the light of those days? Could any man at that time, any sane man, predict that the battle field at Gettysburg could witness the terrible slaughter of Pickett's charge in 1863 and in 1913 see the remnants of that gray army march again up that slope to grasp in brotherly welcome the hands of the boys in blue, their deadly foes of a half century gone? That, sir, is a miracle, and in Buchanan's time was unimagined. Shall we condemn the man for failing to prophesy that miracle? So Buchanan withheld his hand from the task. Just so did Lincoln until he saw the futility of it. Buchanan was at the end of his term, pledged to one course of action. Lincoln was coming in pledged to another course of action. Would any Member of this House seriously contend that an outgoing President is in duty bound to inaugurate the policies of an incoming President? It has never been done and would render the doer ridiculous. Yet had Buchanan even sought to do the things Lincoln was elected to do, yet even then the use of force without provocation against the seceding States could not have been his policy for Lincoln was not elected on any such program or platform.

There is, sir, no basis in reason for censuring President Buchanan. The only basis is in lack of knowledge of events and in bad temper. Buchanan was the end of the old order. It was destined to pass. He was its last exponent. Lincoln was the first of the new order. That came to stay. Buchanan is censured not so much for what he did or failed to do as for the fact that he was the last of his line of Presidents who upheld slavery and State rights.

The culmination of that great question of abolition which had been forming for half a century had been reached. The mooted question of the right of secession was once and for all decided in the negative by the court of last resort and we became an indissoluble Union of indestructible States, and as such are able to meet the task resting upon us to-day in the prosecution of this great war without a jar or disturbance to our machinery of Government. As I have said, Mr. Buchanan served in many capacities. His administration forms a part in the historical evolution of a country from a mere confederacy to a Union of strength and power unequaled in the world's history. It is but right that we should erect a monument to a man who came from the great industrial State of Pennsylvania.

Mr. KREIDER. Will the gentleman yield?

Mr. LINTHICUM. In just a moment. I think we ought at least to honor him in allowing the erection of this monument in the city of Washington when we have placed it under every safeguard in the hands of the Commission of Fine Arts. I now yield to the gentleman.

Mr. KREIDER. Does the gentleman know whether or not there is in the city of Washington at the present time a monument to James Buchanan?

Mr. LINTHICUM. I think not.

Mr. KREIDER. Do you know how many Presidents, from Washington down, have monuments erected in their honor in the city of Washington?

Mr. LINTHICUM. I do not think there are many of them. They are very few. But because we have been wrong in that it does not make this wrong. We ought to have more monuments to the great Presidents of this Republic. I wish we had more monuments to our great Presidents rather than some of these monuments around Washington of people who have never done anything for this country.

Mr. MILLER of Washington. As I understand, there was to be a bowlder in front of the monument, dedicated by some other person?

Mr. LINTHICUM. No; I said that in her will Mrs. Johnston provided for the erection of a monument at his birthplace, at Stony Batter, Pa., and my understanding is that it has already been erected at that place, near Mercersburg, Pa., and out of the income derived from the money the executor told me that the monument at his birthplace had been put there in accordance with Mrs. Johnston's instruction.

In conclusion, Mr. Chairman, let me say that Mr. Buchanan entertained the same views as all the South, much of the North, and even some New England parts agreed with his views on secession and nearly attempted it.

He was an honorable gentleman, an able and a faithful public servant. He served his country long and honorably. He but followed the beaten path of his predecessors back even to the great Washington himself, for his beliefs were the beliefs of the founders.

To deny to his memory now this offered tribute is to show a lack of knowledge of events and a spirit small and mean. If republics are ungenerous, let us for once lay aside this fault and be generous to this man who amid the most trying times worked and spoke to save the Union he loved. [Applause.]

Mr. LINTHICUM. Mr. Chairman, I yield 10 minutes to the gentleman from Pennsylvania, Mr. DEWALT.

Mr. LONERGAN. Will the gentleman yield to a question?

Mr. LINTHICUM. I will.

Mr. DOWELL. Mr. Chairman——

Mr. LONERGAN. If the gentleman will pardon me, I was recognized.

Mr. DOWELL. I desire to raise a question of order. The gentleman has no right to yield the time. The floor was yielded to him for the 55 minutes. He has no right under the rule to yield the time.

Mr. DEWALT. Mr. Chairman, I ask unanimous consent to address the committee for five minutes.

Mr. GARRETT of Tennessee. He was yielded the balance of the time by the gentleman from Texas [Mr. SLAYDEN].

Mr. DOWELL. The gentleman was yielded the time, and he has no right to yield it to the chairman any more than anyone else.

Mr. LINTHICUM. I have not yielded the floor yet. I have the right to yield the balance of my time to the gentleman from Texas [Mr. SLAYDEN].

Mr. DOWELL. That is the question I am raising, that he has no right to yield the time.

Mr. LINTHICUM. We need not have any controversy over the matter.

Mr. SLAYDEN. Mr. Chairman——

Mr. DOWELL. The question is, when time is yielded to a Member to occupy the floor, the gentleman who has the time yielded to him has no right under the rule to yield it to some one else. He must either occupy the floor or yield the floor.

The CHAIRMAN. The Chair will say that it has been the prevailing custom here to yield back the time to the chairman of the committee.

Mr. LINTHICUM. Mr. Chairman——

The CHAIRMAN. The gentleman will wait one minute. The Chair is ready to read the rule on the subject.

Mr. DOWELL. Mr. Chairman, the gentleman who had the floor, the chairman of the committee, had one hour. He could have yielded five minutes or any length of time to any Member, and then could have yielded during the hour and reserved the time and kept within the rule, but under the rules of the House he yielded the time to the gentleman who occupied the floor dur-

ing the balance of his hour, and he has no more to yield. The gentleman who occupied the floor has no right under the rule to surrender it to some other Member.

The CHAIRMAN. The Chair will say that the gentleman from Texas [Mr. SLAYDEN], the chairman of the committee, was recognized for one hour, and the Chair so stated. When the gentleman from Texas had used five minutes of that time he yielded to the gentleman from Maryland [Mr. LINTHICUM] such time as he might want. The Chair of his own motion stated that the gentleman from Maryland was recognized for 55 minutes, and so he was, and he could have used the 55 minutes if he had chosen so to do. The Chair holds that the gentleman from Maryland can yield back the remainder of his time to the gentleman from Texas, who is chairman of the committee.

Mr. LONERGAN. Mr. Chairman——

The CHAIRMAN. Does the gentleman yield to the gentleman from Connecticut?

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. COADY having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had disagreed to the amendments of the House of Representatives to the bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes, had asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. RANSDELL, Mr. MARTIN, and Mr. NELSON as the conferees on the part of the Senate.

STATUE OF JAMES BUCHANAN.

The committee resumed its session.

Mr. SLAYDEN. I yield to the gentleman from Pennsylvania [Mr. DEWALT] 10 minutes.

Mr. DEWALT. Mr. Chairman and gentlemen of the committee, I would not for a moment take either the time or attention of this body were it not for the fact that James Buchanan came from the great State of Pennsylvania, in which I have the honor of living. I therefore deem it not only my privilege but, in part, my duty to advocate the passage of this measure, not as a political question but as a matter of honor and grace and dignity to the great State of Pennsylvania.

Why should there be any opposition to this? Why are there 128 votes cast in the negative? Is it because there is a political reason therefor? Has the time come now in this crisis confronting us, when men sitting on the right-hand side of this Hall shall be severed from those on the left by a political question, not dating now but dating back to the days of 1861? Let me say to those gentlemen that James Buchanan, honored son of Pennsylvania, was a Senator of the United States from that great State, that he was ambassador to Russia, ambassador to Great Britain, was the chairman of the Judiciary Committee of this House, and had an enviable and worthy record not only in the Senate but in the House of Representatives as well and in the foreign courts at which he was our minister. Why, then, this cavil? It certainly can not be a question of economy. It costs the Government nothing except the donation of the site. If there were an expenditure here of $100,000, or, if you please, of $150,000, I still would say it would be justified, because it would honor the memory of a man who served his country well.

We had a man in the State of Pennsylvania, Hensel by name, who was one of the greatest lawyers in the Commonwealth, a former attorney general of our State, who wrote a history of James Buchanan, and in that he gives this cogent sentence:

> I state it from the records and after examination thereof, and my opinion is concurred in by Judge Brown, of the Supreme Court, that if Abraham Lincoln had lived as President under the same circumstances and in the same trying times he would have done before the war what James Buchanan did, and that if James Buchanan had lived and been President when Lincoln was he would have followed the path of the illustrious Abraham Lincoln.

Mr. COOPER of Wisconsin. Will the gentleman permit an interruption?

Mr. DEWALT. Certainly, sir.

Mr. COOPER of Wisconsin. Did I understand the gentleman to say that some man whom he characterized as distinguished from the State of Pennsylvania had said that if Abraham Lincoln had lived before the war he would have done what James Buchanan did under the same circumstances?

Mr. DEWALT. No. Evidently the gentleman has mistaken my sentence, because I recognize the fact, if the gentleman did not, that Abraham Lincoln did live quite a long time before the war.

Mr. COOPER of Wisconsin. But they both lived at the time of the Kansas-Nebraska controversy and the controversy over the Lecompton constitution and other controversies of that day. One was for circumscribing of the limits within which slavery could exist in this country and the other took the opposite view.

Mr. DEWALT. I am not discussing the question of the limitation of slavery or the extension of slavery. I am discussing the broad proposition that in the unhappy circumstances that existed at that time Abraham Lincoln was trying to avert the war as much as he could, and James Buchanan was trying to do the same thing. Neither of them wanted to plunge this country into war; and Abraham Lincoln, the man whose birthday we celebrated yesterday, said, "I must save the Union. If I must free all the slaves, I will save the Union by freeing them all. If I must free some of the slaves, I must save the Union by freeing some. If I can save the Union by freeing none of the slaves, I would still save the Union." [Applause.]

That was the record of that statesman on the slavery question. I do not appeal for the passage of this resolution because I am a Democrat. I do not appeal for the passage of it because James Buchanan was a Democrat, but I appeal for it in this light: That great man, Abraham Lincoln, who, in my judgment, was the greatest President the country ever knew [applause], not excepting George Washington, had this immortal sentence, too, in his mouth, "With charity for all, with malice toward none, let us bind up the cruel wounds of this war." [Applause.]

Now, my friends, this is no time, in my humble judgment, to tear open again the wounds of the war of 1860 to 1865. In my humble judgment, gentlemen, as a Representative from Pennsylvania from the State whence this great statesman came, this is the time to make close the bonds of patriotism and to forget that there were Democrats and that there are Democrats, that there were Republicans and that there are Republicans, but to remember once and for all time that there are none but American citizens. [Applause.]

Mr. SWITZER. Mr. Chairman, will the gentleman yield?

Mr. DEWALT. Yes.

Mr. SWITZER. Do I understand the gentleman to say that if Abraham Lincoln had been President at the time James Buchanan was President, he would have followed the same course and would have done the same things?

Mr. DEWALT. I said, and I repeat it again, that Judge Brown, who is now the chief justice of the Supreme Court of Pennsylvania, who lives in the county of Lancaster, from which President Buchanan came, and that William Uhler Hensel, who was attorney general of the State of Pennsylvania, both gave the history of James Buchanan particular attention, and they assert in printed pamphlets, one of them being a Republican and the other a Democrat, that James Buchanan, in their judgment, pursued the same course that Abraham Lincoln would have taken under the same circumstances.

Mr. SWITZER. Regardless of their judgment, I do not believe it.

Mr. DEWALT. That may be, and your judgment may be more profound than theirs, although one of them is chief justice of the Supreme Court of Pennsylvania. [Applause.] Mr. Chairman, I yield back the balance of my time.

Mr. LONERGAN. Mr. Chairman, will the gentleman yield?

Mr. DEWALT. Yes.

Mr. LONERGAN. Will the gentleman please state to the committee what memorial, if any, erected on public land of the city of Washington, was paid for out of private funds?

Mr. DEWALT. My dear sir, I wish I could give you the information. I would if I had it, but I do not have it, or I would give it to you.

Mr. CARY. I may answer as to one. The Polish monument to Kosciusko was paid for by the National Polish Association.

Mr. GILLETT. I could mention another—that of Daniel Webster.

Mr. SLAYDEN. Mr. Chairman, I would like to ask the gentleman leading the opposition to this measure to use some of his time now or all of it.

The CHAIRMAN. The Chair will recognize some Member in opposition.

Mr. WALSH. Mr. Chairman, if no other Member desires to oppose this measure, I desire to oppose it and control the time of the opposition.

The CHAIRMAN. The Chair recognizes the gentleman from Massachusetts for one hour.

Mr. WALSH. I yield 10 minutes to the gentleman from Indiana [Mr. WOOD].

The CHAIRMAN. The gentleman from Indiana is recognized for 10 minutes.

Mr. WOOD of Indiana. Mr. Chairman, I think it most unfortunate that this proposal is laid before this House at this

time. As has been suggested by the gentleman from Pennsylvania [Mr. DEWALT], who just preceded me, that this is a time when all citizens of the United States should stand together, and when there should be nothing brought to the floor of this House that will have any tendency to strain that relation.

There is a fitness in all things and a time for all things. This is not a fit place to raise a monument to the memory of James Buchanan. It is not a fit time to suggest that a monument be built in the Capital of the Nation to James Buchanan. I am opposing this measure not because James Buchanan was from the State of Pennsylvania or because he was a Democrat.

I wish that this was a proposition to raise a monument to a really great citizen of the State of Pennsylvania and a great Democrat, and I would gladly support it; I wish that a proposal were had to raise a monument to Edwin M. Stanton [applause], who stood for the things that we desired, and which all Americans now stand for. I am opposing this not because James Buchanan was a Democrat and I am a Republican. But I wish it was a proposal to erect a monument to one of the greatest citizens this country has ever had, and one of the best Presidents it ever had, and when the future history is written of the greatness of Presidents he will stand high among them—Grover Cleveland.

The question has been asked, "What did James Buchanan do as President of the United States that warrants this distinguished honor?" I ask gentlemen who stand sponsor for this measure to answer that question. Were that question propounded with reference to Grover Cleveland, there are two things that he did, if no others, that would warrant the building of a monument to his memory as high as the Washington Monument now stands, for the service he rendered was most signal. He stood between law and order and disloyalty and disorder when he said to one governor in the United States, "You shall not longer conduct dishonorably the affairs of your State and interfere with the business of the Nation," and he sent the Army to Chicago to show a man who was trying to tear down this Government that the Nation was bigger than any State and that law should be preserved there.

Again he stood like a stone wall against those who would disgrace the Nation and reduce its finances to a scandal and a shame, and in favor of sound money that would save the country from dishonor.

So there is no politics actuating those who see fit to oppose this proposition. But, as I say, before any man's monument is placed in the city of Washington there should be a condition precedent that he should have rendered some signal service that would warrant the building of that monument. Any time before the disgraceful conduct of Benedict Arnold at West Point had the War of the Revolution closed, the name of Benedict Arnold would have stood high upon the record of fame for having done most signal service for the Colonies. He destroyed it all in a single moment. If James Buchanan had never been President of the United States, and if, by reason of the record that he made as minister to England and as minister to France, or the signal service that he rendered in the State Department as Secretary of State, a monument had been erected to him, then it might have been justified. But when this country was in its peril, when there were those without and within trying to undermine it and destroy it, what signal service did he then render? Again we ask the proponents of the measure to answer.

But it has been said that Abraham Lincoln would have preserved slavery if necessary in order to preserve the Union. That is true, so great was his love for the Union; but back of it all there was in the heart of Abraham Lincoln the lesson inculcated there when he went down the Mississippi River and saw a slave girl being sold from the auction block. He afterwards declared that he then took an oath before God that if he ever had the power he would strike that institution, and strike it damned hard. The time came, and he did strike it hard; he killed it. When Abraham Lincoln became President of the United States, if the continuance of slavery had been essential to the preservation of the Union he would have agreed to the continuance of slavery; but never at any time did Abraham Lincoln, for the purpose of averting that war, permit the arsenals of this country to be seized by the enemy, nor did he permit the vessels that we owned to be taken into far-away ports so that they could render no service whatever.

I say to you that it is most unfortunate that we are asked now to build this monument in these times of peril, when we are appealing to the youth of this country, when we are appealing to the young men of this country that they shall give their all upon the altar of their country if need be for the preservation of this great Government of ours and the world's democracy. This is the time, if you please, when we should point to monuments of men who by reason of their heroism have earned a place in fame or who are entitled to some recognition of this character. Every time we go up and down the avenue and look at the statue of that superb general of the War of the Rebellion, Gen. Hancock, a great Democrat, there is an inspiration in the breast of every young man, an inspiration, if you please, to dare and do for this country of ours. Had there been anything in the conduct of James Buchanan, had he shown any spine at the time when I say it did take courage for men to act, then might there be some reason for coming before us at this time with this project. But when he was called upon to exercise manhood, when it took courage, when it took great decision of purpose, and when it took daring, if you please, James Buchanan was found woefully wanting in the balance. So, I say it is an unfitting time. If this were a proposition to raise this monument to the memory of the woman who graciously discharged her duties as mistress of the White House during the four years that Mr. Buchanan was President of the United States, I would gladly support it, for it would be a gracious tribute to a noble woman and a tribute, if you please, to the gracious womanhood of the United States. [Applause.] But that is not the proposition. It is not to do honor to a man to whom honor is due. It is to do honor to a man who degraded and disgraced his place in the time of peril and in the time of his country's great stress. [Applause.] So, in the name of all those who stood for the Union when he was permitting it to be rent asunder and in the name of the soldiers living and dead who fought to preserve that Union, I protest against this measure.

Mr. WALSH. I yield 15 minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Chairman, I did not intend to speak upon this bill at all. I did intend to content myself with voting against it, upon the general proposition that I do not believe that Congress should ever give permission to anyone, even at their own expense, to erect a monument in the city of Washington unless the subject of that monument was a person who had rendered distinguished service to his country. But, in view of the statements that have been made as to the motives of those who will vote against this bill, I do believe that something ought to be said, and I do resent the insinuation made by the gentleman from Texas [Mr. SLAYDEN] that men who vote against this bill will vote against it because Mr. Buchanan was a Democrat. The gentleman ought to know better than that. He ought to know there is no Republican upon this side of the aisle who is not willing to honor any man deserving of honor, and to grant the same consideration to any man who has rendered distinguished service to the country, whether he be Democrat or whether he be Republican; and it is a slander of the Republican side to make any such intimation as the gentleman has made. Then he says, Why bring up these old issues? Well, I ought to ask in return, Why bring them up? Why have you brought this bill before this House? When a bill is brought before this House proposing to erect a statue to any man, have we not the right to ask what distinguished service that man has rendered that warrants the erection of a statue to him? You proponents of the bill have no right to answer that question by saying, "Oh, you must not ask that question, because he was a Democrat." We may honor Robert E. Lee for the splendid patriotism that he exercised from his standpoint when he, with his State, seceded from the Union. We may honor other distinguished men of the South who did likewise; but I want to say to you that it is a different proposition when you ask us to honor a man who came very near being a traitor to his country while in the presidential chair. [Applause.] Inasmuch as the proponents of this bill have chosen to place its consideration upon the ground that they have, it ought to be discussed upon its merits.

Mr. LINTHICUM. I want to say to the gentleman that this is my bill, and I placed it upon no such grounds. I think there are many Republicans here who are just as much interested in its passage as I am.

Mr. LENROOT. I am very glad to hear the gentleman say that; and yet, if I am not mistaken, the gentleman himself referred——

Mr. LINTHICUM. I beg the gentleman's pardon. I made no such statement.

Mr. LENROOT. The gentleman from Pennsylvania and the gentleman from Texas then did. Now, what were the distinguished services that Mr. Buchanan rendered for which he is entitled to a monument in the city of Washington. The gentleman from Pennsylvania [Mr. DEWALT], if I understood him correctly, stated that in his judgment if Lincoln had been President preceding the war, at the time Mr. Buchanan was President, the action of Mr. Lincoln would have been similar to that of Mr. Buchanan.

Mr. REAVIS. Will the gentleman from Wisconsin yield? I think the gentleman from Pennsylvania made that statement on the authority of some one else.

Mr. LENROOT. In making the statement I think he wished us to understand that that was his view of it.

Mr. REAVIS. I do not think that he made the statement in that way.

Mr. LENROOT. Well, I accept that correction.

Mr. GOODWIN of Arkansas. I do not think the gentleman from Pennsylvania made that statement for himself, but merely quoted the authority of a chief justice of his State, an eminent lawyer, who knew Mr. Buchanan.

Mr. LENROOT. That may be. Now, Mr. Chairman, I hold in my hand a copy of the International Encyclopedia, and in the article on James Buchanan, it is doubtless fair to him, and indeed anyone who reads the article would conclude that it is apologetic and defends him in so far as he can be defended, and I want to read one paragraph:

In the Executive chair he was apparently subservient to southern politicians and allowed their threats of secession to influence his actions. After Lincoln's election Buchanan was more than ever anxious to stifle the slavery discussion, and in his last message to Congress pointedly charged the North with having brought about the existing crisis in national affairs by a discussion which had "produced its malign influence on the slaves and inspired them with a vague idea of freedom." While holding that the States had no right to secede, he added that the Nation had no power to prevent it; he said it could not employ force, except upon the demand of the lawful authorities of the State, and in South Carolina no such authority then existed.

Let me ask if Mr. Buchanan had continued to be President during the years that Abraham Lincoln served, would he have had one Union to-day?

Mr. LINTHICUM. May I ask the gentleman a question?

Mr. LENROOT. Yes.

Mr. LINTHICUM. I do not want to inject any politics into this.

Mr. LENROOT. There is no politics.

Mr. LINTHICUM. In the gentleman's opinion, what would Lincoln have done if he had been in Buchanan's position at that time? He would not have been in control of Congress, he could not declare war; what would he have done?

Mr. LENROOT. If Mr. Lincoln had been President of the United States during the time that Buchanan was President——

Mr. LINTHICUM. No; I am speaking about the last few months when the great controversy came up.

Mr. LENROOT. If the gentleman wants to know, if you read the history of the crisis that was brought on, it was largely because of the position that Mr. Buchanan took that this Nation had no right to prevent the Southern States from seceding by the use of force. What stronger argument could there have been, what stronger invitation could have been extended to the Southern States to secede than the position taken by Mr. Buchanan?

While we all have forgotten these issues that were then raised, while to-day there is no North and no South and there will not be in the future, you who like myself want to have these old issues forgotten ought not to pass this bill to erect a statue in Meridian Park recalling the almost treacherous conduct of a President of the United States during these times, a President that perhaps did more than any other single influence to bring about that civil war because of the position he took which cost hundreds of thousands of lives on both sides. The best thing we can do for the memory of James Buchanan is for the American people, North and South, to forget him as soon as possible. [Applause.]

Mr. SLAYDEN. Mr. Chairman, I would like to have the gentleman from Massachusetts use some of his time, for I understand that some gentlemen on that side of the House have an engagement——

Mr. STAFFORD. Let me say that some gentlemen on this side have an appointment at the White House at 5.30, a delegation numbering 15 will be obliged to leave at 5 o'clock in order to keep the appointment. I was wondering whether we could not rise at that hour if we had not completed the bill.

Mr. LONGWORTH. The statement of the gentleman from Wisconsin excites my curiosity somewhat. Will he be more specific? [Laughter.]

Mr. STAFFORD. They occupy a different attitude than does the gentleman from Ohio, they are grangers.

Mr. NEELY. Mr. Chairman, I would like to make a suggestion that the gentleman from Wisconsin undertake to go on the gentleman from Ohio's bond for good behavior at the White House.

Mr. STAFFORD. Permit me to say that I am not honored by being invited or having business at the White House.

Mr. WALSH. Mr. Chairman, I am not fortunate enough to have spent hours and weeks delving in musty volumes for the purpose of glorifying the great Commonwealth of Pennsylvania nor for the purpose of doing a gracious act to a former mistress of the White House. And I can not speak with the authority and learning of the distinguished and, no doubt, wise judge of Pennsylvania, who is quoted here by the gentleman from Pennsylvania [Mr. DEWALT] as an authority in the House of Representatives upon the day following that which we set apart to do honor and reverence to the memory of our martyred President, the great Lincoln.

And so I lack the authority from having read deeply or delved wisely into written lore. But, sir, no matter who the man may be or what the authority is, to hold out here to us, representing the people of this Union, the idea that the great Lincoln, had he been President during the time that James Buchanan was President, would have followed a similar course borders on blasphemy. And apart from which side of Mason and Dixon's line we may come, we have a right to resent the expression of such sentiments. It has been said that this former President, as a Senator and Member of the Congress, as one of our ambassadors to foreign nations, rendered signal service to his country. I grant that that may be true, but this statue is to be erected to the memory of the President Buchanan, and who is there that will claim that he rendered distinguished service to the United States of America when he held that high office?

I recall having read somewhere that during his public career—and I believe while he was a Member of the coordinate branch of this Government, the great Senate of the United States—he gave expression to the view that 10 cents per day was sufficient for a laboring man. Yet here, in the midst of the world's greatest conflict, we are asked to stop in our deliberations, to pause in our legislation pertaining to this war, to give way for these few hours when more important measures are pending, in order that by our action we may authorize the setting apart of a tract of the public domain a most conspicuous site in the city of Washington to do a gracious act to a former mistress of the White House and to honor the great Commonwealth of Pennsylvania, but beyond and above all that to glorify one who for a term occupied the great office of President of these United States and whose career in that high office is dimmed and dulled by the patriotic courage and devotion displayed by his successor, the great emancipator, Lincoln.

Mr. Chairman, I desire to read a few words that were written upon another matter in December, 1859, during the term of this honorable public servant. In the play of Julius Cæsar I believe it is Anthony who says that Brutus was an honorable man, and so in the same way we might say that Mr. Buchanan as President rendered distinguished services. You will recall the John Brown incident. I wish to read to you words written in 1859, which are truly prophetic, written by one who is still in public life, and although he is of a different party than that to which I belong, I trust he may continue to remain in public life and render distinguished and honorable service in every sense of the word to the Government and people of the United States. The expression of views was contained in a communication reading as follows:

To-morrow John Brown dies upon the gallows, the death of a traitor. Not a traitor to his country, his God, or liberty, but a traitor to a local regulation, recognized in this country as law. He dies, in a land where murderers go unhung, without even a murderer's sympathy. He dies a martyr to his heart convictions of right embedded by bitter experiences and made strong by the same power which hurries him into eternity. He dies; yet there will come a time in the future history of this country when the simple name of John Brown will receive more reverence from the Americans than that of Senator Douglas or President Buchanan or Gov. Wise. The one executed for the highest crime known to the law, the others favored recipients of the highest offices within the gift of a free people—the one the embodiment of nobility and guided by enthusiasm, the others traitors to the revolutionary idea of liberty, fawning sycophants, and timeservers. The only crime proved against John Brown was that of inducing slaves to leave their masters. He did not invade Virginia for rapine and murder, but to strike the shackles from the bondman and let the oppressed go free. Yet Virginia, noble, chivalric Virginia, thirsteth for his blood. The governor of this great State, a would-be President of this Republic, thirsteth for his blood.

It will be noted that reference is made in this communication to this man who rendered such signal and distinguished services as President of the United States. Mr. Chairman, those are words written to the Williams County Gazette, December 1, 1859, when but a youth of 24 years, by our gallant colleague, whose patriotism was shown on many a battle field during the great struggle, the distinguished, in every true sense of the word, gentleman from Ohio, Gen. SHERWOOD. [Applause.]

And I submit here that he was a true prophet, and that it ill becomes us in these serious times to take any action here whereby we shall put the seal of approval upon the official acts of that President, or whereby we shall elevate him to the same plane as that occupied by the immortal Lincoln, and to give

occasion to a revival of discussion of the course pursued by Buchanan and his unfortunate utterances and indecision. And yet they cry "politics"! I say, Mr. Chairman, that this question is broader than a political question. It is sought to dignify and glorify him whose course was such as to deserve then, and as time goes on to still deserve only the censure of silence. Oh, you may say that there is a great bequest pending here, and that unless some action is taken before the 1st of March that bequest will lapse. If that be so, then I say it is better for the Nation to get the benefit of the inheritance tax upon that bequest rather than that we should authorize the setting apart of this tract of land for the erection of this statue, and immortalize not only the individual as President but attempt to cloak with respectability and approbation his official career and what he stood for. Let there be no misunderstanding, let there be no chance for future historians and eminent judges from Pennsylvania, seeking to glorify a statesman or a near statesman, who may have happened to be born within the boundaries of that State—let there be no opportunity for them to say that the American Congress in order to be gracious and courtly to a former mistress of the White House, during the midst of the world's greatest war, in spite of the facts written indelibly in the pages of history during his term of service as a President of this Union, was lax in its efforts to further the great struggle in which we are engaged, and that we put the stamp of disapproval upon impartial historians and political writers; that we put our judgment above and beyond that of the judgment of the men who lived in those times; and that we say that the gentleman from Ohio, Gen. SHERWOOD, did not know of what he wrote, and that he proved to be a false prophet.

I contend, sir, we are warranted in concluding from the facts, the cruel, cold facts of history, that President Buchanan during his term of office skated near the edge of treason and indisputably he was a timeserver. And I ask, sir, that when this measure comes up for final action that this House will not stultify itself by authorizing the erection of this statue in this most conspicuous place at this time. [Applause.]

Mr. Chairman, I reserve the remainder of my time.

Mr. SLAYDEN. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has 35 minutes remaining.

Mr. SLAYDEN. How much has the gentleman from Massachusetts?

The CHAIRMAN. Twenty-eight minutes.

Mr. SLAYDEN. May I ask the gentleman from Massachusetts how many more speeches does he expect to have on his side?

Mr. WALSH. I expect one.

Mr. SLAYDEN. Only one more?

Mr. WALSH. Yes.

Mr. SLAYDEN. Well, Mr. Chairman, we have two more speeches. The gentleman from Pennsylvania [Mr. STEELE] wants a few minutes, and then I will let the gentleman from Massachusetts consume the balance of his time, and I have another colleague in the House who wants to speak on this subject; so now, if it is agreeable, I will yield 10 minutes to the gentleman from Pennsylvania [Mr. STEELE]. [Applause.]

Mr. STEELE. Mr. Chairman, I had not intended to take any part in this discussion, but several matters have arisen concerning the fair fame of one of Pennsylvania's distinguished citizens, and I feel it my duty to say something in defense of his memory. I am one of those who have no personal recollection whatever of the Civil War. I have none of the prejudices growing out of the Civil War. Two of my immediate relatives were officers in the Battle of Gettysburg. They were all what were then known as Douglas Democrats, and upon the slavery question in Pennsylvania sentiment was practically unanimous in opposition to slavery, so I think I can approach this question without any partisan feeling or prejudice or bias growing out of that era in the history of our country. James Buchanan was not the kind of man that he is attempted to be painted on the floor to-day. James Buchanan was a man of sterling character, of high moral principles, and he conscientiously served his country in all the positions he served at that time. He was born in Pennsylvania and descended from the old Scotch Presbyterian stock. He soon fought his way to the front as one of the prominent members of that distinguished bar. He served in the Pennsylvania Legislature for a number of years, and was soon elected a Member of the House of Representatives of the United States. As a Member of this body he soon distinguished himself and after a time became chairman of the Judiciary Committee of this House and served in that position for a considerable time. As a member of the Judiciary Committee of this House he rendered distinguished service to this House and to the country upon the memorable contest to strike out the celebrated twenty-fifth section of the judiciary act and fought that out to a conclusion.

Afterwards he became the representative of Pennsylvania in the United States Senate, and served there for a great length of time. He was then appointed minister abroad, was minister to the Court of St. James, was appointed minister to Russia, and afterwards became Secretary of State under President Polk. In all these positions no question was ever raised as to his ability, no question was ever raised as to his loyalty to the country, and it was only when the trying times came preceding the Civil War that, owing to the passions of that period, he was charged with many things by persons for which there was no real foundation. It had been a growing question for many years, from 1820 down to the outbreak of the rebellion. Was it a crime for Webster and Clay to vote for the compromise in 1850? Nobody has ever charged them with that, and one of them is honored with a monument here to-day in Washington, although he voted for the compromise at that time. You remember the tirade of abuse that arose at that time against Daniel Webster because he voted for the compromise. That same tirade of abuse followed when anyone took that position upon the slavery question about the time of the Civil War, and it is well known that early in the history of James Buchanan h personally asserted in a public speech that he delivered in the city of Lancaster his opposition to slavery. That was his personal principle, and he adhered to that as a political principle down to the time of his death.

Now, James Buchanan was a man of a kindly and peaceful disposition, not possessed of the strong character of Andrew Jackson in the Calhoun controversy or fitted to act in the severe way that a partisan agitator would act. His disposition naturally was to compromise differences and save the country from a period of bloodshed. Was it wrong for him to attempt to do that? In 1898 when the differences arose between ourselves and Spain did not President McKinley assume precisely the same attitude when he opposed the declaration of war as long as he could, and only when the sentiment was overwhelming on that subject accede to it? Was it disloyal at that time for Thomas B. Reed, the celebrated Speaker of this House, to oppose the declaration of war that was then made? I do not think anyone would accuse him of that. So when it comes down to the discussion of Mr. Buchanan whatever differences of opinion may arise as to the course he took at that time there is one thing that all unprejudiced historians who have examined into that question will agree upon at this time, and that is that his loyalty was beyond question. [Applause.]

Now, what objection, therefore, can be made to the erection of this monument at this time? Charges have been made here that would make it look as if Mr. Buchanan had been guilty of some act of disloyalty and of treason to the country. That, it seems to me, is the narrowest kind of partisan objection, and one which there is no real foundation in history to support. I maintain that whatever differences of opinion may exist as to the action of Mr. Buchanan, as to whether he ought to have taken this course or that course, there could be no question that he was entirely loyal to the Union and to the Government at that period of time. And, if that be true—and I do not think it can be questioned as a matter of history—then the objection that this money ought to be used in some other way at this time, or that the ground upon which the monument is proposed to be erected could be used for some other purpose, falls to the ground as the merest captious objection.

The monument does not cost this Government a single dollar. It is paid for entirely out of the estate of his niece, Harriet Lane Johnston, and while Members object to the erection of a monument to Mr. Buchanan and seem to be willing to erect one to the then mistress of the White House, I do not see how the two can be separated at all. For myself, it seems to me that it ought to be an act of grace on the part of this House, and we should be sufficiently broad minded, seeing that this is not going to cost the Government a penny, to do the proper thing under the circumstances.

Mr. GOOD. Will the gentleman yield?

Mr. STEELE. Yes, sir.

Mr. GOOD. Aside from the charges that have been made of the political consideration, the gentleman from Wisconsin [Mr. LENROOT] made one observation that seemed to me ought to have some weight with the House, and that is this, namely: Can we afford to permit persons to erect monuments in the city of Washington on public grounds to be paid for by private persons at all; and if we do follow that principle, is it not likely to happen that the person whose relatives have the most money will have the most magnificent monuments to their memory, irrespective of what service they might have rendered.

Mr. STEELE. As a matter of principle, as long as Congress retains control over the matter, I can see no objection to it.

Mr. FERRIS. Does the gentleman from Iowa think it very hard to distinguish between the ex-Presidents of the United States and ordinary citizens who might have money with which to build monuments?

Mr. GOOD. It had not been brought to my mind until the gentleman from Wisconsin [Mr. LENROOT] referred to that fact, but it did seem to me that the practice of permitting wealthy people to leave large sums for the erection of monuments, even though the monument might be erected to an ex-President, was not a wise provision, and we could better afford to pay for those monuments out of the Treasury of the United States and, therefore, have control over them. I was just asking the gentleman.

Mr. FERRIS. I was impressed with the gentleman's suggestion, as a rule, but I am also impressed with what the gentleman from Pennsylvania [Mr. STEELE] is saying, that this House need not throw itself into a frenzy about building a monument to any ex-President of the United States; I do not care whether he be Democrat or Republican.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. SLAYDEN. Mr. Chairman, I extend the gentleman's time three minutes. And with the gentleman's permission, I would like to interrupt him long enough to make a statement.

Of course I do not know the entire history of the Capital as to the erection of monuments. There have been monuments erected here by contributions from the outside. The Kosciusko Monument was so erected and the Columbus Monument was erected very largely at the expense of private citizens, as was also the Daniel Webster Monument and others.

Mr. GARRETT of Tennessee. Will the gentleman permit a suggestion. The monument to ex-President Garfield was erected by the contributions of organizations outside. The erection of the monument to the founder of the Grand Army of the Republic, which stands at Seventh Street and Pennsylvania Avenue, was erected by contributions of organizations outside.

Mr. SLAYDEN. I will say that it is not the practice, and there has been no custom of the sort as apprehended by my friend from Iowa, and so far as my influence goes there will be none, although at this time there are pending on the calendar two bills authorizing monuments to be erected on ground to be selected by the Commission of Fine Arts, where the cost is to be provided by outside sources. One of these is at the instance of the great Methodist Church and the other at the instance of the Catholic Church. And I am inclined to believe that when those two measures come before this House the suggestion of the committee will be accepted without much controversy.

Mr. GOOD. The incidents that the gentleman referred to, as I understood him, were incidents where there was a sentiment throughout some portions of the country, at least, and the contributions were in response to that sentiment.

Mr. SLAYDEN. The point is that they were erected by private contributions.

Mr. GOOD. But were there any cases where the persons in their wills left provision to erect monuments?

Mr. SLAYDEN. No; no other was proposed except in the case of James Buchanan. That is unique.

Mr. STEELE. Mr. Chairman, I was about to reply to the gentleman when I was interrupted. My personal opinion is that so long as Congress retains control over the whole situation I can see no objection to it. [Applause.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has again expired.

Mr. SLAYDEN. Mr. Chairman, I will yield five minutes to the gentleman from Pennsylvania [Mr. MOORE].

The CHAIRMAN. The gentleman from Pennsylvania is recognized for five minutes.

Mr. MOORE of Pennsylvania. Mr. Chairman, I would rather love my fellow man than hate him. [Applause.] I would rather honor him than traduce him. [Applause.] I would rather forget his failings than remember them after his death. [Applause.]

I do not believe the Congress of the United States is made up of men who propose to put the stamp of opprobrium upon a former President of the United States. [Applause.] I do not believe it is wise to do so during the progress of an international war. [Applause.] I would not believe it proper for the sake of American patriotism to do it at any time. [Applause.]

George Washington was criticized in his day and ill was said of him. Yet, the man who would traduce him now would find it difficult to maintain the title of "patriot" in the United States.

Mr. GOODWIN of Arkansas. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. GOODWIN of Arkansas. Was any man ever traduced more than the great Lincoln by his own people in his own time?

Mr. MOORE of Pennsylvania. I think no public man was ever traduced as Abraham Lincoln was traduced, as much abroad as he was at home; and yet I would like to see the American to-day, at home or abroad, who would question the right of Congress or of citizens to erect a memorial to Abraham Lincoln. [Applause.]

Mr. DEWALT. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. DEWALT. Yet, after all that traducing, when history is written as it is written now, is there any man in the country who is more bepraised and beloved than Abraham Lincoln? [Applause.]

Mr. MOORE of Pennsylvania. Absolutely none, as well by the people of the South as by the people of the North. [Applause.] The time has come for us to forget these differences of 100 years ago or of 50 years ago. [Applause.]

Mr. McLAUGHLIN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes; I yield to my friend from Michigan.

Mr. McLAUGHLIN of Michigan. He is beloved now because what he stood for has been approved and justified. But is it not true that every complaint and criticism of James Buchanan has been magnified up to this very hour?

Mr. MOORE of Pennsylvania. Every criticism has been magnified?

Mr. McLAUGHLIN of Michigan. Every fault pointed to in his character and his record has been magnified, and the criticism of it has not been justified up to this hour?

Mr. MOORE of Pennsylvania. The fault has been magnified—yes—and for that reason I would be fair, as I would be patriotic, in dealing with this question. [Applause.] Read the sketches of James Buchanan and you read of no ordinary man. You read of one who was patriotic in the beginning and who lived his long public career with honor until criticism came. He closed that distinguished career—the first man of all the people of the United States—without a recorded blemish, except as to his judgment or as individuals had their opinions of him and the acts he performed. If this is to be the standard by which we are to judge our public men 50 years after their death, it would apply with distressing force to many of our illustrious forefathers, from George Washington down to the present time. We can pick flaws in the character and in the conduct of everyone of them, but it has been against public policy to do so; it has been against patriotic policy to traduce our public men, and I shall not be one to join now with others, whether I believed with James Buchanan in his time or not, to uphold to the scorn of the world one who had been dignified and honored as President of the United States. [Applause.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. SWITZER. Does the gentleman say that our school histories traduce Mr. Buchanan?

Mr. MOORE of Pennsylvania. My time has expired; but I would say that, so far as I have observed, they do not.

Mr. SLAYDEN. Mr. Chairman, is the gentleman from Massachusetts [Mr. WALSH] going to conclude in one speech?

Mr. WALSH. I have more than one speech.

Mr. SLAYDEN. How much time has the gentleman left?

The CHAIRMAN. The gentleman from Massachusetts has 28 minutes left.

Mr. WALSH. I will yield eight minutes to the gentleman from Nebraska [Mr. REAVIS].

Mr. SLAYDEN. Mr. Chairman, how much time have we left?

The CHAIRMAN. Seven minutes.

Mr. SLAYDEN. It is my purpose to conclude in one speech. I will ask the gentleman from Massachusetts to use some of his time now.

Mr. WALSH. I yield eight minutes to the gentleman from Nebraska [Mr. REAVIS].

The CHAIRMAN. The gentleman from Nebraska is recognized for eight minutes.

Mr. REAVIS. Mr. Chairman and gentlemen, I am somewhat reluctant to speak upon this subject, because I have no desire to fan the embers of ashes that should be dead. I am speaking only because I happen to represent in part a State that, together with the State of Kansas, was the storm center of the period during which Mr. Buchanan served as President. We are not asked to grant permission for the erection of a monument to James Buchanan in any capacity excepting as President of the United States. Whatever service he may have performed pre-

vious to his induction into that office is lost sight of in the measure that is now presented to the House of Representatives.

Personally, I think the erection of monuments in the National Capital should be a matter of very careful concern to the Congress. I do not believe monuments should be erected here as a matter of grace to the lady who happened to be the mistress of the White House during his incumbency. I do not believe that permission should be granted to erect this monument because of the mere fact that he happened to be President of the United States. I believe that before a monument is erected in the Capital of this Nation the one to whom the monument is erected should have been responsible for distinguished service which would justify the action on the part of the Congress.

I can give you in a word the idea I have in mind by the relation of an incident that occurred to me in this city a number of years ago. I came here on some business before the Interior Department, and brought with me a red-headed, freckled-faced little lad who was very much interested in the monuments and statues that he saw in this beautiful city. He talked to me about them repeatedly. One day when I was called to the Department of the Interior I asked him if he could get along without me during the course of the day. With all the confidence of youth he replied that he could get along a good deal better without me than he could with me. I said, "Well, son, you have been very much interested in the statues that you have seen in the city. Now, while I am busy in the department I want you to find the statue in Washington that is erected to the man who made the most money, and when I come back to the hotel for dinner this evening I want you to tell me about it."

As we sat at the dinner table that evening I asked him, "What about the statue?" He said, "Father, I could not find it;" and I replied, "It is not here. It is not anywhere in this gray old world of ours, because the man whose memory is perpetuated in marble is the man who gave most to the world and not the man who took most from it."

I have listened during this debate for some man to tell me or to tell this body of some contribution that James Buchanan as President of the United States made to the United States that would justify us in erecting a statue to him in this city. I have heard that we should erect it as a matter of grace to the lady who left the money. I have heard that we should erect it because it will not cost the Government anything. I have heard that we should erect it because he was at one time President of the United States, but I have yet to hear any man detail a single item or a single circumstance in his life as President of this great Republic that would justify this action in erecting a statue to him at this time. The gentleman from Pennsylvania [Mr. MOORE] spoke in favor of this bill. The day of miracles is not over, because during all of his address he was applauded from the other side of the aisle, and I never saw it happen before during my incumbency in this House. [Laughter.] The gentleman from Pennsylvania grows very charitable, and says that Abraham Lincoln was traduced. He was, in the hour of his activity, but he is not traduced to-day; and the reason that the civilized world has made of Abraham Lincoln a patron saint is that he gave his life in trying to destroy the very thing that Jim Buchanan tried to foster. [Applause.] Gentlemen of the House, I doubt exceedingly the advisability of passing this measure. I doubt exceedingly the advisability of the House of Representatives granting its permission to erect in the Capital of this Nation a statue to one who as President sought to destroy the Nation. I do not believe that this permission should be granted.

I am reluctant to say what I have said, and I have said it only because I come from the State that was the storm center of the activity, the State that was cursed by appointees during Buchanan's presidency, who came there spreading the propaganda that had to be destroyed by the Union at the end of a four-year war. I do not believe we should erect a statue to a man merely because he happened to hold a great office. A statue should be erected to the personality of the individual, and not to the office, and the test should be what contribution did that individual make to the welfare of America or the world. Up to this time I have listened in vain for a single statement as to the contribution of President Buchanan either to the welfare of the Nation or to the race. I am opposed to this bill. [Applause.]

Mr. WALSH. Mr. Chairman, I yield 10 minutes to the gentleman from Wisconsin [Mr. COOPER].

Mr. COOPER of Wisconsin. Mr. Chairman, I had not intended to take part in the debate on this measure until the gentleman from Pennsylvania [Mr. DEWALT] made what seemed to me an astounding statement. I refer to that utterance of his in which he asserted that Abraham Lincoln and James Buchanan held the same views of the Constitution—this, in effect, is what he said—and that under the same circumstances either of these men would have done what the other did in discharging the duties of the great office of President of the United States.

Now, nothing in my judgment—and I say this with all respect to my friend from Pennsylvania—nothing could be more wide of the truth than was that statement. That it is wholly unwarranted is shown by the unchallenged facts of history.

I respect a brave man; I respect Lee and Stonewall Jackson and the hosts of the Confederate Army, the great leaders and the rank and file who, believing that their first duty was to their respective States, went to the front offering their lives, if need be, in defense of what they thought was the right. I observe here a nod of approval from my friend, a brave Confederate veteran, the gentleman from Maryland, Mr. TALBOTT. But I do not admire, nor will I ever by my vote help to honor in the Capital of the Nation, the President who, after Abraham Lincoln had been elected to succeed him, wrote in his message to Congress in December, 1860, the words that I am about to read—words written as he saw approaching the storm that threatened to wreck the Republic, words which shocked and grieved lovers of liberty everywhere throughout the world. Said Mr. Buchanan:

> "Without descending to particulars, it may be safely asserted that the power to make war against a State is at variance with the whole spirit and intent of the Constitution. Suppose such a war should result in the conquest of a State; how are we to govern it afterwards? Shall we hold it as a province and govern it by despotic power? In the nature of things, we could not by physical force control the will of the people and compel them to elect Senators and Representatives to Congress and to perform all the other duties depending upon their own volition and required from the free citizens of a free State as a constituent member of the confederacy."

He declared this Nation to be a confederacy, although the Constitution adopted in 1787 superseded the articles of federation which had made the colonies a confederacy.

He continued:

> "But if we possessed this power, would it be wise to exercise it under existing circumstances? The object would doubtless be to preserve the Union. War would not only present the most effectual means of destroying it, but would banish all hope of its peaceful reconstruction. Besides, in the fraternal conflict a vast amount of blood and treasure would be expended, rendering future reconciliation between the States impossible."

And then he sat in his chair here in Washington and permitted one of his Secretaries to send the Navy to the South and another Secretary to send the Army and the munitions of war from the Government arsenals in the North to the South and to create a situation which when Abraham Lincoln, freedom's apostle, reached Washington seemed to many to be without hope.

But in this tremendous crisis, what did Lincoln say?

> "My countrymen, one and all, think calmly and well upon this whole subject. Nothing valuable can be lost by taking time. If there be an object to hurry any of you in hot haste to a step which you would never take deliberately, that object will be frustrated by taking time; but no good object can be frustrated by it. Such of you as are now dissatisfied still have the old Constitution unimpaired, and, on the sensitive point, the laws of your own framing under it, while the new administration will have no immediate power, if it would, to change either. If it were admitted that you who are dissatisfied hold the right side in the dispute, there still is no single good reason for precipitate action. Intelligence, patriotism, Christianity, and a firm reliance on Him who has never yet forsaken this favored land are still competent to adjust in the best way all our present difficulty."

This far he had been pleading. Listen, now, to his noble, kindly words of warning:

> "In your hands, my dissatisfied fellow countrymen, and not in mine, is the momentous issue of civil war. The Government will not assail you. You can have no conflict without being yourselves the aggressors. You have no oath registered in heaven to destroy the Government, while I shall have the most solemn one to 'preserve, protect, and defend it.'"

Lincoln did not quail. But when they seceded and attacked the Government he called for volunteers to preserve, protect, and defend the Constitution and save the Nation. Buchanan, had he then been in the presidential chair, would have said again

what he said in his message of December, 1860, before Lincoln came here, and nothing would have been done to coerce the seceding States. They would have gone, and this great Nation, dedicated by our fathers to the cause of human liberty, would have been rent in twain and one-half given over to the blackest despotism that ever cursed the earth. To this Republic, saved through those four awful years, the world has ever since looked, and looks to-day, for the influence and example which are sending liberty and the spirit of democracy around the world. But had Buchanan and not Lincoln then been in the White House our example would have been lost and lost forever. Buchanan's own words testify to the truth of my assertion. And they demonstrate how utterly mistaken was the gentleman from Pennsylvania [Mr. DEWALT] when he declared that under the same circumstances Buchanan would have done what Lincoln did. [Applause.]

Mr. SLAYDEN. Mr. Chairman, I would like to have the attention of the gentleman from Massachusetts [Mr. WALSH]. I understand that the gentleman has concluded his side with the speech of the gentleman from Wisconsin [Mr. COOPER]?

Mr. WALSH. I have no further speeches that I know of at present.

Mr. SLAYDEN. I thought we had an agreement as to that a few moments ago. I told the gentleman that I would have one more speech, and I understood the gentleman to agree to that—that we would conclude with these speeches.

Mr. WALSH. What does the gentleman propose to do at the conclusion of this speech?

Mr. SLAYDEN. To close general debate.

Mr. MADDEN. Mr. Chairman, is it the gentleman's intention to proceed to the consideration of this resolution under the five-minute rule after the general debate is closed?

Mr. SLAYDEN. I will say to the gentleman that I do not see any reason why we should not have a vote upon this to-night, or if we can bring it up to a vote and agree when the vote will be taken it will be satisfactory to me. I do not want to inconvenience the gentleman.

Mr. MADDEN. The gentleman certainly does not want to cut off the opportunity to offer amendments?

Mr. SLAYDEN. I probably would not be able to do that if I wanted to.

Mr. MADDEN. I suggest the wisdom to the gentleman of moving to rise after the close of general debate and taking this bill up under the five-minute rule on next Wednesday.

Mr. SLAYDEN. There are two or three other bills on the calendar.

Mr. GILLETT. It is so late I think that that could be done. We will want to have a roll call on this bill.

Mr. SLAYDEN. Very well. I shall consent to that. I now yield the remainder of my time to the gentleman from Illinois, the Nestor of the House [Mr. CANNON].

The CHAIRMAN. The gentleman from Illinois is recognized for 17 minutes.

Mr. CANNON. Mr. Chairman and gentlemen of the House, I have not heard all of this debate. I had no intention of saying a word touching this resolution; and yet as I have listened, first to one and then another, I felt that as I shall vote for the bill I ought to say a few words. I do not do it in temper; I do not do it to open up old sores. I do it because, as I understand the resolution, this statue is to be erected by virtue of the will of Harriet Lane Johnson, the niece of President Buchanan, somewhere on Sixteenth Street. I have lived for almost 82 years, and I have seen many things happen. I have read many platforms. I have heard many political speeches. I have seen great contests on the floor of this House. I have seen a great Civil War. I knew Lincoln personally, though I was not an intimate acquaintance of his; but I knew him, and I did not know President Buchanan and had no acquaintance with him; but just let me call your attention to the history of our country.

This Government has been in the course of evolution. We achieved our independence by a Revolution, then the Confederacy, then the Constitution, then John Marshall, the Chief Justice of the Supreme Court. Oh, we had a war then with England. We had a war with France; and the truth is we had a war with France and England both at the same time. It was not declared, but it was a war. We had embargoes; we had hot fights between the North and the South. While I was not living at the time, yet I can recollect the hurrah that was given, within my recollection, where it would bring on fights when people were called Blue Light Federalists. If I recollect and have read history properly—I think I am not mistaken—New England wanted to secede. I think it was in 1812 that the Hartford convention met, and way before that the doctrine of secession was talked of and approved.

I believe before that time Kentucky passed her resolution declaring the right of a State to secede, and from that time down to 1856, when James Buchanan was nominated as the candidate for President, there never was a national Democratic platform but what it contained a resolution indorsing the Kentucky and Virginia resolutions which spoke for the right for a State to secede. [Applause.] Buchanan was elected upon that kind of a platform. Thank God, Lincoln was elected, and, oh, thank God, thank God, you men who are Democrats on that side of the House, thank God that Lincoln was elected, and that you and your forbears failed. [Applause.] But yesterday in Virginia the legislature, held in the same hall as I read the news where the secession ordinance was passed, adjourned out of respect for Lincoln. Now, Stanton has been spoken of. He was in Lincoln's Cabinet. He was a Jackson Democrat, and a good Democrat, indorsing his policies. Stanton was also a member of Buchanan's Cabinet and was such member when Buchanan's term expired; he supported Buchanan in 1856 upon a platform that indorsed the Kentucky and Virginia resolutions. It is true he became a Union supporter of Lincoln and afterwards went into Mr. Lincoln's Cabinet, if I recollect aright, in 1862, succeeding Cameron. Since that time we have had reconstruction; since that time we have had war with Spain; since that time this great war is upon us. In the year 1812 New England and largely New York were not orthodox touching secession, and later on, my Democratic friends, you were not orthodox. Now Lincoln wanted to preserve the Union. We had a hard time in that great contest. The battle was on along the borderland, evenly divided. Kentucky and Missouri had full quotas in both armies. West Virginia had many men in both armies. In 1862 there was a decided revolution in Illinois, Indiana, and Ohio. In 1864 the northern Democracy met in Chicago, if I recollect aright, and adopted that platform, one plank of which declared the war a failure and demanding an armistice and a compromise. Lincoln was reelected. Say, did you ever go over to Arlington?

Oh, there is where the Nation's patriotic dead lie—generals, privates, fighting for the flag, who have crossed over—there is where they are buried. You know I rode with a man in the Navy some little time ago, and he said, "CANNON, there is where I am going to lie." I believe Westminister Abbey is where they bury their distinguished dead in England. They have had any amount of rebellions in that country. There the dust of patriotic and great men lie. The Westminister Abbey of this country, if it is found anywhere, is to be found over at Arlington, near Washington. Union generals and privates who fought and died, and who have died since, and generals and privates of the Confederate Army following their convictions are there buried upon Uncle Sam's land that Uncle Sam paid for, and paid for after the Civil War was over.

James Buchanan, as I read history, was a great man. He was ambassador to England. He was a Senator of the United States. I recollect very well the campaign of 1856. He was a great man, but he indorsed the Kentucky resolution and the Virginia resolution. He did not believe that he had that power to coerce a sovereign State. He did not want to see a State go, but he said that there was no power to coerce it. He was true to the platform of the Democratic Party upon which he was elected.

Mistaken? Yes. But, after all is said and done, he was President of the United States. Oh, I have sat here in the Chamber of the House of Representatives with hundreds of men who fought to the end for the success of the Confederacy.

There were some good things that came out of the war with Spain as well as some bad things. Sometimes some of us think that one of the bad things was the possession of the Philippines, but I will not discuss that matter. But that war did cement the North and the South. [Applause.] And while I disagree with my Democratic brethren upon this floor touching economic questions, and sometimes disagree with some or all on my own side of the House touching other questions, I am answerable to my constituency, and there is no man in this House or in the Senate but that has the same right as a Representative that I have. And I honor you, Republicans, and I honor you, Democrats.

Now, what is this proposition? As I understand it, Harriet Lane Johnston gives by her will $100,000 with which to erect this statue on Sixteenth Street, in Washington. I am not here to open up the wounds of the Civil War. I thank God for Lincoln. I abused the policy that Buchanan stood for with all the power that was in me during that great struggle. I can understand how Gen. SHERWOOD, whose letter was read here, could in 1859 have properly written it. And he afterwards made good

by his magnificent services. [Applause.] But he now sits on that side of the House——

Mr. SHERWOOD. Yes; and I am going to vote for the bill. [Applause.]

Mr. CANNON. My friend says he is going to vote for the bill. I can quite understand why gentlemen, without perhaps fully weighing the matter, might conclude that this would indorse the principles that James Buchanan stood for touching secession. I think now, as it is all behind us, and in view of all our magnificent history and great progress, it is not a very good policy to assume at this time; and it would not bear fruit even if you did not erect the statue there. When you criticize James Buchanan for his action and for his nonaction, and for his messages, you criticize one-third of the Northland that was cotemporary with him; and there were at least one-third of them that agreed with the South. And you criticize the Southland, too, that was substantially solid against Lincoln and the Union, but now for the Union and the flag.

Let the dead past bury its dead, and let us at this time stand shoulder to shoulder for success in our great world's war for free seas and against autocracy. [Long and continued applause.]

Mr. SLAYDEN. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. JOHNSON of Kentucky, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration House joint resolution No. 70, authorizing the erection on the public grounds of the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States, and had come to no resolution thereon.

EXTENSION OF REMARKS.

Mr. DENTON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Indiana asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. LINTHICUM. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in the RECORD.

The SPEAKER. The gentleman from Maryland asks unanimous consent to revise and extend his remarks in the RECORD.

Mr. GILLETT. On what subject?

Mr. LINTHICUM. On the Buchanan monument.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. SIEGEL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a speech made by my colleague, Mr. LAGUARDIA, at Milan, Italy.

Mr. MOORE of Pennsylvania. Mr. Speaker, reserving the right to object, what is the speech that the gentleman wishes to insert in the RECORD?

The SPEAKER. A speech made by Mr. LAGUARDIA somewhere in Italy. Is there objection?

There was no objection.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to revise and extend my remarks on the alien-slacker bill.

The SPEAKER. The gentleman from Virginia asks unanimous consent to extend his remarks in the RECORD on the alien-slacker bill. Is there objection? [After a pause.] The Chair hears none.

ADJOURNMENT.

Mr. SLAYDEN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 30 minutes p. m.) the House adjourned until to-morrow, Thursday, February 14, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting copy of communication from the Superintendent of the State, War, and Navy Department Building submitting supplemental estimates of appropriation required for the operation of the War and Navy office buildings in Henry Park for the fiscal year 1919 (H. Doc. No. 931); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting copy of communication from the Commissioners of the District of Columbia submitting revised estimates of appropriation required by the Militia of the District of Columbia for the fiscal year 1919 (H. Doc. No. 932); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of the Treasury, transmitting estimates of appropriation for the purchase of the site and the fireproof building being erected thereon for the use of the Treasury Department, together with an extension thereto, not yet commenced, known as the Arlington property (H. Doc. No. 933); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. PADGETT, from the Committee on Naval Affairs, to which was referred the bill (S. 3402) to fix the age limits for candidates for admission to the United States Naval Academy, reported the same without amendment, accompanied by a report (No. 303), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (S. 3129) to provide for the disposition of the effects of deceased persons in the naval service, reported the same without amendment, accompanied by a report (No. 304), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (S. 3401) to authorize the President to reduce temporarily the course of instruction at the United States Naval Academy, reported the same with amendment, accompanied by a report (No. 305), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (S. 3406) to authorize the Secretary of the Navy to determine where and when there are no public quarters available for officers of the Navy and Marine Corps, reported the same without amendment, accompanied by a report (No. 306), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (S. 3445) to authorize the payment of gun pointers and gun captains while temporarily absent from their regular stations, and for other purposes, reported the same without amendment, accompanied by a report (No. 307), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (H. R. 6982) to authorize and empower the Secretary of the Navy to enter into and contract for the construction of a line of railway from a point in the District of Columbia to Indianhead, Md., reported the same with amendment, accompanied by a report (No. 308), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (S. 3404) to authorize the President to drop from the rolls any naval or Marine Corps officer absent without leave for three months, or who has been convicted of any offense by the civil authorities, and prohibiting such officer's reappointment, reported the same with amendment, accompanied by a report (No. 309), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (S. 3130) to amend section 1570 of the Revised Statutes of the United States, reported the same without amendment, accompanied by a report (No. 310), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (S. 3400) to regulate the pay of retired chief warrant officers on active duty, reported the same with amendment, accompanied by a report (No. 311), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. WALTON, from the Committee on the Public Lands, to which was referred the bill (H. R. 4240) for the relief of Alma Harris, reported the same without amendment, accompanied by a report (No. 302), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. EVANS: A bill (H. R. 9829) to authorize the sale of certain lands to School District No. 28, of Missoula County, Mont.; to the Committee on the Public Lands.

By Mr. RAINEY: A bill (H. R. 9830) providing for the disposition of opium, its salts and derivatives, coca leaves, their salts and derivatives, and any other drugs seized by the United States Government in the enforcement of the provisions of the act of October 1, 1890, as amended by the acts of March 3, 1897, February 9, 1909, and January 17, 1914, or the act of December 17, 1914; to the Committee on Ways and Means.

By Mr. NORTON: A bill (H. R. 9831) to stimulate and encourage an increased production of wheat during the crop season of 1918 by amending section 14 of the food-control act, approved August 10, 1917, by fixing the guaranteed price of wheat for the crop of the year 1918 at $3 a bushel instead of $2 a bushel; to the Committee on Agriculture.

By Mr. SULZER: A bill (H. R. 9832) to authorize the incorporated town of Seward, Alaska, to issue bonds in any sum not exceeding $25,000 for the purpose of constructing dikes, flumes, and other works to confine the waters of Lowell Creek for the protection of said town; to the Committee on the Territories.

By Mr. EVANS: A bill (H. R. 9833) to authorize the President of the United States to grant furloughs to enlisted men of the Army of the United States; to the Committee on Military Affairs.

By Mr. RAKER: Joint resolution (H. J. Res. 245) extending the privileges of the act of Congress, approved December 20, 1917, to homestead settlers and entrymen employed in shipyards, coal mines, transportation, munition plants, etc.; to the Committee on the Public Lands.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CAMPBELL of Kansas: A bill (H. R. 9834) granting an increase of pension to James G. Johnson; to the Committee on Invalid Pensions.

By Mr. CARAWAY: A bill (H. R. 9835) granting an increase of pension to John M. Thorn; to the Committee on Invalid Pensions.

By Mr. EMERSON: A bill (H. R. 9836) granting a pension to Joseph E. Rogers; to the Committee on Pensions.

Also, a bill (H. R. 9837) granting an increase of pension to Walter W. Bell; to the Committee on Invalid Pensions.

By Mr. ESCH: A bill (H. R. 9838) granting a pension to Sarah Morrill, to the Committee on Invalid Pensions.

By Mr. GALLIVAN: A bill (H. R. 9839) granting a pension to Ellen M. Davenport; to the Committee on Invalid Pensions.

By Mr. GOOD: A bill (H. R. 9840) granting an increase of pension to James McNeal; to the Committee on Invalid Pensions.

By Mr. HAMILTON of New York: A bill (H. R. 9841) granting a pension to Charles B. Carlson; to the Committee on Pensions.

By Mr. HULL of Iowa: A bill (H. R. 9842) for the relief of George A. Cummings; to the Committee on Claims.

By Mr. HULL of Tennessee: A bill (H. R. 9843) granting a pension to J. M. Stewart; to the Committee on Invalid Pensions.

By Mr. SMITH of Idaho: A bill (H. R. 9844) for the relief of Welton W. Pratt; to the Committee on Military Affairs.

Also, a bill (H. R. 9845) for the relief of Elijah C. Putman; to the Committee on Military Affairs.

By Mr. KELLY of Pennsylvania: A bill (H. R. 9846) granting a pension to John E. McCoy; to the Committee on Pensions.

By Mr. KRAUS: A bill (H. R. 9847) granting an increase of pension to Nelson B. Pilcher; to the Committee on Invalid Pensions.

By Mr. NOLAN: A bill (H. R. 9848) granting an increase of pension to Mary Leahy; to the Committee on Pensions.

By Mr. POLK: A bill (H. R. 9849) granting an increase of pension to William G. Fearing; to the Committee on Invalid Pensions.

By Mr. ROSE: A bill (H. R. 9850) granting an increase of pension to John C. Kauffman; to the Committee on Invalid Pensions.

By Mr. RUCKER: A bill (H. R. 9851) granting an increase of pension to Henry Crooks; to the Committee on Invalid Pensions.

By Mr. SCHALL: A bill (H. R. 9852) for the relief of T. J. Skellett; to the Committee on the Post Office and Post Roads.

By Mr. SELLS: A bill (H. R. 9853) granting a pension to Hess Elliott; to the Committee on Pensions.

By Mr. SNELL: A bill (H. R. 9854) for the relief of Ellen Agnes Monogue; to the Committee on Claims.

By Mr. SWITZER: A bill (H. R. 9855) granting an increase of pension to Silas Litten; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9856) granting an increase of pension to James N. Tewksbury; to the Committee on Invalid Pensions.

By Mr. ZIHLMAN: A bill (H. R. 9857) granting an increase of pension to James T. Rollf; to the Committee on Invalid Pensions.

By Mr. TEMPLETON: A bill (H. R. 9858) granting a pension to Mame Cooley; to the Committee on Pensions.

By Mr. WELTY: A bill (H. R. 9859) granting an increase of pension to Nelson White; to the Committee on Invalid Pensions.

By Mr. EMERSON: Joint resolution (H. J. Res. 246) to give a medal of honor to Capt. Horatio P. Kile; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. AUSTIN: Memorial of the Abraham Lincoln Patriotic and Educational League, asking Congress to indorse these principles of the league: (1) To better the social conditions of the people; (2) to teach the life of Abraham Lincoln in the public schools; and (3) to make his birthday a national holiday; to the Committee on Education.

By Mr. CAREW: Memorial of Chamber of Commerce of the State of New York, relative to the survey of the Delaware & Hudson Canal; to the Committee on Rivers and Harbors.

Also, memorial of Chamber of Commerce of the State of New York, asking for uniform postal rates in the city of New York; to the Committee on the Post Office and Post Roads.

Also, memorial of the Association for an Equitable Income Tax, asking that the income-tax law be amended so that the burdens of the war shall be shared equitably; to the Committee on Ways and Means.

By Mr. CARY: Resolutions of the New Century Club, Wichita Falls, Tex.; the Fortnightly Club, Sharon, Mass.; the Lakeside Club, Manistee, Mich.; and the Woman's Club, Racine, Wis., asking for the repeal of the periodical postage provisions of the war-revenue act; to the Committee on Ways and Means.

By Mr. CLARK of Pennsylvania: Petition of Joanna A. Royer, Mary Nash, Helen Golden, Edna Serr, Helen Burks, and 36 others, praying for the passage of House bill 7995, for the preservation of the *Niagara*, Commodore Perry's flagship in the Battle of Lake Erie; to the Committee on Naval Affairs.

By Mr. DALE of New York: Petition of James A. McKean, of the Brotherhood of Railroad Trainmen, opposing House bill 8172 and Senate bill 3385; to the Committee on Interstate and Foreign Commerce.

Also, resolutions of the Woman's Club, Beaver Dam, Wis.; Woman's Club, Racine, Wis.; Merchants, Manufacturers, and Employers' Association, Stockton, Cal.; the Thursday Club, Bowie, Tex.; and the New Century Club, Wichita Falls, Tex., asking that the periodical-postage amendment to the war-revenue act be repealed; to the Committee on Ways and Means.

By Mr. DALE of Vermont: Petition of L. B. Jones and other employees of the customs service of Island Pond, Vt., favoring the passage of the so-called Keating bill, increasing the compensation of Federal employees; to the Committee on Appropriations.

By Mr. ELSTON: Resolution of the Woman's Christian Temperance Union of Berkeley, Cal., indorsing legislation to safeguard the morals of American soldiers in France; to the Committee on Military Affairs.

By Mr. FULLER of Illinois: Memorial of the National Security League, for coordination of the departments of Government in the matter of espionage; to the Committee on the Judiciary.

Also, petition of the National Federation of Federal Employees, opposing the Borland amendment for an eight-hour day; to the Committee on Agriculture.

Also, memorial of the Merchants, Manufacturers, and Employers' Association of Stockton, Cal., against the increased postage rates on periodicals; to the Committee on Ways and Means.

By Mr. KELLY of Pennsylvania: Petition of citizens of Pennsylvania, favoring increased compensation of rural carriers and postal employees; to the Committee on the Post Office and Post Roads.

By Mr. KENNEDY of Rhode Island: Protest of Rhode Island Mulespinners' Association No. 3, of Pawtucket, R. I., against any interference with plans of Secretary of War concerning Army movements; to the Committee on Military Affairs.

By Mr. LINTHICUM: Memorial of the Marine Engineers' Beneficial Association No. 5, Baltimore, Md., favoring House bill 7913; to the Committee on Interstate and Foreign Commerce.

Also, petition of Edward C. Wilson, Baltimore, Md., favoring the Pyote legislation on behalf of the Indians; to the Committee on Indian Affairs.

Also, petition of Fred H. Taft, Baltimore, Md., opposing daylight saving and the Borland amendment; to the Committee on Agriculture.

Also, petition of George F. Prechtel, president of the Carriage & Toy Co., Baltimore, Md., favoring House bill 9414; to the Committee on the Post Office and Post Roads.

Also, petition of Dr. John Rurrah, Baltimore, Md., and a memorial of the National Citizens' Creed Contest, urging the repeal of the periodical postage provisions of the war-revenue act; to the Committee on Ways and Means.

By Mr. OSBORNE: Petition of the Pacific Coast Division of the Bohemian National Alliance of America asking that the oppressed people of Bohemia be given their freedom when the new map of Europe is made at the close of the present war; to the Committee on Foreign Affairs.

By Mr. RAINEY: Petition of Capt. H. W. Leyhe and other steamboat officials of St. Louis, Mo., favoring larger compensation for steamboat inspection officials; to the Committee on the Merchant Marine and Fisheries.

Also, petition of A. C. Poole and other train dispatchers at Roodhouse, Ill., favoring larger compensation for train dispatchers; to the Committee on Interstate and Foreign Commerce.

By Mr. CHARLES B. SMITH: Resolution of the New York Board of Trade, protesting against section 13 of the Sims bill and suggesting an amendment stating a definite time when Federal control shall cease; to the Committee on Interstate and Foreign Commerce.

By Mr. SNOOK: Resolutions of the Farmers' Institute at Convoy, Ohio, favoring effective prosecution of the war; to the Committee on Military Affairs.

Also, petition of David K. Stedman and 16 other comrades of Pioneer, Ohio, favoring an increase in the rate of pension to Civil War veterans; also a resolution of Bishop Post No. 22, Grand Army of the Republic, Defiance, Ohio, favoring the passage of the Smoot pension bill; to the Committee on Invalid Pensions.

By Mr. TEMPLE: Papers to accompany H. R. 9607; to the Committee on Invalid Pensions.

By Mr. VARE: Memorial of the Lumbermen's Exchange, Philadelphia, Pa., relative to the establishment of a board of war control; to the Committee on Military Affairs.

SENATE.

THURSDAY, *February 14, 1918.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we pray that the light of Thy divine truth may shine clear and strong upon every question that presents itself to our minds this day and that our hearts may be very responsive to the divine impression; that we may do all things according to the will of God. For Christ's sake. Amen.

The VICE PRESIDENT resumed the chair.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. ASHURST and by unanimous consent, the further reading was dispensed with and the Journal was approved.

Mr. ASHURST. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Henderson	McCumber	Ransdell
Beckham	Hitchcock	McKellar	Robinson
Chamberlain	James	McNary	Saulsbury
Colt	Johnson, Cal.	Martin	Shafroth
Culberson	Jones, N. Mex.	Nelson	Sheppard
Cummins	Jones, Wash.	New	Shields
Curtis	Kellogg	Nugent	Smith, Ga.
Dillingham	Kirby	Overman	Smith, Md.
France	Knox	Page	Smith, Mich.
Gerry	Lewis	Pittman	Smith, S. C.
Hale	Lodge	Pomerene	Smoot
Sterling	Thomas	Trammell	Wolcott
Stone	Thompson	Vardaman	
Sutherland	Tillman	Watson	
Swanson	Townsend	Williams	

Mr. CURTIS. I desire to announce that the senior Senator from Wisconsin [Mr. LA FOLLETTE] is absent on account of illness in his family.

I wish also to announce the absence of the Senator from Illinois [Mr. SHERMAN] on account of illness.

I will let this announcement stand for the day.

Mr. SUTHERLAND. I wish to announce that my colleague, the senior Senator from West Virginia [Mr. GOFF], is absent on account of illness.

The VICE PRESIDENT. Fifty-seven Senators have answered to the roll call. There is a quorum present.

PETITIONS AND MEMORIALS.

Mr. HENDERSON. I present brief resolutions adopted by the Women's Civic League, of Reno, Nev., which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

NEVADA WOMEN'S CIVIC LEAGUE,
Reno, Nev., January 29, 1918.

Hon. CHARLES HENDERSON,
Washington, D. C.

DEAR SIR: The following resolutions were adopted at a meeting of Women's Civic League at Reno, Nev., on January 20, 1918:

Resolved, That the members of the Civic League call upon President Wilson and the Democratic administration to give suppport to the national suffrage amendment by making it an administration measure, and securing its passage in the present session of Congress, at the time when the Government is calling for the indispensable service of the women in bearing the burden of war: Be it also

Resolved, That the members call upon the Senate of the United States to pass at once the Federal suffrage amendment, establishing at home that democracy for which the men of this country have been called to fight abroad; that this resolution be read into the CONGRESSIONAL RECORD as evidence of the activities of our leaders: Be it also

Resolved, That this resolution be sent to the President; Vice President; Senator THOMAS MARTIN, Democratic leader of the Senate; Senator JACOB H. GALLINGER, Republican leader of the Senate; to Senator JONES, chairman of the Woman Suffrage Committee; and to our Senators.

Yours, respectfully, MINNIE FLANIGAN, *President.*
MRS. MILES KENNEDY, *Secretary.*

Mr. ROBINSON. I present resolutions adopted at a meeting of citizens of Fayetteville, Ark. I ask that they may be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Resolutions adopted by citizens of Fayetteville, Ark., in patriotic assembly, February 1, 1918.

Whereas we recognize, in a measure, the magnitude of the work of organizing and equipping the fighting forces of our country and the multitude of new and intricate problems; and

Whereas we realize the limitations of human skill and human wisdom and human knowledge, and something of the terrible responsibility heaped upon our President and his Cabinet; and

Whereas we are aware, through the medium of the public press, of the actions, criticisms, and investigations by certain individuals in and out of Congress of the work, purposes, and plans of the United States Government with reference to the prosecution of the war, which have tended to disturb confidence in our leaders and to divulge important military secrets, to the aid and comfort of the enemy: Therefore be it

Resolved, That we, as citizens of Fayetteville, Ark., in mass meeting assembled, while recognizing the value of helpful, wholesome, constructive criticism, deplore the injection of anything in the nature of partisan strife into the discussion of our war measures or our plans for prosecuting the war, and that we express in the strongest terms our disapproval of any actions, accusations, and investigations which have a tendency to break down the confidence of the public in the wisdom, honesty, or patriotism of the men on whom rests the responsibility for the prosecution of the present war or which be the means of furnishing any information that might be of benefit or comfort to our enemy.

Resolved, That we express the highest degree of confidence in President Wilson, Secretaries Baker and Daniels, and pledge them our utmost loyalty, and urge that our Representatives and Senators be urged to cooperate with them to the end that their war plans may bring to speedy success this struggle for the safety of the democracies of the world.

Resolved, That copies of these resolutions be sent to President Wilson, Secretaries Baker and Daniels, and to Senators ROBINSON and KIRBY, and Congressman TILLMAN.

Approved in mass meeting. W. S. CAMPBELL, *Chairman.*
THOMAS SHELTON, *Secretary.*

Mr. ROBINSON. I also present a telegram from the Business Men's League of Helena, Ark., which I ask to have printed in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

HELENA, ARK., *February 7, 1918.*

Hon. JOSEPH T. ROBINSON,
Senate Office Building, Washington, D. C.:

The disaster to American troops reported to-day impels this community to vigorously protest against continuation of public investigations disclosing secret plans of War Department and furnishing information to enemy agents that may lead to the murder of thousands more of our soldiers. German agents and partisan politicians are in same class. Our sons offering their lives and our citizens contributing

their money to help win the war demand that Congress support the personal bill of President Wilson and aid in prosecution of war instead of blocking it.

BUSINESS MEN'S LEAGUE OF HELENA, ARK.,
By E. M. ALLEN, *President*.

Mr. SMITH of Michigan. I have a telegram addressed to my colleague and myself which I should like to have printed in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

JACKSON, MICH., *January 22, 1918.*

Hons. WILLIAM ALDEN SMITH and CHARLES E. TOWNSEND,
United States Senate, Washington, D. C.:

Domestic building and loan associations are entitled to exemption in the proposed bill to govern the issue of stocks, as the business is purely local and the money is used for the purpose of buying, building, and improving homes.

MICHIGAN BUILDING AND LOAN ASSOCIATION LEAGUE,
WILLIAM H. PECK, *President, Kalamazoo.*
IRVING B. RICH, *Secretary, Jackson.*

Mr. SHEPPARD presented a petition of the Fort Smith, Pauls Valley & Wichita Falls Highway Association and of the Pauls Valley Chamber of Commerce and Community League, of the States of Oklahoma, Arkansas, and Texas, praying for a system of national highways, which was referred to the Committee on Agriculture and Forestry.

Mr. McLEAN presented petitions of Local Branch No. 154, United National Association of Post Office Clerks, of Meriden, Conn., and Local Branch, National Association of Letter Carriers, of Bridgeport, Conn., praying for an increase in the salaries of postal employees, which were referred to the Committee on Post Offices and Post Roads.

He also presented petitions of the Catholic Gimnostic Sokal, of Meriden Branch of the Slovak League, and of the Catholic Slovak Union, all of Meriden, in the State of Connecticut, praying for the liberation and unification of the Czecho-Slovaks of Austria-Hungary into one independent Czecho-Slovak State, which were referred to the Committee on Foreign Relations.

He also presented petitions of Milford Branch of the National Woman's Party and of sundry citizens of Milford, Conn., praying for the submission of a Federal suffrage amendment to the legislatures of the several States, which were ordered to lie on the table.

Mr. CURTIS presented a petition of Civil War veterans of Garden City, Kans., praying for an increase of pensions of veterans of the Civil War, which was referred to the Committee on Pensions.

He also presented a memorial of sundry citizens of McPherson, Kans., remonstrating against the enactment of legislation making it a crime to deposit in the mails literature having for its purpose the exposure of oaths, rituals, and ceremonies of any or all secret or fraternal orders, which was referred to the Committee on Post Offices and Post Roads.

Mr. COLT presented memorials signed by 830 members of the congregations of Methodist Episcopal Churches of Rhode Island, remonstrating against the enactment of legislation authorizing the construction of railroad tracks directly opposite the Lucy Webb Hayes National Training School and the Sibley Memorial Hospital, in the city of Washington, D. C., which were referred to the Committee on Interstate Commerce.

He also presented petitions of sundry citizens of Rhode Island, praying for the submission of a Federal suffrage amendment to the legislatures of the several States, which were ordered to lie on the table.

Mr. TOWNSEND presented a memorial of the congregation of the Bates Street Christian Reformed Church, of Grand Rapids, Mich., remonstrating against the enactment of legislation granting certain help and protection to secret societies, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of Slovak League of America, No. 117, of Muskegon Heights, Mich., praying for the liberation and unification of their race into one independent Czecho-Slovak State, which was referred to the Committee on Foreign Relations.

He also presented a petition of Local Branch No. 1, National Association of Letter Carriers, of Detroit, Mich., praying for an increase in the salaries of postal employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented a resolution adopted by the Grand Rapids Retail Grocers and Meat Dealers' Protective Association, of Grand Rapids, Mich., remonstrating against the repeal of rates on second-class postage, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of the congregation of the Central Methodist Episcopal Church, of Lansing, Mich., remonstrating against the passage of the so-called daylight-saving bill, which was referred to the Committee on Interstate Commerce.

WOMAN SUFFRAGE IN GREAT BRITAIN.

Mr. SHAFROTH. Mr. President, I present a letter and ask that it be read.

The VICE PRESIDENT. Without objection, the Secretary will read.

The Secretary read as follows:

NATIONAL AMERICAN WOMAN SUFFRAGE ASSOCIATION,
Washington, D. C., February 9, 1918.

Senator JOHN F. SHAFROTH,
Columbia Road and Twentieth Street, Washington, D. C.

MY DEAR SIR: Lest the press dispatch may not have come to your notice, I write to inform you that woman suffrage as a part of the representation of the people act became a law in Great Britain on Thursday, February 6. It applies to the women of England, Scotland, Ireland, and Wales. This is not a referendum, but a definite grant of the vote.

This action challenges the United States to make good her claim that she "fights for democracy."

The doubts, fears, and objections in regard to woman suffrage in Great Britain have been as bitter and obstinate as those in the United States, yet Great Britain, with vision clarified by her war sacrifices, has overcome them and done justice to her women. Shall the United States be less generous? Shall the States not be given the opportunity to act?

I also call your attention to the fact that the State Legislatures of New York and North Dakota have just passed resolutions asking the Senate to pass the suffrage amendment.

The world crisis demands that women shall have a voice in the problems so vital to the welfare of the human race. The Federal amendment is the only method by which the Nation can take action.

Yours, truly,

CARRIE CHAPMAN CATT, *President.*

Mr. SHAFROTH. Mr. President, I am gratified to receive the good news. I want to indorse every statement contained in that letter, and to express the hope that the Government, which in its Declaration of Independence first announced the principle that the just powers of government are derived from the consent of the governed, will soon pass the constitutional amendment granting equal suffrage to women.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. POMERENE:

A bill (S. 3838) granting a pension to Emma J. Naylor; to the Committee on Pensions.

By Mr. KIRBY (for Mr. HOLLIS):

A bill (S. 3839) granting a pension to Katherine I. McGrath (with accompanying papers); to the Committee on Pensions.

A bill (S. 3840) for the relief of George A. Turbox; to the Committee on Military Affairs.

By Mr. THOMPSON:

A bill (S. 3841) granting a pension to Johanna McGee; to the Committee on Pensions.

By Mr. JONES of New Mexico:

A bill (S. 3842) fixing the term of service of Welton W. Pratt during the Civil War; and

A bill (S. 3843) fixing the term of service of Elijah C. Putman during the Civil War; to the Committee on Military Affairs.

By Mr. CHAMBERLAIN:

A bill (S. 3844) granting an increase of pension to Israel Wood (with accompanying papers); and

A bill (S. 3845) granting an increase of pension to Jacob W. Kinsey (with accompanying papers); to the Committee on Pensions.

By Mr. BORAH:

A bill (S. 3846) granting an increase of pension to Sarah Whittle (with accompanying papers);

A bill (S. 3847) granting a pension to Alice Hereh (with accompanying papers); and

A bill (S. 3848) granting an increase of pension to George F. Behymer (with accompanying papers); to the Committee on Pensions.

By Mr. CURTIS:

A bill (S. 3849) granting an increase of pension to John C. Mercer (with accompanying papers);

A bill (S. 3850) granting a pension to Nancy J. Bower (with accompanying papers);

A bill (S. 3851) granting a pension to Tom Pogue (with accompanying papers);

A bill (S. 3852) granting an increase of pension to Nathan L. Fritts (with accompanying papers);

A bill (S. 3853) granting an increase of pension to Edward G. Moore (with accompanying papers);

A bill (S. 3854) granting an increase of pension to William H. Henkle (with accompanying papers);

A bill (S. 3855) granting an increase of pension to Camm T. Sanders (with accompanying papers);

A bill (S. 3856) granting an increase of pension to John G. Fulton (with accompanying papers);

A bill (S. 3857) granting an increase of pension to Harvey Potter (with accompanying papers);

A bill (S. 3858) granting an increase of pension to Austin L. Myers (with accompanying papers);

A bill (S. 3859) granting an increase of pension to John Clopine (with accompanying papers);

A bill (S. 3860) granting an increase of pension to W. W. Lamb (with accompanying papers); and

A bill (S. 3861) granting an increase of pension to John W. Magann (with accompanying papers); to the Committee on Pensions.

By Mr. HALE:

A bill (S. 3862) granting an increase of pension to Frederick E. Sprague (with accompanying papers); to the Committee on Pensions.

By Mr. SIMMONS:

A joint resolution (S. J. Res. 133) authorizing the granting of insurance under the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917, on application by a person other than the person to be insured; to the Committee on Finance.

AMENDMENT TO RAILROAD-CONTROL BILL.

Mr. ROBINSON. I desire to offer an amendment to the pending bill, the bill (S. 3752) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes. I ask that it be printed and lie upon the table. I call the attention of the chairman of the committee to the amendment. I will state that it is designed to reform and make clear certain language in the bill.

The VICE PRESIDENT. The amendment will be printed and lie on the table.

AMENDMENT TO POST OFFICE APPROPRIATION BILL.

Mr. LEWIS submitted an amendment providing that hereafter when emergencies or the needs of the service require letter carriers in the City Delivery Service and clerks and special clerks in first and second class post offices to work in excess of eight hours a day such additional services shall be paid for at a rate of 50 per centum higher than their salaries as fixed by law, intended to be proposed by him to the Post Office appropriation bill, which was referred to the Committee on Post Offices and Post Roads and ordered to be printed.

WITHDRAWAL OF PAPERS—DANIEL A. WILLIAMS.

On motion of Mr. BORAH, it was

Ordered, That the papers accompanying Senate bill 275, Sixty-fifth Congress, first session, granting a pension to Daniel A. Williams, be withdrawn from the files of the Senate, no adverse report being made thereon.

THE COMMITTEE ON FINANCE.

Mr. SIMMONS submitted the following resolution (S. Res. 205), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Finance, or any subcommittee thereof, be, and hereby is, authorized during the Sixty-fifth Congress, to send for persons, books, and papers, to administer oaths, and to employ a stenographer, at a cost not exceeding $1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before said committee, the expenses thereof to be paid out of the contingent fund of the Senate, and that the committee, or any subcommittee thereof, may sit during the sessions or recess of the Senate.

WAR CABINET.

Mr. KIRBY. Mr. President, I desire to give notice that I shall address the Senate briefly to-morrow morning after the Senator from Massachusetts [Mr. WEEKS] has concluded, relative to the war-cabinet bill.

The VICE PRESIDENT. The morning business is closed.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had, on the 12th instant, approved and signed the following joint resolution:

S. J. Res. 128. Joint resolution granting to certain persons in the active war service an extension of time within which application for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917.

AMERICA AND HER NATIONAL DEFENSE.

Mr. JAMES. Mr. President, in a time of war those who hold positions of high station should be exceedingly careful as to their utterances. No matter how good the intention, some utterances made, not properly weighed, not properly measured, may be of far-reaching and disastrous effect.

SENATOR CHAMBERLAIN'S SPEECH.

I am going to call to the attention of the Senate and the country a speech made in New York by the chairman of the Military Affairs Committee of the United States Senate. It was a great gathering of citizens addressed by him. He was speaking not alone to those gathered there, but he was speaking to the people of America and to the world. In the course of a speech of some length he used these words:

Now, in conclusion—and I have only touched a few of the high spots—let me say that the Military Establishment of America has fallen down. There is no use to be optimistic about a thing that does not exist. It has almost stopped functioning, my friends. Why?

He is going to give you the reason now why the Military Establishment of America has fallen down.

Because of inefficiency in every bureau and in every department of the Government of the United States. [Applause.] We are trying to work it out. I speak not as a Democrat, but as an American citizen.

The Senator seems to make some strange and weird distinction between a Democrat and an American citizen. For myself, I have always believed that to be a good Democrat is to be a good American, and if I did not believe that I would sever at once my association and allegiance from that body.

In the course of this remarkable speech, concluded with this more remarkable utterance, the Senator diverted long enough to pay high tribute to the former President of the United States, Col. Roosevelt. He paid high tribute to former Senator Root. But throughout that speech not one word of tribute did he pay, indeed he did not mention, the name of that man whose name is upon the lips of all the people of the world, the Commander in Chief of the Army and Navy of the United States, Woodrow Wilson. Of course, I recognize the surrounding and attendant circumstances. There was the "King of the Jungle," the hero of San Juan Hill, the discoverer of the River of Doubt, and I imagine, though the distinguished Senator told us in the course of a speech upon this floor that he is not afraid of God, man, or devil, that he at least was given an aphasia by Col. Roosevelt and was unable to think of the name of the President of the United States.

But let us examine into the facts. Let us investigate and see whether there was any warrant for this unhappy and unusual utterance. There sat to his left Elihu Root, a distinguished lawyer, a great American. Perhaps the Senator had in mind the thought that Russia had fallen down and he had unconsciously substituted the name of the United States for Russia. The President sent Senator Root to Russia at the head of the mission from this country. He did all that a human being could do, but Russia failed, Russia fell down. Root was not to blame; he did, as I say, all that he could; but suppose, upon the other hand, that instead of sending Mr. Root as our representative abroad the President had selected Mr. Bryan; how this Chamber would have reverberated with criticism and anathema! They would have declared that he had sent abroad an orator and not a nation builder; but he sent a member and leader of the great Republican Party to Russia. After he failed, having done all he could, not from my lips shall fall one word of criticism of him.

THE MILITARY ESTABLISHMENT HAS NOT FALLEN DOWN.

But has the Military Establishment of the United States fallen down? Mr. President, we must look abroad, as I said in the beginning, to measure the effect of that speech. At the time it was uttered the fires of revolution had just begun to blaze in Austria; 500,000 hungry, war-torn workingmen were marching the streets of Germany crying for "peace without annexations, peace without indemnities."

Who can measure the mighty force of this utterance in the hands of the Kaiser—red lined upon every newspaper in the Empire, posted upon every billboard? "What is it, Kaiser?" "America, giant of the West; America, hope of the allies; America, hope of the world, has collapsed." "Who said it?" The chairman of the Military Affairs Committee of the United States Senate—no utterance of some irresponsible; no word that has filtered through the lines by a spy, but it is the deliberate utterance made by this man in this mighty station, that America has failed in this great war. Who can say, and who can measure, and who can weigh the mighty influence that these utterances had in quieting that revolution and in stopping the strike and sending those men back to work? I can hear the Kaiser say: "Trust me a little longer, just a while longer, and Germany will triumph over the world."

Of course I know that my good friend the Senator from Oregon [Mr. CHAMBERLAIN] did not intend that this speech should have that effect; but I am pointing out the danger of such utterances as this. Mr. President, the truth is that they

are not justified by the facts. Let us see if I can not demonstrate that. In the first place, my good friend the Senator from Oregon assumes the rôle of the efficient man, of the man who makes no mistakes, of the man who wants to correct the mistakes of the War Department; and yet in this short speech of 20 minutes he was forced to withdraw 90 per cent of his charges and subject the remaining 10 per cent to the terrific battle of dispute—90 per cent inefficient himself in a speech of 20 minutes does not proclaim him as the man without liability to make mistakes.

Of course America has made mistakes. We want to go back and live in the atmosphere a while before the war. This country was without an army. We all know that. When war was declared our Army did not number in both officers and men what the Army to-day numbers in officers alone. What did we have to do? In the first place we had to have an Army. How should we get it? We had to secure the Army partly by volunteers and that part was negligible and in the greater degree by the selective-draft system.

England for two years was without the draft; Canada only until recently was without it; Australia has twice refused it; and yet America, a great democracy as it is, did in the short space of 30 days what these old, staid, and tried Governments were unable to do in two years' time. We heard gloomy forebodings, we heard gloomy prophecy, we heard it said that America would not submit to the draft; and yet, when the time came and these brave men were called to the colors, 10,000,000 of them marched up and registered, willing to make the great sacrifice, that of their lives—all they had—for the country. It was done as quietly as we hold an uncontested election in America. Has a Military Establishment and a country fallen down that can do that?

But that is not all. Then came the sorting-out process; then came the exemption board appointments. Mr. President, I would be the last man in the world to inject politics into this war; God knows that, while I am a Democrat, I am also an American. I pay just tribute to the brave, patriotic men upon the other side of this Chamber who have stood by the country in its hour of peril, and who, I believe, will continue to stand by it. They are also in the other House; they are throughout America. What boots it for a party to win a political victory and to lose our liberty? What boots it for a political party to gain a victory with nothing to rule? So, Mr. President, when the President came to make the appointments of these various boards that should pass upon the exemptions claimed by men, it was submitted to the various governors in the States—Republican governors as well as Democratic governors. They appointed the various exemption boards, and those men walked up and made their claim for exemption. Think of it, Mr. President! The millionaire and the pauper, the prince and the peasant, the butcher and the merchant, the farmer and the lawyer were all called alike to the same service.

SELECTION OF CAMPS AND CONSTRUCTION OF CANTONMENTS.

Then, what happened? We have our Army on the way; we have to have cantonments for them; we have to have camps for them. Where are we going to get them? We had to do what? First, we had to select the sites. Of course, that was a contested matter; various ambitious cities wanted to be selected. Then after the sites were selected, the cantonments had to be built quickly, immediately, for the necessity was great, the war was on, and soldiers were wanted at the front. We let out the contracts—not according to the old system; it could not be done; we did not have time—to the various firms, according to a percentage basis, and, under the management of Col. Littell, the cantonments were erected, 16 of them in number. It took almost a billion feet of lumber to build them; it took almost a hundred thousand carloads of material to supply them; it took more than a hundred thousand men working and toiling to erect these cantonments. Roads had to be built, hundreds and thousands of miles of roads had to be built. These cantonments sprang up as if overnight.

Then came the Army to the camps. One million five hundred thousand men came to these cantonments, were transported over the railroads of the country, and not a life was lost. That does not look to me like the Government had ceased to function and had broken down.

Then what happened? The men had to be trained. We had to have physicians. We could not get them within the draft age. Thousands of fine country and city doctors laid down their lucrative practices, walked willingly to the standard of their country, and tendered their efficiency and their talents in the service in these cantonments.

Who can point me to any scandal connected with the exemption of men who were unworthy to be exempted? I have not heard of any. Probably there are some cases; I doubt not that is so; it would be impossible in the handling of 10,000,000 of these cases not to have something of that sort, but upon the whole it has been singularly and remarkably free of any scandal caused by influence or corruption.

Mr. President, of course, probably you might find one soldier, or two soldiers, or a dozen soldiers, or more, who perhaps were neglected in the camps; but who is it, pray tell me, who can guarantee the honesty and the humaneness of fifteen hundred thousand men? When Christ was upon earth he tried His hand upon 12, and we know the result. I want to stand here to-day, Mr. President, to defend the thousands of American doctors who have given up the comforts of home, who have given up a lucrative and growing practice back home, and have come to a greater service, for which the pay is hardly anything to be considered at all. Actuated by fine patriotism, these men deserve the highest praise, and I want to defend them from any intimation that they are not rising to the highest standard and the best traditions of their profession, both as men of science and patriotism.

GOOD CARE AND HUMANE TREATMENT OF SOLDIERS IN THE CANTONMENTS.

The Senator from Oregon read us a letter from a distracted and heart-broken parent. God knows my heart goes out to him; but, Mr. President, I want to say in all kindness that I do not believe that was the way to handle a question like that at a time like this. The soldier's name was not given to the Secretary of War; the Secretary of War, so far as I know, has never been able to secure the name of the soldier who was thus mistreated; but, Mr. President, the reading of that letter upon the floor of the Senate, creating the impression throughout America that that was the rule in these cantonments rather than the exception, did a great injury to the cause of our country. It distressed many a mother at home; it dampened the enthusiastic ardor and patriotic fervor of many a father back home, causing the inquiry to spring into their minds, "Has my country to which I am willing to render the great service been guilty of the mistreatment of my boys in the hour of their illness?"

I received a letter myself, Mr. President, only a short time ago in regard to the treatment of a soldier in the cantonment in my State, Camp Zachary Taylor. I want to say here and now that in that camp, having between 30,000 and sometimes 40,000 and probably 45,000 soldiers within its keeping, I probably know personally as many of the soldiers there as any other man in civil life, and I had never received one single complaint up to that time. The letter to which I have referred did not come from a soldier; it did not come from any of his kinsmen; it came from a personal friend of mine, telling me that it was reported that this boy had been neglected, telling me the county from which he came in Kentucky, and stating that by reason of the neglect he died. I did not read the letter upon the floor of the United States Senate that it might go out into the homes of Kentucky. I did not know the facts; my informant did not know the facts. I went down to the Secretary of War, and I said to him: "I want this case immediately investigated; I demand a court-martial, because a man who mistreats an American soldier mistreats me, and you, and every other American citizen." That case will be thoroughly and completely investigated. I also said to the Secretary that I wanted the severest punishment, if guilt existed, visited upon those who had neglected this soldier.

But, Mr. President, I know—we all know—that Mary Roberts Rinehart told the truth when she said that the soldiers in these cantonments were the best-cared-for soldiers in the world. I believe that to be absolutely true.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator for just a moment?

Mr. JAMES. Certainly.

Mr. CHAMBERLAIN. I simply want to say that the names of those parties were given to the Secretary of War.

Mr. JAMES. Yes; but, if the Senator will pardon me, only after the Secretary of War wrote and pleaded with the Senator to give them. I am making no criticism. I am pointing out the facts. They were given finally. I do not know that both of them were given.

Mr. CHAMBERLAIN. Both of them.

Mr. JAMES. I accept the Senator's statement. Both of them were given, but it was after the Secretary of War wrote the Senator a letter asking for the letters, and after the Senator had made his speech upon the floor of the United States Senate, reading both of the letters.

OUR SOLDIERS IN FRANCE THE BEST-CARED-FOR SOLDIERS IN THE WORLD.

I picked up this home paper, published in the little town where I live. I find this letter in it, and I want to read it, because I want the mothers of America—for they are those

who bring the first true and lasting teaching of genuine patriotism to the infant mind—to know that their country is not neglecting their boys. I read from the Crittenden Record-Press of January 31, 1918:

Former City Marshal George E. Boston—

I know him well—

received the following letter from the George Wood Anderson Evangelistic Campaign, of Huntington, W. Va., in regard to his son, Wilbur, who is an American soldier, now somewhere in France:

HUNTINGTON, W. VA., *January 15, 1918.*

MR. GEORGE E. BOSTON,
Marion, Ky.

MY DEAR MR. BOSTON: While in France I had the pleasure of meeting and talking with your son, Wilbur Boston, who gave me your address that I might be able to send you this short message.

He was nicely located and in fine health and spirits. He, with other soldier boys, has plenty to wear and to eat and is safely sheltered. Our Government is doing everything possible to safeguard the health and morals of our boys in France, and they are the best-cared-for soldiers in the world. I shall return to them the 1st of March.

The inclosed message written by him I trust may bring joy to your heart.

Cordially, yours,

GEORGE WOOD ANDERSON.

Permanent address, Bellefontaine, Ohio.

There the minister of God, the good man who is working among these boys, brings from France the news to a Kentucky father that his boy is with the soldiers of America there, and that they are the best-cared-for soldiers in the world. No; America's Military Establishment has not fallen down, nor have the departments ceased functioning.

UNIFORMS OF AMERICAN SOLDIERS 100 PER CENT VIRGIN WOOL.

But what else, Mr. President?

Why, when the Senator from Oregon was speaking I got the impression that the virgin wool that was in the uniform of the soldier had been cut down, and it distressed me greatly. I thought there must be some reason for it. But what are the facts? When we come to investigate it, we find that the uniform of the American soldier before this war was 75 per cent virgin wool and 25 per cent cotton. To-day it is 100 per cent virgin wool.

"Oh," they say, "there were some overcoats missing." Senators, take into consideration the mighty problem that confronted our country—drafting the Army, transporting soldiers, building the cantonments, securing hospital corps, and then, in addition to that, they had to have all of this material manufactured. They needed millions of overcoats, millions of uniforms, millions of shoes, hats, shirts, underwear, beds, wagons, trucks, vast tonnage, artillery of all sorts, ammunition, and a thousand things were needed at once. Our manufacturing establishments were overwhelmed. We can easily see the great task facing America. That we met it as quickly and efficiently as we did is fairly the marvel of the world.

Every manufacturing establishment in the United States was already running overtime and crowded to the very limit, supplying our allies abroad. We could not go and take those contracts away from them. We could not go to them and say, "You must cease your manufacturing for those men that are already in the trenches, fighting a battle that is ours." In many cases the War Department had to go out and they had to secure various business associations to engage in the manufacturing of the necessary articles of equipment for these soldiers. We must also bear in mind that this shortage was in the Southern States, and, in addition, that this has been the most rigorous winter in the history of this Nation for 50 years. In many Southern States overcoats were not worn until January, at which time every soldier had an overcoat. You would think, from some of the statements, that all of the boys went to the cantonments without any overcoats at all; that they never had an overcoat before, and that they had to rely upon the Government to give them an overcoat; but at the very time the Senator himself was speaking every soldier in the American Army had an overcoat furnished by the Government of the United States.

HEALTH CONDITION OF ARMY THE BEST IN THE WORLD.

The honest truth is that the health condition of the American Army, notwithstanding they have gone through the most severe winter of a half century, is by far the best of that of any other army in the world.

The death rate from disease per annum of the American troops is 8 soldiers out of a thousand.

In the Spanish-American War the death rate per annum of the American Army from disease was 25 soldiers out of a thousand.

In the China-Japanese War the death rate per annum from disease was 15 soldiers out of a thousand.

In the Russo-Japanese War the death rate per annum from disease was 20 out of a thousand.

SUCCESSFUL WORK OF SENDING OUR SOLDIERS ABROAD.

Then we had to proceed to get these soldiers abroad. How must we do that? It is a mighty task. We did not have the ships. My friend from Nebraska [Mr. HITCHCOCK] was complaining of that. He is right. We have not as many ships as we ought to have and as we would have if the ship-purchase bill of 1915 had been written into law. Our shipyards would have been blossoming forth. They would have been organized. The ships would have been turned out daily. But then there were men who said they knew more than the President did; but the President was right then, as he is right to-day.

We have started transporting these soldiers. I was present at a dinner given in this city to Marshal Joffre. I betray no confidence, because it has been frequently told—I do not know whether my friend from Oregon [Mr. CHAMBERLAIN] was present or not; I do not now recall—but at that dinner, in conversation with Marshal Joffre, up almost to the hour of 1 o'clock, I heard him say that the most soldiers they needed in France at that time were 30,000. He would divide those into two divisions. He gave his reasons for it. Back at the time when Joffre came here the uppermost thought in his mind, as one of the high representatives of France, was that all they needed and wanted from America was enough soldiers to inspirit the French Army and to show the Germans that we were upon the side of democracy and of liberty.

What are the results? We started this work of sending these soldiers abroad. The Senator from Mississippi [Mr. WILLIAMS] calls my attention, and he is right, to the fact that Marshal Joffre also pointed out that the soldiers they wanted were the Regulars. He told us that this war had revolutionized all warfare that had ever existed before. He said it was kaleidoscopic in its changes; that what was efficient to-day was thrown into the scrap heap to-morrow; that as the battle raged the change in artillery, the change in the machine-guns and in various modes of attack and defense had to be made overnight; and he said in addition that he wanted the Regulars, because they were trained to marching orders, and that after they had the Regulars there they would have to put them in camps in France and train them for three months before they would be able to go into the trenches upon the fighting line. They would have to teach them how to use the gas masks; they would have to teach them how to throw these hand grenades; they would have to show them the various modes of warfare; and it would take three months of intensive training to prepare these soldiers in France before they could go upon the fighting line.

What are the facts? We have sent abroad, not 30,000, but many, many times, 30,000; not 100,000, but many times 100,000. Has a Military Establishment fallen down that can do a work like that?

But let us see a little further if it has fallen down. I want to read a letter that I have received from the Shipping Board:

UNITED STATES SHIPPING BOARD,
Washington, February 7, 1918.

Hon. OLLIE M. JAMES,
United States Senate, Washington, D. C.

MY DEAR SENATOR: In accordance with your telephone request, I beg to advise you that upon the outbreak of war with Germany there were interned in United States ports and possessions 113 German and Austrian vessels, divided as follows: One hundred German and thirteen Austrian. Upon the seizure of these ships by the Federal Government it was discovered that practically all of them had been damaged to a greater or less extent in the machinery department. The damage in most cases consisting of willful destruction of the valve chest between the high pressure and intermediate cylinders, the intention being, apparently, to necessitate the making of new patterns and castings, which it was apparently expected must come from Germany. It was found, however, that repairs could be made by cutting out the damaged pieces and fitting neat graving pieces in the cylinders, properly secured and bolted, in which repairs electric welding was also found to be of great assistance. Repairs were thus effected contrary to the expectation of the Germans. The day following the declaration of war, a board of survey and consulting engineers, made up of experts in the ship survey and repair line, was appointed by myself in New York City, at the request of the Secretary of the Treasury. Within a month after the declaration of war one of the German ships so damaged was placed at the service of one of our allies for the purpose of carrying munitions and supplies, and from that date onward the ships were repaired as rapidly as possible up until July and August, at which time those on the Atlantic coast were all practically ready for service. Some of those on the Pacific coast were later in completing repairs.

On the Atlantic and Gulf coasts these ships were interned at various ports from Boston to Galveston. German ships were also interned at Pacific coast ports, in the Hawaiian, Samoa, and the Philippine Islands. Four German vessels were interned in the Canal Zone, which were only slightly damaged and were almost immediately put into service by the War Department. Two German vessels were interned in Porto Rico. Some of the vessels interned in the more out of the way places had to be towed to other ports to effect repairs. Five of those interned in the Hawaiian Islands were towed to the Pacific coast of the United States for repairs, and some of the Philippine ships were towed to Hongkong for the same purpose.

Shortly after these vessels were seized by the Federal Government nine cargo ships interned in South Atlantic ports were turned over to the Navy for repair at navy yards and for use by the Navy Department as supply ships. In July, by order of the President, 16 of the

high-speed passenger steamers were turned over to the Navy after repairs had been inaugurated under the supervision of the Shipping Board for completion of repairs by the Navy to complete repairs and be fitted out for transport purposes. The two ships interned at San Juan, Porto Rico, were seized by the Navy as prizes of war, as well as two of the ships in the Hawaiian Islands. Another ship which had been willfully sunk and abandoned at Charleston, S. C., was seized by the naval authorities as a wreck and repaired by them.

The total cost of repairs made on these ships to date by the Shipping Board are:

German	$5,257,223.61
Seven Austrians obtained by purchase	874,008.02
Total	6,131,231.63

Four German ships interned in Cuban ports were placed in the hands of the Shipping Board by that Government for operation, and repairs to these have been effected by the Shipping Board at New Orleans at a cost of $120,445.86.

From the accompanying lists it will be noted that 68 of the ex-German ships are now being operated by the Shipping Board, together with 7 ex-Austrian ships, which were obtained by purchase prior to the declaration of war against Austria. These have a total dead-weight tonnage of 448,565; total gross tonnage, 333,907; and total net tonnage, 213,603. In addition, it will be noted, as per the inclosed list, that there are 32 ex-German steamers being operated by the Navy having a total dead-weight tonnage of 280,462; total gross tonnage, 347,559; and total net tonnage, 297,614. It therefore appears that inclusive of the seven Austrian ships obtained by purchase the United States has gained by reason of the interned vessels 729,027 dead-weight tons, 681,466 gross tons, and 511,217 net tons.

Six of the interned Austrian steamers were purchased by private interests prior to the declaration of war against Austria, and one has been seized by the Navy Department for transport purposes.

Trusting that this furnishes you with the information desired, believe me to be,

Very truly, yours,

JOHN A. DONALD,
Commissioner.

MEMORANDUM FOR COMMISSIONER DONALD.

FEBRUARY 7, 1918.

In response to telephone inquiry by Mr. Morrill, I desire to submit the following figures in connection with German and Austrian vessels:

	To date.
Repairs to German vessels	$5,257,223.61
Repairs to Austrian vessels	874,008.02
Repairs to Cuban vessels	120,445.86
Purchase of Austrian vessels	7,831,026.70
	14,082,704.19

Very truly, yours,

WM. L. SOLEAU,
Disbursing Officer.

I also desire to have published the list of the various ships to which this letter refers.

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter referred to is as follows:

Former German and Austrian ships owned by United States Shipping Board Feb. 1, 1918.

Name.	Dead weight.	Gross tons.	Net.	Speed.	Trade.	Service.
Adelheid	4,200	2,870	2,057	.....	Italian	Italian Government.
Amphion, formerly Koln	8,970	7,409	4,665	13.5	Army	Army.
Anhalsia	7,475	5,423	3,371	.....	Pacific to Atlantic	Food.
Anna[1]	2,360	1,598	933	8	Porto Rico	A. H. Bull Co.
Araphoe, formerly Steinbeck (ship)	3,680	4,145	3,205	13	Pacific coast	Western Fuel.
Appeles, formerly Elsass	11,220	8,248	5,210	12.5	Army	Army.
Arcadia	6,400	5,453	3,412	9.5	....do	Do.
Armenia	7,600	5,463	3,386	10	French	French Government.
Artemis, formerly Bohemia	11,173	8,413	5,247	13	Army	Army.
Ascutney, formerly Pisa	6,800	4,966	3,147	12	Italian	Italian Government.
Bavaria	5,900	3,888	2,466	.....	Army	Army.
Black Hawk, formerly Rhaetia	7,430	6,599	4,141	12.5	Italian	Italian Government.
Casco, formerly Elmshorn	7,900	6,022	3,761	11	Army	Army.
Chattahoochee, formerly Sachsen	12,320	8,232	6,307	.....	French	Food Administration.
Chillicothe (ship), formerly Arnoldus Vinnen	2,200	1,860	1,782	.....	Australian	Commonwealth of Australia.
Clara[1]	6,125	3,931	2,510	9	French	French Government.
Constantia	4,500	3,026	1,889	.....	Repairing	Unassigned.
Coosa, formerly Longmon	2,625	1,969	1,218	12	Cuban	Munson.
Dora[1]	10,575	7,037	4,536	13	Russian	Russian Government.
Erny[1]	8,450	6,515	4,170	13	Army	Army.
Gen. O. H. Ernst, formerly Sachsenwald	5,380	3,564	2,259	11.5	Panama	Panama Railroad.
Gen. G. W. Goethal, formerly Grunwald	5,437	4,833	2,878	13	....do	Do.
Gen. W. C. Gorgas, formerly Prinz Sigismund	5,520	4,564	2,826	11	....do	Do.
Gen. H. F. Hodges, formerly Savoia	4,035	2,732	1,667	10	....do	Do.
Hercules, formerly Bulgaria	15,040	11,440	7,218	11.5	Army	Army.
Ida[1]	7,200	4,730	3,093	12	French	French Government.
Isonomia, formerly Nassovia	6,020	3,901	2,474	10	New England coal	Fuel Administration.
Iosco, formerly Johanne	1,800	1,531	952	.....	Philippine	Philippine Government.
Iroquois, formerly Wittekind	6,800	5,640	3,606	12	Army	Army.
Itasca, formerly Setos	8,150	6,126	4,550	10	...do	Do.
Lucia[1]	8,600	6,755	4,386	10	...do	Do.
Midget, formerly Wiegand	600	499	292	.....	Philippine	Philippine Government.
Minnow, formerly Neptune	300	197	131	.....	Army	Army.
Moccasin, formerly Prinz Joachim	4,780	4,780	2,981	13	...do	Do.
Monongahela, formerly Red Jacket, formerly Dalbek (bark)	4,150	2,723	2,544	.....	Hawaiian	
Monticello	9,000	7,582	4,731	10	Army	Do.
Montauk, formerly Matador (bark)	2,214	1,483	1,355	.....	Australian	U. S. & Ass. Co.
Montpelier, formerly Bocinumi	10,000	6,128	3,721	11	Army	Army.
Mochulu, formerly Dreadnaught, formerly Kurt (bark)	4,950	3,109	2,875	.....	Australian	McNear.
Muscoota, formerly Flying Cloud, formerly Ottawa (bark)	4,950	2,659	2,542	.....	...do	Do.
Nansemond, formerly Pennsylvania	15,002	13,332	8,526	13.5	Army	Army.
Neuse, formerly Magdeburg	6,830	4,406	2,876	10	Italian	Italian Government.
Nipsic, formerly Borneo	2,500	2,164	1,344	.....	Philippine	Philippine Government.
Nyanza, formerly Esslingen	7,750	6,213	2,864	10	Army	Army.
Oconee, formerly Maia	4,246	2,554	1,634	8.5	Russian	Russian Government.
Orion, formerly Prinz Oskar	4,286	6,026	2,777	13	Italian	Italian Government.
Osage, formerly Serapis	7,424	4,756	2,953	10	French	French Government.
Olivant	5,800	4,014	2,928	.....	...do	Do.
Otsego, formerly Prinz Eitel Frederick	5,240	4,650	2,920	12.5	Italian	Italian Government.
Pawnee, formerly Harburg	6,850	4,471	2,837	12.5	Russian	Russian Government.
Pequot, formerly Ockenfels	8,900	5,621	3,541	10	Army	Army.
Princess Matoika, formerly Princess Alice	10,500	10,981	6,829	15	Trans-Pacific	Pacific Mail.
Quantico, formerly Lyemoon	2,900	2,676	1,887	11	Trans-Pacific	Dollar.
Quinnebaug, formerly Pongtong	2,000	1,631	997	.....	Philippine	Philippine Government.
Rajah	3,250	2,329	1,378	9	Chrome	Lavino.
Rappahannock, formerly Pommern	12,674	6,478	4,021	12	Army	Army.
Raritan, formerly Carl Diederichsen	1,600	1,243	774	.....	Philippine	Philippine Government.
Sachem, formerly Coblenz	3,800	3,139	1,869	11	Repairing	Hawaiian.
Suwanee, formerly Mark	11,496	6,493	3,998	12	Army	Army.
Taeony, formerly Verdun, formerly Staatssekretar Kraetke	2,620	1,962	1,133	.....	Cuban	New York and Cuba.
Teresa[1]	5,700	3,769	2,380	8	Army	Army.
Tioga, formerly Clara Jebsen	2,500	1,735	1,103	.....	Philippine	Philippine Government.
Ticonderoga, formerly Camilla Rickmers	7,500	5,139	3,163	.....	Army	Army.
Tippecanoe, formerly Holsatia	9,000	6,187	3,789	10.5	French	Food Administration.
Tonawanda, formerly Indra (bark)	2,700	1,746	1,613	.....	Manganese	Bethlehem.
Tunica, formerly Sambia	7,600	4,765	3,011	10.5	Pacific to Atlantic	Food Administration.
Wabash, formerly Seneca, formerly Tubingen	8,000	5,672	3,312	10	....do	United States Shipping Board.
Wachuse t, formerly Suevia	6,160	4,336	2,601	10	Army	Army.
Wacouta, formerly Prinz Waldemar	3,400	3,135	1,831	12	Cuban	New York and Cuba.
Watauga, formerly Governor Jaeschke	2,200	1,738	1,045	11	Porto Rico	New York and Porto Rico.
Wyandotte, formerly Willehad	5,900	4,761	3,011	11	Army	Army.

Mr. JAMES. Has a country fallen down that can do a thing like that? But let us examine a little further into that question.

REPAIR OF SHIPS THE GERMANS THOUGHT COULD NOT BE REPAIRED.

One of the greatest things that has been done by the Navy since the outbreak of the war was the repairing of the machinery of the big German liners that were interned at Boston, New York, and Norfolk, which are now in service transporting our troops to France. Without them we should be seriously embarrassed in getting our soldiers and supplies across the Atlantic. German ingenuity had been given the widest scope in an endeavor to so wreck the machinery of these ships as to defy repairs. The methods adopted and systematically carried out bore the stamp of a central direction, and so well was the work believed to have been done that opposite each item of the list found on one of the ships were the words, "Can not be repaired." German mechanism, German skill, and German deviltry made a list and put opposite each one of them, "Can not be repaired." Let us see what this "fallen-down administration" and Government did.

But here the Hun reckoned in true Teutonic fashion. He little thought that the same brain and the same brawn that will carry our arms to victory in Europe would put these ships in serviceable condition, and that the greater the difficulties the more determined are Americans to solve them. The result of the Navy's work in this matter challenges criticism.

Cylinders, valves, and other massive pressure parts of the engines of these ships were so badly smashed as at first to lead to the conclusion that nothing short of renewal would make them fit for service.

It looked like the German notation that they could not be repaired was probably true. It looked as if we would have to send to Germany to get the parts of machinery they thought they had so destroyed.

In fact, such a course of action had been decided upon; but shortly after this decision had been reached the ships were turned over to the Navy, and instead of renewing cylinders, which would have delayed their completion and render impossible the transport of our troops to France, the services of American engineers familiar with electric welding were enlisted and in a comparatively short time what appeared to be insuperable difficulties were quickly solved and every one of these commodious ships made ready for service.

As one writer has remarked:

> Under ordinary conditions, by methods dictated by the traditions of the ship-repairing fraternity, at least 18 months would have been required to place the looted vessels again in commission. * * * Fortunately, traditional methods were jettisoned. In their stead ideas new to the marine world were brought into play, and as a result by Thanksgiving Day all of the 109 German ships that fell into our hands in April were operating on the Atlantic under the American flag.

To what extent the devilish ingenuity of the Germans went may be inferred when I tell you that in some cases fire extinguishers were emptied and refilled with gasoline. They thought that when the ships went out to sea loaded with our brave soldiers, and the cry of fire went up, and they seized the fire extinguishers to hurl this fluid into the flames to put it out instead they would have gasoline that would add fury to the flames. German kultur! German mechanism! German ingenuity! Pipes apparently in good order were plugged, ground glass was put in the shaft bearings, and boiler stays sawed partly in two. Everything that Teutonic efficiency could suggest was done to prevent our use of these ships; but the officers intrusted with the important work of ferreting out the vandalism and correcting it were told that they must take nothing for granted, that the lives of our brave soldiers were at stake, and that no part was to be considered so unimportant as to be neglected. So well was the work of the Navy done that there has not been a single "comeback," and the ships are probably in better condition to-day than they were in 1914. To make sure that everything was thoroughly reliable before risking the lives of our troops in them each ship, after the customary dock trial, was sent to sea for a 48-hour trial in order to test the effectiveness of the repairs that had been made; and be it said to the credit of the skilled engineers who were concerned in the work that every repair has stood the test of strenuous winter service in the North Atlantic, and that in no case has there been the slightest evidence of weakness.

In the case of the giant *Vaterland*, the pride of the German fleet, the injury to her engines and boilers was thought to be such as to make her a hopeless wreck, and it is related that when her chief engineer left her to go to the internment camp on Ellis Island it was with the satisfied remark, "If they can make her go, I'll take off my hat to them." And they did make her go, and as we made the German commander take off his hat to the American mechanics so we are going to make the Kaiser hand his sword to Woodrow Wilson and to the allies in this coming struggle. We have not fallen down, my friends. And they did make her go, and so well did she go that on her shaking-down cruise over a distance of about 3,000 miles, with an untrained crew, this magnificent ship, happily renamed *Leviathan*, which had not been docked for more than three years, did so much better than she had ever done in German hands as to leave no doubt of her success as an American transport.

And so in this case, as in all others in which the Navy has participated, has the good name and fame of this great country been right worthily maintained.

Mr. President, I shall have something further to say of the Navy in a moment. I bring that to the attention of America to show that those in charge of this great war are working night and day. They have met and overcome German ingenuity, these masters of the sea, these gentlemen who thought no power could repair what they had wrecked.

I want to send word to the brave boys "somewhere in France," if they have been discouraged by the speech of my friend CHAMBERLAIN that America has fallen down. I want them to hear all America say, "No; we have not fallen down. Hold the fort, for we are coming, more than ten hundred thousand strong." I place these facts before the country because the country is entitled to know them.

GREAT ACCOMPLISHMENT BY THE NAVY.

But let us see what the Navy itself has done. Of course, in a great war like this, with probably hundreds of thousands of details in contracts and various things to be done, anybody can pick out a mistake. That is easy to do. Anybody can criticize. But let us not lose sight of the elephant while looking for a chip under his foot. Let us give credit where credit is due. Let us not dishearten Americans. Let us tell them the truth.

Just as our Army, which was not more than 200,000 when war was declared, is to-day 1,500,000, so the Navy, including reserves and marines, now constitutes a force of 330,000, more than three times as large as when war was declared. The enlisted strength of the regular Navy has increased from 64,680 to 189,000; the reserve force from about 10,000 to 72,000; the Marine Corps from 13,266 to 37,000. There are 15,500 National Naval Volunteers and 4,600 members of the Coast Guard in the naval service, and the Hospital Corps has grown from 1,600 to 8,000.

There are nearly four times as many vessels in service as there were a year ago. Between 700 and 800 have been taken over and converted into transports, supply and patrol vessels, submarine chasers, mine sweepers, and the various other types needed. A large number of submarine chasers have been built, many already in service. A number of vessels that were under construction have been completed and commissioned.

The 109 interned German ships have been repaired and all are in service, an addition of more than 700,000 tons, some of them being operated by the Navy and others by the Shipping Board. The repair of these vessels, whose machinery had been so badly damaged by the German officers and crews that they did not believe it could be repaired, was a triumph of American ingenuity and engineering skill and a credit to the Navy's

Bureau of Steam Engineering, under whose direction it was accomplished. The former *Vaterland*, now the *Leviathan*, the largest vessel afloat, and a number of the other German vessels of large tonnage are in use as transports. When the President last March issued his orders for the arming of American merchantmen for protection against attack by submarines the Navy immediately undertook the task of furnishing guns and crews of expert gunners to man them, and in a short time every American merchant ship that applied for it was armed. The battles of these armed guards with submarines, their work in the protection of American ships, forms one of the brightest chapters in this war.

The Bureau of Ordnance has armed more than 1,100 vessels, this including numerous vessels added to the Navy as well as merchantmen. Some idea of the work done by this bureau can be given when it is stated that the annual expenditures have increased from $3,000,000 to $360,000,000. Immense amounts of munitions and large numbers of guns have been furnished, new sources of manufacture being opened up to supply the demand. In addition, much new material has been developed, including depth charges, new submarine bombs, nonricochet shells, bomb-dropping sights, howitzers, guns for throwing depth charges, smoke-screen apparatus, heavier ordnance for aircraft and many other important designs which can not be disclosed at this time.

To man the large number of vessels added to the Navy and the merchantmen armed thousands of gunners were required. Every ship has been utilized as a school in gunnery and engineering and thousands of men have been trained as expert gunners and engineers. Especially gratifying progress has been made in marksmanship with guns of the smaller caliber used in fighting submarines, with a periscope as the target.

Immediately after the declaration of war steps were taken to organize and equip a flotilla of destroyers for foreign service. The first of these sailed in April, arriving at a British port May 4, since which time our destroyers have taken an active part in the antisubmarine warfare in the war zone. The force has been constantly augmented, and, in cooperation with the navies of our allies, has done effective service in convoying merchantmen and transports and combating the German U boats. The record made by our destroyers has won the warmest commendation of both the British and French Admiralties.

Before war was declared Admiral Sims was sent abroad, and since we entered the war he has been, as commander of our forces operating in European waters, in close cooperation with the officials of the navies of our allies. The visit of Admiral Henry T. Mayo, commander in chief of the battle fleet, to England and France, and the participation of Admiral William S. Benson, Chief of Naval Operations, in the war council which met in Paris, were of great value. The formation of the allied naval council, in which this country is now represented by Vice Admiral Sims, has proved an important step in bringing about closer cooperation among the naval forces of the allies.

The Navy organized and has operated the large transport service which is carrying our troops and supplies overseas for European service and has furnished the convoys which protect these vessels. How successfully this hazardous and difficult task has been carried out is shown by the very small losses in comparison with the large number transported among our troops taken across the Atlantic.

We all remember that before war was declared Germany sneeringly said, "You can not take your troops abroad; we will sink them." But not more than 100 out of all the thousands and thousands we have there have they been able to sink, and they have taken the lives of a very few of our soldiers.

The regrettable sinking of the British ship *Tuscania*, with the loss of more than a hundred American soldiers, was the first instance in which a ship carrying American troops to Europe has been sunk. Previously not a single American transport has been torpedoed going to Europe and only one, the *Antilles*, sunk returning. One other returning transport, the *Finland*, was torpedoed, but reached port under her own steam.

NAVAL TRAINING CAMPS AND NAVAL BASES.

To provide for the vast increase in the personnel of the Navy and Marine Corps, some 20 camps have been erected. Old training stations have been greatly enlarged and new ones created. The Great Lakes Training Station, at Chicago, which formerly provided for 2,200 men, now has accommodations for over 20,000. That is an example of how these stations have grown.

The Navy now has 95,000 men in training, the Marine Corps more than 10,000. In addition to the stations, many special schools have been created, like the radio school at Harvard, which now has more than 3,000 students. The training facilities have increased from provision for about 6,000 men to provision for more than 13,000.

America has not fallen down so far as this showing goes.

The acquisition of the Jamestown Exposition and Pine Beach properties at Hampton Roads, Va., provided for the creation of the Navy's first fleet-operating base, which is destined to be one of the greatest of its kind in the world. A camp for 10,000 men has already been erected and is in use. The base will include an aviation station, submarine base, large warehouses for fleet supplies and fuel, docks and piers, and every accommodation needed for the fleet.

ENLARGEMENT OF NAVY YARDS AND CONSTRUCTION OF DRY DOCKS.

Our navy yards are vast workshops, building, repairing, and converting ships, and they have been greatly enlarged; warehouses, foundries, and machine shops being erected, and all the facilities increased. Dry docks are in course of construction that will accommodate the largest vessels. New shipways are being added that will largely increase shipbuilding facilities and enable the Navy to build all types of war vessels in its own yards. The entire shore construction program being carried out under the direction of the Bureau of Yards and Docks, comprises a total cost of about $110,000,000. The number of civilian employees in navy yards has increased from 35,000 to more than 65,000.

The large projectile plant under construction at Charleston, W. Va., will be completed in a few months, and will be operated in connection with the armor-plate factory which is to be built at that point later.

NAVAL FLYING CORPS.

The Navy has erected its own aircraft factory at the Philadelphia Navy Yard, the keel of the first flying boat being laid 90 days after ground was broken for the erection of the factory. A very satisfactory type of flying boat has been developed; a new dirigible balloon designed and built, and a number of other improvements made in seaplanes and other aircraft. The Navy's Flying Corps has been largely increased in both personnel and material, and is doing effective service on the European coast as well as in this country. The first of the United States armed forces to land in France were the 100 naval aviators who arrived there on June 8.

RADIO STATIONS.

The United States now has the largest radio service in existence, this being operated under the Naval Communication Service. At the beginning of the war all the commercial radio stations in this country were taken over by the Navy. The new stations at Pearl Harbor, Hawaii, and Cavite, Philippine Islands, the most powerful in the world, have been completed. Direct radio service was recently instituted between this country and Rome, so that our radio service now covers the Atlantic and the Pacific, messages being transmitted quickly to both Europe and Asia. We also conduct a radio service to Alaska, and soon all the possessions of the United States will be connected by wireless.

This unprecedented increase in the Navy has been accomplished, these difficult and varied tasks performed without necessitating any change in its organization, which expanded easily and rapidly to meet every condition and demand.

EXPANSION OF THE NAVY.

The ability of the Navy, without friction or hurrying, to bring to bear its force rapidly and to increase it threefold in a short time [the increase is now practically fourfold]—

Said Secretary Daniels in his annual report for 1917—

is due to the system that had been built up in peace times and to the securing before the war of a larger building program, extending over a term of years, as well as to the authorization of an increased personnel. Internally the efficient organization working together for years as a trained team made the Navy Department's rapid expansion easy, though it taxed the strength and energy of every head of a department and the entire personnel on shore and in the fleets. The spirit among the officers, among the enlisted men, among the skilled mechanics, among the trained civilians, was so united and their service so willing and their capacity so extraordinary that the Navy Department has marched abreast, all seeking to make the Navy's deeds worthy of its traditions. The years of drilling and practice, of close cooperation in planning and thinking, were evidenced in the readiness and quickness with which the Navy moved when the command rang out. Ships were manned without an hour's delay. Those in reserve were fully commissioned. Expert gunners lost not a moment when ordered as armed guards on merchant ships. Every man was zealous to find his place and prove the stuff he was made of, and most of them asked the place of danger.

Nor is it alone to the purely military side of the Navy that we feel we may point with justifiable pride. This war, more than any other war, has been an affair of business as well as of fighting. Supplies, equipment, transportation, all have called for the highest degree of efficiency and intelligence in order that the fighting arm might be sustained. The Navy is fortunate in having during the past four years so improved its business methods and its purchasing system as to be able to meet the tremendous and sudden demands of war time with-

out having found it necessary to alter its existing machinery in anything save an increase in personnel sufficient to handle the vast volume of business which now constitutes a day's work.

Such, Mr. President, is the showing of the Navy of the United States. What American is not proud of it? But the same warfare that is being waged to-day upon Secretary of War Baker was waged until recently upon Secretary of the Navy Daniels. Let me call to your attention the fact that on the 24th day of July, 1917, the Navy was attacked upon this floor. I undertook to defend it. In the course of a colloquy the senior Senator from Pennsylvania [Mr. PENROSE] made this startling and remarkable statement, which I read from the CONGRESSIONAL RECORD:

Mr. PENROSE—

Speaking to me—

Will the Senator permit an interruption? For the last time I want to deny that I am attacking the American Navy or anybody else. I am introducing a resolution of inquiry.

Mr. JAMES. You just admitted that you were attacking the Secretary of the Navy.

Mr. PENROSE. No; I said I have a right to attack him if I choose. I want to state here to the Senator and to the country that, in my opinion, the administration of the Navy Department and the War Department is marked by an indecision and inefficiency which will rapidly become a national scandal and which I intend to have investigated in some way at an early opportunity.

In July last, the leader of the other side—but, thank God, not a spokesman for that side—said he was going to have the Navy of America investigated; that it had become a national scandal! Let me read you what another distinguished Republican Member of the other side said:

Mr. KENYON—

Who was abroad and saw with his own eyes, who was in the trenches and who knows what service our force is performing abroad, when he came back, in an interview with the New York World, said this:

In this era of criticism no criticism has been made of our Navy—

He evidently considered that the statement which I have just read from the remarks of the senior Senator from Pennsylvania was not a criticism—

In this era of criticism no criticism has been made of our Navy. Lloyd George a few days ago congratulated America on the splendid efficiency of her Navy. Let no one say that we have done nothing in this war. We have helped to destroy the submarine. Our Navy is doing some of the most essential work of the war. All honor to the boys of the American Navy, to the work of Admiral Sims, and to the splendid efficient Secretary of the Navy, Josephus Daniels.

I put that wonderful record of splendid, triumphant achievement of the Navy, unrivaled by any country in the world, against the unsustained criticism of the Senator from Pennsylvania.

Mr. SMITH of Michigan. Mr. President, will the Senator from Kentucky permit an interruption?

Mr. JAMES. Certainly.

Mr. SMITH of Michigan. The compliment paid to the American Navy was, of course, a timely and well-deserved one; but it may not be inappropriate for us to pay a compliment to the British Navy, which since the war began has transported 13,000,000 men across the seas and has lost but 2,700.

Mr. JAMES. Mr. President, I would not say one word to detract from the glory that is due England; no word of invidious comparison or criticism will escape my lips. She has done heroic and wonderful service, and I hope that no member of Parliament has sought to plant the seed of distrust in the heart of her people by saying that she had not done this or that she had not done that, or that she had not rendered efficient service.

FRANCE NOT "BLED WHITE" AND NOT IMPOSED UPON BY AMERICA.

But, Mr. President, the Senator from Oregon in the course of his speech—and, to my mind, the most unfortunate part of it—talked about France being "bled white." In order that I may do him no injustice I will read just what he said:

Mr. President, the Secretary of War, in his general statement to the country—which was carefully written and prepared—tells us that $3,200,000,000 have been appropriated for the Ordnance Department and contracts have been let for $1,677,000,000; all of which is true. But the Secretary fails to tell us, Mr. President, in his statement to the country, and it only comes out in the course of a cross-examination, that America stands to-day unprepared, so far as ordnance is concerned. I challenge anybody to read the testimony and come to any other conclusion. Poor, bleeding France, my friends—bled white, not only for her own life and for the liberty of her own citizens but for America as well—is to-day furnishing our troops as they arrive in France the necessary heavy ordnance and machine guns for aircraft and for ground service. Why, Mr. President, if we relied upon the Ordnance Department in this emergency to furnish our troops with the heavy ordnance—and this is largely a war of artillery to-day—the war would be over before we ever got to the front.

Why, there is testimony, if I correctly remember it, before the Military Affairs Committee that along some of these fronts the cannon—and heavy cannon, if you please—are located 5 yards apart for a distance of 6 miles; and yet America, this great and magnificent country, is dependent upon poor France to deliver the ordnance! Did France agree to deliver it in order to win over reluctant America? Did she agree to furnish it in order to encourage and hearten America?

Mr. President, I can imagine no more unfortunate or unjustified utterance than that. France "bled white!" America imposing upon her! Mr. President, for more than 125 years in every school in this land we have taught our little children to love dear old France. There is not an inch of her soil or a drop of her blood that is not held in the deepest affection by America. France "bled white!" That is a German expression. She is not bled white; she holds 560 miles of that bloody western front at this hour, and the reddest blood that courses through any veins in the world runs through the veins of the French people—not white, but red, blood-red.

But what is the charge? You would think from the Senator's speech that we trafficked with France as to whether we would go into this war and that the condition upon which we went into it was that France would furnish us with ordnance, light and heavy artillery. America went into this war for the highest ideals known among nations and among men. She went into the war not only to make the world safe for liberty, but to make America safe for citizens of the United States. America went into this war for the old, dearly loved, and historic right of the freedom of the seas. Germany had ruthlessly murdered our citizens, she had fired upon and sunk our unarmed merchant vessels, she had sent to their death brave American seamen and citizens without an opportunity given them either to surrender or to fight. She had planted bombs in our factories, she sought to dismember the Nation by throwing us into war with Mexico and Japan, promising as spoils a part of this great Republic. I resent the insinuation that my country entered into the war trafficking with France as to whether she would go into it upon the condition that France would furnish us ordnance, when the records show—and I will produce them—that the agreement which France made with us to supply ordnance was made months after we had gone into the war. I know my dear, amiable friend CHAMBERLAIN did not see the danger of that sort of an utterance. A man ought never to speak when he is angry; his vision is not clear; he does not measure and weigh the importance of his statements. I have the contract here:

Washington, 14th of July, 1917—

Now, here is how we happened to get artillery from France. It is perfectly clear, absolutely plain, and it was the only sensible thing to do. France by reason of putting into her army so many millions of men had to erect great manufacturing establishments to supply the army with artillery. France came to us; we did not go begging France; we did not go trafficking with France; we did not make a condition with France upon our entry into the war, but the high commissioner of France came over here and this is what happened:

In the early part of last summer I concluded an arrangement with the French commissioner in Washington, Mr. André Tardieu, following an invitation from the commission—

That is, the French commission—

to place orders for artillery and artillery munitions in France, for the manufacture of a considerable supply of 75 millimeter field guns and 155 millimeter howitzers for the American forces in France. The supply ordered was more than sufficient to equip our troops with these pieces as rapidly as they would arrive in Europe, and the amount of ammunition for them was in accordance with the French practice as developed by the war. The feeling of the French authorities in regard to this transaction is best expressed by the following notice for the French press, prepared by the high commission in Washington and handed me by Mr. Tardieu.

The statement I have just read was made by Gen. Crozier, Chief of Ordnance of the United States, before the Senate Military Affairs Committee on December 31, 1917.

Now, here is the agreement. This statement was given out for the French press and prepared by Mr. Tardieu, the French high commissioner in the United States:

[Translation.]

WASHINGTON, *July 14, 1917.*

An important agreement has been concluded between the United States Government and the French high commissioner, Monsieur Andre Tardieu.

According to said agreement the American Government adopts the two principal pieces of matériel of French artillery, the 75-millimeter field gun and 155-millimeter rapid-fire howitzer.

The Expeditionary Corps of Gen. Pershing has received from the French authorities, on arrival, its field artillery, its rapid-fire heavy artillery, and its French artillery, which of course will accelerate its taking its place in the line.

At the same time the artillery production in France and in America has been organized so that the American Army of 1,000,000 men which is about to be recruited will receive without delay, as the units are formed, the necessary heavy and light guns.

The negotiations, taken up for the first time at the end of May, between Monsieurs André Tardieu, high French commissioner; Monsieur Ganne, chief of war munitions of the high commission; and Brig. Gen. Crozier, Chief of Ordnance, were characterized by two ideas.

On one hand, the American Government wished to adopt the quickest solution, in order to realize in the shortest time the complete armament of its forces.

Hurrying to the front, not delaying the war—

On the other hand, with great foresight they attached particular importance to realizing for the American and the French Armies, called to fight on the same battle field, uniformity of munitions, of such capital importance from a tactical point of view.

In view of these two desired aims, the French high commissioner was able, thanks to the development since 1916 of the machine equipment of our war munitions factories, to furnish Gen. Crozier with a detailed plan of industrial collaboration, which, by the united efforts of French and American industries, will assure the complete realization of the American program.

The double certainty of rapid production and uniformity of munitions decided the United States Government, despite the incontestable value of its own matériel, especially that of the 3-inch field gun, of which the superior qualities are universally recognized, to adopt our 75 and our short 155.

The negotiations on these lines were rapidly completed. At the end of [illegible] what over one month they were concluded this week by a complete understanding fixing the quantity and the price of the matériel to be furnished.

This understanding, susceptible of important further developments, is a precious proof of the esteem in which the most powerful industrial country of the world holds our engineers and our mechanical constructors. It has also a practical bearing of great value.

From the military point of view, it is evident that uniformity of type of guns and munitions for armies fighting on the same battle fields is an appreciable guaranty of safety and efficiency. The supply and the volume of fire are thereby equally facilitated. Unity results spontaneously from identity of weapons. Finally, all tactical results obtained by the experience of three years of war are without previous adaptation assimilated by the American Army.

I shall not read all of that statement, but I will incorporate it in the RECORD, showing that this contract was made between the United States and France because France had a surplus supply of ordnance, of light and heavy artillery, and could give it to our soldiers at once and put them into the fighting line much more quickly.

The remainder of the statement of M. Tardieu, the French high commissioner in the United States, is as follows:

From the industrial viewpoint, the unity of effort created between the manufacturing plants of the two countries will produce happy results without precedent, not only during the war but also subsequently. Common action provides the best means of mutual acquaintance and for preparation of the close cooperation which it is desired to organize for the future.

From the financial standpoint it is possible to hope that the purchase by the United States of French artillery matériel will create an improvement in exchange, which, under the existing relations of America and of her European allies, is as much to be desired by the United States as by France.

It is also likely that the adoption of the metric system, which has been officially requested by the American Bureau of Standards, and which is much to be desired from the point of view of future French-American interests, may be thereby facilitated.

These are, briefly stated, some of the results, certain or probable, of the agreement between the French high commissioner and the American Government.

The dominant note of the agreement lies in the proof it gives of the unshakable resolution of the American Government to achieve in the shortest time the maximum of military strength, and, on the other hand, it proves the intimate and active cooperation existing between the United States and France.

Mr. Baker, Secretary of War and Gen. Crozier, Chief of Ordnance, of the American Government, have given proof in this case of the broadest spirit of comprehension and decision and have succeeded in a few weeks in securing for the American troops artillery of the first order.

Our high commissioner at Washington speaks in unbounded praise of their cooperation with him.

We may add that the first French guns arrived last week in the United States, and that the Artillery School of Saumur has been placed at the disposal of the American Army for training purposes.

And, as the Senator from Ohio [Mr. POMERENE] says, of course, that will save transportation.

I can imagine with what fine satire some of our friends who are prone to criticism would have attacked us if we had refused to accept this. Suppose we had said, "No; we are going to manufacture them ourselves. We are going to ship them abroad." I can imagine some of our friends rising and saying, "How foolish. Instead of taking guns across, you could take to them meat and bread and supplies that they sorely need. They have got the guns already there. They can supply you with them. You can get them cheaper from them than you can make them here. You are loaning France hundreds and hundreds of millions and up into the billions of dollars. She can pay back some of her loans by supplying you with this ordnance, and she was willing to do it, and you would not accept it. She offered to do it, and you refused it." Because America did the sensible thing—and every fair-minded man is bound to admit it—we are attacked here upon the floor and asked, "Did France do that to invite us into the war?"

Let us see a little further upon this question of the Military Establishment of America breaking down.

MR. TARDIEU'S COMPLIMENT ON OUR MILITARY PREPARATION.

I have here a speech made on February 7, 1918, after the unfortunate utterance of the senior Senator from Oregon [Mr. CHAMBERLAIN]. It was made by the French high commissioner. Let us see what he says:

Mr. Tardieu described America's military effort as "wonderful and splendid," and asserted it had been "a surprise to the enemy."

Alluding to the raising of the National Army, Mr. Tardieu declared that "no event of wider import has ever taken place since the beginning of the war." He continued:

"Thus your Government, with a clear and courageous view, has given you the strength of numbers, the first condition of military power. In April, 1917, you had 9,524 officers and 202,810 men. You have now 110,000 officers and 1,500,000 men, and the number of your men in France at the present moment is notably in excess of the establishment of your Army nine months ago."

Against the unprepared utterance—as the Senator tells us his speech there was—which the Senator made, which he can not sustain, and was forced to withdraw 90 per cent of it, and undertook to defend part of it, I place the statement of this man, representing the heroic Government of France, who has been here, who has carte blanche in all of the departments of this Government. He says America has done wonders.

France, he said, has taken "every necessary measure" so that America can complete in France the training begun here. Regarding aviation, American development had been "beyond all expectations," he declared.

Warriors of the sky! America has exceeded all expectations in her aviation preparations, not fallen down—

He outlined how America had helped the entente also financially and with shipping, food, and fuel—aid which he described as "immense and conclusive."

"Wherever on special points," he added, alluding to his association with officials at Washington, "I believe that mistakes have been made, I say it frankly, the heads of the Cabinet or the heads of your departments know it from their own experience."

"I have the optimism of the satisfied," Mr. Tardieu said, discussing the situation generally, "and as long as I shall be here as the representative of my country I will ask from you every day a still greater effort. After 43 months of war our needs are huge indeed, and in order to supply them enormous sacrifices are required of you"—

So said High Commissioner Tardieu in speaking of the military preparation of America. The Senator from Oregon says there is no use in being optimistic about something that does not exist. This high commissioner is satisfied, and he has the satisfaction that optimism gives.

"Some people in Europe, as well as here," he said, "have been wondering why you should not, in that respect, have done everything by yourselves. This criticism shows that those people ignore, firstly, what time means in war—

That is, not manufacturing our own guns, taking the surplus over there—

and, secondly, how infinitely complicated is the industrial war organization, which, from the very start, is required by the extensive production of ordnance and aviation. * * *

"I have drawn roughly the results of the military effort of the United States for a period of less than 10 months—

Listen to this statement—

"I do not believe that impartial man would say that this effort is now completed but I declare that any impartial man must admit its wonderful extension and splendid achievements."

LORD NORTHCLIFFE'S VIEW OF AMERICA'S MIGHTY WAR MACHINE.

That is not all. I have other witnesses that I shall call. America has not ceased to function. According to this high authority, the Military Establishment has not fallen down; and if there are any disheartened people in America let them take courage. These critics exist now as they did in the days of long ago. They are no newcomers.

But let us go a little further.

I hold in my hand an article written for the newspapers of this country and copyrighted by the Public Ledger Co., of Philadelphia. They are articles by Lord Northcliffe, the representative here of Great Britain. I shall not read the first article; it is too long. I shall print it in the RECORD immediately following the conclusion of my speech; but I will read the headlines:

PHILADELPHIA, *September 16.*

The Public Ledger to-morrow will print the following article written by Lord Northcliffe. The second and concluding article will appear Tuesday. They are printed simultaneously in the London Times, the London Daily Mail, and the Washington Post.

Here are the headlines:

Swift, unexpected action characterizes United States in war, declares Lord Northcliffe. British high commissioner reviews growth of war machines in America, expressing surprise at the quick results obtained through Nation's system of deliberating carefully and striking suddenly.

The other article is headed:

Intensity of America Shows in its Mighty War Machine, Declares Lord Northcliffe. Vast Accomplishment in Air Service Campaign Praised by British Commissioner, who Describes Wonderful Progress Made by the Government in Enacting War Measures. Believes United States System will Defeat Prussians.

I shall only read the concluding paragraph of this last letter and include the balance immediately at the conclusion of my speech. Here it is:

It is easy to say that many of these things might have been done a couple of years ago, but democracies do not work in that way. Even after the war had begun we in England spent almost two years in discussing whether we should have equality of sacrifice in regard to military service, and Canada was still debating the question until a few days ago. Each nation has to make its war preparations after its own fashion.

No nation seems to learn much from any other. The American war machine is being built in the American way. Maybe it will have its faults, but for all that it is the mighty sledge hammer that will pulverize Prussianism. The Americans are getting to war with all the virility and intensity of a very forceful people.

That is the utterance of Lord Northcliffe.

TRIBUTE TO PRESIDENT WILSON.

But, Mr. President, our friend, the Senator from Oregon [Mr. CHAMBERLAIN], after telling us that the Military Establishment had fallen down and had ceased to function, after paying, as I have said, great compliments to the other guests, at last, at another dinner in the same city, thought of the President of the United States, and here was what he said. This is copied from the New York Times:

Senator CHAMBERLAIN paid tribute to President Wilson when he called him the premier of all the statesmen of the world, leading others in thought as no other one man.

And yet, just a short time before that, the Government over which he presided had ceased to function, and there was a falling down of the Military Establishment, and in addition to that there was inefficiency in every department!

Why, of course the Senator could not have meant that, for he beholds the United States Treasury under its Federal Reserve System standing as unshakable and secure as the Rocky Mountains do. Under the old system a Wall Street rumor could throw the Nation into panic. Under this new system a world's war does not shake it. I submit to these gentlemen who are such willing critics of the President of the United States that they had better read the history of the country, and they will find out that America has never yet deserted, and never will desert, the Commander in Chief of the Army and Navy of the United States.

SAVING OF MILLIONS IN PURCHASE OF SUPPLIES.

I have here a statement, which I shall not take the time to read, which was supplied to me. I shall incorporate part of it in my speech. It shows that under the system of the War Department millions and millions of dollars have been saved to the people of the United States of America in the purchasing of supplies.

A ROMAN VIEW OF IMPEDIMENTS IN WAR.

Mr. President, when I listened to these critics I was struck with this, which was sent to me by a Member of Congress:

A WAR 2,000 YEARS AGO.

Lucius Æmilius Paulus, a Roman consul, who had been selected to conduct the war with the Macedonians, B. C. 168, went out from the senate house into the assembly of the people and addressed them as follows:

"In every circle, and truly, at every table, there are people who lead armies into Macedonia; who know where the camp ought to be placed; what posts ought to be occupied by troops; when and through what pass Macedonia should be entered; where magazines should be formed; and when it is proper to engage the enemy, when to lie quiet. And they not only determine what is best to be done but if anything is done in any other manner than what they have pointed out, they arraign the consul, as if he were on his trial. These are the great impediments to those who have the management of affairs, for everyone can not encounter injurious reports with the same constancy and firmness of mind as Fabius did, who chose to let his own authority to be diminished through the folly of the people, rather than mismanage the public business with a high reputation. I am not one of those who think that commanders ought never receive advice; on the contrary, I should deem that man more proud than wise, who did everything of his own single judgment. What, then, is my opinion? That commanders should be counseled chiefly by persons of known talent; by those especially who are skilled in the art of war, and who have been taught by experience; and next, by those who are present at the scene of action, who see the country, who see the enemy, who see the advantages that occasions offer, and who embarked, as it were, in the same ship, are the sharers of the danger.

"If, therefore anyone thinks himself qualified to give advice respecting the war which I am to conduct, which may prove advantageous to the public, let him not refuse his assistance to the state, but let him come with me to Macedonia. He shall be furnished by me with a ship, a horse, a tent, and even with his traveling charges. But if he thinks this too much trouble and prefers the repose of a city life to the toils of war, let him not, on land, assume the office of a pilot." (Livy, Book XLIV, ch. 22.)

And so it is and ought to be in America. Let those who criticize come to Macedonia, and they will be supplied with a ship and a horse, and a gun, and they can have an opportunity to see at first hand, and display under daring conditions and circumstances their real knowledge of warfare.

THERE SHOULD BE NO POLITICS IN THE WAR.

But a speech was made by the Senator from New York [Mr. WADSWORTH]. I regretted to see this. I am sincere in this statement. I have a sympathetic feeling for the Senator from New York. He made a speech here advocating the passage of certain bills to take control of the war machinery of the country, which, as is well known by the public, are opposed vigorously by the President of the United States. The Washington Post on February 9, 1918, had this article:

HOUSE VACANCIES GIVE G. O. P. HOPE—REPUBLICANS LAY PLANS TO WIN DISTRICTS IN NEW YORK.

The Republican congressional committee at a conference held in the minority caucus room last night decided to make a vigorous campaign to win in the special election in New York March 5 to fill four vacancies from the greater city.

Acting on the recommendation of the subcommittee in charge of the campaign the general committee decided to have the speech of Senator WADSWORTH, delivered on the reorganization of the Army, distributed in these districts as a campaign document. This subcommittee is composed of NORMAN J. GOULD, chairman; Representatives WINSLOW, of Massachusetts, and GEORGE S. GRAHAM, of Pennsylvania. Mr. GOULD left at midnight for New York, where he will hold a second conference with local leaders to-day to complete organization for the campaign.

Should the Republicans win two of the districts in the special election, they will retain a plurality of 4 votes over the Democrats. The House now stands Democrats, 209; Republicans, 212; scattering 8; vacancies, 6.

I regretted to see that, Mr. President. I will tell you why. In a time like this we need a united American people back of the Commander in Chief of the Army and of the Navy of this land; and, of course, whoever attacks the Commander in Chief of the Army and the Navy of America will have the whole-hearted support of every pro-German, of every spy, of every pacifist, of every enemy of America, who will rally behind him because they want to break down the great directing force of this war.

I have read his speech. This article says there are four candidates who are going to stand on it as a platform. Mr. President, I do not believe it will hold them up.

Mr. President, so far as this war is concerned to me it has no politics. I have served hundreds of Republican soldiers in Kentucky as willingly, enthusiastically, and efficiently as I have served Democrats. I will continue to do this. They are fine Americans and no party spirit shall be shown in any way by me in service to these men. They are entitled to the best that I can give, and they shall have it.

ABRAHAM LINCOLN AND WOODROW WILSON.

During the Civil War, when the fate of a Nation was trembling in the balance, there appeared at the White House one day some gentlemen from the West. They were much excited and troubled about the commissions or omissions of the administration. President Lincoln heard them patiently, and then replied: "Gentlemen, suppose all of the property you were worth was in gold and you had put it in the hands of Blondin to carry across the Niagara River on a rope"—Blondin was a great tight-rope walker of his day—"would you shake the cable or keep shouting out to him, 'Blondin, stand up a little straighter; Blondin, stoop a little more; go a little faster; lean a little more to the south?' No! You would hold your breath as well as your tongue, and keep your hands off until he was safe over. The Government," said Abraham Lincoln, "is carrying an immense weight. Untold treasures are in their hands. They are doing the best they can. Don't badger them. Keep silence and we'll get you safe across."

President Wilson walks the tight rope, it stretches across the sea with its wreck and dead. He holds in his hands the richest treasure ever lodged in the keeping of one man since God said let there be light. The treasure is our very life, our liberty, our institutions, our homes, our firesides, our all. Gentlemen, let me plead with you—plead with all Americans—do not shake the rope. Do not badger him. Do not heckle him. Do not annoy him. He will make the journey safely over this ocean of blood and peril. Keep silence! Hold your tongues!

There were men in Washington's day who said they knew and he did not know; and in the distress of Valley Forge they tried to displace him as Commander in Chief of the Armies of the land. But the soldiers, with their bloody feet upon the frozen earth—those brave men, God bless them, with their flintlock rifles and coonskin caps—stood by Washington and American liberty blossomed into being, and Washington waved in triumph the conquered sword of Cornwallis.

The critic was in existence in Lincoln's day—patient, strong, great Lincoln. They thought they knew more about running the war than he did. They heckled him; they annoyed him; they shook the rope; but the flowers had not withered upon his new-made grave when the triumphant American Army marched down this Avenue.

So gentlemen, take courage, you critics. I can stand you upon each other's shoulders, and President Wilson will tower above you all like Washington's Monument towers above the foundation in which its granite base is laid.

The day will come in the Providence of God when our victorious Army, with America solidly back of them, will come back home in triumph and march down this same great Avenue, panoplied with the flowers and love and tears and pride of all America, in review before Woodrow Wilson, the man whom not only America trusts, but the civilized world trusts. Liberty will be safe and Americanism will be secure. [Applause in the galleries.]

The PRESIDING OFFICER. The Chair will make the usual but useless admonition, that the occupants of the galleries must be silent.

APPENDIX.

SWIFT, UNEXPECTED ACTION CHARACTERIZES UNITED STATES IN WAR, DECLARES LORD NORTHCLIFFE—BRITISH HIGH COMMISSIONER REVIEWS GROWTH OF WAR MACHINES IN AMERICA, EXPRESSING SURPRISE AT THE QUICK RESULTS OBTAINED THROUGH NATION'S SYSTEM OF DELIBERATING CAREFULLY AND STRIKING SUDDENLY.

(Copyright, 1917, Public Ledger Co.)

PHILADELPHIA, *September 16.*

The Public Ledger to-morrow will print the following article written by Lord Northcliffe. The second and concluding article will appear Tuesday. They are printed simultaneously in the London Times, the London Daily Mail, and the Washington Post.

By Lord Northcliffe.

This September, 1917, sees the beginning of the growth of a war machine unequaled in the world's history. The machine is being built in the American way. As I watch the process I am reminded continually of the method by which Americans build their skyscrapers, whose roots are deep down in the rock that forms the island on which New York stands.

In watching the building of a skyscraper the uninformed observer feels that the thing will never begin. For some time there is a blasting of rock, crowds of men appear with strange machines, and nothing much seems to happen. Then gradually but surely a great steel skeleton arises. The progress does not seem to be as rapid as it might be until suddenly the passer-by finds to his astonishment that the exterior walls of the seventeenth or thirtieth story are finished, the lower stories being yet in skeleton form. There is another delay, and lo! the skyscraper suddenly finished and housing ten or fifteen thousand busy workers. The American war machine is being built in the same way.

GIANT GIRDS ON HIS ARMOR.

From the staid British point of view the process is sometimes bewildering. There are delays, tolerances, repetitions of European war blunders, criticisms, arguments, extravagant optimism, and grave underestimations. Sometimes at the end of a long day one looks back on the morning and can see no progress. But at the conclusion of every six days there is not only an advance but sometimes a leap. The great giant of the West slumbered more or less uneasily for the first two and a half years of the war. He eventually woke with some unwillingness. To-day he is up and about and doing. He is girding on his armor and fashioning the club that should end the rule of despotism in Europe.

STREETS FILLED WITH KHAKI.

Lookers-on and critics here in the United States were astonished to find that, almost without public notice, conscription came into being. Having arrived, it works as smoothly as though it had been in use since the Declaration of Independence. Again the giant pauses a while and people begin to wonder what he is doing, but meanwhile the streets become filled with khaki. The stern-looking business men and professional beauties of photographers' shops are replaced by clean-visaged officers and nurses. The parks are busy from dawn to dark with men in shirt sleeves at drill. Those trying to make business appointments by telephone find that so and so has gone to France or to the officers' training camp at Plattsburg or elsewhere. The war hourly becomes more and more a part of the visible public life.

My American home is some miles out of New York City. When I took up my residence there in June last there were no signs of war about me. I went to Washington and returned after the space of a few days. A vast camp, as big as ours at Witley in Surrey, appeared at my doors as though it had grown by magic. This camp is not on the map, so to speak; it is not one of the great cantonments that are being built with lightning speed. Of these soldier cities there are now 16 finished, or nearly so. They are no mere camps. There is a permanence about them which makes it difficult to realize that they are built in two score of days. A number of them are being erected wisely in the sunny and comparatively stormless South, where the soldiers, more especially the flying men, will be in full training during the whole winter.

CAMP CITIES PROVE EFFICIENCY.

Let me describe one of these cities in the words of an English eyewitness, one of the 16 cities which will accommodate the first installment (687,000 men) gathered by conscription. These cities are tangible proof of the efficiency of American methods of organization applied to war making. We asked and obtained permission to see one of the most rapidly finished. It happened to be 2,000 miles from New York City. It did not seem to concern those who extended the very cordial invitation to us that the journey was a long one; it is regarded here as we in England look upon the journey from London to Newcastle or London to Glasgow. We were particularly interested in the construction, because it is the result of the activities of a great firm not unknown in England, Stone & Webster, whose ramifications extend not only through the United States but to most parts of the world in the form of the international corporation.

TEN THOUSAND WORKMEN GET BUSY.

Early in July there lay 3 miles outside San Antonio, Tex., a stretch of ground covered with a difficult kind of scrub or brush. On the 6th of July there appeared an army of between nine and ten thousand workmen of every known nationality, directed by young Americans of the Harvard and Yale type. The 10,000 arrived in every kind of conveyance, in mule carts, farm wagons, horse cabs, motors, and huge motor vans. At the end of the day's work, when the whistle had blown, the scene resembled that of some eccentric, elaborately staged cinematograph film. Together with the army of 10,000 men came many kinds of semiautomatic machinery. The hard concrete roads of the United States are now made by machinery with a thoroughness and permanence which should attract attention in Europe. In this new town outside San Antonio 12 miles of rail, 25 miles of road, 31 miles of water pipes, 30 miles of sewer were accomplished in 45 days.

FROM 1,200 TO 1,500 BUILDINGS.

The scale of wages is as surprising to Europeans as the energy expended. The average wage for all and sundry exceeded $25 a week, carpenters getting $6.50 daily. Nearly all material had to be brought from what appear to us vast distances. As often as not the thermometer stood at 100°, yet the daily photographs taken by the contractors show that progress was continuous, until on August 25 a considerable part of the city was ready for occupation. The strongly and comfortably built huts are all provided with heating arrangements for the winter, and baths, hot and cold, are attached to each building; there are vast stores and office blocks, several post offices, a huge bakery, laundry, stables for 1,300 horses and mules, hospitals, schools; in all, between 1,200 and 1,300 buildings.

And what has been done in Texas was being done simultaneously in 15 other parts of the country.

PROMPTLY CLOSES SALOONS.

Although Long Island is so close to New York and is one of the most fashionable country-house districts in the United States, the site chosen for Yaphank, the great camp on Long Island, gave as much trouble as any other. A forest had to be cut down and the roots blasted out of the soil. Furthermore, the work was hampered by mosquitoes to a degree that will be understood by those who have disturbed virgin soil in new places. They have a prompt, unexpected way of doing things in this country, which is pleasingly refreshing. One morning I read that all saloons within 5 miles of Yaphank had been closed. Nothing more said about it; no discussion preceded the matter; there were no abstruse calculations as to compensation. The United States is at war; saloons are not good for war; close them. That's all there was to it.

POLICE ORDER ENDS PACIFISM.

These are a good-natured but a drastic people. One of their great war accomplishments is the stamping out of sedition. When I first arrived here it was common to see knots of rather bored-looking persons at street corners round a wildly gesticulating man standing on what I believe is known as a soap box. I noticed the number of these orators grew. I stopped one evening to listen to one of them in the negro quarter; he was talking a lot of excitable rubbish. In one part of his discourse he evinced unexpected sympathy for the down-trodden Irish farmer, who is notably, by the way, among the most prosperous of farmers. The American giant paused one day in his war preparations, issued some kind of police order, and there was an end to pacifism. Armed men in special motor cars ended it.

A shrewd British friend of mine who has lived here many years remarked the other day that it took a long time to get Uncle Sam into war, but it may take a much longer time to get him out. Already, after barely five months of preparation, the United States has close upon 1,500,000 soldiers undergoing intensive training for their task. The Regular Army was brought up to its full strength, 300,000, by voluntary enlistment. The National Guard, a State militia, was filled up by the same means until it numbered 500,000. Then came the ballot for conscripts under the conscription act; this gave between 600,000 and 700,000 more.

For the training and upkeep of this force, and for the provision of all that it will require in the field, sums of money have been voted which make one's brain reel. For airplane construction, $640,000,000 has been appropriated. Upon merchant shipbuilding, $1,134,500,000 is to be spent. A naval appropriation of $350,000,000 for the building of destroyers has been commenced. One armor plate and projectile plant at South Charlestown will soak up $22,000,000. In all, the war expenditure of the United States already amounts to well more than $8,000,000 a day and loans to allies account for another $12,000,000 every 24 hours. The war machine gathers momentum as it travels. Its ramifications are bewildering. Scarcely a day passes without some fresh and startling proof of its force.

ACTION LIKE SMASHING BLOW.

The American characteristics in war seem to me to be two: Firstly, what looks like undue deliberation, and, then, before you are ready for it, like a bolt from the blue, a smashing blow. We know so little of the United States in Europe that probably not one reader in a score will understand that the Democrats (radicals) are in office and the Republicans (conservatives) are in opposition. The system so far is rather like our own, but the head of the Nation is a President whose character appears to me to be a mixture of Scottish caution and tenacity, with American unexpectedness.

BANGS DOWN EMBARGO.

Witness the reply to the Pope. Cables from Europe contained mealy-mouthed meanderings from continental newspapers, outlining all kinds of suggested temporizing replies to his holiness. Suddenly came an altogether unexpected bang from the White House at Washington; the whole miasma of pacifism and all the rantings from soap boxes were at an end. My Republican friends, naturally critical of persons and things Democratic, shared the Nation-wide joy in the President's reply.

As with the well-meant papal peace offerings, so with the embargo. Well-meaning European statesmen have too long provided the German armies with materials for making shot and powder and with food through greedy and gain-loving neutrals. The American mind wondered why. I went one day to have a look at an American transport sailing for Europe, in which the soldier boys clustered like bees in swarming time. Incidentally, my guide showed me a great number of neutral ships loading up with grain for Germany. There came another bang from the big gun at Washington. The ships are still here.

I should not be surprised if they eventually helped to carry food to the American Armies in France and to Belgium. I am very certain they will not carry one grain of wheat to Germany. The right of neutrals to prolong the war is not conceded by the United States. The American mothers who are sending their boys to face submarines in the Atlantic and high explosives in the trenches have no sloppy sentiment for Sweden or Spain. They are sorry for Holland, but the motto "America first," though not, perhaps, always suited to an alliance, is undoubtedly a formidable war weapon when put into operation with the drastic suddenness characteristic of American mentality in war time.

INTENSITY OF AMERICA SHOWS IN ITS MIGHTY WAR MACHINE, DECLARES LORD NORTHCLIFFE—VAST ACCOMPLISHMENT IN AIR-SERVICE CAMPAIGN PRAISED BY BRITISH COMMISSIONER, WHO DESCRIBES WONDERFUL PROGRESS MADE BY THE GOVERNMENT IN ENACTING WAR MEASURES—BELIEVES UNITED STATES SYSTEM WILL DEFEAT PRUSSIANS.

[Copyright, 1917, Public Ledger Company.]

PHILADELPHIA, *September 17.*

The second and concluding article by Lord Northcliffe on "The Americans at war," which will appear to-morrow in the Public Ledger, the London Times, and the London Daily Mail, follows:

By Lord Northcliffe.

The Americans, who are becoming almost as critical of themselves as we English have always been of ourselves, often ask whether there is not observable a lack of enthusiasm in the public demeanor toward troops parading or departing. The same criticism has been made continuously in Great Britain in regard to our people and our army. It is quite true that an ordinary baseball game, or an association foot-

ball match at home, is more provocative of cheering and other forms of applause than the parading of troops. Pictures of soldiers departing in the old wars make us believe that they were surrounded by enthusiastic crowds. That does not appear to be the case now in any one of the belligerent countries in which I have been since August, 1914. Even the more excitable Italians go to this war with gravity and sobriety. The only really vociferous acclamation to troops that has come under my notice was in a neutral country whose callous pro-Germanism has made it a byword among nations. A cynical American who watched with me a squadron of cavalry passing at the trot and being vigorously applauded by that neutral crowd remarked, "The last thing these people mean to do is fight."

THOROUGHLY IN EARNEST.

American troops, whose physique is at present much the best in the war, are regarded by their onlookers with interest, affection, and pride. Their mission is far too serious a one for wild hurrahing, such as was heard during our South African and their Spanish War. Summed up in one word, the attitude of the American people and their soldiers seems to me to be earnestness. If any other word be necessary, thoroughness might be added. I have only to mention the wonderful Red Cross fund and the great organization which is behind it to illustrate my thought.

The world has heard in the last few days of the evolution of what is known as U. S. A. or liberty air engine. The story of the development of this practical and now tested motor sums up many of the most marked traits in the American war character. It is the product of enthusiasm put to the right purpose.

BUYS MOTOR CAR FOR $1,000.

There is probably no more highly organized industry in the world than the manufacture of American motor cars. The keen competition that has enabled Americans, rich and poor alike, to have automobiles has been backed by cooperation and standardization among the rival producers, which has intensified simplicity and eliminated waste. It is because of this that I am able to purchase for my own use here an excellent four-seated landaulette for £200 ($1,000), with electric lighting installation and self-starter. I have the choice of a number of types at that price, and even less.

The methods of the motor-car industry, which have given such marvelous results, are being adopted in regard to the air engine. Early in July I was invited to the Bureau of Standards in Washington to see the engine just after it had arrived from Detroit. In a room adjoining the bench on which the motor rested was a machine for reproducing mechanical drawings, or blue prints, by a highly ingenious form of rapid rotary printing. These drawings are being sent in thousands to makers of automobiles and parts of automobiles all over the United States.

ENGINEERS UNITE EFFORTS.

The young men who had accomplished the construction of the engine were the leading designers and engineers of the great competing motor-car and motor-van makers. All trade rivalry had been set apart and they had thrown their united efforts into a magnificent piece of teamwork which will enable the United States to turn out air engines almost as rapidly as Mr. Ford multiplies his wonderful little cars.

It is not pretended that these air engines are of the same quality as the best English or French war models. It was wisely foreseen here that the construction of motors so delicate would demand the training of thousands of skilled hand workers. Time is a vital factor in the situation; therefore it was resolved to produce an engine that can be manufactured in part in a thousand workshops and assembled at certain given points, as is done in Germany with her submarines. It is an engine designed for a certain specific air program, the nature of which the Germans will learn in due course.

Together with the manufacture of the air motor, which has now been tested in long flights at various altitudes, goes on the training in flight of a large number of eager and capable young men. Almost every steamship arriving from Europe brings more and more skilled air teachers from the war zone—French, American, and English. Flying grounds in the United States are being extended continuously. They range now from Camp Borden, in Canada, where young British officers are training American and Canadian fliers, to San Antonio, in Texas. Instruction in flying can continue without ceasing, owing to the choice of so many suitable, because almost windless, climates for the camp installations.

The enthusiastic outpourings of air amateurs and their cries of "100,000 airplanes" have made a good many persons skeptical as to American participation in the air fighting. But behind all that talk is already a vast accomplishment. The solid foundation has been laid of an air service backed by virtually illimitable man power and machine power. Its fruits will be shown as suddenly as came conscription. Movement is going on as rapidly as possible, in view of the thoroughness with which everything is being done. There has been a complete liaison with the air services of France and England. The models of the latest French and English machine are here. While no time has been lost, most careful consideration has been given to a definite plan of campaign.

I wish I could say as much with regard to the speed of American shipbuilding. I have already expressed my opinion, which is shared by many persons here, that so long as the allied Governments hide the truth as to the real nature of the submarine danger the burning enthusiasm which Americans are putting into their air service will be lacking in the American shipyards.

This, however, is the only direction, so far as I have been able to judge, in which more might be done than is being done at present. I arrived in the United States during the second week of June. I have kept a diary of war happenings. Those who take the trouble to read it will find that the pace has been accelerating every week until during the last seven days we have been made acquainted with a series of war measures which would seem to be almost beyond the national power of digestion. Here are the events I have noted down since I landed:

DIARY OF WAR HAPPENINGS.

June 12: Senate approves bill giving the President the power to embargo exports to neutral countries which might find their way to Germany (power which the President has now vigorously used).

June 20: The Federal Trade Commission proposes to the President that the coal problem be solved by the creation of a Government agency to control production and transportation. (Coal controller appointed since.)

June 22: The President signs an Executive order creating an exports council, to direct exports so that they will go first where most needed.

June 26: Coal operators, representing both anthracite and bituminous industries, meet with Government officials at Washington and agree to establish a fixed lower price.

July 7: The Senate passes an amendment to the food bill prohibiting the manufacture and importation of whisky during the war.

July 9: President Wilson issues a proclamation placing the export of specific commodities (coal and fuel oils, flour and meal, meats and fats, iron and steel, arms and ammunition, etc.) under Government control.

July 11: President Wilson issues a proclamation setting forth the guiding principles in price regulation; he especially condemns shipowners for exacting exorbitant freight rates.

July 14: The House passes the bill appropriating $640,000,000 for the construction and operation of a vast fleet of airplanes.

July 24: The Senate Committee on Finance is informed by Secretary of the Treasury McAdoo that $5,000,000,000, in addition to previous estimates, will be required to carry the war to June 30, 1918.

FOOD-CONTROL BILL SIGNED.

August 10: The President signs the food-control bill and appoints Herbert Hoover as Food Administrator.

August 12: Food Administrator Hoover makes public his plans for stabilizing the price of wheat. A fair price for the 1917 harvest to be determined by a committee headed by Harry A. Garfield, president of Williams College.

August 19: New regulations by the Bureau of War-Risk Insurance require merchant ships sailing across the Atlantic to be armed, painted to reduce visibility, provided with smokeless fuel, and equipped with appliances for producing smoke clouds to escape torpedo attack.

August 24: Congress asked to vote $1,134,500,000 for the construction of 1,270 merchant vessels.

August 28: Naval appropriation of $350,000,000 announced for the building of destroyers.

August 29: Decided to develop the internal waterway traffic of the country to relieve the railways and to create huge fleet of lake and river ships.

WHEAT PRICE FIXED.

August 30: The President fixes the price of wheat.

August 31: Two million persons in New York witness the parade of National Guard regiments about to go into training camp.

September 1: Announced that the embargo on food exports will be rigidly enforced and that no neutral country need expect any autumn shipments of wheat.

September 2: Letter of President Wilson published declaring intention "to oppose the organized and dangerous efforts of those who hide disloyalty behind a screen of specious phrases."

September 4: President Wilson marches at the head of the young men of Washington chosen by ballot for the National Army.

FIRST QUOTA GOES TO CAMP.

September 5: First quota of conscription men called up and sent into camps all over the country.

September 6: Congress passed the $11,538,945,000 bond-issue bill.

September 8: Prosecution announced against Socialist leaders on charges of plotting against the country and offending under the espionage act.

September 9: Anticonscription meeting broken up by the police in New York.

September 10: Senate passes war-revenue bill carrying an aggregate tax of $2,406,670,000.

September 11: National supervision of the money market announced in order to make country "panic proof." Arrest reported of the staff of a German-language paper at Philadelphia on charges of treason.

September 12: Mr. McAdoo explains to the Senate defense committee the necessities for the $11,000,000,000 war-credit bill.

September 13: Final successful test of "Liberty air engine" announced.

WILL PULVERIZE PRUSSIANISM.

It is easy to say that many of these things might have been done a couple of years ago, but democracies do not work in that way. Even after the war had begun we in England spent almost two years in discussing whether we should have equality of sacrifice in regard to military service, and Canada was still debating the question until a few days ago. Each nation has to make its war preparations after its own fashion. No nation seems to learn much from any other. The American war machine is being built in the American way. Maybe it will have its faults, but for all that it is the mighty sledge hammer that will pulverize Prussianism. The Americans are getting to war with all the virility and intensity of a very forceful people.

During the delivery of Mr. JAMES'S speech,

The PRESIDING OFFICER (Mr. THOMAS in the chair). The Senator from Kentucky will suspend for a moment. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business.

The SECRETARY. A bill (S. 3752) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes.

After the conclusion of Mr. JAMES'S speech,

RAILROAD CONTROL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3752) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes.

Mr. SMOOT. Mr. President, I understand there are a number of Senators who desire to be present when the Senator from Iowa [Mr. CUMMINS] will take the floor and speak on the pending bill. For that reason I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Beckham	Fernald	Henderson	King
Borah	France	James	Knox
Chamberlain	Gallinger	Johnson, Cal.	Lewis
Cummins	Gronna	Jones, N. Mex.	Lodge
Curtis	Hale	Jones, Wash.	McCumber
Dillingham	Hardwick	Kellogg	McKellar

McNary	Pittman	Smith, Ga.	Tillman
Myers	Poindexter	Smith, Mich.	Trammell
Nelson	Pomerene	Smith, S. C.	Vardaman
New	Ransdell	Smoot	Watson
Norris	Robinson	Sutherland	Williams
Nugent	Shafroth	Swanson	Wolcott
Overman	Sheppard	Thomas	
Page	Simmons	Thompson	

The PRESIDING OFFICER (Mr. MYERS in the chair). Fifty-four Senators have answered to their names. A quorum of the Senate is present.

Mr. CUMMINS addressed the Senate. After having spoken, with interruptions, for about two hours,

Mr. TOWNSEND. Mr. President——

Mr. CUMMINS. I desire to say a word in response to the Senator from South Carolina [Mr. SMITH].

Mr. TOWNSEND. I was just going to suggest that I take it the Senator from Iowa is not going to finish his speech to-night, and as he has been talking a long while, and evidently is somewhat weary, we might take an adjournment now. It is approaching the hour of 5.

Mr. STONE. Mr. President——

The PRESIDING OFFICER (Mr. STERLING in the chair). Does the Senator from Iowa yield to the Senator from Missouri?

Mr. CUMMINS. I do.

Mr. STONE. It is, of course, a matter subject to the pleasure of the Senator from Iowa, but if he is about to close for the day I should like to have an executive session instead of an adjournment. Will that be agreeable to the Senator from Iowa at this point?

Mr. CUMMINS. Oh, yes.

WAR TRADE BOARD (H. DOC. NO. 934).

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying paper, referred to the Committee on Commerce and ordered to be printed.

To the Senate and House of Representatives:

As required by the provisions of section 6 of the "Trading with the Enemy Act," approved October 6, 1917, I transmit herewith reports of the Bureaus of Enemy Trade and of Imports, showing the proceedings had by the War Trade Board during the year ending December 31, 1917.

WOODROW WILSON.

THE WHITE HOUSE, *14 February, 1918.*

EXECUTIVE SESSION.

Mr. STONE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 4 o'clock and 45 minutes p. m.) the Senate adjourned until to-morrow, Friday, February 15, 1918, at 12 o'clock meridian.

NOMINATIONS.

Executive communications received by the Senate February 14, 1918.

CALIFORNIA DÉBRIS COMMISSION.

Col. Charles L. Potter, Corps of Engineers, for appointment as a member of the California Débris Commission provided for by the act of Congress approved March 1, 1893, entitled "An act to create the California Débris Commission and regulate hydraulic mining in the State of California," vice Lieut. Col. Richard Park, Engineers, National Army.

REGISTERS OF THE LAND OFFICE.

Christopher C. Davidson, of Springfield, Mo., to be register of the land office at Springfield, Mo., vice John H. Bowen, term expired and resigned.

APPOINTMENTS IN THE NAVY.

Medical Director William C. Braisted to be Surgeon General and Chief of the Bureau of Medicine and Surgery in the Department of the Navy, with the rank of rear admiral, for a term of four years, from the 11th day of February, 1918.

Brig. Gen. George Barnett to be major general commandant of the Marine Corps for a period of four years from the 25th day of February, 1918.

CONFIRMATIONS.

Executive nominations confirmed by the Senate February 14, 1918.

ASSISTANT SECRETARY OF WAR.

Benedict Crowell to be Assistant Secretary of War.

AUDITOR INTERIOR DEPARTMENT.

David C. Reay to be Auditor for the Interior Department.

AIRCRAFT BOARD.

Howard E. Coffin to be chairman of the Aircraft Board.
Richard Howe to be a member of the Aircraft Board.

PUBLIC HEALTH SERVICE.

Asst. Surg. Walter Matthew Jones to be passed assistant surgeon.

Asst. Surg. William Howard Slaughter to be passed assistant surgeon.

Asst. Surg. James Gayley Townsend to be passed assistant surgeon.

POSTMASTERS.

ILLINOIS.

Frederic A. Perkins, Canton.

KENTUCKY.

J. B. Cray, Millersburg.
Cora Singleton, Waynesburg.

NEBRASKA.

Anton J. Ruyicka, Belgrade.
Charles P. Davis, Bladen.
D. A. Berkey, Davenport.
C. G. Fritz, Hooper.
J. E. Scott, Osmond.
Charles H. Mohr, Plainview.

NEW YORK.

Ira Baker, Amagansett.

RHODE ISLAND.

S. Martin Rose, Block Island.
Charles J. Baron, Centerdale.
George W. Jenckes, Slatersville.
Reuben A. Gibbs, West Barrington.

HOUSE OF REPRESENTATIVES.

THURSDAY, *February 14, 1918.*

The House met at 12 o'clock noon.

Rev. William Camden, of Washington, D. C., offered the following prayer:

Lord God Almighty, with all reverence we pray; down with autocracy and all special class privilege—all the world's Hohenzollerns and junkers; and long live our American Republic and all other democracies and the growing power of the people's will throughout the world. Save us from mere futile theorizing; but under the sense of Thy universal Fatherhood may we approximate and finally realize the universal brotherhood of man.

To this end cooperate with us in our public work to-day. In the name of Jesus of Nazareth, amen.

The Journal of the proceedings of yesterday was read and approved.

TAXES ON CERTAIN INCOMES, DISTRICT OF COLUMBIA.

Mr. JOHNSON of Kentucky. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the purpose of considering a bill (H. R. 9248) the title of which is "A bill to prevent extortion, to impose taxes on certain incomes in the District of Columbia, and for other purposes"; and pending that motion I would like to come to some agreement with the gentleman from Massachusetts [Mr. TINKHAM] as to some reasonable limit on general debate.

The SPEAKER. The gentleman from Massachusetts is recognized.

Mr. TINKHAM. Mr. Speaker, I would like to ask the honorable Representative from Kentucky what he thinks a reasonable time would be?

Mr. JOHNSON of Kentucky. I would like about an hour and a half on this side.

Mr. TINKHAM. I should think two hours here would be sufficient.

Mr. JOHNSON of Kentucky. The gentleman, I think, ought to be willing for an hour and a half on a side.

Mr. GILLETT. Do you expect to divide the time with the men on this side who are favorable to the bill?

Mr. JOHNSON of Kentucky. Yes; I expect to. I expect to spend a portion of the time myself in explaining the bill, and after I have done that and answered such questions as I am able to answer I will yield to anybody, and especially to gentlemen on that side who are in favor of the bill.

Mr. GILLETT. One gentleman on this side, I understand, is in a judicial attitude, partly for and partly against the bill, and he would like to have 30 minutes.

Mr. JOHNSON of Kentucky. That is the gentleman from Michigan [Mr. MAPES]?

Mr. GILLETT. Yes.

Mr. JOHNSON of Kentucky. I would suggest that I have an hour and a half, and the gentleman from Massachusetts [Mr. TINKHAM] an hour and a half, and the gentleman from Michigan [Mr. MAPES] half an hour.

Mr. MAPES. Mr. Speaker, reserving the right to object, as the gentleman from Kentucky and the gentleman from Massachusetts will recall, this bill was discussed very little in committee, on the theory that we would have a chance to discuss and debate the bill on the floor of the House. It is one of the most important bills, so far as the District of Columbia is concerned, that has been presented to the House in many moons. I know of several Members who have expressed a desire to discuss it. It does not seem to me that that is going to give any time commensurate with the importance of the measure.

Mr. JOHNSON of Kentucky. The general debate would lead us up to nearly 4 o'clock under the proposed arrangement.

Mr. GILLETT. The time to which it will lead, it seems to me, ought not to determine the reasonable amount of debate on it. I think we ought to debate it reasonably.

Mr. JOHNSON of Kentucky. I am quite sure of that.

Mr. GILLETT. We do not want to waste time, of course.

Mr. JOHNSON of Kentucky. In determining the time for general debate, we must recognize the fact that we have only to-day.

Mr. GILLETT. Does the agreement give us only to-day?

Mr. JOHNSON of Kentucky. That is my understanding of it, that we have only to-day.

Mr. STAFFORD. Of course, if the bill is not finished to-day the gentleman will have the privilege of bringing it up on next District day.

Mr. JOHNSON of Kentucky. Yes; I will have the privilege of bringing it up on the next District day.

The SPEAKER. What is the gentleman's proposition?

Mr. JOHNSON of Kentucky. I propose that I have an hour and a half and that the gentleman from Massachusetts [Mr. TINKHAM] may have an hour and a half, and the gentleman from Michigan [Mr. MAPES] half an hour.

Mr. GILLETT. The gentleman from Massachusetts says he would rather have two hours, and then he will accommodate the gentleman from Michigan. He would rather have it that way.

The SPEAKER. The gentleman from Kentucky, pending the motion that the House resolve itself into Committee of the Whole House on the state of the Union, asks unanimous consent that the debate be limited to three hours and a half.

Mr. JOHNSON of Kentucky. I will ask the gentleman from Michigan that if he himself does not use the 30 minutes provided for him he would let me have part of it instead of letting the gentleman from Massachusetts have it all.

Mr. MAPES. So far as I am concerned, I would be very glad to.

The SPEAKER. Now, what is the gentleman's request?

Mr. JOHNSON of Kentucky. That I have control of one hour and a half of the time, and that the gentleman from Massachusetts control two hours of the time, but that he give the gentleman from Michigan [Mr. MAPES] half an hour, and if the gentleman from Michigan does not use that entire half hour he divide it equally between the gentleman from Massachusetts and myself.

The SPEAKER. The gentleman from Kentucky asks unanimous consent that the debate be limited to three hours and a half; that he shall control one hour and a half and the gentleman from Massachusetts two hours, and out of that two hours the gentleman from Massachusetts will yield 30 minutes to the gentleman from Michigan [Mr. MAPES], who will have the right to parcel it out to suit himself, and if he does not use it all up he will divide the remnant equally between the gentleman from Massachusetts and the gentleman from Kentucky. Is there objection?

Mr. RUCKER. Mr. Speaker, reserving the right to object—and I do not want to object—I would like to prefer a unanimous-consent request.

The SPEAKER. On this subject?

Mr. RUCKER. No; to put in the RECORD a resolution of a bank in my district declaring that from this time to the end of the war it will pay interest on deposits on monthly balance to the Red Cross, and pay all dividends accruing to the bank to the Red Cross without declaring to the stockholders anything of the proceeds.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The SPEAKER. The question is on agreeing to the motion to go into the Committee of the Whole House on the state of the Union.

The motion was agreed to.

The SPEAKER. The gentleman from Missouri [Mr. RUCKER] will take the chair.

Mr. MASON. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Illinois rise?

Mr. MASON. I rise on the question of a lack of a quorum. I make the point of no quorum.

The SPEAKER. The gentleman from Illinois makes the point of no quorum. The House has already gone into Committee of the Whole.

Mr. MASON. It has not gone yet.

Mr. GARRETT of Tennessee. The Speaker had called the Chairman to the chair.

The SPEAKER. That is what the Chair was deciding. The gentleman from Illinois can raise the point of no quorum in the committee. Of course there is a difference in the number required to make a quorum, but the Chair can not help that.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 9248) to prevent extortion, to impose taxes upon certain incomes in the District of Columbia, and for other purposes, with Mr. RUCKER in the chair.

Mr. MASON. Mr. Chairman, I make the point of order that there is no quorum present

Mr. JOHNSON of Kentucky. Mr. Chairman, pending that, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Illinois makes the point of no quorum present. The Chair will count. [After counting.] Eighty-nine Members present—not a quorum.

Mr. HAMLIN. Mr. Chairman, I call for tellers on that.

Mr. WALSH. Mr. Chairman, I rise to a point of order.

The CHAIRMAN. What is the gentleman's point of order?

Mr. WALSH. That the Chair has decided that there is not a quorum present and can not use tellers to ascertain that fact.

Mr. HAMLIN. We can have tellers to determine whether there is a quorum present.

The CHAIRMAN. There is not a quorum present. The Clerk will call the roll. The Doorkeeper will lock the doors. The Sergeant at Arms will notify absentees.

The Clerk proceeded to call the roll, when the following Members failed to answer to their names:

Ashbrook	Francis	LaGuardia	Platt
Austin	Gandy	Lesher	Porter
Barnhart	Garland	Lever	Riordan
Beakes	Glass	Lundeen	Rodenberg
Bell	Godwin, N. C.	Lunn	Rowland
Cantrill	Goodall	McCormick	Sanders, Ind.
Capstick	Gray, Ala.	McLaughlin, Mich.	Sanders, La.
Connally, Tex.	Gray, N. J.	McLaughlin, Pa.	Scott, Pa.
Crosser	Harrison, Miss.	Maher	Scully
Curry, Cal.	Hastings	Miller, Minn.	Shouse
Davidson	Heintz	Montague	Snyder
Dent	Hollingsworth	Mudd	Sterling, Ill.
Drukker	Hood	Neely	Sullivan
Dunn	Humphreys	Nicholls, S. C.	Taylor, Colo.
Dyer	Hutchinson	Nichols, Mich.	Vare
Edmonds	Johnson, S. Dak.	Olney	Ward
Fairchild, G. W.	Kahn	Osborne	Wilson, La.
Flynn	Kehoe	Padgett	Winslow
Foss	Key, Ohio	Phelan	Zihlman

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. RUCKER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having under consideration the bill H. R. 9248 found itself without a quorum; whereupon he caused the roll to be called, when 350 Members answered to their names, and he reported the names of the absentees, to be printed in the Journal.

The committee resumed its session.

The CHAIRMAN. The gentleman from Kentucky [Mr. JOHNSON] asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

Mr. STAFFORD. Mr. Chairman, reserving the right to object, I believe this bill has been so recently reported, and so few Members have had an opportunity of knowing its provisions, it would be better to have the bill read.

Mr. JOHNSON of Kentucky. I suggest that every gentleman will have a chance to read the bill while I am talking.

Mr. STAFFORD. They all want to pay attention to the gentleman when he speaks.

The CHAIRMAN. The Clerk will report the bill.

The bill was read, as follows:

Be it enacted, etc., That the term "real estate" as herein used shall be construed to include lands, buildings, parts of buildings, houses, dwellings, apartments, rooms, suites of rooms and every other improvement or structure whatsoever on land situated and being in the District of Columbia.

The word "person" when used in this act shall be construed to include individuals, partnerships, joint-stock companies, associations, corporations, societies or bodies corporate.

Any word in this act importing the masculine gender shall be construed to extend and be applicable to females or artificial persons or bodies.

The terms "income from real estate" as herein used shall be construed to include all amounts received for the daily, weekly, monthly, or yearly use or occupancy of real estate or for any part of any of such periods of time.

SEC. 2. That, in addition to other taxes imposed by law, there is hereby levied and shall be assessed, collected, and paid to the District of Columbia an annual tax of 100 per cent upon so much of the income from real estate of every person, whether resident or nonresident of said District, received from and after December 31, 1916, as exceeds the deductions herein allowed. For the purpose of ascertaining the amount of income subject to said tax, there shall be deducted from the gross income reported as herein provided so much thereof as equals the average amount charged for the use and occupancy of the same property for the same or a corresponding number of days, weeks, months, year or 18 months, or for any part of any of such periods of time, in, of, or during the 18 months immediately preceding September 30, 1916, plus 10 per cent thereof additional, except in cases where the property was rented or leased "furnished" during the period before September 30, 1916, entering into the computation, and is rented "unfurnished" during the taxable period, in which cases the said additional deduction shall not be allowed.

If no such income was charged or received during said period of 18 months, then the deduction from such gross income shall be an amount equal to 10 per cent of the value of the property producing the income including furniture, if any, as determined by the assessor of the District of Columbia.

In cases where the property was rented "unfurnished" for the period before September 30, 1916, used in the said computation, and is rented "furnished" during the taxable period, then the additional deduction from such gross income shall be increased to 15 per cent.

If the real estate producing the income has been materially improved since September 30, 1916, there shall be an additional deduction from such gross income of an amount equal to 10 per cent of the actual cost of such improvements: *Provided*, That no such deduction shall be allowed for the cost of repairs made necessary or desirable by the ordinary wear and tear of rented or leased property.

No other exemption or deduction from such gross income shall be allowed. It is the intent and purpose of this act to tax at the rate herein fixed so much of every income from real estate as exceeds the deductions specifically authorized by this section.

SEC. 3. That, on or before the 10th of July, 1918, a true and accurate return under oath shall be made by each "person" subject to said tax, or his authorized agent, to the assessor of the District of Columbia, setting forth specifically the gross amount of such income from all separate sources accrued during the period from December 31, 1916, to June 30, 1918, and the deductions to which he may be entitled under this act; and the said taxes thereon, computed as provided in section 2, shall become due and collectible on or before September 1, 1918. And on or before the 10th of August, 1918, and of each and every month thereafter a true and accurate return under oath shall be made by each "person" subject to said tax, or by "his" authorized agent, to the said assessor, setting forth specifically the gross amount of such income from all separate sources accrued during the next preceding month, together with a statement of such deductions. If any person subject to said tax fails to make any such return at the time herein fixed, or makes, willfully or otherwise, a false or fraudulent return the assessor of the District of Columbia shall make the return from his own knowledge or from such information as he can obtain through testimony or by any other means; and the return so made shall be sufficient for all purposes of this act. To the amount of the tax due upon all returns so made by the assessor there shall be added a penalty of 50 per cent of the tax; but when it shall appear that the failure to file the return or the making of a false return was due to an unavoidable or excusable cause the said penalty may be abated by the Commissioners of the District of Columbia. It shall be the duty of said commissioners to prepare and furnish to each taxpayer making application therefor printed forms on which such returns shall be made. The said tax and all penalties thereon shall constitute a superior lien on the "real estate" from which the income has been derived, and shall be assessed and collected by the same officers, at the same time, except as herein otherwise provided, and by similar proceedings as other taxes on real and personal property in said District.

SEC. 4. That if any person or agent subject to said tax fails to file his return as and when herein required, or offers to file a return which, in the opinion of said assessor, is erroneous, false, or fraudulent, the said assessor shall be empowered to examine the books, papers, and accounts of such person and to summon him or any other person having possession, custody or care of books, papers, and accounts relating to the business or income of such person, or the lessee, or any other person, to appear before him and produce such books, papers, and accounts at a time and place named in the summons, and to give testimony and to answer interrogatories under oath respecting any subject relating to the said income or the return thereof.

SEC. 5. That all leases, contracts, and agreements, expressed or implied, providing for the payment of any larger amount of money, or at a higher rate, than that fixed by the deductions herein allowed, for the use or occupancy of any "real estate," are hereby declared to be contrary to public policy and unenforcible; and any person who shall hereafter pay for the use or occupancy of any "real estate" any amount of money, or at a rate exceeding that fixed by such deductions, may sue therefor in the municipal court or in the Supreme Court of the District of Columbia, without regard to the amount in controversy, and in such action shall be entitled to recover of the person receiving such excess, or his agent in the transaction, double the amount thereof and the costs of suit, including a reasonable attorney's fee of not less than $50; but no such action shall be instituted more than five years after the termination of the lease or other agreement under which such payments were made.

SEC. 6. That the provisions of this act shall not apply to any income from real estate, the amount of which was fixed by lease, contract, or agreement made before October 1, 1916, and which was not subsequently increased except as stipulated in such lease, contract, or agreement.

SEC. 7. That the Commissioners of the District of Columbia are hereby authorized and directed to make all reasonable and needed rules and regulations for the enforcement of this act.

SEC. 8. That this act shall remain in force until one year after a treaty of peace between the Imperial German Government and the Government of the United States of America shall have been concluded.

The CHAIRMAN. The gentleman from Kentucky [Mr. JOHNSON] has one hour and a half.

Mr. JOHNSON of Kentucky. Mr. Chairman, I believe that this is one of the many very important bills before Congress. Here, at the Capital of the Nation, a condition exists which, I believe, does not exist anywhere else in all the civilized world. I do not believe, however, that it will be necessary for me upon this occasion to be compelled to show to the House that extortion in its most infamous form is being practiced to an extent never practiced anywhere before, because I believe that the membership know of this condition without my telling them of it. However, I will devote at least a small portion of the time allotted to me for the purpose of inviting attention to some particular instances of extortion. I have in my hand a letter dated February 11, 1918, from an Army officer at present located in the District. Before I read the letter, however, it might be best for me to say that opposition to the passage of this bill to stop rent profiteering comes from three sources:

First, from some gentlemen upon the floor of this House who, I am sorry to say, seem willing that it should continue.

Another source of opposition is the real estate men of the city. I can understand their opposition, particularly when I know that they and their clients are the profiteers.

Another source of opposition is the Evening Star, which since I have been in Congress has been the apologist for many things that are absolutely wrong. In former instances where the interests of the Government clerks were at stake, this paper has

defended the Government clerks. For that I praise it. But in this instance the Washington Star is confronted by a double question—the Government clerks upon one side, to whom it wishes to sell its papers, and the real estate men upon the other side, from whom it receives hundreds of thousands of dollars every year in the way of pay for advertisements.

In taking its choice between the Government clerks whose pennies it takes for subscriptions and the real estate people who contribute thousands to the maintenance of the paper, they forget the Government clerks and go to that side of the question which furnishes the largest revenue. This paper, as every one of you knows, during the last few days has taken the position, indirectly at least, that this profiteering should not be interfered with; and when it takes that position it means that the profiteering must come from the Government clerks and those who pay their pennies to support the paper; and that those who furnish it hundreds of thousands of dollars in the way of advertisements shall go untouched.

Now I will read a letter, as I said, from an Army officer. It is addressed to the editor of the Evening Star, and says:

DEAR SIR: There has been a great deal of editorial comment in your paper lately concerning the pending House bill to punish extortion in the District—very little news or comment on the bill itself. If the Star is a newspaper, why not give as much publicity to the bill as you do to attacks on it, or on the Government's prosecution of the war?

There is one gem of humor in your editorial of Friday evening, February 8, which deserves a place among the classics with Josh Billings's and Joe Miller's best; it is: "Wealthy newcomers are competing with one another in the tender of tempting rental offers," etc.

Poor Washingtonians, tempted beyond their power of resistance; but how about the newcomers who are not wealthy, who are poorer by 50 to 80 per cent than we were before we came to help, who have walked the streets in vain for weeks to find a few small rooms for less than $100 a month?

Look at the tempting (?) offers made by the new landlords in your own paper, then find out the original rent, and push down this veil of hypocrisy and try to help cure a very real evil which anyone who has eyes can see.

The Government asks for new landlords, as it asks for new soldiers, to make a sacrifice, not a fortune.

Yours, truly, ——— ———.

Mr. ALEXANDER. Did the Evening Star publish that letter?

Mr. JOHNSON of Kentucky. I looked in the Star and did not find it.

Mr. Chairman, last night I took a Washington Star of yesterday and looked over a few of the rent advertisements. Under the head of "Furnished rooms for rent" I found 107 advertisements. Out of these 107 advertisements only 17 gave the price at which the room was to be rented. What does that mean? That means that they were ashamed or afraid in the face of this Congress to publish the exorbitant rates that they intend to demand of those who have come here to help win the war.

Under the head of "Rooms wanted" there were 28. Why do these 28 people who have come to Washington to do their bit have to advertise for rooms when 107 rooms are right here before their faces advertised for rent? The answer is, that the prices are too high; that they are not able to pay them, and consequently they themselves put advertisements in the same paper, seeking quarters within the reach of their poor purses.

In yesterday's Star, under the head of "Furnished rooms," 14 apartments were advertised, and out of those only 5 have the audacity to state the prices. But that is not all. In the same paper 16 people advertised for rooms or apartments right by the side of these 14 apartments which were advertised for rent. Is it not reasonable to suppose that these people who are advertising for apartments have gone to see the advertised apartments, but could not get them because the price was beyond their reach? We have a concrete case where the secretary of the gentleman from Ohio [Mr. GORDON] tried to get a room, and one of the principal real estate agencies in town would not let him go and look at a room until he deposited $35. When he went and looked at it he found that he could not live in it, and this scoundrel refused to give him back the $35 or any part of it. If rumors be true and I hope they are, as a result of a grand jury investigation, the United States marshal in a few days will wait upon this particular gentleman. [Applause.]

Rents in Washington are well known to all. I see in the Star here that there is a good chance for a Government clerk on a $900 salary to get three rooms in Massachusetts Avenue at $300 a month. I see another place where he can get two rooms—a small room and a kitchenette, for $80 a month. Here is another place on Connecticut Avenue where he can get two rooms for $200 a month. Here is another place, an apartment of two or three bedrooms, from February 20 to June 15, at $300 a month.

Mr. SMITH of Idaho. Has the gentleman any information what these apartments rented for a year ago?

Mr. JOHNSON of Kentucky. I have not. I did not see these advertisements until last night. Here is another apartment, furnished, for $125 a month; another at $160; another at $250; another at $300; another at $250; another at $250; another at $250; another at $150; and a very modest apartment, within the reach of every Government clerk, at $2,000.

Mr. WINGO. What is the gentleman reading from?

Mr. JOHNSON of Kentucky. From the Washington Evening Star.

Mr. TAYLOR of Arkansas. Do these prices include board?

Mr. JOHNSON of Kentucky. No; simply the rent of the rooms or apartments. I have in my hand a clipping handed me by the secretary of the gentleman from Ohio, Mr. GORDON, in which rooms are advertised for rent in the city of Cleveland, a city of 800,000 inhabitants.

Here is a furnished flat for $40 a month. Here is one at Forestdale, three rooms and a bath, first floor, furnished, $25 a month; another, five rooms and bath, completely furnished, with a piano, $35 a month. These are houses, not rooms. Here is another house of five rooms and a bath for $25. Another place, six rooms and a bath, furnished, $30 a month.

Mr. MOORE of Pennsylvania. In what city are these lower rents?

Mr. JOHNSON of Kentucky. Cleveland, Ohio.

Mr. MOORE of Pennsylvania. Does not the gentleman think it is worth the difference to live in Washington? [Laughter.]

Mr. JOHNSON of Kentucky. If the gentleman had said Philadelphia instead of Washington, I might have agreed with him.

Mr. SMITH of Michigan. Rockefeller lives in Cleveland, does he not?

Mr. JOHNSON of Kentucky. I believe it is difficult to determine just where Mr. Rockefeller does live. Here is another house, of seven rooms, at $40; another adjacent to Edgewater Park, eight rooms, two baths, large porch, and sun porch, $85. Another six-room house, with a furnace and garage and garden, $18 a month. Here is another of eight rooms, well furnished, for $45 a month. Here is another, an apartment, for $20 per month. That illustrates, in short order at least, the difference in rent between this city and the city of Cleveland.

Mr. TINKHAM. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. TINKHAM. I desire to ask the honorable Representative from Kentucky if he does not believe there are places, apartments, and rooms that can be obtained in Washington of a different sort than the advertisements in the Star show, of the same kind that the advertisements or the newspaper articles show can be had in Cleveland, and for the same price?

Mr. JOHNSON of Kentucky. I do not.

SEVERAL MEMBERS. No! No! No!

Mr. TINKHAM. Does he not think there are apartments and rooms that can be had for $45 a month in Washington?

Mr. JOHNSON of Kentucky. I have seen some advertisements recently in the Washington newspapers to that effect, and I have talked with people who have gone to see them, and without exception every one of them has told me that when he got to the place where the room was advertised he found that the price had been raised. I have a letter here with me, which I do not find for the moment, which tells of this instance. Two Government clerks in Washington were renting a house at $75 a month. Others came on, and three others, making five all told, saw an advertisement of a house for $250 a month, furnished. They concluded they would rather go to this house at $250 a month and all five families go into it—whether they had families or not I do not know—but all five of these clerks at least, and divide the rent. When they went to see the house which was advertised in the newspaper at $250 per month, what did the woman tell them? She told them that she had raised her price from $250 a month to $1,000 a month, or $8,000 for eight months. I have that statement in writing with me, signed.

Mr. BENJAMIN L. FAIRCHILD. Possibly she did not like their appearance.

Mr. JOHNSON of Kentucky. It was their pocketbooks that she did not like, else she would have closed the deal with them at $250 a month. This letter further states that the combined salaries of the five men did not amount to $1,000 a month.

Mr. SMITH of Michigan. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. SMITH of Michigan. Can the gentleman tell how many vacant houses there are in the city of Washington that are for rent?

Mr. JOHNSON of Kentucky. No; I can not; but I believe from what I have gathered that most of those that are for rent are beyond the reach of the pocket of the man who is brought here to do his bit in this war.

Mr. SMITH of Michigan. Every paper carries a list, does it not?

Mr. JOHNSON of Kentucky. I just read a long list.

Mr. MOORE of Pennsylvania. It is patent that a clerk who earns $1,200 a year or thereabouts can not pay $1,000 a month rent for an apartment.

Mr. JOHNSON of Kentucky. But these people would have him pay it.

Mr. MOORE of Pennsylvania. To whom does the gentleman think these apartments are rented at these large figures?

Mr. JOHNSON of Kentucky. I can tell of one instance where a man found himself in a $75 a month house, with a sick wife and a sick child. He was getting $2,400 a year. The rent was raised on him from $75 a month, if my memory serves me correctly, to $250 a month. He could not go out with a sick wife and child into the snow and the storm, and he went beyond his salary and into his savings and paid it, and for this month the same man is asked $350 for the same premises.

Mr. MOORE of Pennsylvania. That is unfortunate and reprehensible.

Mr. JOHNSON of Kentucky. And by this bill I am after the reprehensible part of it.

Mr. MOORE of Pennsylvania. Is it not a fact that a great many men have been invited to come to Washington, men of wealth, some of them, to work for a very little compensation, who can afford to pay these large rents for apartments and houses, and is it not due to the fact that they are ready to pay these prices that the people of Washington that have property to rent have gotten on to the fact that they can get them?

Mr. JOHNSON of Kentucky. Something of that is true. I heard of an instance—in fact, a real estate broker told me—where a man here had a house worth about $35,000, and a man offered him $16,000 a year rent if he would get out and surrender it to him. I have no more sympathy for the one than I have for the other.

Mr. MOORE of Pennsylvania. I wonder whether the man who owns the property can be held under the gentleman's bill for asking any price he sees fit for his property.

Mr. JOHNSON of Kentucky. I do not care what he asks, but if this bill passes it will stop the practice of profiteering in the District of Columbia. [Applause.]

Mr. MOORE of Pennsylvania. The question with me is whether some responsibility does not rest with the man who is willing to pay these exorbitant prices, and who thus contributes to the general increase in rates all over the District.

Mr. JOHNSON of Kentucky. I think he is culpable, also.

Mr. FOCHT. Mr. Chairman, will the gentleman yield?

I would like to ask this in connection with the articles read from the newspaper, whether the responsibility rests with the owner of the property or with a speculator who is readvertising these places for rent?

Mr. JOHNSON of Kentucky. I shall come to that presently.

Mr. FOCHT. I wish the gentleman would. I know of instances where apartments have rented for $30 and sublet for $125. I think we should get at the right person.

Mr. JOHNSON of Kentucky. I shall come to that later on. Among the many letters that I have received is one from a gentleman complaining of an extortionate raise in his rent. He is in the life insurance business here in Washington, and he hails from the city of the gentleman from Massachusetts, Boston.

Here is a complaint which has reached me, of Mrs. M. E. Parkins, who lives on Euclid Street. She has a landlord by the name of Saunders, and she has been paying $50 a month rent, and he has raised her rent to $100 a month and has been to see her and urged her to sublet the property at $200 a month, saying that he was doing some of that sort of renting. Here is an extravagant, outrageous thing. In looking over the letter hastily, without reading it all, I find a complaint from Massachusetts Avenue, that the landlady has 93 people, some girls sleeping three in a room, and charges $37.50 each, and the letter says:

> I think somewhere there are only one or two in a room.
> The $37.50 includes board, and that is high, including the number of people who are forced into one room. This same woman has the Kaiser's picture in her bedroom, and that is going some.

I have here another communication, where the writer says that his rent has been increased 450 per cent. Here is another, whose rent has been increased from $35 to $40. Here is another, where the rent has been raised from $15 to $40. And here is a letter from a man who says that he has four sons who have gone to the front, and his rent has been raised about 100 per cent. He says in his letter that he and his family, to the fullest extent that they can do so, have been buying the smaller denominations of liberty bonds and the war stamps, and that he prefers to give whatever money he has to spare to that good cause rather than to the profiteering landlords of the District of Columbia. [Applause.] Here is an instance where more rent is paid for one room in a house than the landlord pays for the whole house. Here is another instance of an increase of 100 per cent, and here is one where the rent has been increased from $50.50 to $75. Right there, why the 50 cents? I have asked that question, and they tell me it is to cover water rent. And I see they raised one poor widow's rent from $51.33 a month to $100.

I asked her what the $1.33 a month was for, and she said: "That is to pay the water rent." I said, "What does your water rent amount to?" She said she did not know. I then wrote a letter to the Commissioners of the District of Columbia and asked them what the water rent was for premises 1207 First Street NE., or NW., I am not sure which, and they wrote me that the basis of the water rent was $4.50 a year, but that excess water had been used and for one year they had charged these premises $9 and something a year and another year $7 and something, and for another year $7 and something. I asked for the next preceding three years, and found that poor woman had been compelled to pay $16 a year water rent, when her landlord was paying only $7 and $9 for that service. That much money was being stolen from this woman, and I would be glad to see a grand jury get hold of that case and somebody punished. [Applause.]

Here is a communication which says Mr. Gill was paying $43.50 per month, and they put the 50 cents on; the lease expires October 1, 1918, and he was not allowed to sublet his apartment; his wife died and he surrendered the lease to the real estate agents, Shannon & Luchs. Mrs. Peters called on the real estate agent and was told the rental would be $150 a month.

Here is a communication from a man who complains of his rent having been raised on his storehouse something like 50 per cent, and he asks the very pertinent question why it is that Congress permits his landlord to increase the rent upon him when the law forbids him increasing the price of the foodstuffs which he must sell from this storehouse. [Applause.]

Here is a communication from another whose rent has been raised three times in the last nine months; and from another who has been raised 100 per cent; and here is another, and I have indorsed on the back of the envelope that while his sons are in the service the rent has been extortionately increased. Here is another case of a raise of 150 per cent.

Mr. SLOAN. Will the gentleman yield at that point?

Mr. JOHNSON of Kentucky. I will.

Mr. SLOAN. I am very much interested in what the gentleman is saying, and I would like to ask him, Is it not a fact that the owners of these properties contribute to the District of Columbia only one-half of taxation for the support and protection of their property. Is not that the rule?

Mr. JOHNSON of Kentucky. The people of the gentleman's State and mine, and of every other Member of this body, bear their own tax, and then, in addition, pay half of the expenses of the District government.

Mr. SLOAN. One other question. Has the gentleman any figures—I think they would be very interesting—to compare the valuation fixed by the taxing authorities on these various properties with these rental amounts? I think the gentleman will find that the rentals now being charged on a good deal of this property for a year or so are more than the valuation on these properties fixed for assessment purposes. Is not that the fact?

Mr. JOHNSON of Kentucky. I have not gone over those figures, but I fear the gentleman is correct.

Mr. SLOAN. I would like for the gentleman to look into that.

Mr. MEEKER. Will the gentleman yield for a question before he goes beyond the point brought out by the gentleman from Nebraska calling attention to the fact that property owners pay half the taxes and the Government the other half—that is considered a fair deal——

Mr. JOHNSON of Kentucky. I do not think so.

Mr. MEEKER. The Government certainly occupies enough territory here at the present time that it should bear the burden.

Mr. JOHNSON of Kentucky. We are getting into a question now that is entirely foreign to the subject under discussion; but I do not believe the gentleman is at all familiar with the extent to which the Government owns property in the District of Columbia.

Mr. BURNETT. Will the gentleman yield?

Mr. JOHNSON of Kentucky. I will.

Mr. BURNETT. Does the bill of the gentleman provide for the extortionate increases by hotel people?

Mr. JOHNSON of Kentucky. It does, and I will come to that later.

Mr. BURNETT. And may I ask the gentleman, does the bill provide for a case of this kind, where a hotel man permits an elevator to remain out of commission for a week or 10 days and

guests have to walk up and down the stairway for that length of time?

Mr. JOHNSON of Kentucky. No; it does not.

Mr. BURNETT. I call the gentleman's attention to the fact that I have a "feeling" knowledge of a case of that kind. [Laughter.]

Mr. GREENE of Vermont. If the gentleman will permit, I would like to call his attention to the fact that a great many hundreds of Army officers have been ordered by the War Department to come to this city for duty. They do not come here from choice. And finding that there are no quarters such as are usually provided by the Government for such officers, they have been obliged to pay these rents; and so they, too, have been imposed on outrageously when they come here to serve their country in time of war.

Mr. JOHNSON of Kentucky. In answer to that I will say to the gentleman that only a few days ago the Comptroller of the Currency called me up and said that he had knowledge, coming to him only the day before, of where the War Department, I believe it was, had called a man here from Norfolk, Va., an official, to be consulted relative either to the war or naval conditions down around the Chesapeake Bay. That man, I say, living at Norfolk, was a public official. As such, under the law he was allowed $5 a day for travel and sustenance. When he arrived in Washington at 11 o'clock at night and went to the Raleigh Hotel to sleep from then until 7 o'clock the next morning they demanded of him $10 for a room—more than $1 an hour for a bed. He then went to the Harrington Hotel, and there they did let him sleep until morning for $6, a dollar more than the Government allowed both for his eating and sleeping.

Mr. GREENE of Vermont. May I also suggest to the gentleman that there are a good many young second lieutenants who are ordered to this city for duty, and that they are allowed under the law for commutation of quarters $12 a month for a room; and one has only to compare the prices which are charged by these highbinder landlords to see where they come out with their salary.

Mr. JOHNSON of Kentucky. Now, Mr. Chairman, I come to the minority report signed by three gentlemen of the committee.

Mr. FESS. Will the gentleman yield to just one observation? Referring to what the gentleman from Vermont [Mr. GREENE] said, I would like to make a statement concerning a high-salaried gentleman who was brought here from New York City. I speak of it because he happens to be a personal friend of mine. He was brought from New York City, from a salary of $5,000 a year in a very responsible position, and took, on his own choice, a first lieutenancy—and the gentleman will understand the salary. He was loaned from New York to the War Department here. He rented quarters at $55 a month and brought his family to Washington. He has been notified that his rent at the end of a certain period will be raised to $75, and also there has been a suggestion of a raise to $90 to follow. And under a peculiar arrangement that was not anticipated in New York the loaning has ceased, and instead of his salary being made up, as was promised originally, it will not be made up. But here is a gentleman who is serving the country, a high-minded, splendidly educated, well-trained man, at $2,000 a year, who will have to go off into some place where he can get living quarters that will enable him to live within his salary. I think that is one of the most outrageous things that I know of, leaving out the rest of us who suffer likewise.

Mr. DOWELL. Has the committee made any effort to ascertain whether it would be impossible to compel landlords to clean some of the snow and ice from the sidewalks of the city of Washington?

Mr. JOHNSON of Kentucky. No. The committee has not gone into that subject yet.

As I was saying when I yielded to the gentleman from Ohio, I wish to discuss the minority report signed by three members of the Committee on the District of Columbia.

Mr. DECKER. The gentleman said he would refer to the question of sublessees.

Mr. JOHNSON of Kentucky. I will later.

Mr. LINTHICUM. I thought the gentleman was going to take up the hotel question.

Mr. JOHNSON of Kentucky. I will take that up later.

The minority report, signed, as I said, by three gentlemen of the committee, was written, I am quite sure, by the gentleman from Massachusetts [Mr. TINKHAM]. In that minority report he says:

> The undersigned believe that most of the alleged improper increases of rentals sought to be eliminated by the bill will not be prevented by it.

If the gentleman's surmise is correct, then I am quite sure he would be willing to withdraw his objection to this bill. I know beyond surmise that the real estate people here would withdraw their objection to it and let the bill go to final passage if it does not stop profiteering.

Mr. BARKLEY. Will my colleague yield?

Mr. JOHNSON of Kentucky. I will.

Mr. BARKLEY. Does this bill provide for cases where property has not heretofore been rented, private homes?

Mr. JOHNSON of Kentucky. It does; and I will come to all that if I can be given the opportunity.

Mr. BARKLEY. I want to call the gentleman's attention to one instance where an employee of the War Department a few days ago was brought to Washington, and he heard of two rooms and a bath that were for rent. He went out to the private home and asked what they wanted for them, and the lady told him she did not have to rent them, that she did not need the money, but she wanted to help the Government out; that she understood the Government was in a tight place for rooms, and she was willing to take $275 a month for these two rooms and bath.

Mr. GORDON. A month?

Mr. BARKLEY. Yes; a month.

Mr. GORDON. She was "doing her bit." [Laughter.]

Mr. JOHNSON of Kentucky. That is a fair sample of local patriotism.

The minority report further says:

> The enforcement of the provisions of the bill, if passed, would lead to grave injustices and greater abuses than now maintain, and, finally, that the present policy of the Government of the United States to obtain greater housing facilities for both business and residential purposes in the District of Columbia would be retarded, if not defeated.

He says further:

> The other novel principles of law contained in the bill, if passed, are unsound and without precedent—

And so forth. Yes; the provisions of this bill are without precedent, and they have to be, in order to meet an extortionate condition which has never had a precedent since the beginning of time. [Applause.]

In the report written by the gentleman from Massachusetts he says:

> The bill will affect about $200,000,000 worth of real estate and about $15,000,000 worth of personal property in the nature of furnishings and fixtures in the District of Columbia.

Now, in one part of this report the gentleman from Massachusetts says that the property owners themselves are not guilty of this extortion, but that their tenants are, and that if their tenants should not pay the income tax of 100 per cent that is provided for in this bill, and that payment should be made a lien upon the real estate, then the owners of the property would suffer and the tenants who sublet it would not. But does not the gentleman say that the bill involves $15,000,000 worth of furnishings? And God knows that with $15,000,000 worth of furniture the owners are amply indemnified.

Further along in the minority report it is stated that the bill is ambiguous in some respects. It may be. I do not claim to be a Daniel Webster or from Boston. It is not only possible, but probable, that something has been overlooked in this bill. If so, I welcome amendments in the way of correction. But God knows I do not want the money lenders to write the usury laws of the land; neither do I want the rent profiteers to write the laws concerning the rental of property in this District. [Applause.]

Mr. CRISP. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. Certainly.

Mr. CRISP. My colleague was just calling attention to the provision in the minority report that this would be an injustice to the landlords if their tenants sublet the premises. Is it not true and is it not the regular form, of all leases within the District——

Mr. JOHNSON of Kentucky. I am coming to that——

Mr. CRISP. That the landlord must consent to the subleasing?

Mr. JOHNSON of Kentucky. Yes; but I am coming to that. I am taking the minority report section by section as I go along, and in that it is stated that the value of these properties must be taken according to their "assessed" value. The gentleman from Massachusetts will see upon careful reading of the bill that in that he is mistaken; that the assessor, under certain conditions, fixes values, but he fixes them for the purposes of this bill, and not for taxation. In order that that may be perfectly clear, since it does not seem to be clear to the mind of the gentleman from Massachusetts, I will offer an amendment to clarify it when we reach that place in the bill.

The gentleman also says in his minority report:

> The bill plainly proposes not only to take from the owner of real estate all of the rentals in excess of these amounts from the date of the passage of the bill, but all the rentals in excess of these amounts which have been paid to the owner from the 31st day of December, 1916, to the date of the passage of the bill.

It seems that that part of the bill is not ambiguous at all. The gentleman understands it. That is exactly what I propose to do by the terms of this bill.

Again he says:

The device by which any greater rentals than those allowed by the bill are to be prevented is by the provisions in section 2, that any charge or payment made in excess of these rates and percentages shall be taxed at the rate of 100 per cent and paid to the District of Columbia.

The gentleman understands that aright. I propose by this bill to tax all extortion to the extent of 100 per cent of it.

Further along he says:

It is freely admitted by the proponents of this bill that neither in America nor in foreign countries is there any precedent for it, so far as is known. It is also admitted that the tax of 100 per cent is without any precedent in any American statute or that of any foreign land, so far as is known.

The objections to the bill as drawn are most profound.

I suspect that the gentleman did not understand quite clearly those to whom he refers, and he did not do so if he referred particularly to me. Take the case of whisky. It costs 40 cents a gallon to make, and you have got a tax on it now of about 800 per cent. There are other things that are taxed accordingly. The present income tax of the United States taxes some parts of great fortunes to the extent of 66⅔ per cent. Under this bill the landlord is permitted to go 10 per cent above the prices of 1916, and after that all is taken in the way of taxation. I am not quite sure that I am exactly right in drafting the bill to permit them to have that 10 per cent.

Mr. LONDON. Mr. Chairman, will the gentleman yield there?

Mr. JOHNSON of Kentucky. I do.

Mr. LONDON. On the subject of the experience of other countries, I understand that New South Wales has passed a similar law, except that they have established a special court which has the power to determine the amount of rent which is to be paid, and that England and France have been tackling this very problem.

Mr. JOHNSON of Kentucky. The gentleman from Massachusetts in his report says that the terms of the bill do not apply to hotels and boarding houses. But I say they do, provided the hotel is run upon the European plan. But the bill does not reach the hotel or the boarding house that is run on the American plan. That is where the room and the board are furnished under one price. But I have prepared an amendment to the bill, which I will offer at the proper time to make a distribution of the price paid between the room and board.

There is one part of the minority report to which I wish to invite particular attention, and that is where the gentleman from Massachusetts says:

The rates of taxation upon real estate of the same kind, or used for the same general purposes, are unequal, which is a violation of the first principle of every measure of sound taxation. Under the terms of the bill, if a piece of property were occupied previous to September 30, 1916, the rate then charged plus 10 per cent fixes the income, which in turn fixes the amount of the tax, or if the property were unoccupied or not built at that time, then the assessed value fixes the income, which in turn fixes the amount of the tax; and if, by chance, the property were a boarding house or hotel where room and board were charged in gross amount, that property under the bill would escape taxation, as no provision of the bill covers property so used; so that in one block there well might be three owners of real estate; one with his income and, consequently, his tax fixed on the basis of what he was charging for rental the 30th day of September, 1916, and 10 per cent more; another with his income and, consequently, his tax fixed on the basis of 10 per cent of the assessed valuation; and a third, providing room and board in gross amount, not coming within the terms of the bill. This plainly would be unconstitutional, as taxation of the same kind of property must be equal and at the same rate, and not discriminatory.

Now, this is not a tax upon real estate. The three houses in the same square of which the gentleman speaks are not taxed at all, but the income from those three houses is uniformly taxed. Bear in mind that it is the "income" that is taxed and not the "real estate."

Mr. LONGWORTH. Will the gentleman yield for a question for information?

Mr. JOHNSON of Kentucky. I yield to the gentleman from Ohio.

Mr. LONGWORTH. How would the amount to be charged be determined for rooms in a hotel which has been recently built and has not been rented?

Mr. JOHNSON of Kentucky. I provide for that in the bill.

Mr. LONGWORTH. The gentleman simply provides that an amount of rent equivalent to 10 per cent of the assessed value may be charged, but that would not provide for the particular charge against certain rooms.

Mr. JOHNSON of Kentucky. Oh, yes; each room is to be taken separately.

Mr. LONGWORTH. How could the gentleman determine that? His bill provides only that where no rent has ever been charged for a building a rent equivalent to not more than 10 per cent of the assessed value of the property may be charged.

Mr. JOHNSON of Kentucky. No; I did not say "assessed" value.

Mr. LONGWORTH. Of the value to be determined——

Mr. JOHNSON of Kentucky. By the assessor.

Mr. LONGWORTH. That might be workable in the case of one single building; that is to say where there was only one rent charged for the whole building.

Mr. JOHNSON of Kentucky. At the end of each month the books of the hotel can be gone over to see what they collected for the rooms during the whole month and apply that to the cost.

Mr. SNOOK. Mr. Chairman, do I understand the gentleman to say that this provision on page 2, in lines 11 and 12, covers the question of subletting?

Mr. JOHNSON of Kentucky. Read it, please.

Mr. SNOOK. It is—

That, in addition to other taxes imposed by law, there is hereby levied and shall be assessed, collected, and paid to the District of Columbia an annual tax of 100 per cent upon so much of the income from real estate of every person, whether resident or nonresident of said District, received from and after December 31, 1916, as exceeds the deductions herein allowed.

Mr. JOHNSON of Kentucky. It is an income tax, no matter by whom it is received.

Mr. SNOOK. Do I understand the gentleman to say that it covers the question of subletting?

Mr. JOHNSON of Kentucky. Certainly. If the one who sublets gets a revenue from it, that revenue is the income which is taxed.

Mr. SNOOK. Yes; but let me point out to the gentleman that the case of subletting is a rental for mixed property, for the use of the room and the personal property in the room.

Mr. JOHNSON of Kentucky. The bill takes care of that.

Mr. SNOOK. Where is that?

Mr. JOHNSON of Kentucky. My time is running now. If the gentleman will read the bill he will find it. If not, I will find it for him.

Mr. KEARNS. Will the gentleman yield for this question? I do not believe the gentleman understood the question of the gentleman from Ohio [Mr. LONGWORTH]. For instance, here is a hotel which cost half a million dollars to build. We will say it has 200 rooms in it. Some of those rooms are renting for $1.50 a night.

Mr. JOHNSON of Kentucky. I never heard of such here.

Mr. KEARNS. We will say for illustration some are renting for $5.

Mr. JOHNSON of Kentucky. That is not up to the price they are charging.

Mr. KEARNS. Five dollars a night?

Mr. JOHNSON of Kentucky. I just recited an instance where a gentleman could not get a room at the Raleigh for less than $10 from 11 o'clock at night until next morning.

Mr. KEARNS. Suppose they rent one room for $15. That is a good room. They have a more expensive room for $25 per night. I never heard of any such prices as that and I can not deal with those figures, but I am using that for an illustration. How are you to know that a room that rented for $15 per month is renting for 10 per cent of the cost of construction and furnishing of that one identical room?

Mr. JOHNSON of Kentucky. Oh, that is dead easy. There is not a house in Washington, there is not a house in any city of consequence that is not erected on the cubic-foot plan.

Mr. KEARNS. That is the way you arrive at it, do you not?

Mr. JOHNSON of Kentucky. I do not know how the assessor would arrive at it, but that would be the first step I would take.

Mr. LINTHICUM. May I ask the gentleman a question for information?

Mr. JOHNSON of Kentucky. My time is running.

Mr. LINTHICUM. We want to get all the information we can on the subject, and I think the gentleman ought to give it to us.

Mr. JOHNSON of Kentucky. My time is so short I can not answer every question.

Mr. LINTHICUM. We will have to get it from some one. Is the provision on page 3, line 5, the one which covers hotels that have not been in operation heretofore?

Mr. JOHNSON of Kentucky. I will ask the gentleman to read it.

Mr. LINTHICUM. Do I understand that such a hotel would only be entitled to receive 10 per cent upon the valuation placed upon the property?

Mr. JOHNSON of Kentucky. New hotels.

Mr. LINTHICUM. How about the service that they render?

Mr. JOHNSON of Kentucky. They get paid for that forty times over in the restaurant.

Mr. LINTHICUM. No; I mean the service they give to the rooms—bell boys, chambermaids, and so forth.

Mr. JOHNSON of Kentucky. The profit allowed for that is quite ample, except from the standpoint of the millionaire.

Mr. LINTHICUM. Ten per cent upon the valuation placed upon the property?

Mr. JOHNSON of Kentucky. Yes.

Mr. LINTHICUM. In my town we expect to receive 10 per cent upon real estate, to provide for taxes, repairs, and so on.

Mr. JOHNSON of Kentucky. That will pay it and more.

Mr. LINTHICUM. And that is for the house itself—not for any service whatever.

Mr. KEARNS. I am intensely interested in this, and I am going to vote for the gentleman's bill whether it will cure this evil or not, because I am in sympathy with any attempt to stop these highbinders of Washington. I would like to see some provision put in this bill that would require putting into each hotel room a statement of what the lessee of that room ought to pay per night for that room.

Mr. JOHNSON of Kentucky. I have seen that in a number of hotels, and I believe it ought to be done here.

Mr. KEARNS. Could you put that in this bill?

Mr. JOHNSON of Kentucky. I believe it ought to be done.

Mr. KEARNS. I would not know, if I was going to rent a room, and neither would the gentleman, whether I was being charged an exorbitant price for that room.

Mr. JOHNSON of Kentucky. I always inquire before I take a room.

Mr. KEARNS. Then if they should tell you, "This room is worth $3" or "this room is worth $5" you would know.

Mr. JOHNSON of Kentucky. I believe the suggestion made by the gentleman is a good one.

Now, the gentleman from Massachusetts [Mr. TINKHAM] says this bill is unconstitutional. I ask the attention of the House to the question of constitutionality. The Constitution of the United States says:

SEC. 10. No State shall enter into any treaty, alliance, or confederation; grant letters of marque and reprisal; coin money; emit bills of credit; make anything but gold and silver coin a tender in payment of debts; pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

Until quite a few years ago it was a novel proposition to me that a State could not pass a law impairing the obligation of contracts, while the Congress of the United States could. Now, I lay down the broad principle that while a State, under the Constitution of the United States, can not enact a law impairing the obligation of contracts, the Congress of the United States can do so. And it has done so in many instances.

I have before me a number of decisions relative to the limitation of the power of the State, and I find this language used:

This clause is a limitation on the legislative power of the State, whatever form it may assume.

And then:

The United States are not included within the constitutional prohibition which prevents a State from passing laws impairing the obligation of contracts.

There are a large number of opinions cited to sustain that. Then I have a case decided by Mr. Justice Brewer, where in the opinion this language is used——

Mr. LITTLE. Will the gentleman please give the volume and page?

Mr. JOHNSON of Kentucky. It is in the Federal Reporter, volume 105, page 297:

We deem it wholly unnecessary to indulge in any extended discussion of the question which has been raised whether the act of Congress aforesaid impairs the obligation of contracts and is for that reason void. First, because the inhibition against the exercise of such a power which is contained in section 10, Article I, of the Federal Constitution, is not addressed to the National Legislature but to the legislatures of the several States.

Mr. MADDEN. Will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. MADDEN. I heard the gentleman's suggestion a few moments ago that owners of buildings that have not been occupied would not be permitted to collect rent to the extent of more than 10 per cent of the cost of the building. Has the gentleman thought about the fact that there is 5 per cent depreciation on buildings every year?

Mr. JOHNSON of Kentucky. Yes; but I do not believe it.

Mr. MADDEN. That is true.

Mr. JOHNSON of Kentucky. I live in a house that has been built nearly 100 years, and it is about as good now as it ever was.

Mr. MADDEN. But there has been a lot of money expended for repairs.

Mr. JOHNSON of Kentucky. A new roof put on now and then.

Mr. MADDEN. It probably averaged 5 per cent of the value or cost.

Mr. JOHNSON of Kentucky. Seventeen years ago I built a building on a piece of property in my town for business purposes, and the repairs on it have not been one-half of 1 per cent.

Mr. MADDEN. That may be true in that instance, but the average depreciation runs about 5 per cent.

Mr. JOHNSON of Kentucky. I know that people who want big rents claim that, but I do not believe it. No house is all gone in 20 years.

Now, another objection in the minority report is the claim that the landlords are not guilty of extortion; that their tenants alone are guilty of it. I have read you instances in the paper where the landlords are the guilty ones. Now, let me invite your attention to this fact: I do not know a landlord in this city who has ever leased a piece of property to anybody that did not include in that lease a clause that the property should not be sublet without the written consent of the landlord. Therefore I say the landlord is particeps criminis when he permits his tenant to sublet at an extortionate rate.

Mr. BENJAMIN L. FAIRCHILD. Will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. BENJAMIN L. FAIRCHILD. Does the gentleman want the House to understand that in case of a house leased by a tenant for the purpose of keeping a boarding house that the lease prevents him from letting rooms without the consent of the landlord?

Mr. JOHNSON of Kentucky. That is what the lease says, and I will tell the gentleman why they are more particular about it now than they were before. It is on account of the Kenyon anti-red-light district law, which provides that under certain circumstances the furnishings with the property is forfeited if prostitution is permitted to go on there; and the landlords are extremely particular to see who goes into their houses as tenants. I say that if this bill becomes a law these selfsame landlords will see who their subtenants are in order that extortion shall not be practiced.

Mr. BENJAMIN L. FAIRCHILD. Does not the gentleman know that hundreds of houses in the city of Washington are originally leased by tenants for the purpose of running them as rooming and boarding houses, that they lease them for that purpose, and that it is a part of the lease that they are permitted to use them for that purpose?

Mr. JOHNSON of Kentucky. I beg the gentleman's pardon, but my time is running rapidly.

Mr. BENJAMIN L. FAIRCHILD. The gentleman stated that all the leases in the District of Columbia had that clause against subleasing, but the gentleman is mistaken. The common sense of any Member of the House will show that no man who rented a house for the purpose of renting rooms in the house would consent to that.

Mr. JOHNSON of Kentucky. There are some gentlemen who lack common sense, but that does not reach the question. If this bill is passed it will stop profiteering.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. JOHNSON of Kentucky. Briefly.

Mr. COOPER of Wisconsin. The gentleman from New York who interrupted the gentleman from Kentucky was not very clear in his statement. The lease specified was a lease from the landlord to a tenant for the purpose of a rooming house. That tenant could not sublet it to another tenant for the purpose of a rooming house without the consent of the landlord.

Mr. BENJAMIN L. FAIRCHILD. But he could rent rooms in the house without consulting the landlord.

Mr. COOPER of Wisconsin. Exactly, and that is the gentleman's mistake. The landlord picks out a good man for a tenant who will see that the character of the house is kept up. He could not sublet it to another tenant without the consent of the landlord.

Mr. BENJAMIN L. FAIRCHILD. No.

Mr. JOHNSON of Kentucky. Mr. Chairman, so much of my time has been taken by questions and arguments of other gentlemen who can get in later under the five-minute rule, that I feel that I must decline to yield for further questions or for statements by other gentlemen.

Mr. LINTHICUM. I want to ask the gentleman one question for information.

Mr. JOHNSON of Kentucky. No; I can not yield.

Mr. LINTHICUM. But the gentleman has all of the information and is unwilling to give it.

Mr. JOHNSON of Kentucky. That is an unwarranted statement, in the face of my having just stated that I do not have time. Anyway, I could not give the gentleman a high-school education in five minutes.

Mr. LINTHICUM. I will ask that the gentleman's time be extended.

Mr. JOHNSON of Kentucky. But that can not be done. I decline to yield. I had hoped to be able to take up this minority report and go through it item by item, but I find I shall not be able to do that in my time, and I shall jump now over to the fourth objection urged by the minority report, which is as follows:

Fourth. No distinction is made in the bill between real estate which is let or leased bare of service and heat and those which are let and leased with service and heat; yet the same rate of increase, namely, 10 per cent, is only allowed for each; nevertheless, since September 30, 1916, maintenance and supplies have increased 50 per cent or more in the District of Columbia, coal over 100 per cent, with a great decrease in quality, and the cost of services also has greatly increased. To fix an arbitrary figure the same for both classes of property is unfair and discriminatory. The cost of all maintenance, supplies, and services are advancing and undoubtedly will advance during the continuance of the war; yet the bill axes, irrespective of these increases, past, present, and future, a rigid limitation on the income until a year after the war has come to an end.

I do not know of any coal that has been increased 100 per cent in price. I have been buying coal right along in small quantities, and I have not heard of any such advance. Along in 1916 and 1917 I paid about $8 a ton for coal, and I have not paid higher than $9.25 for coal this winter, and I have bought it in the public market and from whomsoever I could get it. But the gentleman says there is no distinction made between real estate which is let or leased bare of service and that let or leased with service—that the 10 per cent applies to both. I am perfectly willing the gentleman shall offer an amendment to limit the increase in the rent to 7½ per cent for houses where no service is rendered, and let the 10 per cent apply to those where the service is rendered.

Mr. TINKHAM. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. TINKHAM. At this time I desire to ask the honorable Representative from Kentucky whether he would accept as a substitute for this bill a bill of general application against profiteering in the United States, limited to soldiers, sailors, and all employees of the Government?

Mr. JOHNSON of Kentucky. I would suggest to the gentleman that we better take a bird that is in hand and then go later to those in the bush. When he introduces a bill of that character I shall help him pass it.

Mr. TINKHAM. Then, I offer——

Mr. JOHNSON of Kentucky. Oh, no; the gentleman can not offer a substitute now and have it read in my time.

Mr. TINKHAM. As I understand it, I have the promise of the honorable Representative from Kentucky to support such a bill.

Mr. JOHNSON of Kentucky. You have my promise to support a bill prohibiting profiteering anywhere on God's green earth. [Applause.]

But while we have this question up, applying to the District of Columbia, the gentleman should not put himself in the predicament of saying that unless we can get it for all the rest of the United States we should permit this gouging to be done right here in the Nation's Capital.

Mr. Chairman, in a short explanation of the bill, I desire to say that there are three kinds of years in the District of Columbia. There is the calendar year, the fiscal year, and the rental year. The rental year in the District of Columbia commences on the 1st of October and ends on the last day of the next succeeding September, making one year. The rental year of 1916, which was a normal year, has been taken as a basis for rent. This bill allows a 10 per cent increase in rentals on the basis of the rentals of 1916. Three different kinds of propositions are covered in the bill, one for premises that were renting unfurnished in 1916; another for those that were rented furnished; and one for buildings that were vacant in 1916. Then another proposition undertakes to deal with houses rented since September 30, 1916. I expect when the time comes to offer an amendment to cover the objection raised by the gentleman from Massachusetts [Mr. TINKHAM] that apartments or houses in which service is rendered should have more increase than houses in which no service is rendered. I shall offer an amendment at the proper time to take care of that.

Mr. KEARNS. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. I shall have to decline to yield, as my time has nearly expired.

In this matter great minds have turned out to run in the same financial channel. The mind of the author of the minority report, the mind of the real estate dealer, and the mind of the editor of the Washington Star all are in keeping, and each runs in accord with the other. There is almost no difference between the minority report, the statements which the Real Estate Brokers' Association has furnished, and the newspaper articles in the Star. There is practically no difference among the three.

Mr. TINKHAM. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. TINKHAM. Does the gentleman know whether the minority report was written first?

Mr. JOHNSON of Kentucky. I do not.

Mr. TINKHAM. Or in what order the articles were written, the minority views, the report of the Real Estate Exchange, and the newspaper articles?

Mr. JOHNSON of Kentucky. I have not the remotest idea as to which was written first. Neither have I any opinion at all as to whether there was any conference among those who wrote the different opinions.

Mr. TINKHAM. Might it not be that the minority, having written their report, the report being so sound and so intelligent, that it was approved by the board and also by this independent newspaper?

Mr. JOHNSON of Kentucky. That not only is possible, but highly probable, because when the gentleman announced that he was going to write a minority report he said he was going to do it in a Boston-like way.

In other words, he meant that that report would come from the intellectual metropolis of the universe.

I regret more than I can tell to be compelled to realize that the gentleman from Massachusetts [Mr. TINKHAM] is not with me in this fight for justice, mercy, and our country's flag.

He and I have served in former Congresses and upon the same committee.

If I recall correctly, in all committee matters, save one, practically we have been of one mind.

When I returned to Washington in December, after several weeks of arduous committee work at East St. Louis, I learned that the gentleman, out of a spirit of patriotic adventure, had gone to the battle front in Italy. I was disappointed in not finding him here. I missed the grasp of his hand and also his cheerful smile and radiant face, but I took abundant consolation out of the fact that my personal friend was making history. In my wakeful dreams of pleasant things I was soothed with the thought that when I went back to Kentucky I might gather my children's children about my knees and tell them to tell their children's children that the close, intimate friend of their ancestor had gone to Italy during the bloodiest war known to man, and there had fired the first American gun against Prussianism and for the liberty of the world.

Yet, when day after day, week after week, I saw this profiteering monster grow into frightful proportions and rear its defiant head over the Capital City of our Nation, in our Nation's hour of need; when I saw this hideous thing plunge a thousand hands into the pockets of those who here are toiling to feed, to clothe, to arm, and to succor our gallant boys over there; when I heard its shameless voice drive their mothers and sisters from the shelter into pitiless storm; when I saw this beast of avarice and extortion prey upon the thousands who came here, each to do his bit in the patriotic cause; when I saw these men and women, boys and girls, turned away and sent back to their homes in the States that this ravenous thing might feed even upon the bones of our heroic dead, I even prayed that the gentleman from Massachusetts [Mr. TINKHAM] might hasten back, if not himself to fire the first gun, at least to give aid to my feeble efforts to strike down the gluttonous rent profiteer.

At last the welcome message was flashed through space that this all but modern Horatio had saved the day—had laid down his sword made bloody in freedom's cause at the bridge—and was returning to his native land to join the chorus, "My country 'tis of thee, sweet land of liberty."

As he sailed, from each of the seven hills of historic Rome there came a thousand voices chanting the first words of Virgil's Æneid:

Arma virumque cano, etc.
(I sing of arms and a hero who, first, exiled by fate, came from the coast of Troy to Italy and the Lavinian shore, etc.)

Gibraltar passed the joyous tidings westward. At the Azores binoculars swarmed to the shores, and some youthful Joaquin Miller megaphoned out: "Sail on! sail on! brave Congressman; sail on, and on!"

As the voyage proceeded the world was bulletined that hundreds of German U-boats had ducked to the bottom of McGinty's Sea under his menacing and glaring periscopical gaze.

At last American shores were reached. He hied himself to the intellectual metropolis of the universe and then took up his triumphal march to the Capital City. Imagine my surprise and disappointment when I found that, apparently, at least, something of his patriotism had been lost in a storm at sea, and that

the local profiteers called him "Friend," notwithstanding the fact that his country, following somewhat the thought of Miller, the poet, was saying:

The profiteers grow mutinous day by day;
The clerks grow ghastly wan and weak.
The paid clerk with bowed head gray
In faltering accents tried to speak.
What shall we say, brave Tinkham, say,
If the profiteers in armies drawn,
Await us at the break of day?
Why say, Charge on! Charge on! Charge on! and on!

Mr. Chairman, I reserve the remainder of my time, and I ask the Chair how much time have I remaining?

The CHAIRMAN. The gentleman has six minutes. Does the gentleman reserve the remainder of his time—the six minutes?

Mr. JOHNSON of Kentucky. I do.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. SAUNDERS of Virginia having taken the chair as Speaker pro tempore, a message from the President of the United States, by Mr. Sharkey, one of his secretaries, was received.

TAXES ON CERTAIN INCOMES IN THE DISTRICT OF COLUMBIA.

The committee resumed its session.

The CHAIRMAN. The gentleman from Massachusetts [Mr. TINKHAM] is recognized for two hours.

Mr. TINKHAM. Mr. Chairman, when I was at the front the principle which was most discussed, the policy which the soldiers were carefully taught to adopt, was when you shoot hit the mark, and I say to the honorable Representative from Kentucky that the trouble with his bill is that it does not hit the mark. He shoots, but he does not hit what he aims at. Who is there in the United States, except the beneficiaries, who are not opposed to unfair profiteering, and even they in their secret hearts are ashamed of it. I am as much opposed to unfair profiteering in war times as the honorable Representative from Kentucky, and I will ardently support any reasonable, sane, practical bill which prevents unfair profiteering in rents or in food or in any other human necessity, and I shall offer at the appropriate time a bill which is very much simpler, very much more practical, and which will be of general application in the United States, to prevent the very kind of unfair profiteering which the honorable Representative from Kentucky attempts by this bill to prevent, but does not. The bill which I shall offer will be one of general application, and if no one interposes the point of order that it can not be substituted upon a local bill it will then be adopted by this House and go to the Senate.

The bill reads as follows:

A bill prohibiting any person, lessor, or sublessor from making a larger charge for rooms, apartments, houses, hotel rooms, etc., than the rate charged for such rooms, houses, or dwellings on the 1st day of December, 1917.

Be it enacted, etc., That no person, lessor, or sublessor of a dwelling house, hotel, room, apartment, boarding or lodging house shall charge for the use and occupation of the same by soldiers or sailors of the United States, or any employee, officer, or official connected with the naval, military, or civil service, or any person engaged as laborer, employee, or otherwise in manufacturing or other industry producing ships, food, fuel, munitions, equipment, clothing, supplies, or any other article or thing used by the Government in any capacity during the existence and continuance of the present war with Germany, a larger charge for rental than the rate which was charged for similar rooms, houses, or dwellings on the 1st day of December, 1917. Any person violating this act shall be deemed guilty of a misdemeanor and shall be punished by a fine not exceeding $500.

Instead of trying to reach by the very effeminate method of taxation the evil of unfair profiteering, as proposed by the honorable Representative from Kentucky, I, coming from virile Massachusetts, will propose a virile remedy for unfair profiteering, making it a crime not only in the District of Columbia but throughout the United States. [Applause.] Now, Mr. Chairman, before I begin the discussion of the bill now before the committee I want to say one word——

Mr. MOORE of Pennsylvania. Before the gentleman goes on——

The CHAIRMAN. Does the gentleman yield?

Mr. TINKHAM. I do.

Mr. MOORE of Pennsylvania. Does the bill the gentleman suggests propose to penalize those who charge rents in excess of those charged in preceding years?

Mr. TINKHAM. There is no penalizing except by way of a tax upon anything in excess of 10 per cent of what the rents were on the 30th of September, 1916, in the bill now before the committee.

Mr. MOORE of Pennsylvania. That is a date prior to our entry into the war?

Mr. TINKHAM. Yes; that is prior to our entry into the war.

Mr. MOORE of Pennsylvania. What does the gentleman think of the idea of averaging those rates for three years prior to the war?

Mr. TINKHAM. Well, it would come nearer to working equity, but I should prefer that a substitute bill be drawn for this——

Mr. MOORE of Pennsylvania. I submit that making a comparison for a series of years would perhaps be more equitable than fixing an arbitrary date.

Mr. TINKHAM. It would be more equitable.

Mr. REED. May I ask what the arbitrary date was, 1916 or 1917?

Mr. TINKHAM. September 30, 1916.

Mr. REED. I understood the gentleman to say 1917.

Mr. MOORE of Pennsylvania. I was referring, since attention was called to it, to the substitute offered by the gentleman from Massachusetts, and I understood the gentleman's bill proposed to compare the high rate now charged with the rates which were charged on a given date preceding the war.

Mr. TINKHAM. That is true. I thought you referred to the bill now before the committee.

Mr. MOORE of Pennsylvania. I was referring to the bill the gentleman said he had introduced.

Mr. TINKHAM. I said I proposed to introduce a substitute to this bill.

Mr. MOORE of Pennsylvania. I asked the gentleman whether he had considered the advisability of making his comparison with the three years preceding the war the average rate paid for three years preceding the war instead of fixing an arbitrary date as he has in the draft of the bill?

Mr. TINKHAM. I had not considered it.

Mr. MOORE of Pennsylvania. That is the method that is followed abroad, as I understand it, and it is a method that has been adopted by the Ways and Means Committee in the revenue bill. That is to say, a prewar period has been fixed. The gentleman could ascertain, if he cared to do that, a fair rental charge by averaging the three years' charge preceding the war.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. TINKHAM. I will.

Mr. GARRETT of Tennessee. The bill that the gentleman proposes to offer as a substitute he concedes is subject to a point of order?

Mr. TINKHAM. I concede it is subject to a point of order.

Mr. GARRETT of Tennessee. Why does not the gentleman draw a substitute that would apply to the District and not be subject to the point of order?

Mr. TINKHAM. Mr. Chairman, I have a second substitute bill here, applying alone to the District of Columbia, if a point of order is raised against my first substitute bill of general application, but it seems to me that a technical rule of parliamentary law should not be invoked if it is possible for us to pass a law here of general application in the United States to unfair profiteering. I am firmly of the belief, as long as this matter of great importance is before us, we should pass a law of general application rather than limited application to the few feet of land here in the District of Columbia.

Mr. LONGWORTH. Will the gentleman yield?

Mr. TINKHAM. I will.

Mr. LONGWORTH. I presume the committee had extensive hearings on this important bill, did it not?

Mr. TINKHAM. Mr. Chairman, there were no hearings on the bill. It was discussed for perhaps an hour and a half in full committee. No amendments were made to the bill as originally introduced, except two textual amendments, and it is, in that condition and after that history, sent here to be considered by us.

Mr. JOHNSON of Kentucky. Will the gentleman yield for a question?

Mr. TINKHAM. Yes.

Mr. JOHNSON of Kentucky. In answer to the question just asked by the gentleman from Ohio [Mr. LONGWORTH], I will say that the Real Estate Brokers' Association, through a special committee, came to me, as chairman of the committee, and said they did not want public hearings. At the time a reporter from one of the local newspapers was in the room, and they even asked him to go out while they discussed the matter with me. They said on both of their visits to me that they wished to discuss it with me instead of with the whole committee. Now, I do not know what the reasons were, but I apprehend they did not want a discussion of it because those here in the city who had been extortioned upon would also come and be heard on the other side of the question.

Mr. KELLEY of Michigan. Will the gentleman from Massachusetts yield?

Mr. TINKHAM. I will.

Mr. KELLEY of Michigan. I understand that the gentleman's bill—the one that he proposes to offer as a substitute—applying to the District of Columbia——

Mr. TINKHAM. The one I proposed applies to the United States.

Mr. KELLEY of Michigan. In the event that objection is made to that he proposes to offer a similar one applying to the District of Columbia?

Mr. TINKHAM. Yes.

Mr. KELLEY of Michigan. Has the gentleman thought what authority Congress might have to fix rentals directly in the District of Columbia or anywhere else?

Mr. TINKHAM. That is, applying his question to the bill now before us, but not my bill——

Mr. KELLEY of Michigan. The bill that you propose to offer is a bill to fix the rentals directly. This is a bill to regulate by taxation, which everybody might concede at once Congress would have full authority to pass, but the bill which you propose is a bill to fix rentals in the District of Columbia; and what constitutional warrant would Congress have to do that?

Mr. TINKHAM. Well, of course, I think some of the laws which we have passed since the war began would have been unconstitutional before the war, but to-day are not unconstitutional. I think some of the laws that we pass to-day are undoubtedly, and may be declared, unconstitutional. On the other hand, I believe wherever possible war-time legislation is going to be sustained by the Supreme Court, and if we can fix the price of food, and that is constitutional; if we can fix the price of other commodities, and that also is constitutional, I do not see why we can not fix the price at which real estate can be leased or let. However, I do not say that any of this legislation is constitutional.

Mr. MASON. Mr. Chairman, will my colleague yield for a moment?

Mr. TINKHAM. I will.

Mr. MASON. I think it is due to the chairman of our committee to call his attention to the fact, which was called out in answer to this question of the gentleman from Ohio [Mr. LONGWORTH], that the board did ask for a hearing before the committee, and there was a misunderstanding as to the date. The Committee on the District of Columbia met in order to hear them yesterday morning, as I remember it, or the day before, and it seems from a letter which I have received, and I have no doubt the chairman has received, that there was a misunderstanding as to when the hearing was to be had, and the committee, with the chairman, waited patiently half an hour for them, certainly 20 minutes, and they did not appear, and so we adjourned. Since that, and as a member of the committee, I have received a letter asking for a hearing and I have sent that to the chairman. I thought that was due to the members of this association who wished to be heard.

Mr. JOHNSON of Kentucky. If the gentleman from Massachusetts will permit, I will say that long prior to the occasion to which the gentleman from Illinois [Mr. MASON] has just referred the committee of the Real Estate Brokers' Association came to see me twice and not only argued the matter with me orally but submitted a lengthy typewritten communication. I do not know at all, but I suppose that other members of the committee and other Members of the House were furnished with that. But concerning that I have no knowledge. But they did say most plainly that they did not want open hearing; and then on yesterday morning, when there was a misunderstanding as to the time for the hearing, they indicated that the subcommittee of the real estate brokers only were to come.

Mr. KEARNS. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. KEARNS. It is not very usual that the robber wants an open hearing, anyhow, is it?

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. TINKHAM. Yes.

Mr. LONGWORTH. Mr. Chairman, I will say that my question was propounded not with any intention to embarrass the committee. I know nothing about the real estate brokers. I am in sympathy with the object sought to be accomplished by the bill, but it seems to me, on a very brief review of the bill, that there are a number of unworkable features in it, and I asked the question only to bring out the fact whether or not the bill had been carefully considered and the sections gone over with care. It was only for that purpose that I asked the question. It would seem that the bill was rather hastily considered. The bill is of the most vital importance.

Mr. JOHNSON of Kentucky. Yes; the bill is of the most vital importance, and I will say to the gentleman that I spent two or three weeks in writing and rewriting it, and I believe if the time were at hand so that the features of it could be explained the gentleman would not find a single place in it where it is not workable.

Mr. FOCHT. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Massachusetts yield to the gentleman from Pennsylvania?

Mr. TINKHAM. I do.

Mr. FOCHT. Mr. Chairman, in justice to the gentlemen who are interested in connection with the Real Estate Brokers' Association, I happen to know, by reason of the fact that he was a former resident of my district, the president of this association, and he asked me, as a member of the District Committee, several days ago, if I would attend the hearings to be held by the committee yesterday morning. I told him if I was well enough I would, and I went to the meeting and found that he and his friends of the Real Estate Brokers' Association did not appear. Then I received this letter. In justice to him and others I would like to have the letter read so that the House will understand that at least he, over his signature, as well as others, did desire a hearing.

The CHAIRMAN. Does the gentleman from Massachusetts yield for that purpose?

Mr. TINKHAM. I do.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

REAL ESTATE BROKERS' ASSOCIATION,
Washington City, D. C., February 27, 1918.

Hon. B. K. FOCHT,
House Office Building, City.

DEAR MR. FOCHT: The writer evidently misunderstood the chairman of the House District Committee as to the day the special committee of this association was to be heard.

All arrangements were made by us to appear Thursday, this week, at 11 o'clock. We exceedingly regret the error and sincerely trust you were not greatly inconvenienced thereby.

We have asked Hon. BEN JOHNSON to arrange the hearing for a later date, and hope that the bill will not pass this week so that we may be afforded an opportunity.

This is a serious proposition.

Thousands of residents and nonresidents own Washington real estate who will be considerably damaged if the present bill, H. R. 9243, becomes a law.

Yours, very truly, CHARLES W. FAIRFAX,
President.

Mr. FOCHT. Mr. Chairman, will the gentleman yield me a moment, please?

Mr. TINKHAM. Yes.

Mr. FOCHT. As expressive of the fact that I am in accord with the view that we have just had from the gentleman from Ohio [Mr. LONGWORTH] I wish to say that I think we are all seeking to attain but one desirable object, and that is to dispose of the profiteer, and I expect to vote for a measure that will do justice to the people who come here to rent houses and remain here. Yet in a measure as important as this is, with so many untold millions involved, with so many questions as to the constitutionality of it involved, it seems to me it would be only a matter of fairness and justice, from my viewpoint, inasmuch as the business men here have asked for a hearing, that we grant such hearing or hearings. And so I hope, Mr. Chairman, that this bill will be recommitted and that these men in the Real Estate Brokers' Association who desire to be heard may be given a hearing. I hope the gentleman from Kentucky will not object to this proposal, since it involves no more than justice and fair play.

Mr. JOHNSON of Kentucky. Mr. Chairman, if the gentleman from Massachusetts will permit——

Mr. TINKHAM. Yes.

Mr. JOHNSON of Kentucky. Speaking for those from whom extortion has been demanded and taken, and not for the real estate owners and profiteers, I ask the gentleman from Pennsylvania [Mr. FOCHT] to recall my statement to the effect that the committee of the Real Estate Brokers' Association, of which his correspondent, Mr. Fairfax, is president, came to the Committee room and told me that they wished to present their arguments to me alone, and not to the committee——

Mr. FOCHT. Of course, that is in contradiction to the letter. That is up to somebody else to decide——

Mr. JOHNSON of Kentucky. And handed me the argument in typewritten form which they wanted to present.

Mr. FOCHT. Then they changed their minds as to the form.

Mr. JOHNSON of Kentucky. They changed their minds as to the extent of the delay sought in the interest of profiteering.

Mr. FOCHT. If you do not expect to pass this bill to-morrow, do you not think it would be fair to grant their request?

Mr. JOHNSON of Kentucky. I hope we may pass this bill to-day. [Applause.]

Mr. RAGSDALE. Mr. Chairman, will the gentleman yield?

Mr. TINKHAM. Yes.

Mr. RAGSDALE. I think it would be but fair that I should state here a little incident of which I have personal knowledge. I have some personal acquaintance with Mr. Fairfax, which is very slight, but I am quite sure he is a gentleman of the highest character. I was in his office on Tuesday to discuss a little matter with him, and he told me that his committee expected to come before the House Committee on the District of Columbia on Thursday, and asked me to be present. He told me they had made an engagement, expecting to come before our committee on Thursday, and I called his attention to the fact that that was the very day on which the bill would be taken up here for consideration.

Mr. JOHNSON of Kentucky. If the gentleman will permit, I will say in that immediate connection that I, too, told Mr. Fairfax over the telephone that the bill would come up for consideration on Thursday, and that the meeting of the committee on that morning would interfere with my getting my papers together for the purpose of arguing the matter on the floor of the House. I suggested that they come over Wednesday morning, and I sent out notices to all the members of the committee to be there on Wednesday morning, and I thought Mr. Fairfax understood that the meeting was to be on Wednesday morning and not on a morning that would postpone the consideration of the bill.

Mr. RAGSDALE. I am quite sure Mr. Fairfax expected the meeting to be held on Thursday, because he so informed me; and I told him that the bill was coming up on the floor of the House on Thursday; and I remember his saying, "Then you will come fresh from your hearing there to the floor of the House to consider it."

Mr. JOHNSON of Kentucky. If the gentleman will permit me, I will say that I believe Mr. Fairfax was honestly mistaken about it.

Mr. BENJAMIN L. FAIRCHILD. That is the point. There was a misunderstanding between the committee and Mr. Fairfax as to the date of the hearing.

Mr. JOHNSON of Kentucky. There is no doubt about that.

Mr. BENJAMIN L. FAIRCHILD. And as a result there has been no hearing.

Mr. JOHNSON of Kentucky. There has been no hearing beyond the hearing that they said they wanted. They asked for two different hearings before me. They said they did not want any hearing before the committee; that they wanted to discuss the matter with me alone.

Mr. BENJAMIN L. FAIRCHILD. As a member of the committee, I regret that I have not been able to join in the majority report, because there is an evil here in the District that ought to be corrected. Now, I ask the chairman of the committee, in all fairness, whether it is not due to the purpose we have in mind to accomplish, due to the interests here in the District of Columbia, and also due to the other members of the District of Columbia Committee, that this bill be referred back to the committee in order that we can bring in, after due investigation and consideration, a bill that will accomplish the purpose without injustice to anybody except the profiteers?

Mr. JOHNSON of Kentucky. In answer to the gentleman I will say that unless this bill did really stop profiteering, the Real Estate Brokers' Association and the property owners here would not be objecting to it in the least. In addition to that, I am opposed to one day's delay while these robbing methods continue. [Applause.]

Mr. BENJAMIN L. FAIRCHILD. We want to accomplish the results, and I believe the chairman of the committee realizes that although there may be some people in Washington who are subject to the criticisms he makes about the profiteers, there are Members of this House and members of his own committee who are just as desirous as he is to have this evil corrected, and because they want it corrected would like to have a proper consideration of the proposition. [Applause.]

Mr. JOHNSON of Kentucky. Does not the gentleman think he is getting consideration of it now?

Mr. BENJAMIN L. FAIRCHILD. No.

Mr. JOHNSON of Kentucky. The gentleman has ample opportunity to consider it right now.

Mr. MOORE of Pennsylvania. Will the gentleman from Massachusetts yield?

Mr. TINKHAM. I will.

Mr. MOORE of Pennsylvania. I have in my hand the bill which the gentleman from Massachusetts [Mr. TINKHAM] proposes to offer as a substitute, and I call his attention to the fact that the date he fixes when the penalty shall go on for excess charges is the 1st of December, 1917. My recollection is, and I think the facts bear it out, that rents were at their very highest point December 1, 1917. I rather like the gentleman's draft but think the date he has fixed is wrong.

Mr. TINKHAM. I think it is a little irrelevant to discuss anything in relation to a bill which not only has not been offered but which the action of the House may prevent from being offered or discussed.

Mr. MOORE of Pennsylvania. I thought it was the gentleman's intention to offer it.

Mr. TINKHAM. I said at some subsequent time, if it were possible.

Now, Mr. Chairman, before I discuss what I believe are the demerits of the bill before the committee, I want to say just one word in relation to a number of statements made by the honorable gentleman from Kentucky [Mr. JOHNSON]. He stated that there were three classes of people who were opposed to his bill, and one of the classes he denominated as men who are willing to have unfair profiteering continue. I think if I offer my bill it will show that I am as fully opposed, if not more so, to unfair profiteering in the District and the United States than he is, if my sincerity of purpose is questioned, which is something to which I am utterly unused. I have only opposed this bill because I believe, as I have explained previously in my remarks, that it does not hit the mark, that it does not accomplish its purpose, because it is futile to pass legislation which either will not effect its purpose or will be declared unconstitutional.

The gentleman said in his remarks that The Evening Star, which I consider the most influential newspaper in Washington, was not opposed to profiteering. I do not believe any American newspaper can be defended properly and as well defended by a Member of Congress or a member of any other public body as it can defend itself, and I am sure I am not audacious and bold enough to come forward as the champion of the Star in its defense; although I do think it is fair to bring to the attention of the House the article published in the Star on February 8, on the front page, in which it says in large headlines:

No war extortion by profiteering, whether in rentals, food, or fuel, here or anywhere else in the United States.

Mr. JOHNSON of Kentucky. Will the gentleman yield right there?

Mr. TINKHAM. In a moment I will; not now. In the same article, in large type, down the column, is the statement, in discussing the bill now before the committee:

Of course the aim of the legislation is not to collect any kind of tax, but to punish and prevent profiteering in rentals. This purpose is sound, wholesome, and in the public interest.

And there is not a Member of this Congress, and there is not a decent newspaper in the United States, or a citizen of the United States, who is not against unfair profiteering in time of war. All the minority of the District Committee wants is a bill which will effect the purpose of preventing unfair profiteering, and it does not believe that the measure reported by the committee will prevent it. I think I will be able in a few moments this afternoon to demonstrate the reasons.

Mr. JOHNSON of Kentucky. If the gentleman will yield just there.

Mr. TINKHAM. I will yield now.

Mr. JOHNSON of Kentucky. I will say that I too clipped from the Star the same article that the gentleman has just read. I did not have the time to get to it, but I wished then and I wish now to invite attention to that article, and that it opens by declaring that there has been no profiteering, but agrees that there ought to be some remedy if it is done.

Read it as you did a moment ago, the three top lines.

Mr. TINKHAM (reading)—

No war extortion by profiteering, whether in rentals, food, or fuel, here or elsewhere in the United States.

Mr. JOHNSON of Kentucky. There is the broad statement that there is none going on. [Laughter.]

Mr. TINKHAM. I suppose an article must be taken in whole as well as in part, and surely it should be examined aside from the headlines. Now, it says below what I read before:

Washington will welcome equitable legislation which prevents landlords from extorting excessive rentals from District tenants.

And then it suggests equitable amendments that might be made to the bill. I do not think that the interpretation put upon the headlines by the honorable Representative from Kentucky is fair. I do not think that the Evening Star meant that there was no unfair profiteering going on now in Washington, but it meant that there should not be extortion here by profiteering, and a reading of the article will convince anyone that that is so.

Now, Mr. Chairman, let us take up the provisions of this bill. This is what is before us, and not the question whether there were hearings or were not hearings, or whether there are low rentals in Cleveland or high rentals in the District of Columbia.

The question is whether the bill we are discussing would prevent unfair profiteering in rentals in the District of Columbia, and whether it should be passed.

The minority says that—

most of the alleged improper increases of rentals sought to be eliminated by the bill will not be prevented by it; that the utter novel principles of law contained in the bill, if passed, are unsound and without precedent; that the enforcement of the provisions of the bill, if passed, would lead to grave injustices and greater abuses than now maintain; and, finally, that the present policy of the Government of the United States to obtain greater housing facilities for both business and residential purposes in the District of Columbia would be retarded if not defeated.

The bill will affect about $200,000,000 worth of real estate and about $15,000,000 worth of personal property in the nature of furnishings and fixtures in the District of Columbia.

The bill, reduced to its simplest terms, proposes to fix all rentals for real estate of every kind and nature or used for whatsoever purposes in the District of Columbia at the same rentals paid for it on the 30th day of September, 1916, and to allow only an increase above these rentals of 10 per cent.

The law as proposed is to be retroactive to September 30, 1916, and to continue in effect until a year after the ending of the war.

That means that a man who has received a rental which was fair and just, so far as the law is concerned, at the time, and has spent the money, will have to return that amount to the District treasury. It does not seem to me that that is quite the fair thing, to allow by law certain charges to be made, and then, 15 or 20 months afterwards, declare it unlawful and deprive him of that which he has received as lawful income. Such legislation is intolerable in a land which proclaims itself the model for justice and fairness.

Mr. JOHNSON of Kentucky. Will the gentleman yield?

Mr. TINKHAM. Yes.

Mr. JOHNSON of Kentucky. I will say that it is not my construction of the bill that any contract is made void—it is possible for it to be made voidable—but in this way the courts do not have to decide the question whether it is against public policy, for the bill makes extortionate rents against public policy.

Mr. HUSTED. Will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. HUSTED. As I understand the bill, it fixes taxation on all rentals paid since September 30, 1916, which are in excess of the amount fixed by the bill.

Mr. TINKHAM. That is true.

Mr. HUSTED. Assuming that a lessee receives an excess rental, his lease has expired, and he has left the District. The owner of the property was unable to recover that excess rental from him. Does the bill provide that the owner of the property will have to pay the excess rental, and if he does not, will a lien be imposed on his property? That is the way I read the bill.

Mr. TINKHAM. I think that construction can not only be read into it, but it is a plain provision of it.

Mr. ROGERS. Will the gentleman yield?

Mr. TINKHAM. Yes.

Mr. ROGERS. There is a provision in the bill that 10 per cent may be added to the amount of the rentals which had been charged prior to September 30, 1916.

Mr. TINKHAM. That is correct.

Mr. ROGERS. Would the landlord be permitted to exact 10 per cent from his tenant for the period between September 30, 1916, and the date of the passage of this act, as well as for the future?

Mr. TINKHAM. There is no such provision in the bill.

Mr. MADDEN. Will the gentleman yield?

Mr. TINKHAM. I will.

Mr. MADDEN. There is a provision in the bill which says not to exceed 10 per cent of the cost of the building may be charged for rental. In fixing that percentage of rentals which is to be allowed, has the committee taken into consideration the depreciation of the building during the period for which it is to be rented, and have they taken into consideration the likelihood of the building being vacant for any given part of the period, and have they taken into consideration the amount of taxes that are to be paid; and if they have not, how much of the 10 per cent would come to the owner of the building, assuming that he was not able to charge more than 10 per cent on the cost?

Mr. TINKHAM. Mr. Chairman, as I stated before, the consideration of the bill was limited to about an hour and a half. There were no public hearings; there was very little discussion of anything but pure details and technicalities, and it was reported out with the two amendments that you see in the report, which are purely textual changes. In other words, the committee did not consider any other question in relation to this bill, and it could not do so on a bill as complicated as this in an hour or two.

Mr. LONGWORTH. Will the gentleman yield?

Mr. TINKHAM. I will.

Mr. LONGWORTH. I do not know whether the gentleman was present this morning when I asked the gentleman from Kentucky a question for information. Under the provisions referred to by the gentleman from Illinois a number of new hotels are being built here and are not completed. After the date of completion, who is going to determine what the various rooms in those hotels shall be rented for, and how can it be determined?

Mr. TINKHAM. Mr. Chairman, the honorable Representative from Ohio [Mr. LONGWORTH] has suggested one of the many difficulties in relation to the application of the bill to produce the results desired by its author. In relation to such a problem as he has raised, the facts and arguments are these: This bill provides that if an apartment house has been constructed since the date prescribed in the bill—the 30th of September, 1916—there can be a gross charge only of 10 per cent—10 per cent on whatever its assessed value may be. The question arises immediately, How is the assessed value of these apartments—and I understand that that is the gist of the question—to be assessed or levied or divided in relation to the total assessment of the property? The only answer that has ever come from the author of the bill is that you can divide any piece of property up into cubic feet, and by the number of cubic feet you can fix what the value or rental proportionately should be. Then you would run into this difficulty immediately: On each floor, wherever situated in the building, the same number of cubic feet would be held to be of the same value. That, as we all know, is impossible. There are rooms of the same number of cubic feet which have a number of windows, others which have a southern exposure, others on floors that are more desirable, and you could not divide up your house fairly and properly on a cubic-foot basis and then say what you could charge in fairness for each piece in relation to the entire amount of the assessment in order to reach your 10 per cent gross upon your assessment. That is one of the very profound defects, it seems to me, in the workability of the bill.

Mr. LONGWORTH. I assume that under this provision a hotel, for instance, that was worth $1,000,000 would be allowed $100,000 a year—that is, to charge a number of rents which, added together, would produce $100,000 a year.

Mr. TINKHAM. Yes.

Mr. LONGWORTH. Does the gentleman think that any hotel could run on that basis, when you consider the cost of upkeep, of service, and so forth?

Mr. TINKHAM. I no more think that would be possible than I believe this is a practicable bill or that it will stop unfair profiteering.

Mr. ROGERS. Mr. Chairman, will the gentleman yield again?

Mr. TINKHAM. Yes.

Mr. ROGERS. Is it not possible that a hotel could reach the result which it would desire by charging the lodger for the night a price which should include a basis breakfast in the morning? Would not the hotel then be enabled to free itself of the provisions of this bill?

Mr. TINKHAM. Mr. Chairman, that is another difficulty with the bill; and it is pointed out in the minority report that there is absolutely no provision for covering by this tax or this law a hotel or boarding house, or even an apartment house, which sells food besides its space. They are not even included; they are excluded by the very terms of the bill. That is another reason why the minority felt it should oppose the bill, in order either that the bill might be referred back to the committee or rectified from its foundation up, or some substitute which would be more effective passed by the House.

Mr. SANFORD. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. I do.

Mr. SANFORD. The gentleman recognizes one apparently good thing about the bill, does he not, that it undoubtedly gives to every Member of Congress who has become a tenant this year a cause of action by which he could get some of his money back to enable him to pay his income tax? [Laughter.]

Mr. TINKHAM. I hope no one will be influenced by that fact.

Mr. SANFORD. I assure the gentleman I would not; but I wanted to ask him if that is not a fact.

Mr. TINKHAM. I think that might be possible.

Mr. HUSTED. Adverting to the retroactive feature of this bill, am I correct in assuming that the owner who receives the excess rental over and above the amount allowed by the bill, and who pays it through the income-tax provisions of the bill, is also liable to pay twice the amount again to the persons from

whom he received the rental, plus $50 attorney's fee in each case and the cost of the suit? In other words, is it possible under this bill for a landlord who has received this excess rental to be compelled to pay not only the full amount of the excess to the Government, but also to pay back twice the amount of the excess to the persons from whom he received it, plus an attorney fee of $50 in each case and the cost of the action in each particular case?

Mr. JOHNSON of Kentucky. Mr. Chairman, I will say to the gentleman that that is the deliberate intention of the draftsman of the bill. I purposely wrote that into the bill so that that very thing might be done.

Mr. TINKHAM. May I ask the honorable Representative from Kentucky if he means that if after September 30, 1916, an amount in excess of the 10 per cent had been charged, this bill requires, according to his interpretation, that money could not only be turned over into the treasury of the District of Columbia, but also allows the man who received it, who has received it before we have legislated, before it has been declared to be illegal, to be penalized by twice the amount that he received?

Mr. JOHNSON of Kentucky. I will say to the gentleman in answer to that that in drafting the bill I had two ideas in view. One was to treat this along the lines of the present income-tax law of the United States—that is, to make them pay these heavy penalties in the way of income tax—and then, next, to follow the laws relative to national banks concerning usury; that is, to make them pay back double the extortion they have taken, and also to allow an attorney's fee. I am extremely anxious that both should be done. I want to collect everything back that the extortioner has taken from these unfortunate people.

Mr. TINKHAM. I would like to ask this question: Does the gentleman know of any law passed by any State or by the United States in relation to usury or extortion which provides that any person who has taken a larger rate than was allowed by the law before the new law was passed should be penalized by the provisions of the new law—punished for something which was legal under the law and the Constitution at the time the transaction occurred?

Mr. JOHNSON of Kentucky. That might not be constitutional if the law were made by a State, but I do insist that it would be constitutional if made by the National Legislature.

Mr. TINKHAM. I did not ask concerning its constitutionality, but whether there was any precedent. It is unthinkable that there should be or that such a provision should be contained in any law. I did not know that the bill went as far as that. It makes it all the more objectionable.

Mr. JOHNSON of Kentucky. That is exactly what I tried to write, and then I put in in addition a minimum attorney's fee of $50 to be taxed as costs in order to protect the poor people, so that they could find a lawyer who will go after these robbers and get this money back from them.

Mr. STEVENSON. Will the gentleman yield?

Mr. TINKHAM. I will.

Mr. STEVENSON. I certainly did not understand the gentleman from Kentucky. I agree with the gentleman from Massachusetts, that I did not understand the gentleman from Kentucky as I understand the bill. The bill says:

> And any person who shall hereafter pay for the use or occupancy of any real estate, etc.

You do not propose to go back and collect that back which they paid last year, as I understood it from the gentleman's statement?

Mr. JOHNSON of Kentucky. I wish to say, since my memory has been refreshed, that at first I wrote the bill in the way I have just explained, and I had forgotten that subsequent to that I made a change, so we will have to rely upon the bill to speak for itself in that respect. But I would be very glad, indeed, to see done that which I thought had been done.

Mr. STEVENSON. Then I also desire to ask, because I am bothered about that question, how the committee proposes to validate the imposition of an income tax on incomes from real estate which is in the District of Columbia and not the incomes of real estate elsewhere. How do we get around the equality clause of the Constitution, and also, how they propose to get around the fact that they tax incomes from real estate alone and do not tax it from anything else. Those are questions I want to hear something about before I vote.

Mr. TINKHAM. Mr. Chairman, those are some of the questions I would like to have answered.

Mr. STEVENSON. I thought possibly the gentleman was prepared to answer.

Mr. TINKHAM. I am not prepared to answer those questions, because I am strongly opposed to the bill as being unsound and not effecting its purpose. I asked the honorable Representative from Kentucky in committee how he was going to get the bill under the income-tax clause of the United States Constitution, which is a clause of general application to the United States, and then limit the application of the power to the incomes of the people of the District of Columbia. He said that that was easily done by the bill, and he thought it was constitutional. Perhaps it is, I do not know, but the deeper you go into the bill, I think, the more you can raise questions to show that it is unsound. Now, this question of the constitutionality of the taxation is raised in the first objection of the minority report, which says:

> The objections to the bill as drawn are most profound.
>
> First. The rates of taxation upon real estate of the same kind, or used for the same general purposes, are unequal, which is a violation of the first principle of every measure of sound taxation. Under the terms of the bill, if a piece of property were occupied previous to September 30, 1916, the rate then charged plus 10 per cent fixes the income, which in turn fixes the amount of the tax, or if the property were unoccupied or not built at that time, then the assessed value fixes the income, which in turn fixes the amount of the tax, and if by chance the property were a boarding house or hotel where room and board were charged in gross amount, that property under the bill would escape taxation, as no provision of the bill covers property so used; so that in one block there well might be three owners of real estate; one, with his income and consequently his tax fixed on the basis of what he was charging for rental the 30th day of September, 1916, and 10 per cent more; another, with his income and consequently his tax fixed on the basis of 10 per cent of the assessed valuation; and a third, providing room and board in gross amount, not coming within the terms of the bill. This plainly would be unconstitutional, as taxation of the same kind of property must be equal and at the same rate, and not discriminatory.
>
> Second. Section 2 establishes and levies a tax upon all excess above the fixed percentage of rentals in the bill; yet section 5, lines 11–13, declares any contracts or agreements made whereby the tax could be collected "are hereby declared contrary to public policy and unenforceable." In other words, section 2 establishes a tax by the Congress of the United States and in the same law the contracts from which the tax grows and out of which the tax can be levied are declared to be "contrary to public policy and unenforceable."

I do not know, Mr. Chairman, quite how to denominate a situation of that kind. I do not believe there is any bill that has ever been presented to the Congress which established a tax and then makes the tax illegal. It surely is quite anomalous and can not be sound legislation.

Mr. HOWARD. Will the gentleman yield for a question?

Mr. TINKHAM. I will.

Mr. HOWARD. Suppose this tax was uniform within the District of Columbia. The gentleman would not then contend it was unconstitutional, because Congress has exclusive and peculiar jurisdiction over the District of Columbia that it has not in other parts of the country.

Mr. TINKHAM. My answer to that question——

Mr. HOWARD. If it were uniform, that is the point.

Mr. TINKHAM. I have just criticized the bill as not giving uniform taxation to the District, and the question a few moments ago was raised as to the constitutionality of applying the income tax under the income-tax provision of the Constitution and applying it only to the District of Columbia, and I have the query whether perhaps there is not an element of unconstitutionality in that phase of the bill.

Mr. HOWARD. As the bill is written, I do not think the gentleman will contend that anything but incomes from realty is taxed and the imposition of taxes is put upon incomes under the provisions of the bill as written is uniform.

Mr. TINKHAM. In the District, but not throughout the United States, and that is the question whether you can impose——

Mr. HOWARD. The gentleman would not contend that it was necessary to make this bill constitutional?

Mr. TINKHAM. I say there is a query about it.

Mr. HOWARD. Does not the State of Massachusetts impose an income tax and also the Government of the United States?

Mr. TINKHAM. Yes.

Mr. HOWARD. And it imposes it uniformly within the confines of the State of Massachusetts?

Mr. TINKHAM. It imposes its taxes in Massachusetts under its own constitution.

Mr. HOWARD. Yes.

Mr. TINKHAM. The only way the tax is imposed in the District of Columbia on incomes, as I understand it, is under the general income-tax clause of the Constitution, which must apply to the entire United States.

Mr. HOWARD. Will the gentleman contend that this Congress would not have the right, if it saw fit, as a tax measure, to provide for an additional tax to the present income tax uniformly throughout the United States and the District of Columbia?

Mr. TINKHAM. I think it might; yes.

Mr. HOWARD. Then it has the right to impose this tax if it is applied uniformly.

Mr. MEEKER. Will the gentleman yield?

Mr. TINKHAM. I will yield in a moment. I did not raise the question of the constitutionality of the tax on that ground.

Mr. HOWARD. If the gentleman will permit, the gentleman from South Carolina [Mr. STEVENSON] did raise that very point, and the gentleman concurred in his reasoning.

Mr. TINKHAM. I said it might be so.

Mr. STEVENSON. Will the gentleman yield one minute, inasmuch as I have been brought into this?

Mr. TINKHAM. I will.

Mr. STEVENSON. I raised the question because I wanted to get a little light, and I did also raise the question on this taxing of incomes derived in the District of Columbia from only one species of property and not taxing all of them equally and excluding income derived from all other. I ask now if such is not a discriminatory tax?

Mr. HOWARD. If the gentleman from Massachusetts will yield, I would like to answer the question of the gentleman from South Carolina. Will the gentleman yield?

Mr. TINKHAM. I will not. I yield to the gentleman from Missouri [Mr. MEEKER].

Mr. MEEKER. I would like to ask to what extent, inasmuch as the gentleman from Georgia is referring to the State of Massachusetts as an illustration, the State of Massachusetts under its constitution would think of putting such a special tax on the citizens of Boston alone and letting the others go free? Would that be considered constitutional?

Mr. HOWARD. I will answer the question, if the gentleman from Massachusetts will permit. Boston could impose any tax it saw fit as a revenue measure if it was given the right under the constitution to do it, but the State could not tax one city in the State of Massachusetts one way and another city in another way.

Mr. TINKHAM. I think it is conceded that you can not fairly and constitutionally omit certain classes of real estate and include other classes of real estate in a tax measure and those that were included be fixed at different rates.

Now, the third objection found by the minority is as follows:

> Section 3, page 5, lines 14–16, provide that "the said tax and all penalties thereon shall constitute a superior lien on the 'real estate' from which the income has been derived." Section 1 defines the words "real estate" "to include lands, buildings, parts of buildings, houses, dwellings, apartments, rooms, suites of rooms." This would allow a tenant or lessee against the will or wish of the owner to charge the owner's property with a lien, which is utterly indefensible. If the lien can be imposed upon the property by the lessee or tenant, he can put the excess money subject to the tax in his pocket and let the owner pay the tax, which does not stop the evil, because the greatest of the alleged abuses of increased rentals have come through contracts made by lessees with their subtenants. If the bill, when it became law, were construed to apply only to owners of property because no property should be subjected to a lien except by act of the owner, then the greatest of the alleged abuses as indicated would not be reached. If the bill, when it is passed, were construed to allow the lessee or tenant to create a lien upon the property of the owner, no responsible landlord would let a house or building to people who let rooms, as he would not want to run the risk which the bill would impose upon him and his property, which in turn would reduce rooming facilities in Washington when they are most needed.
>
> The bill only provides for the collection of the tax in the way indicated.

Mr. PAIGE. Will the gentleman yield?

Mr. TINKHAM. I will.

Mr. PAIGE. I have been very much interested in this discussion, and I would like to ask my colleague which he thinks will be the easiest, to carry out the provisions of this law or to win the war?

Mr. TINKHAM. I shall have to be frank and say, Mr. Chairman, that I do not know.

Now, the answer by the majority of the committee to the third objection of the minority and in the debate which has just occurred was that all leases in the District of Columbia contain a clause saying that the consent of the landlord must be obtained, and therefore if the consent of the landlord must be obtained he was charged with knowledge, and if his tenant practiced extortion he should be held. But nearly all small property and nearly all lodging houses, as distinguished from apartment houses, are not let by landlords upon formal leases. That is true in the District of Columbia and it is true in all of the large cities of the United States. Large buildings, apartment houses that are of large value, are let, it is true, on leases, and very often it is the custom to require that the tenant—that is, the lessee—must obtain the consent of the landlord to sublet. But there are thousands of houses, tens of thousands of houses, perhaps, worth no more than from $6,000 to $10,000, or $12,000, or $15,000, where there are no leases, and that is true in the District of Columbia. Now, where there are no leases, so far as this bill provides, a tenant against the will and without notice to his landlord, can charge the property with a lien. So the third contention of the minority, it seems to me, is properly sustained.

Mr. SNOOK. Will the gentleman yield?

Mr. GOULD. Mr. Chairman——

Mr. TINKHAM. I will.

Mr. SNOOK. The chairman of the committee, the gentleman from Kentucky [Mr. JOHNSON], stated——

The CHAIRMAN. To whom does the gentleman from Massachusetts [Mr. TINKHAM] yield?

Mr. GOULD. Mr. Chairman, I make the point of no quorum.

Mr. SNOOK. The gentleman from Kentucky stated that the income tax——

Mr. GOULD. Mr. Chairman, I make the point of no quorum.

The CHAIRMAN. The gentleman from New York makes the point of no quorum. The Chair will count.

Mr. GARRETT of Texas. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WALSH. A point of order, Mr. Chairman. I rise to a point of order. The gentleman can not state a parliamentary inquiry during the ascertainment of a quorum.

The CHAIRMAN. The point of order is well taken. The Chair has counted 59 Members present, and the Clerk will call the roll.

Mr. GARRETT of Texas. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Texas rise?

Mr. GARRETT of Texas. I make the point of order that the gentleman is out of order, because he can not take another Member off his feet in the midst of his speech.

The CHAIRMAN. The Chair may be inaccurate in his ruling, but it has been held that he can. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Alexander	Estopinal	LaGuardia	Rubey
Anthony	Fairchild, G. W.	Lea, Cal.	Sabath
Ashbrook	Fields	Lenroot	Sanders, Ind.
Austin	Flynn	Lever	Sanders, La.
Beakes	Francis	Littlepage	Schall
Bell	Freeman	Lunn	Scott, Pa.
Brodbeck	Gandy	McArthur	Scully
Butler	Gard	McCormick	Sears
Byrnes, S. C.	Garland	McLaughlin, Mich.	Shackleford
Capstick	Godwin, N. C.	McLaughlin, Pa.	Shallenberger
Chandler, N.Y.	Goodall	Magee	Siegel
Collier	Gordon	Maher	Slemp
Copley	Graham, Pa.	Mann	Small
Costello	Gray, Ala.	Miller, Minn.	Smith, C. B.
Crago	Gray, N. J.	Mondell	Snyder
Crisp	Greene, Vt.	Montague	Stedman
Curry, Cal.	Hastings	Morin	Steenerson
Dale, N. Y.	Hayden	Mudd	Sterling, Ill.
Davidson	Hayes	Neely	Sterling, Pa.
Davis	Heflin	Nicholls, S. C.	Strong
Dent	Heintz	Olney	Sullivan
Dill	Hollingsworth	Peters	Tillman
Dooling	Hood	Platt	Vare
Dowell	Houston	Pou	Ward
Drane	Hull, Iowa	Price	Watson, Va.
Drukker	Humphreys	Rainey	Webb
Dunn	Johnson, S. Dak.	Rankin	Welling
Dupré	Johnson, Wash.	Riordan	Wilson, La.
Dyer	Jones, Va.	Robinson	Wood, Ind.
Edmonds	Kahn	Rodenberg	Woodyard
Esch	Kincheloe	Rowland	

Thereupon the committee rose; and the Speaker having resumed the chair, Mr. RUCKER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill (H. R. 9248) to prevent extortion, to impose taxes upon certain incomes in the District of Columbia, and for other purposes, and finding itself without a quorum, he had caused the roll to be called under the rule, and 305 Members had responded, and he furnished a list of absentees to the Clerk for printing in the RECORD.

The SPEAKER. The committee will resume its sitting.

The committee resumed its sitting.

The CHAIRMAN. The gentleman from Massachusetts [Mr. TINKHAM] is recognized.

Mr. SNOOK. Mr. Chairman, will the gentleman yield?

Mr. TINKHAM. I yield to the honorable Representative from Ohio.

Mr. SNOOK. When I was interrupted by the roll call I was endeavoring to ask the gentleman a question. The distinguished chairman of the committee [Mr. JOHNSON of Kentucky], as I understood him, in his argument said that the provisions of this bill applied to cases of subleasing. For illustration, let

me put a concrete case. If a person leased an apartment and then furnished it with furniture completely and leased it for the years 1916 and 1917 for $100 a year and then increased the rent to $200 a year for the present year, where is there any provision in this bill that applies this income tax to a rental of that kind?

Mr. JOHNSON of Kentucky. Mr. Chairman, will the gentleman let me answer in one word?

Mr. TINKHAM. I do not object to the honorable Representative from Kentucky answering it.

Mr. JOHNSON of Kentucky. The answer is that all incomes derived from unfurnished real estate in excess of 10 per cent are taxed.

Mr. SNOOK. I will point out that this income is not entirely received from real estate. It is income from mixed property, from real estate and personal property combined, and the definition of "real estate," as set out in the first paragraph of the bill, does not cover it.

Mr. JOHNSON of Kentucky. But the gentleman will see there is a clause in the bill that takes care of furnished apartments. There the owner is allowed 15 per cent, whereas the owner is allowed only 10 per cent advance for unfurnished apartments.

Mr. SNOOK. Is that in cases where they have not rented them before?

Mr. JOHNSON of Kentucky. I think it applies to the whole situation.

Mr. TINKHAM. Now, Mr. Chairman, the fourth objection of the minority is as follows:

No distinction is made in the bill between real estate which is let or leased bare of service and heat and those which are let and leased with service and heat; yet the same rate of increase, namely, 10 per cent, is only allowed for each; nevertheless, since September 30, 1916, maintenance and supplies have increased 50 per cent or more in the District of Columbia, coal over 100 per cent, with a great decrease in quality, and the cost of services also has greatly increased.

Criticism was made during the debate that the price charged for coal in the District had not increased 100 per cent. Perhaps it has not. My information was—the best I could obtain—that it had; but for the sake of the argument I am willing to correct the statement there made and admit it is wrong, if it is, and say that there has been an increase in the price by 50 per cent. It will not affect the validity of the objection against the bill now being made by me.

Further:

To fix an arbitrary figure the same for both classes of property is unfair and discriminatory. The cost of all maintenance, supplies, and services are advancing and undoubtedly will advance during the continuance of the war; yet the bill fixes, irrespective of these increases, past, present, and future, a rigid limitation on the income until a year after the war has come to an end.

It seems to me, Mr. Chairman, the statement in the report is clear enough. It does not discriminate between property which supplies no services, heat, and so forth, and property which supplies much services, heat, and so forth, and yet the limitation of return is the same, which means that the person who owns property and does not render services, heat, and so forth, will receive more of an income under the bill, if it is passed, than the person who has the same character and kind of property who is supplying services, heat, and so forth, and who has had to pay and will have to pay an increasing amount for these things.

Mr. JOHNSON of Kentucky. The gentleman understood me there that I was going to offer an amendment as to that.

Mr. TINKHAM. Now, the fifth reason why the bill, according to the minority report, should not be passed in its present form is that——

Under the terms of the bill no distinction is made between residential and business property. The Government has made contracts with owners of business property which this bill would make void. Legislation which makes void contracts and agreements entered into in good faith and voluntarily before the passage of the bill is a vicious exercise of legislative authority, if it is constitutional.

Now, I do not say that it is unconstitutional. I rather think contracts, under the Constitution, can be made void that have been entered into in good faith, so far as the United States laws are concerned, so that I lay no emphasis on that element in the objections to this bill. But we contend further in the minority report that—

The effect of the bill, if passed, must be to prevent the renting of property of this class, whereas the policy of the Government has been to promote the leasing of such property for the use of its own departments and that of its contractors, who are coming to the District of Columbia in increasing numbers. Many of the owners of such property, if their leases were automatically canceled by this law, might demand their property back, not being satisfied with the return allowed under the bill and the conditions imposed by it.

The sixth objection to the bill is as follows:

There is always a serious and profound objection to making legislation retroactive. In relation to this particular measure, it can be said that this is unusually true. Many people in the District of Columbia, who, since September 30, 1916, leased their residential property at advances in excess of those allowed by the bill and with the assurance of the increased income, and have made new arrangements for themselves and families by agreements and leases, with the understanding of what their income would be, would have their arrangements seriously affected, although their agreements and leases, both with their tenant on the one hand, and their landlord on the other, were made in good faith and would be most unfair to them.

Mr. Chairman, the seventh objection to this bill found by the minority is as follows:

Section 5 does not plainly state that the landlord as well as the tenant can avoid the lease if made in excess of the stipulated rates, even although such a lease is declared against public policy and unenforceable. If the tenant or lessee has the right to avoid his lease made since September 30, 1916, the landlord should plainly have the same right, in which case many landlords, if compelled to take lower rentals, might take back their property.

This would include Government property—that is, property leased to the Government—of which there is much in the District of Columbia leased since September 30, 1916.

Now, the eighth objection is that—

In section 3, page 4, lines 16 and 17, a return must be made to the assessors every month. This feature is not only vexatious but would cause a large increase in the cost of maintenance of the assessor's office.

I would like to ask the honorable Representative from Kentucky if he knows of any other law under which a monthly return is made? If so, I should be pleased to be informed of it.

Mr. JOHNSON of Kentucky. No; I do not; and I provided for monthly returns instead of annual returns so as to give these profiteers just as much trouble as possible. [Laughter and applause.]

Mr. TINKHAM. The ninth objection of the minority is that—

The rentals for the District of Columbia on the basis of 1916 as a standard as taken in the bill are distinctly unfair, as 1916 rentals were very low. There were 8,000 to 10,000 vacant houses during that year, owing to the attraction of many of the population to munition factories and to other employment outside of the District. In many of the poorer sections of the District of Columbia rents have not been increased over the 1916 standard, but if this bill is passed it might well be a suggestion and incentive to the owners of this class of property to increase their rentals over those now in vogue by 10 per cent.

The tenth objection is that—

An extensive campaign is being made among the residents of the District of Columbia to house new Government employees who are coming here to the District in large numbers. With such a law in effect as proposed many residents would undoubtedly refuse their facilities, as they would not desire to run the risk of becoming involved with such a law as is proposed in this bill.

Now, Mr. Chairman, only one word in closing, and that is this, that the minority of the Committee on the District of Columbia are as sincerely desirous of stopping unfair profiteering in the District of Columbia, or in any other part of the United States, as the majority, or the honorable Representative from Kentucky, Mr. JOHNSON; but they do not want to pass a bill which they believe is not only unconstitutional, in at least one of its phases, but unworkable, and which will not produce the results which are believed by both sides to be desirable. I therefore believe that one of three courses should be followed in relation to this bill: As no hearings were given and only an hour and a half given to the consideration by the committee, it should be referred back to the committee for reformation, or——

Mr. JOHNSON of Kentucky. Will the gentleman yield just there?

Mr. TINKHAM. I will.

Mr. JOHNSON of Kentucky. Would the gentleman advocate giving burglars and thieves a hearing in preparing laws to stop them from their practices?

Mr. TINKHAM. Mr. Chairman, I do not know how to reply to that question, I am frank to say. I am going to let it remain in the RECORD exactly as it was spoken, without any reply.

Mr. SMITH of Idaho. Mr. Chairman, I understand the people interested in this bill had an opportunity to be heard and declined to appear before the committee.

Mr. TINKHAM. That is not so.

Mr. SMITH of Idaho. Did not the chairman so state?

Mr. JOHNSON of Kentucky. I say most emphatically that Mr. Fairfax and the other gentlemen who came to me with their written objections to this bill said that they wanted to come to me alone with them, and not before the committee, and they came twice.

Mr. FOCHT. All right, Mr. Chairman. We have just had read into the RECORD a letter from Mr. Fairfax, in which he said they did want a hearing.

Mr. JOHNSON of Kentucky. I thoroughly agree with the gentleman as to that feature of it. They wanted a hearing to-day.

Mr. FOCHT. They want a hearing, and this House ought to do them the justice to let them be heard.

Mr. JOHNSON of Kentucky. They want all the hearings that will make delay, and they do not want any more hearings.

Mr. FOCHT. As far as Mr. Fairfax is concerned, I resent the impeachment that he is other than a reputable gentleman, and asks only fairness.

Mr. BENJAMIN L. FAIRCHILD. In all fairness to Mr. Fairfax, the chairman of the committee will agree that subsequent to the date when the chairman had that conversation with Mr. Fairfax about a conference with the chairman alone, there was an endeavor between the chairman and Mr. Fairfax to fix a date for a hearing.

Mr. JOHNSON of Kentucky. Either yesterday or to-day.

Mr. BENJAMIN L. FAIRCHILD. And they supposed it was for this morning, and there was a misunderstanding between the two, and as a result there was no hearing.

Mr. JOHNSON of Kentucky. I have not intentionally said anything reflecting on Mr. Fairfax, and I agree with everything you say about him.

Mr. BENJAMIN L. FAIRCHILD. There has been no hearing, because of a misunderstanding about the date.

Mr. JOHNSON of Kentucky. There was no hearing yesterday, because of a misunderstanding between Mr. Fairfax and myself; but Mr. Fairfax was before me with a number of other gentlemen upon two previous occasions, when we sat for hours at a time discussing the bill.

Mr. FOCHT. But there was no hearing before the committee.

Mr. JOHNSON of Kentucky. It was not my fault, because they came and asked to see me alone, and I saw them, according to their request.

Mr. TOWNER. Will the gentleman yield to me?

Mr. JOHNSON of Kentucky. I will.

Mr. TOWNER. I would like to ask the chairman of the committee a question. It seems to me that perhaps a matter vastly more important than the desire of the persons who may be interested in this legislation is the question as to whether or not it is constitutional and right. The gentleman knows well—better than almost anybody else on the floor of the House—that the limitations on the powers of Congress with regard to taxation in the District of Columbia are exceedingly ill-defined. Congress is the legislative body of the District of Columbia, and yet constitutionally there are no statements affecting the powers of Congress to tax the people of the District of Columbia. Now, whether the ordinary constitutional limitations apply, or whether common-law limitations, which are still greater and more strict, will apply in a case of this kind, I confess that I have not had time or opportunity to examine. This is such a novel piece of legislation, does not the gentleman from Kentucky think that it would be advisable that at least final action on it should go over until Members of Congress have an opportunity to give the matter more consideration?

Mr. JOHNSON of Kentucky. I will say, if I may be permitted, in answer to the gentleman from Iowa, that only a few years ago a bill was before Congress which some of the ablest minds in both branches of Congress pronounced to be unconstitutional. The President of the United States, in my judgment one of the greatest lawyers in the country—President Taft—vetoed the bill because he thought it was unconstitutional, but since then the Supreme Court of the United States has decided that it was constitutional. I think these people ought not to be permitted to rob the citizens of this District one day while the discussion goes on as to whether it is constitutional or not.

Mr. TOWNER. The gentleman's statement in regard to the matter only emphasizes the fact that I stated a moment ago as to the uncertainty of the constitutional powers of Congress as to taxation in the District of Columbia. I agree with the gentleman that no one should be allowed to rob anyone else in the District of Columbia for a single day longer, but the gentleman is too good a lawyer to desire, I am sure, questionable legislation to be passed when it may result in not accomplishing what he and we all desire, the prevention of extortion, because it may be unconstitutional.

The CHAIRMAN. The gentleman from Massachusetts has three minutes remaining.

Mr. TINKHAM. Mr. Chairman, if this bill is not recommitted to the committee, the next course which should be pursued is to substitute a bill which I will propose at the proper time for this measure, which I think will correct the evil and accomplish much better than the bill that is before the committee in its present form what the honorable Representative from Kentucky desires to have accomplished. I think the bill as it is now presented to us is vicious and should be defeated. [Applause.] Mr. Chairman, I reserve two minutes of my time.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. RUCKER having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 3433. An act requiring the Government to furnish uniforms to officers of the Army, and for other purposes.

TAXES ON INCOMES, DISTRICT OF COLUMBIA.

The committee resumed its session.

Mr. JOHNSON of Kentucky. Mr. Chairman, how much time has the gentleman from Massachusetts used?

The CHAIRMAN. The gentleman from Massachusetts has 32 minutes remaining.

Mr. TINKHAM. Mr. Chairman, I yield 30 minutes to the gentleman from Michigan [Mr. MAPES].

Mr. MAPES. Mr. Chairman, there has been some discussion about the question of hearings on this bill before the committee. There were no hearings on it. The bill was introduced January 25, as will be seen by reference to the date on the bill. The Committee on the District of Columbia voted to report it out on February 1, at the first meeting of the committee after it was introduced. After the committee had voted to report the bill out, a motion was made and carried to have hearings on it, but no hearings have been had.

I am in favor of the purpose sought to be accomplished by the bill, as stated in the report of the committee, namely, to stop the practice of extortion and profiteering in rents in the District of Columbia. As far as I am concerned, I am not at all alarmed about its not being a proper function of the Government to do so; but as to the constitutionality or unconstitutionality of this particular bill, I shall leave that for others to discuss and shall confine myself to a discussion of it upon its merits, regardless of the constitutional question.

Everyone knows of the crowded condition of the city and the difficulties involved in securing proper housing facilities within the District on reasonable terms, or, as a matter of fact, on any terms at all, for the greatly increased number of Government employees coming to Washington since the declaration of war; and no doubt everyone here has heard of instances where the rent for houses and apartments has advanced to an enormous and outrageous extent, although it is only fair to say that disinterested people of responsibility who have investigated the conditions declare that such increases are by no means universal.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. MAPES. I yield to my colleague from Michigan.

Mr. SMITH of Michigan. I have heard it reported that before the 1st day of the coming August the number of clerks in the different departments on account of the war activities will be increased by 20,000.

Mr. MAPES. I have seen substantially that same statement. The committee held no hearings and has no official information to present to the House. Congress should, however, do all that it can and take whatever action is necessary to prevent the possibility of extortion or profiteering in rents in any case.

The pending bill, however, in order to be made workable and in order that it may not aggravate the housing difficulties in the District, which it, of course, proposes to relieve, ought to be amended in some important particulars.

All price-fixing legislation of whatever nature is important and deserves careful consideration. As a member of the Committee on the District of Columbia, I regret that that committee did not see fit to give legislation of so great importance more consideration and perfect this bill or report one which represented the consensus of opinion of at least a majority of the members of the committee after mature and careful deliberation.

There has been something said about the time this bill was considered in the committee. It so happened that I looked at my watch on the morning that the committee met as I stepped into the committee room. It was 20 minutes of 11 at the time, and the committee had not then been called to order. I looked at my watch after it had adjourned, and it was not quite 20 minutes of 12; so that the committee was in session a little less than one hour. During that time the chairman had read the bill, there had been several aye-and-no roll calls of the committee, and whatever consideration was given to the bill and

its different provisions was given within that time, a trifle less than one hour.

Mr. BENJAMIN F. FAIRCHILD. Had the bill been considered by any subcommittee?

Mr. MAPES. It had only been introduced about a week before, and the committee had not considered it at all.

Mr. BENJAMIN F. FAIRCHILD. Neither the committee or a subcommittee?

Mr. MAPES. Neither the committee nor any subcommittee. The bill was voted out of the committee at one session of less than one hour's duration without any adequate opportunity being given for amendment or discussion 10 days before it could possibly be considered under the rules in the House. One of the apologies for this action was that the bill could be considered, discussed, and amended in the House, although that, of course, is the duty of a committee and might more appropriately have been done for several days by the committee in this instance without losing any time or without delaying the passage of the bill a single hour. In fact, it would in all probability have expedited its final passage through the House. At any rate it would not then have been necessary to convert the House into a standing committee.

The matter of rent is so intimately connected with the shortage of houses, apartments, and rooms to house the people constantly coming to Washington, and apparently in increasing numbers as the war continues, that the two can not be separated in any proper consideration of the subject.

Tuesday the House passed a bill reported by the Committee on the Merchant Marine and Fisheries, which had already passed the Senate, authorizing an appropriation of $50,000,000 to enable the Government, through the Shipping Board, to buy and build houses for the employees of the shipyards.

The chairman of the Committee on Labor of the House has introduced a bill prepared and recommended by the Department of Labor authorizing an appropriation of another $50,000,000 for the purpose of enabling the Government, through the Secretary of Labor, to buy or build houses for employees of the Government generally and for industrial workers engaged in industries connected with the national defense and security and for their families during the war.

Mr. Whitaker, one of the experts who testified at the hearing before the Committee on the Merchant Marine and Fisheries during the consideration of the bill reported by that committee at the instance of the Shipping Board, testified that his "study of this question of housing dates back over 20 years, and so far as this immediate project is concerned"—that is, the proposition of housing the employees of the shipyards—"it dates back," he continues, "to when I was asked by the War Department to draft a program on account of some serious difficulties in the production of munitions. * * *

"Since that time this project has passed through a great many stages. The Council of National Defense have had two separate committees at work; they have held a great many hearings and taken a great mass of testimony."

And yet the Committee on the District of Columbia, without, I dare say, a member who has ever given the subject any special consideration, solves the problem for the District of Columbia in less than one hour's time. Why should these other agencies of the Government be permitted to waste their time and ability in such a manner when the District Committee could solve their difficulties for them so promptly?

The conclusion reached by the Shipping Board and the Secretary of Labor after consideration of the subject is that the Government should build houses and keep down the rents by increasing the supply and fixing a reasonable rent for the Government houses.

The pending bill may provide an effective method of keeping down the rents within the District, but there are other questions of equal importance involved which ought to be considered if the great influx of Government employees on account of the war is going to be properly housed. The man who is out looking for a place to sleep these cold winter nights is as much concerned over finding a place to stay as he is over the price he has to pay after he finds it, and it is fair to assume that the owners of real estate will find little in this bill to encourage them to increase their housing facilities to relieve an already overcrowded condition.

Personally I believe that in addition to any bill limiting the charges for rent some action will have to be taken by the Government to build accommodations for the people within the District of Columbia similar to that proposed by the Shipping Board and the Secretary of Labor. The housing facilities are already greatly inadequate and it is estimated that upward of 20,000 additional Government employees will come to Washington during the current year, as my colleague from Michigan [Mr. SMITH] states.

In this connection it seems to me that people who are not Government employees or who have no business with the Government ought to keep away from Washington at the present time. The housing facilities are too limited and the number of people who are actually obliged to be here is so great that the city ought not to be made a resort for the retired and pleasure seeking part of society during the war. Before coming here they may well ask themselves whether they have the moral right to come and preempt the already grossly inadequate supply of housing and hotel accommodations, thereby depriving the necessary Government employees of them. In my opinion they have had more to do in causing the greatly increased rent and other living expenses within the District than anything else. With more money than discretion they come to Washington and are willing to pay temporarily almost any price for furnished houses or hotel accommodations.

The pending bill proposes to take a sort of prewar period of 18 months prior to September 30, 1916, to determine the normal or fair income from rents on property within the District and then to levy a tax, to be paid to the District of Columbia, of 100 per cent on all above 10 per cent that the gross income from rent since December 21, 1916, exceeds the gross income from rent for an equal period of time during the prewar period, that is, the 18 months prior to September 30, 1916. In other words, if the income from rent since December 31, 1916, or any part of such time is more than 10 per cent greater than it was for an equal period of time during the 18 months prior to September 30, 1916, this bill proposes to tax and collect all of such excess from and after December 31, 1916, until one year after the signing of the treaty of peace between the Imperial German Government and the Government of the United States.

All leases and agreements to pay more than the 10 per cent paid during the prewar period are declared to be against public policy and unenforcible, and in addition to the tax of 100 per cent the bill authorizes any person who shall pay more than the 10 per cent received during the prewar period after the passage of the act to sue and recover double the amount thereof and the costs of suit, including a reasonable attorney's fee of not less than $50.

It is safe to conclude that if this bill is enacted into law no one will accept for the rent of his property within the District more than 10 per cent over what he received during this prewar period. If he does he will be required to pay back to the District government and his tenant three times the amount—100 per cent to the District government and 200 per cent to the tenant—in addition to costs of suit and an attorney's fee of not less than $50.

Mr. HILLIARD. Will the gentleman yield?

Mr. MAPES. Yes.

Mr. HILLIARD. What effect would that have on the real estate men?

Mr. MAPES. I think it would stop the increase of rentals in the District, as I have stated.

Mr. HILLIARD. That is the present purpose of the legislation, is it not?

Mr. MAPES. I have so stated in my remarks.

The bill provides that the 100 per cent tax to the District government shall date back to December 31, 1916. There was some criticism about the retroactive features of the income-tax provisions proposed in the war-revenue bill of last year. They were finally stricken from that bill, but they did not compare with the retroactive features of this bill. In addition to this 100 per cent tax provided for in this bill, the owners of real estate within the District have paid or must pay under the general law the same income tax for last year as anyone.

Allowing the prewar period to remain as the 18 months prior to September 30, 1916, for the purpose of arriving at the proper rent, the 100 per cent tax ought not in good conscience to apply to any income received prior to December 31, 1917, and the bill should be amended in that respect. With that amendment this provision would still date back to the first of this year and would reduce rents at once to the normal level of the prewar period plus the 10 per cent allowed by the bill, and would accomplish what the bill aims to accomplish, namely, the reduction of rents.

One of the principal abuses as far as this rent question is concerned is the rerenting of leased apartments by tenants. They lease an unfurnished apartment, put a little furniture in it, and rerent it at a greatly advanced price, in some cases several times the amount received by the owner or the original lessor. It seems to me there is more or less uncertainty as to whether the

bill covers lessees and sublessees and that it should be amended so as to clearly include them.

Mr. CAMPBELL of Kansas. Mr. Chairman, will the gentleman yield?

Mr. MAPES. Yes.

Mr. CAMPBELL of Kansas. Did the committee ascertain the amount of subletting that is now being done in the District?

Mr. MAPES. It did not. The committee held no hearings, as I said before.

Mr. CAMPBELL of Kansas. Held no hearings on the bill?

Mr. MAPES. Held no hearings on the bill.

Mr. CAMPBELL of Kansas. I do not know, but I think it would be interesting for the House to know the amount of subletting that has been done at enormously increased rents. I have been told that the owner who makes a lease has had very little to do with the enormous rents that are being charged up to the tenants who are occupying the property, and that the vice is in the subletting. A few hundred dollars' worth of furniture is put into an unfurnished apartment and that is leased for sometimes three times the amount of the original rent.

Mr. MAPES. I think every Member of the House has heard of a great many instances of that kind. How general it is I have no way of telling.

Mr. KELLEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MAPES. Yes.

Mr. KELLEY of Michigan. In the case which my colleague cites, of a subtenant furnishing an apartment and leasing, this bill presumes to make the excess tax a lien against the real estate. What does my colleague think of that as a legal proposition?

Mr. MAPES. I am just about to discuss that.

Mr. JUUL. Mr. Chairman, will the gentleman yield?

Mr. MAPES. For a brief question. My time is limited.

Mr. JUUL. In the matter of the retroactive features of the bill as discussed by the gentleman, does the gentleman want that the people who have safely deposited the result of their extortion in the banks should get away with it, and that what we have suffered, if we have suffered, to date should be forgiven and forgotten?

Mr. MAPES. I doubt whether there was very much of this excessive charging for rent prior to a very few months ago, and my suggestion is that the retroactive provision date back to December 31, 1917.

Mr. JUUL. I can give the gentleman a case where people remaining in a place were boosted 60 per cent in the rent from one month to the next.

Mr. MAPES. And I dare say that that was only a short time ago, perhaps since December 31, 1917. It is of course indefensible. If the bill should pass it would immediately reduce the rent to the prewar rent, which is the purpose of the bill.

The owners of real estate complain that the tax is made a lien upon the property, even though the lessee and not the owner is the profiteer, but the interests of the owner can probably be safeguarded in this respect, for the future at least, by the clause usually inserted in leases against subletting without the consent of the owner.

It is impossible, however, to justify or reconcile the retroactive feature of the tax in so far as this practice of subletting at greatly advanced rates is concerned, assuming that it covers it with the provision of the bill which makes the tax a lien on the property. The owner must pay the tax to protect his property, even though he received no benefit from the excessive rent, and no matter how much he may have regretted the action of his tenant in rerenting at the advanced rate, and even though the original lessee, the only profiteer in the case, may be wholly irresponsible and now out of the jurisdiction of the District. The constitutionality of this feature of the bill may well be questioned. Can one man's property be taken to redress the wrong of another? But this provision goes still further—it levies a retroactive tax on the income of one man not subject to taxation at the time or during the period for which it is levied and makes that tax a lien on the property of another.

Those who have been making a disinterested study of the housing conditions in the District say that one of the real problems is to prevail upon the residents of the District who have not heretofore done so to open their homes and to rent one, two, or three rooms to the employees of the Government. It seems to me that the provisions of the bill are unworkable, as far as the renting of an individual room in a home is concerned, and would tend to keep people from doing this very desirable and much-needed thing rather than to encourage them to do it. No legislation should be passed which would have that effect or tendency, and the bill should be amended so as to exempt private families who are willing to thus open their homes.

The bill provides that in case no income was received from property during the prewar period of 18 months prior to September 30, 1916, the owner shall be allowed a gross income equal to 10 per cent of the value of the property producing the income, including furniture, if any, "as determined by the assessor of the District of Columbia," before the operation of the 100 per cent tax. That provision would be unworkable as far as the renting of an individual room in a private family is concerned. It would not be practicable to secure a separate valuation of the separate rooms throughout the District, and a roomer in a private home ought not to be required to pay 10 per cent of the value of the entire place for a single room.

The value of the property as determined by the assessor of the District of Columbia is made the basis of calculation, but the bill does not state whether by that is meant the present assessed valuation or whether the assessor is to make a special valuation in order to carry out the provisions of the act. If it means the present assessed valuation, then it must be remembered that real estate within the District is now assessed at two-thirds of its actual value, not its full value. Two-thirds of 10 per cent is 6⅔ per cent, so that the bill actually allows the owner of real estate who wishes to rent property now that was not rented during the prewar period to receive a gross income of 6⅔ per cent only on the actual value thereof. Of course the net income would be less than that, how much less depending upon the nature of the property and the uses to which it is put.

Mr. JOHNSON of Kentucky. Mr. Chairman, will the gentleman yield for a statement there?

Mr. MAPES. Yes.

Mr. JOHNSON of Kentucky. I have already said that it was not the purpose of the bill to base this 10 per cent or 15 per cent upon the appraised value, and inasmuch as several gentlemen have read the bill in that way, I have already said that I have an amendment prepared to take care of that situation; but even if that were the case the assessed valuation is three-thirds, and then only two-thirds of it are taken for taxing purposes.

Mr. MAPES. I congratulate the chairman on having changed his attitude from what he assumed in the Committee on the District. I am glad to see that he is now proposing certain amendments to the bill which I think will improve it.

Mr. JOHNSON of Kentucky. If the gentleman had heard all of my remarks, he would have heard of another amendment that I proposed to offer.

Mr. MAPES. I heard those statements. I only regret that the gentleman did not see fit to have the committee consider them and put those and other amendments in the bill.

Mr. JOHNSON of Kentucky. I did not want all the teeth taken out of it.

Mr. MAPES. There might have been some teeth put in, as far as some provisions are concerned.

Mr. MADDEN. Mr. Chairman, will the gentleman yield there?

Mr. MAPES. Yes.

Mr. MADDEN. The net income from the property would be this much less. Under the revenue law 4 per cent depreciation is allowed on all property, but the average depreciation per annum on building property is 5 per cent. That is the average experience. The taxes in the District of Columbia are 1½ per cent. That makes 6½ per cent. The average vacant period for a building is 2½ per cent. That makes 9 per cent. So that in the best circumstances all the owner of the property would get would be 1 per cent.

Mr. MAPES. All of those matters have to be taken into consideration.

Mr. JOHNSON of Kentucky. Will the gentleman permit me to interject a remark right there?

Mr. MAPES. I am sorry, but I have only a few minutes left.

Mr. JOHNSON of Kentucky. Just one second. That depreciation of 5 per cent a year would make the house absolutely valueless after it was 20 years old.

Mr. MADDEN. Almost every house has to be reconstructed at the end of 20 years.

Mr. JOHNSON of Kentucky. It has not in our section of the country.

Mr. MAPES. If this provision should go into effect unchanged, there will be little inducement for private enterprise to build additional housing accommodations within the District with the practical certainty of a material reduction in the income to be derived therefrom as soon as the war stops, and limited to a gross income of 6⅔ per cent on the capital invested for the period of the war, uncertain and indefinite as that period is.

Another clause in the bill states that in case the property was rented unfurnished during the prewar period and is rented furnished during the taxable period, the owner is allowed an

increase of 15 per cent before the application of the tax of 100 per cent.

It should be borne in mind that the law exempts from assessment and tax furniture within the District to the value of $1,000. If the value of furniture is $1,000 or less, there is no record of it at all in the assessor's office. That being the case, if the present assessment system is to prevail, it is safe to say that no new furnished apartments will be rented within the District unless the furniture in them exceeds in value $1,000, because no allowance in computing the income could be made for such furniture.

What is to be done with the large apartment houses containing a great number of suites of rooms, a part only of which may have been rented during the prewar period? Are the owners to be limited to the 10 per cent over the income which they received during the prewar period on a part only of their buildings, or are they to be allowed a gross income of 10 per cent of the value of the property as determined by the assessor of the District of Columbia, as in the case of property not rented during the prewar period, or are they to receive an increase of 10 per cent over the prewar period for the rooms rented during that time and 10 per cent of the value of the property as determined by the assessor for those not rented during the prewar period? Will it not be an interminable, if not an impossible, job for the assessor to determine the value of the individual rooms or suites of rooms in the houses and apartments throughout the District?

If the clause "the valuation of the property as determined by the assessor" means the present valuation, then the bill is unworkable, because there is now no separate valuation of individual rooms or suites of rooms or of furniture unless the value thereof exceeds $1,000. If it means that the assessor is hereafter to determine the value of these individual rooms and suites of rooms for the purposes of the act, then the bill creates positions for a great many deserving Democrats in the assessor's office.

These are some of the practical difficulties that will be met in the operation of the provisions of the bill if it is enacted into law as it now reads. Others will readily suggest themselves to anyone who studies the bill.

Congress has created since this war started several agencies to fix the price of different commodities. The President, through the Fuel Administration, is authorized to operate mines, distribute coal, and fix its price. Through the Food Administrator he is authorized to regulate the distribution and fix the price of a great many food products. One way of solving the rent problem would be to have a board appointed to fix the rent of property within the District of Columbia. If the bill goes into effect, there should be created a board of some kind to put it into practical operation.

Mr. RAGSDALE. Will the gentleman yield?

Mr. MAPES. I have very little time left.

Mr. RAGSDALE. For only one question. On these various boards that would be created, would not there be some Democratic appointments and enjoy the objection made by the gentleman to the other created?

Mr. MAPES. I am not making any objection to the bill on that ground. I am only calling attention to the fact.

Mr. RAGSDALE. Oh, yes.

Mr. MAPES. It does not make sufficient provision for the changed conditions now prevailing within the District over those of normal times. People are occupying a great deal less space than formerly. There are more people in an apartment. Where one person formerly had a room, two or three are now occupying it. I have heard of an instance where there were as many as five now in a room formerly occupied by one, and of another case where a father and mother and two grown children were occupying an apartment in one of the leading apartment houses of the city composed of only one room and a bath. If the owners in such cases are obliged to rent their places for the same income as they received during the prewar period, it is safe to say that many of these people will be obliged to move out into the street. The owners can get the prewar price without any trouble by accommodating only the same number of people that they did in the prewar period. After we pass this bill we may have to supplement it with additional legislation compelling the owners to open their places for rent and telling them how many they may or must put into a given place.

Limiting the charge for rent to 10 per cent over that received during the prewar period in all cases where the property is used for practically the same purposes as it was during the prewar period will not work a hardship upon anyone, but some allowance ought to be made for those cases where the property is put to a different use or where conditions have materially changed.

An amendment to the bill should be adopted providing for the creation of a rent administrator or board with authority to change the rates provided for in the bill under changed conditions where the facts justify it, but requiring the rates fixed in the bill to remain until and except they should be changed by said rent administrator. I shall introduce an amendment of that kind, and I believe its adoption would do away with many of the objectionable features of the bill.

Mr. RAGSDALE. Will the gentleman yield for another question?

The CHAIRMAN. The time of the gentleman has expired. The gentleman from Massachusetts has two minutes remaining.

Mr. TINKHAM. Mr. Chairman, I rise to offer a preferential motion.

Mr. CAMPBELL of Kansas. Mr. Chairman, while the time was fixed, can not we have the time extended so that the gentleman may finish his remarks?

Mr. JOHNSON of Kentucky. I am perfectly willing for the gentleman from Michigan to conclude his remarks. He has two minutes now.

The CHAIRMAN. The time of the gentleman has expired.

Mr. TINKHAM. Mr. Chairman, I have two minutes, and I yield them to the honorable Representative from Michigan.

The CHAIRMAN. The gentleman is recognized for two minutes more.

Mr. MAPES. I thank the gentleman.

The fact remains that a great many people eligible for Government work and who have been recommended for appointment in the different branches of the service are restrained from accepting appointments on account of the excessive rents now being charged in the District. Others who come here in good faith to accept Government positions return to their homes because they are unable to obtain places to live within their means, and a great many Army men with limited incomes are assigned to duty within the District. These men are obliged to live here.

Something must be done to relieve the situation. The interests of the Government require it. I do not believe that anyone should be allowed to take advantage of the necessities of the Government and the conditions brought about on account of the war to profiteer in rents within the District. I am in favor of limiting the charge that can be made and of stopping any excessive rents, and I believe that to do so is a proper function of the Government. I hope this bill will be amended so as to be made more workable in its practical operation. There is more to the rent and housing question than the bald provision that you can charge so much and no more for rent, but as this is the only bill now before the House for consideration I shall give it my vote, but before being called upon to do so I hope it will be amended in several important particulars.

Mr. SMITH of Michigan. Will the gentleman yield for a question?

Mr. MAPES. I yield.

Mr. SMITH of Michigan. I would like to inquire whether or not there could not be a rent administrator just as well as a Food Administrator or some other? Did the committee consider such a thing as that?

Mr. MAPES. The committee had no time to consider it, as I have said.

The CHAIRMAN. The time of the gentleman has expired.

Mr. JOHNSON of Kentucky. Mr. Chairman, I believe I have six minutes remaining.

The CHAIRMAN. The gentleman has six minutes.

Mr. JOHNSON of Kentucky. Mr. Chairman, the gentleman from Ohio [Mr. LONGWORTH] and several others have inquired about the revenue of a hotel building which may have been built since the time fixed by this bill for commencing the tax.

These sums were based upon the idea in the construction of the bill that the limit was 10 per cent on them. There are two limits as to a furnished building, one of 10 per cent and one of 5 per cent, aggregating 15 per cent. The 15 per cent would apply to the furnished apartments or rooms of a hotel.

Mr. LONGWORTH. If the gentleman will pardon me, no allowance is made by this bill as to any different class of buildings. There might be one class of building in which the cost of upkeep is slight, and there would be no question as to servants, laborers, and so forth.

Mr. JOHNSON of Kentucky. I was seeking uniformity in drafting the bill.

Mr. LONGWORTH. Does the gentleman believe that in a hotel as it is run nowadays that a 15 per cent margin on the

cost of the investment would be sufficient to allow the hotel to run?

Mr. JOHNSON of Kentucky. I believe it is far more equitable than what they are charging. The gentleman from Michigan [Mr. MAPES] a few moments ago referred to the possibility of somebody having to go into a room in each and every house and determine its rental value. We know what rooms in a particular house rented for prior to September 30, 1916, and we know what rooms in the same locality and of practically the same description should bring. They should bring what the other rooms brought in 1916.

I regret that the gentleman from Michigan suggested politics in the assessor's office as coming from the District of Columbia Committee.

This is the eighth year of my chairmanship of that committee, and I do not believe politics has ever yet entered the committee, and I do not believe the gentleman can recall a single instance where it has.

Mr. MAPES. Will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. MAPES. I think the gentleman from Kentucky has misconstrued my reference to that. I did not say there was any politics in the committee, but inevitably, if this bill is enacted into law, there must be a greatly increased force in the assessor's office in order to take care of the assessments that the bill provides.

Mr. JOHNSON of Kentucky. I take the position that there will not have to be a single increase, because the minute this bill passes this extortion is going to stop, and the force, therefore, will not have to be enlarged.

And, besides that, during Wilson's administration, shortly after the beginning of which Democratic commissioners went into office, there has not been a single removal of anybody in the assessor's office, except one man, who was guilty of fraudulent and corrupt practices.

Mr. MAPES. Will the gentleman yield a little further?

Mr. JOHNSON of Kentucky. I will.

Mr. MAPES. The bill provides for statements and affidavits to be filed with the assessor's office monthly during the operation of the act until one year after the war closes, and they must be filed upon the basis of the assessed valuation of the property.

Mr. JOHNSON of Kentucky. I do not think so at all. I do not think the gentleman has read the bill correctly.

Mr. MAPES. And it will necessarily take a lot more of employees.

The CHAIRMAN. The time has expired. The Clerk will read.

Mr. TINKHAM. Mr. Chairman, I rise to offer a preferential motion.

The CHAIRMAN. There is no more motion pending. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the term "real estate" as herein used shall be construed to include lands, buildings, parts of buildings, houses, dwellings, apartments, rooms, suites of rooms and every other improvement or structure whatsoever on land situated and being in the District of Columbia.

Mr. TINKHAM. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. TINKHAM. To offer a preferential motion. Under the rules I can offer a preferential motion at any time, as I understand it.

Mr. JOHNSON of Kentucky. Mr. Chairman, without knowing what the motion is, I reserve a point of order on it.

The CHAIRMAN. The Clerk will report the motion offered by the gentleman from Massachusetts.

The Clerk read as follows:

Mr. TINKHAM moves that the committee do now rise and report the bill to the House with the recommendation that further consideration be postponed until February 25, 1918.

Mr. JOHNSON of Kentucky. I make a point of order against that.

The CHAIRMAN. The gentleman will state it.

Mr. JOHNSON of Kentucky. The Chair will rule on the point of order.

Mr. RAGSDALE. Mr. Chairman, I move to lay that motion on the table.

Mr. JOHNSON of Kentucky. Mr. Chairman, I withdraw the point of order and ask for a vote.

The CHAIRMAN. The gentleman from Massachusetts [Mr. TINKHAM] moves that the committee rise and report the bill back to the House with the recommendation that further consideration of the bill be postponed until February 25.

The question was taken, and the Chair announced that the Chair was in doubt.

Mr. TINKHAM. Division, Mr. Chairman.

The committee divided; and there were—ayes 25, noes 36.

Mr. TINKHAM. Mr. Chairman, I make the point of order there is no quorum present.

The CHAIRMAN. The gentleman from Massachusetts makes the point of order that there is no quorum present. The Chair will count. [After counting.] Seventy-five gentlemen are present, not a quorum. The Clerk will call the roll.

Mr. HAYES. Mr. Chairman, I make the point of order the roll can not be called in the Committee of the Whole.

Mr. WALSH. Mr. Chairman, I ask for the regular order. The Chair directed the roll should be called, and the Clerk should proceed.

The CHAIRMAN. The Clerk will call the roll.

The roll was called, and the following Members failed to answer to their names:

Anderson	Gallivan	McCormick	Sanders, N. Y.
Anthony	Goodall	McKenzie	Schall
Ashbrook	Goodwin, Ark.	McKinley	Scott, Pa.
Austin	Gould	McLaughlin, Mich.	Scully
Beakes	Graham, Pa.	McLaughlin, Pa.	Sims
Borland	Gray, Ala.	Maher	Small
Brodbeck	Gray, N. J.	Mann	Smith, C. B.
Caldwell	Gregg	Miller, Minn.	Snell
Capstick	Hamill	Mondell	Snyder
Caraway	Hamilton, Mich.	Montague	Stedman
Carter, Mass.	Hamilton, N. Y.	Mott	Stephens, Nebr.
Chandler, N. Y.	Harrison, Miss.	Mudd	Sterling, Ill.
Clark, Fla.	Hastings	Neely	Sterling, Pa.
Collier	Heintz	Nelson	Strong
Copley	Hollingsworth	Nicholls, S. C.	Sullivan
Costello	Hood	Nolan	Talbott
Curry, Cal.	Howard	Olney	Towner
Davidson	Humphreys	Parker, N. Y.	Vare
Denison	Johnson, S. Dak.	Platt	Voigt
Dooling	Johnson, Wash.	Porter	Walton
Drukker	Kahn	Pou	Ward
Dunn	Kennedy, R. I.	Powers	Wason
Dyer	Key, Ohio	Price	Waston, Va.
Edmonds	King	Ramsey	Webb
Estopinal	La Follette	Randall	Welling
Fairchild, G. W.	LaGuardia	Robinson	White, Ohio
Fess	Lea, Cal.	Rodenberg	Wilson, Ill.
Flood	Lee, Ga.	Rowland	Wilson, La.
Flynn	Lever	Russell	Winslow
Fordney	Littlepage	Sabath	Woodyard
Francis	Lundeen	Sanders, Ind.	
Freeman	Lunn	Sanders, La.	

Thereupon the committee rose; and the Speaker having resumed the Chair, Mr. RUCKER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having under consideration the bill (H. R. 9248) to prevent extortion, impose taxes upon certain incomes in the District of Columbia, and for other purposes, and finding itself without a quorum, he had caused the roll to be called, whereupon 304 Members had responded to their names, and he submitted a list of absentees for printing in the RECORD.

The SPEAKER. The committee will resume its sitting.

The committee resumed its sitting.

Mr. JOHNSON of Kentucky. Mr. Chairman, I desire to make a statement to the committee, consuming about one minute.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. JOHNSON of Kentucky. A large number of Members of the House now present were not present when this roll call commenced. The gentleman from Massachusetts [Mr. TINKHAM] made a motion to postpone the consideration of the bill. A vote was taken on the motion, and the motion was lost, but less than a quorum voted. Whereupon the gentleman from Massachusetts made a point of no quorum. It is my desire now to have a vote taken on the motion made by the gentleman from Massachusetts, and when that vote has been taken I will make a motion that the committee rise.

The CHAIRMAN. The question now is on the motion of the gentleman from Massachusetts [Mr. TINKHAM], which the Clerk will report.

The Clerk read as follows:

Mr. TINKHAM moves that the committee do now rise and report the bill to the House, with the recommendation that the further consideration of the bill be postponed until February 25, 1918.

The CHAIRMAN. The question is on agreeing to the motion.

The question was taken, and the chairman announced that the "noes" seemed to have it.

Mr. JOHNSON of Kentucky. I ask for a division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 7, noes 102.

So the motion was rejected.

Mr. JOHNSON of Kentucky. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. RUCKER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 9248) to prevent extortion, to impose taxes upon certain incomes in the District of Columbia, and for other purposes, and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. GRAY of Alabama, for 10 days, on account of important business.

To Mr. KEHOE, for the day, on account of illness.

To Mr. SANDERS of Indiana, for two days, on account of important business, at the request of Mr. PURNELL.

URGENT DEFICIENCY BILL (H. REPT. NO. 315).

Mr. SHERLEY, by direction of the Committee on Appropriations, reported for printing, under the rule, the bill (H. R. 9867) making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June thirtieth, nineteen hundred and eighteen, and prior fiscal years, on account of war expenses, and for other purposes, which was referred to the Committee of the Whole House on the state of the Union and ordered to be printed.

Mr. GILLETT. Mr. Speaker, I reserve all points of order on the bill.

The SPEAKER. The gentleman from Massachusetts reserves all points of order on the bill.

REPORTS OF WAR TRADE BOARD FOR 1917 (H. DOC. NO. 934).

The SPEAKER laid before the House the following message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on Interstate and Foreign Commerce and ordered to be printed:

To the Senate and House of Representatives:

As required by the provisions of section 6 of the "Trading with the enemy act," approved October 6, 1917, I transmit herewith reports of the Bureaus of Enemy Trade and of Imports, showing the proceedings had by the War Trade Board during the year ending December 31, 1917.

WOODROW WILSON.

THE WHITE HOUSE, *February 14, 1918.*

HOUSING OF SHIPYARD EMPLOYEES.

Mr. ALEXANDER. Mr. Speaker, I desire to call from the Speaker's table the housing bill (S. 3389), with House amendments, to insist on the amendments, and agree to the conference asked for by the Senate.

The SPEAKER. The gentleman from Missouri asks that Senate bill 3389, with House amendments, be taken from the Speaker's table, and that the House agree to the conference asked by the Senate. The Clerk will report the bill by title.

The Clerk read the title of the bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved lands, houses, buildings, and for other purposes.

The SPEAKER. Is there objection?

There was no objection; and the Speaker appointed as conferees on the part of the House Mr. ALEXANDER, Mr. HARDY, Mr. SAUNDERS of Virginia, Mr. GREENE of Massachusetts, and Mr. EDMONDS.

PERSONAL EXPLANATION.

Mr. ALMON. Mr. Speaker, being called away by the serious illness of my son at Camp Wadsworth, I asked a friend to secure leave of absence for me for the 12th and 13th of this month. He neglected to do so, and I desire to make this statement in explanation of my absence on the 12th and 13th.

LEAVE TO EXTEND REMARKS.

Mr. GREENE of Vermont. I ask unanimous consent to extend my remarks in the RECORD by printing an article from the Army and Navy Register, written by Admiral Clark, of the Navy.

The SPEAKER. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. KITCHIN. I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 33 minutes p. m.) the house adjourned until to-morrow, Friday, February 15, 1918, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. YOUNG of Texas, from the Committee on Agriculture, to which was referred the joint resolution (H. J. Res. 231) authorizing the Secretary of Agriculture to certify to the Secretary of the Treasury for payment, and the Secretary of the Treasury to pay, the appropriation for the Georgia Experiment Station, of the State of Georgia, under act of March 4, 1917, for the fiscal year ending June 30, 1918, to the board of trustees of the Agricultural and Mechanical College, of the State of Georgia, and for other purposes, reported the same with amendment, accompanied by a report (No. 312), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SHALLENBERGER, from the Committee on Military Affairs, to which was referred the bill (S. 2917) to amend section 15 of the act approved June 3, 1916, entitled "An act for making further and more effectual provision for the national defense, and for other purposes," as amended by the act approved May 12, 1917, etc., reported the same without amendment, accompanied by a report (No. 313), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. MOON, from the Committee on the Post Office and Post Roads, to which was referred the bill (S. 3689) authorizing the Postmaster General to cancel or readjust the screen-wagon contract of H. H. Hogan, at Kansas City, Mo., reported the same without amendment, accompanied by a report (No. 314), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 9275) granting a pension to Edwin D. Goodell, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. BLANTON: A bill (H. R. 9860) to provide for the common defense and general welfare by conserving and increasing the production of food, leather, and clothing, through furnishing immediate needed relief to drought-stricken portions of the States of Texas, Colorado, and New Mexico, Kansas, Nebraska, North Dakota, and South Dakota, preventing by the immediate advancement for necessary feed the impending starvation of several million head of cattle and other valuable live stock; and by advancing needed means for supplies, feed for teams, and seeds for planting, thus making provisions for the cultivation of thousands of productive farms, which otherwise would be uncultivated and nonproductive in 1918; and appropriating therefor money hereafter reimbursable; to the Committee on Agriculture.

By Mr. KELLEY of Michigan: A bill (H. R. 9861) to prohibit the importation of goods, wares, merchandise, and materials from the German Empire under certain conditions; to the Committee on Ways and Means.

By Mr. SHERWOOD: A bill (H. R. 9862) increasing rates of pensions of soldiers and sailors of the Civil War; to the Committee on Invalid Pensions.

By Mr. HILLIARD: A bill (H. R. 9863) to amend section 224 of the Revised Statutes of the United States, relating to certificates of discharge; to the Committee on Military Affairs.

By Mr. GLASS: A bill (H. R. 9864) to amend section 3 of the Judicial Code in respect to the western district of Virginia; to the Committee on the Judiciary.

By Mr. EVANS: A bill (H. R. 9865) to authorize the sale of certain lands to school district No. 28 of Missoula County, Mont.; to the Committee on Indian Affairs.

By Mr. OSBORNE: A bill (H. R. 9866) authorizing and directing the Secretary of the Interior to grant to the Los Angeles County flood-control district the use of certain public lands in California, and granting rights in, over, and through the Angeles and Santa Barbara Forest Reserves to the Los Angeles County flood-control district; to the Committee on the Public Lands.

By Mr. SHERLEY: A bill (H. R. 9867) making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1918, and prior fiscal years, on account of war expenses, and for other purposes; committed to the Committee of the Whole House on the state of the Union and ordered to be printed.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AUSTIN: A bill (H. R. 9868) granting a pension to Anna Baird; to the Committee on Invalid Pensions.

By Mr. BROWNE: A bill (H. R. 9869) granting a pension to Carrie C. Fry; to the Committee on Invalid Pensions.

By Mr. BRUMBAUGH: A bill (H. R. 9870) granting a pension to Albert N. Oakleaf; to the Committee on Pensions.

By Mr. CARY: A bill (H. R. 9871) granting a pension to Albert Beiro; to the Committee on Pensions.

By Mr. COADY: A bill (H. R. 9872) for the relief of sundry building and loan associations; to the Committee on Claims.

By Mr. COPLEY: A bill (H. R. 9873) changing the naval record of Clarence A. Richards, for the administration of the pension laws; to the Committee on Naval Affairs.

By Mr. CRAGO: A bill (H. R. 9874) granting a pension to Harry W. Conn; to the Committee on Pensions.

By Mr. DENTON: A bill (H. R. 9875) granting a pension to America F. Roberts; to the Committee on Invalid Pensions.

By Mr. DEWALT: A bill (H. R. 9876) granting an increase of pension to Henry A. Kline; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9877) granting an increase of pension to William Haines; to the Committee on Invalid Pensions.

By Mr. DICKINSON: A bill (H. R. 9878) granting an increase of pension to Michael Ingram; to the Committee on Invalid Pensions.

By Mr. DOOLITTLE: A bill (H. R. 9879) granting an increase of pension to Joseph Brown; to the Committee on Invalid Pensions.

By Mr. EMERSON: A bill (H. R. 9880) granting a pension to Helen M. Warren; to the Committee on Invalid Pensions.

By Mr. GOULD: A bill (H. R. 9881) for the relief of Capt. Fred S. Johnston; to the Committee on Claims.

By Mr. HAWLEY: A bill (H. R. 9882) granting an increase of pension to James H. Layne, jr.; to the Committee on Invalid Pensions.

By Mr. KEATING: A bill (H. R. 9883) granting an increase of pension to Daniel W. Butt; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9884) granting an increase of pension to Oliver M. Mahan; to the Committee on Invalid Pensions.

By Mr. KEY of Ohio: A bill (H. R. 9885) granting an increase of pension to Charles H. Dalrymple; to the Committee on Invalid Pensions.

By Mr. LEA of California: A bill (H. R. 9886) granting an increase of pension to Mervell J. Hibbard; to the Committee on Invalid Pensions.

By Mr. LESHER: A bill (H. R. 9887) granting an increase of pension to De Lafayette S. Wynn; to the Committee on Invalid Pensions.

By Mr. OVERMYER: A bill (H. R. 9888) granting an increase of pension to Charles Fortescue; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9889) granting a pension to Sarah C. Francis; to the Committee on Invalid Pensions.

By Mr. ROSE: A bill (H. R. 9890) granting a pension to Frances J. Dixon; to the Committee on Invalid Pensions.

By Mr. TEMPLE: A bill (H. R. 9891) granting an increase of pension to James C. Stevenson; to the Committee on Invalid Pensions.

By Mr. VESTAL: A bill (H. R. 9892) granting a pension to Charles A. Swander; to the Committee on Pensions.

Also, a bill (H. R. 9893) granting a pension to Lulu M. Lehman; to the Committee on Pensions.

Also, a bill (H. R. 9894) granting a pension to Fred G. Pettigrew; to the Committee on Pensions.

Also, a bill (H. R. 9895) granting a pension to Charles C. Studley; to the Committee on Invalid Pensions.

By Mr. WOODYARD: A bill (H. R. 9896) granting an increase of pension to Lewis M. Cales; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Resolution of the Association of American Medical Colleges, favoring the Owen amendment to Senate bill 1786; to the Committee on Military Affairs.

Also (by request), petition of members of the Friends of Irish Freedom, urging favorable action by Congress on the Rankin resolution for Irish independence; to the Committee on Foreign Affairs.

Also (by request), resolutions of the Lakeside Club, Manistee, Mich.; the Community Association of Crawfordsville, Ind.; the Romeo Monday Club, Romeo, Mich.; the Sorosis Club, St. Peter, Minn.; the Woman's Club, Racine, Wis.; and the Woman's Missionary Society of the United Presbyterian Church, urging the repeal of the second-class postage rates of the war-revenue act; to the Committee on Ways and Means.

Also (by request), memorial of Public Ownership League of America, favoring Government ownership, as well as operation, of the railroads; also a memorial of Columbia Lodge, No. 174, International Association of Machinists, favoring permanent Government control of transportation; to the Committee on Interstate and Foreign Commerce.

By Mr. ANTHONY: Petition forwarded by Dr. Clyde Gray, of Horton, Kans., and signed by A. J. Thompson and other members of Company B, One hundred and thirty-seventh Infantry, Camp Doniphan, Okla., favoring the passage of House bill 5407; to the Committee on Military Affairs.

By Mr. CAREW: Resolution of the security holders of the Boston & Maine Railroad, relative to the effect of Federal control of that road; to the Committee on Interstate and Foreign Commerce.

By Mr. CARY: Resolutions of the Woman's Missionary Society of the United Presbyterian Church, Fort Morgan, Colo., and of the Maryland State Federation of Women's Clubs, favoring the repeal of the periodical postage provisions of the war-revenue act; to the Committee on Ways and Means.

By Mr. CLARK of Pennsylvania: Petition of Martin L. Schauble, Axil Ekslund, William A. Shurrager, H. H. Jarvis, and 18 others, praying for the passage of House bill 7995, for the preservation of the *Niagara*, Commodore Perry's flagship in the Battle of Lake Erie; to the Committee on Naval Affairs.

By Mr. DALE of New York: Resolution of the New York Antivivisection Society, protesting against compulsory inoculation of soldiers; to the Committee on Military Affairs.

By Mr. ELSTON: Petition of several hundred citizens of Alameda County, Cal., urging the passage of House bill 7356, known as the Keating bill; to the Committee on Appropriations.

By Mr. FULLER of Illinois: Petition of A. H. Karn and other citizens of Peru, Ill., favoring legislation for universal military training; to the Committee on Military Affairs.

Also, memorial of the Maryland State Federation of Women's Clubs, opposing increased rates of postage on periodicals; to the Committee on Ways and Means.

By Mr. GALLIVAN: Resolution of the Massachusetts State Board of Trade, favoring the loading or unloading of ships of high explosives at such distance from our shores as to minimize the hazard; to the Committee on Naval Affairs.

By Mr. HILLIARD: Resolutions adopted by the Community Association of Crawfordsville, Ind.; College Hall Library Club, of Sherman, Tex.; the Woman's Club of Beaver Dam, Wis.; and the Fortnightly Club of Sharon, Mass., protesting against the increased postage rates on periodicals; to the Committee on Ways and Means.

Also, petition of Mrs. Edmond E. Eckels, of Greeley, Colo., urging the admittance of osteopathic physicians to the Army; to the Committee on Military Affairs.

Also, petition of W. R. Callicotte, of Denver, Colo., urging the passage of measures designed to increase salaries of postal employees; to the Committee on the Post Office and Post Roads.

By Mr. KEATING: Petition of citizens of Colorado, asking for amendment of the rural-credits law; to the Committee on Banking and Currency.

By Mr. KENNEDY of Rhode Island: Petitions of Methodist Episcopal Churches of Providence, R. I., protesting against passage of Senate bill 3476, providing for a railroad track crossing

First Street into square No. 673 in Washington, D. C.; to the Committee on the District of Columbia.

By Mr. LUFKIN: Telegram from Hon. Leslie K. Morse, mayor, of Haverhill, Mass., urging opening up of old canals to assist in relieving the coal situation; to the Committee on Interstate and Foreign Commerce.

By Mr. MAGEE: Petition by many residents of Route 2, La Fayette, Onondaga County, N. Y., favoring passage of national emergency war prohibition bill; to the Committee on the Judiciary.

By Mr. MOORE of Pennsylvania: Resolutions of the Lumberman's Exchange of Philadelphia, favoring the creation of a board of war control and a director of munitions; to the Committee on Military Affairs.

Also, memorial of Central Labor Union of Philadelphia, favoring legislation increasing the pay of postal clerks and carriers; also resolutions of the same organization opposing the Postmaster General's attitude toward labor organizations; to the Committee on the Post Office and Post Roads.

Also, resolution of the Vero Commercial Club, urging Government control of the Florida Coast Line Canal; to the Committee on Rivers and Harbors.

By Mr. O'SHAUNESSY: Petition of George Thornto, Pawtucket, R. I., protesting against interference with the efforts of Secretary Baker; to the Committee on Military Affairs.
